Global Forest Resources Assessment 2015 Food and Agriculture Organization of the United Nations. 2018-05-23 The contributions of forests to the well-being of humankind are far-reaching. Forests provide vital wood supplies and help to combat rural poverty, ensure food security and provide decent livelihoods; they offer promising mid-term green growth opportunities; and they deliver vital long-term environmental services, such as clean air and water, biodiversity, and mitigation of climate change. Building on data that is more comprehensive and reliable than ever before, covering 234 countries and territories, the Global Forest Resources Assessment 2015 shows encouraging signs of improved forest management and a global slowdown in deforestation. However these trend needs to be strengthened, especially in countries that are lagging behind. This desk reference provides the data reported by countries for the Global Forest Resources Assessment 2015. Presented in easy-to-consult tabular form, it is a useful companion to the synthesis report as well as to the more detailed figures available on the Forest Land Use Data Explorer website.

Parent-Child Relations Hisham Altalib, Abdulhamid Abusulayman, Omar Altalib. 2013 This easy-to-read, comprehensive guide contains what you need to know on how to parent with confidence. Packed with advice and powerful tips, using the latest research on child development and parenting techniques, it offers a mine of information on how to let children flourish, take the frustration out of parenting and develop happy family relations. Authors provide guidance on developing character, knowledge, values, and skills, as well as a faith-based outlook in children, benefitting parents with kids of all ages. The many strategies and techniques offered include: teaching children how to problem-solve, make decisions, and develop self-esteem. Raising God conscious, moral, successful children, with a sense of civic responsibility in today's world is not easy. It is also not impossible. Effective parenting is the key.

Restoring the Soil Dawn Berkelaar, Tim Motis. 2019 During the last 35 years, green manure/cover crops (gm/ccs) have become recognized widely as an important agricultural technology for the developing world. Millions of farmers use traditional gm/cc systems, and millions more now use systems developed and introduced during the last three decades. Faced with so many promising possibilities, even well-informed agronomists find it difficult to choose the best gm/cc system for a given situation. This happens in part because, unfortunately, some 20 different factors must be considered in selecting the gm/cc systems that will have the greatest potential in any given situation. These factors include everything from local food habits, current market conditions, the dominant cropping systems and the major weeds, to local economic needs, environmental conditions and farmer preferences. Furthermore, the best gm/cc systems almost always include not just one, but several species of gm/cc.

West African Agriculture and Climate Change Abdulai Jalloh, Gerald C. Nelson, Timothy S. Thomas, Robert Bellarmin Zougmore, Harold Roy-Macauley. 2013-01-01 The first of three books in IFPRI's climate change in Africa series, West African Agriculture and Climate Change: A Comprehensive Analysis examines the food security threats facing 11 of the countries that make up West Africa -- Benin, Burkina Faso, Côte d'Ivoire, Ghana, Guinea, Liberia, Niger, Nigeria, Senegal, Sierra Leone, and Togo -- and explores how climate change will increase the efforts needed to achieve sustainable food security throughout the region. West Africa's population is expected to grow at least through mid-century. The region will also see income growth. Both will put increased pressure on the natural resources needed to produce food, and climate change makes the challenges greater. West Africa is already experiencing rising temperatures, shifting precipitation patterns, and increasing extreme events. Without attention to adaptation, the poor will suffer. Through the use of hundreds of scenario maps, models, figures, and detailed analysis, the editors and contributors of West African Agriculture and Climate Change present plausible future scenarios that combine economic and biophysical characteristics to explore the possible consequences for agriculture, food security, and resources management to 2050. They also offer recommendations to national governments and regional economic agencies already dealing with the vulnerabilities of climate change and deviations in environment. Decisionmakers and researchers will find West African Agriculture and Climate Change a vital tool for shaping policy and studying the various and likely consequences of climate change.

