The Psychological Foundations of Culture Mark Schaller, Christian S. Crandall. 2003-09-12 How is it that cultures come into existence at all? How do cultures develop particular customs and characteristics rather than others? How do cultures persist and change over time? Most previous attempts to address these questions have been descriptive and historical. The purpose of this book is to provide answers that are explanatory, predictive, and relevant to the emergence and continuing evolution of cultures past, present, and future. Most other investigations into cultural psychology have focused on the impact that culture has on the psychology of the individual. The focus of this book is the reverse. The authors show how questions about the origins and evolution of culture can be fruitfully answered through rigorous and creative examination of fundamental characteristics of human cognition, motivation, and social interaction. They review recent theory and research that, in many different ways, points to the influence of basic psychological processes on the collective structures that define cultures. These processes operate in all sorts of different populations, ranging from very small interacting groups to grand-scale masses of people occupying the same demographic or geographic category. The cultural effects--often unintended--of individuals' thoughts and actions are demonstrated in a wide variety of customs, ritualized practices, and shared mythologies: for example, religious beliefs, moral standards, rules for the allocation of resources, norms for the acceptable expression of aggression, gender stereotypes, and scientific values. *The Psychological Foundations of Culture* reveals that the consequences of psychological processes resonate well beyond the disciplinary constraints of psychology. By taking a psychological approach to questions usually addressed by anthropologists, sociologists, and other social scientists, it suggests that psychological research into the foundations of culture is a useful--perhaps even

necessary--complement to other forms of inquiry.

European Competence Standards for the Academic Training of Career Practitioners

Christiane Schiersmann, Sif Einarsdottir, Johannes Katsarov, Jukka Lerkkanen, Rachel Mulvey, Jaques Pouyaud, Kestutis Pukelis, Peter Weber. 2016-08-15 The citizens of Europe are facing increasingly complex challenges to their career development nowadays. Over the span of their lifetime, they need to manage their careers, and make numerous decisions concerning education, training and employment – decisions, which seriously impact their futures and their wellbeing. To prepare citizens for these challenges, and to support them in the progress, competent career practitioners are needed. But what kinds of career practitioners are we talking about? And what do they need to be able to do? How can the quality of their training be assured? This handbook introduces common European competence standards for the academic training of career practitioners in Europe, together with some proposals and examples, of how to implement and establish such competence standards in practice. More than 200 experts from all across Europe have contributed to the development of these shared standards of the Network for Innovation in Career Guidance and Counselling in Europe (NICE). The standards are already being used in many countries for the development of degree programmes.

Abitur und was dann? Helen Knauf, Christiane Maschetzke, Elke Rosowski. 2009-09-04 Diese Studie gibt Einblicke in Lebensplanung und Berufsorientierung junger Frauen und Männer kurz vor dem Abitur und analysiert den Einfluss von Schule und Elternhaus. Die Übergänge von der Schule in Studium und Berufsausbildung sind auch für AbiturientInnen in den letzten Jahren unübersichtlicher und die Berufs- und Ausbildungsentscheidungen komplexer geworden. Was will ich nach dem Abitur machen, will ich studieren oder doch lieber eine Ausbildung machen? Wie will ich später leben? Was kann ich überhaupt? Diese Fragen sind für viele AbiturientInnen auch kurz vor dem Abitur noch keineswegs geklärt. Diese Untersuchung gibt Auskunft über Berufsorientierungen und Handlungsstrategien von jungen Frauen und Männern kurz vor dem Abitur. Sie fragt nach Unterschieden und Gemeinsamkeiten in den Berufsorientierungen und der Lebensplanung beider Geschlechter und analysiert den Einfluss von Schule und Eltern auf die Orientierungsprozesse von Schülerinnen und Schülern.

Jew's Beech Annette von Droste-Hulshoff. 2018-01-01 Based on a true story, this haunting tale centers on two brutal murders--the first of a local forester and the second of a Jewish moneylender near a beech tree--and the impact these events have on the life of Friedrich Mergel, a herdsman with a turbulent family history. A prototype of the murder mystery and a thoughtful examination of village society, this intriguing novella contains hints of the Gothic and the uncanny, including ominous thunderstorms, mysterious disappearances, eerie doppelgangers and grizzly discoveries, as well as a famously ambiguous climax.