Requirements for Using Interest Rates As An Operating Target for Monetary Policy Alexandre Chailloux, Alain Durré, Mr. Bernard Laurens. 2009-07-01 This paper discusses the use of interest rates as the operating target for monetary policy in Tunisia and the roadmap for establishing the other building blocks of an inflation targeting framework. It argues that strengthening the effectiveness of the current monetary policy framework will facilitate the adoption of inflation targeting over time.

Challenging Chains to Change Anna Laven, Rhiannon Pyburn. 2012 Very often, efforts to improve value chains miss out half of the population - the female half. It is men who sell the products and who keep the money from those sales. The women, who do much of the work but are not recognized for it, often have to work even harder to meet ever-increasing quality requirements. But they see few of the benefits. How to change this? This book

explains how development organizations and private entrepreneurs have found ways to improve the position of women in value chains - especially small scale women farmers and primary processors. It outlines five broad strategies for doing this: (1) working with women on typical women's products such as shea, poultry and dairy; (2) opening up opportunities for women to work on what are traditionally men's commodities or in men's domains; (3) supporting women and men in organizing for change by building capacity, organization, sensitization and access to finance; (4) using standards and certification to promote gender equity, and (5) promoting gender-responsible business. The book draws on dozens of cases from all over the world, covering a wide range of crops and livestock products. These include traditional subsistence products (such as rice), small-scale cash items (honey, vegetables) as well as export commodities (artichokes, coffee) and biofuels (jatropha). The book includes a range of tools and methodologies for analyzing and developing value chains with gender in mind. By bringing together the two fields of gender and value chains, this book offers a set of compelling arguments for addressing gender in value chain development.

African Oral Literature Isidore Okpewho.1992-09-22 . . . its pages come alive with wonderful illustrative material coupled with sensitive and insightful commentary. —Reviews in Anthropology . . . the scope, breadth, and lucidity of this excellent study confirm that Okpewho is undoubtedly the most important authority writing on African oral literature right now . . . —Research in African Literatures Truly a tour de force of individual scholarship . . . —World Literature Today . . . excellent . . . —African Affairs . . . a thorough synthesis of the main issues of oral literature criticism, as well as a grounding in experienced fieldwork, a wide-ranging theoretical base, and a clarity of argument rare among academics. —Multicultural Review This is a breathtakingly ambitious project . . . —Harold Scheub . . . a definitive accounting of the evidence of living oral traditions in Africa today. Professor Okpewho's authority as an expert in this important new field is unrivaled. —Gregory Nagy Isidore Okpewho's African Oral Literature is a marvelous piece of scholarship and wide-ranging research. It presents the most comprehensive survey of the field of oral literature in Africa. —Emmanuel Obiechina . . . a tour de force of scholarship in which Okpewho casts his net across the African continent, searching for its verbal forms through voluminous recent writings and presents African oral literature in a new voice, proclaiming the literariness of African folklore. —Dan Ben-Amos This is an outstanding book by a scholar whose work has already influenced how African literature should be conceived. . . . Professor Okpewho is a scholar with a special talent to nurture scholarship in others. After this work, African literature will never be the same. —Mazisi Kunene Isidore Okpewho, for many years Professor of English at the University of Ibadan, is one of the handful of African scholars who has facilitated the growth of African oral literature to its status today as a literary enterprise concerned with the artistic foundations of human culture. This comprehensive critical work firmly establishes oral literature as a landmark of high artistic achievement and situates it within the broader framework of contemporary African culture.

Republic of Tanzania International Monetary Fund. African Dept..2018-01-16 This paper discusses Tanzania's Seventh Review Under the Policy Support Instrument (PSI). Program performance under the PSI has been broadly satisfactory. Most quantitative targets for June and September 2017 were met. Although progress in structural reforms has been mostly slow, efforts have been boosted to advance them. Macroeconomic policies will need to be closely coordinated. After recording a small fiscal surplus in July–September against a programmed deficit, the government is planning to step up budget implementation, particularly in development spending. The monetary policy stance and liquidity forecasting and management will need to be closely coordinated with fiscal developments. Strong growth and job creation are needed to address high poverty and a large underemployed youth population.

The State of Food Insecurity in the World 2012 Food and Agriculture Organization of the United Nations.2013-06-21 The State of Food Insecurity in the World 2012 presents new estimates of undernourishment based on a revised and improved methodology. These show that progress in reducing hunger during the past 20 years has been better than previously believed, and that, given renewed efforts, it may be possible to reach the MDG hunger target at the global level by 2015. However, the number of people suffering from chronic undernourishment is still unacceptably high, and eradication of hunger remains a major global challenge. This year's report also highlights the importance of sustainable agricultural growth in reducing undernourishment in rural areas. Other policies and programs that will ensure nutrition-sensitive growth include supporting increased dietary diversity, improving access to safe drinking water, sanitation and health services, and educating consumers regarding adequate nutrition and childcare practices.

Pastoralism and Development in Africa Andy Catley,Ian Scoones,Jeremy Lind.2013 A view of 'development at the margins' in the pastoral areas of the Horn of Africa highlights innovation and entrepreneurialism, cooperation and networking and diverse approaches rarely in line with standard development prescriptions. Abrupt Climate Change National Research Council,Division on Earth and Life Studies,Board on Atmospheric Sciences and Climate,Polar Research Board,Ocean Studies Board,Committee on Abrupt Climate Change.2002-04-23 The climate record for the past 100,000 years clearly indicates that the climate system has undergone periodic-and often extreme-shifts, sometimes in as little as a decade or less. The causes of abrupt climate changes have not been clearly established, but the triggering of events is likely to be the result of multiple natural processes. Abrupt climate changes of the magnitude seen in the past would have far-reaching implications for human society and ecosystems, including major impacts on energy consumption and water supply demands. Could such a change happen again? Are human activities exacerbating the likelihood of abrupt climate change? What are the potential societal consequences of such a change? Abrupt Climate Change: Inevitable Surprises looks at the current scientific evidence and theoretical understanding to describe what is currently known about abrupt climate change, including patterns and magnitudes, mechanisms, and probability of occurrence. It identifies critical knowledge gaps concerning the potential for future abrupt changes, including those aspects of change most important to society and economies, and outlines a research strategy to close those gaps. Based on the best and most current research available, this book surveys the history of climate change and makes a series of specific recommendations for the future.

Hidden Hunger Aya Hirata Kimura.2013-02-15 For decades, NGOs targeting world hunger focused on ensuring that adequate quantities of food were being sent to those in need. In the 1990s, the international food policy community turned its focus to the hidden hunger of micronutrient deficiencies, a problem that resulted in two scientific solutions: fortification, the addition of nutrients to processed foods, and biofortification, the modification of crops to produce more nutritious yields. This hidden hunger was presented as a scientific problem to be solved by experts and

scientifically engineered smart foods rather than through local knowledge, which was deemed unscientific and, hence, irrelevant. In *Hidden Hunger*, Aya Hirata Kimura explores this recent emphasis on micronutrients and smart foods within the international development community and, in particular, how the voices of women were silenced despite their expertise in food purchasing and preparation. Kimura grounds her analysis in case studies of attempts to enrich and market three basic foods—rice, wheat flour, and baby food—in Indonesia. She shows the power of nutritionism and how its technical focus enhanced the power of corporations as a government partner while restricting public participation in the making of policy for public health and food. She also analyzes the role of advertising to promote fortified foodstuffs and traces the history of Golden Rice, a crop genetically engineered to alleviate vitamin A deficiencies. Situating the recent turn to smart food in Indonesia and elsewhere as part of a long history of technical attempts to solve the Third World food problem, Kimura deftly analyzes the intersection of scientific expertise, market forces, and gendered knowledge to illuminate how hidden hunger ultimately defined women as victims rather than as active agents.