Academic Freedom in an Age of Conformity Joanna Williams. 2016-01-05 Academic freedom is increasingly being threatened by a stifling culture of conformity in higher education that is restricting individual academics, the freedom of academic thought and the progress of knowledge – the very foundations upon which academia and universities are built. Once, scholars demanded academic freedom to critique existing knowledge and to pursue new truths. Today, while fondness for the rhetoric of academic freedom remains, it is increasingly criticised as an outdated and elitist concept by students and lecturers alike and called into question by a number of political and intellectual trends such as feminism, critical theory and identity politics. This provocative and compelling book traces the demise of academic freedom within the context of changing ideas about the purpose of the university and the nature of knowledge. The book argues that a challenge to this culture of conformity and censorship and a defence of academic free speech are needed for critique to be possible and for the intellectual project of evaluating existing knowledge and proposing new knowledge to be meaningful. This book is that challenge and a passionate call to arms for the power of academic thought today.

The Routledge International Handbook of the Sociology of Education Michael W. Apple,Stephen J. Ball,Luis Armando Gandin.2009-12-16 This collection brings together many of the world's leading sociologists of education to explore and address key issues and concerns within the discipline. The thirty-seven newly commissioned chapters draw upon theory and research to provide new accounts of contemporary educational processes, global trends, and changing and enduring forms of social conflict and social inequality. The research, conducted by leading international scholars in the field, indicates that two complexly interrelated agendas are discernible in the heat and noise of educational change over the past twenty-five years. The first rests on a clear

articulation by the state of its requirements of education. The second promotes at least the appearance of greater autonomy on the part of educational institutions in the delivery of those requirements. The Routledge International Handbook of the Sociology of Education examines the ways in which the sociology of education has responded to these two political agendas, addressing a range of issues which cover three key areas: perspectives and theories social processes and practices inequalities and resistances. The book strongly communicates the vibrancy and diversity of the sociology of education and the nature of 'sociological work' in this field. It will be a primary resource for teachers, as well as a title of major interest to practising sociologists of education.

Skills and Inequality Marius R. Busemeyer.2015 This book argues that critical choices about the institutional design of education systems in the post-war period have long-term implications for social inequality.

Positioning of Destinations Tamara Mayerhofer.2010-05-10 Scientific Essay from the year 2010 in the subject Tourism, University of Innsbruck (Tourism & Service Industry), language: English, abstract: This Paper focuses on the importance of strategic positioning of destinations and its stakeholders in a globalised competitive environment. The theoretical background is based on the research on destinations and destination management, strategic marketing, strategy development and positioning strategies and positioning models. A new theoretic framework from a RBV was developed to identify the most important elements of the successful positioning of destinations and its organizations from a stakeholder perspective. An empirical study was applied to all stakeholders who form a destination by the example of three very successful positioned destinations in the Austrian Alps. The theoretical model was tested by the application of frequency distribution and multiple linear regression analysis. Most of the points were confirmed but also a few rejected which asks for further research. However, the applied model gives a great insight in how stakeholders can successful and sustainable position their organizations and the destination as a whole. It further can be used as a tool to find an efficient positioning strategy for young entrepreneurs or gives helpful advice for stagnating or decreasing businesses to formulate a new positioning strategy or aim for a relaunch.

International Handbook of Teacher Education John Loughran, Mary Lynn Hamilton.2016-05-04 The International Handbooks of Teacher Education cover major issues in the field through chapters that offer detailed literature reviews designed to help readers to understand the history, issues and research developments across those topics most relevant to the field of teacher education from an international perspective. This volume is divided into two sections: The organisation and structure of teacher education; and, knowledge and practice of teacher education. The first section explores the complexities of teacher education, including the critical components of preparing teachers for teaching, and various aspects of teaching and teacher education that create tensions and strains. The second examines the knowledge and practice of teacher education, including the critical components of teachers' professional knowledge, the pedagogy of teacher education, and their interrelationships, and delves into what we know and why it matters in teacher education.

The Resilience Handbook Martha Kent, Mary C. Davis, John W. Reich.2013-08-22 How are people and communities able to prevail despite challenge? What helps them bounce back from adversity and even grow in knowledge and understanding? And can this resilience be taught? During the past decade, exciting scientific advances have shed light on how resilience operates from neurons to neighborhoods. In *The Resilience Handbook*, experts in the science of resilience draw on human and animal research to describe the process of resilience and follow its course as it unfolds both within individuals and in social networks. Contributors also highlight the promise of new interventions that apply what we know about resilience processes to bolster positive health, and raise some of the

pressing questions and issues for the field as it matures. This handbook is designed to be used by students as an invitation to a burgeoning field; by researchers, as a framework for advancing theories, hypotheses, and empirical tests of resilience functions; and by clinicians, as a comprehensive and up-to-the-minute integration of theory and practice.
