Enough About Love Hervé Le Tellier.2011-02-01 New York Times Bestselling and Goncourt Prize-Winning Author of *The Anomaly* Any man—or woman—who wants to hear nothing—or no more—about love should put this book down. Anna and Louise could be sisters, but they don't know each other. They are both married with children, and for the most part, they are happy. On almost the same day, Anna, a psychiatrist, crosses paths with Yves, a writer, while Louise, a lawyer, meets Anna's analyst, Thomas. Love at first sight is still possible for those into their forties and long-married. But when you have already mapped out a life path, a passionate affair can come at a high price. For our four characters, their lives are unexpectedly turned upside down by the deliciously inconvenient arrival of love. For Anna, meeting Yves has brought a flurry of excitement to her life and made her question her values, her reliable husband, and her responsibilities to her children. For Louise, a successful career woman in a stable and comfortable marriage, her routine is uprooted by the youthful passion she feels for Thomas. Thought-provoking, sophisticated, and, above all, amusing, *Enough About Love* captures the euphoria of desire through tender and unflinching portraits of husbands, wives, and lovers.

Emotions, Media and Politics Karin Wahl-Jorgensen.2019-01-15 Emotions have long been neglected in media research, although their role is a vital ingredient in shaping our shared stories

and the ways we engage with them. But emotions, as they circulate through the media, can also be divisive and exclusionary. Karin Wahl-Jorgensen makes the case for researching the role of emotions in mediated politics. Drawing on a series of studies, she explores the complex relationship between emotions, politics and media. The book includes analyses of how Facebook structures emotional reactions; the anger of Donald Trump; the use of personal storytelling in feminist Twitter hashtags; the role of emotionality in award-winning journalism; and the communities created by political fandoms. Essential reading for scholars and students, this important volume opens up new ways of thinking about and researching emotions, media and politics.

Textbook of Addiction Treatment Nady el-Guebaly, Giuseppe Carrà, Marc Galanter, Alexander M. Baldacchino.2020-11-03 Addiction is increasingly being recognized as a major global public health issue, and an ever-growing number of medical specialties, psychological and social science training programs, and professional associations are including addiction as part of their training and continuing education curricula. The first edition of this book presented an overview of the spectrum of addiction-related problems across different cultures around the globe. Sharing the experience and wisdom of more than 260 leading experts in the field, and promoted by the International Society of Addiction Medicine, it compared and contrasted clinical practices in the field of addiction medicine on the basis of neurobiological similarities as well as epidemiological and socio-cultural differences. Building on the success of this inaugural edition, and taking into account the formal and informal

comments received as well as an assessment of current need, this textbook presents general updated information while retaining the most requested sections of the first edition as demonstrated by the number of chapter downloads. It also provides a basic text for those preparing for the ISAM annual certification exam. Written by some 220 international experts, it is a valuable reference resource for anyone interested in medicine, psychology, nursing, and social science.

Implementing Change Gene E. Hall, Shirley M. Hord. 2011 A research-based guide for educators to the practical methods of understanding, evaluating and facilitating the change process. Significantly revised based on student and instructor feedback, the new third edition of *Implementing Change* continues to examine the ways in which change processes are experienced by those on the ground while adding new features, new material and the most current research. Based primarily on the Concerns Based Adoption Model (CBAM), this user-friendly text focuses on introducing constructs that can be used by those engaged in facilitating change processes as well as those who are evaluating and studying change. Rather than maintaining a bird's eye view of change processes, each chapter introduces a research-based, research-verified construct about change that captures the complexity of implementing change and the diversity of reactions to it. With a stress on pedagogical aids, each chapter incorporates practical examples, sample research, case studies, reflection questions and examples of common roadblocks to change.

Women in Philosophy Katrina Hutchison, Fiona Jenkins. 2013-10-23 Despite its place in the humanities, the career prospects and numbers of women in philosophy much more closely resemble

those found in the sciences and engineering. This book collects a series of critical essays by female philosophers pursuing the question of why philosophy continues to be inhospitable to women and what can be done to change it. By examining the social and institutional conditions of contemporary academic philosophy in the Anglophone world as well as its methods, culture, and characteristic commitments, the volume provides a case study in interpretation of one academic discipline in which women's progress seems to have stalled since initial gains made in the 1980s. Some contributors make use of concepts developed in other contexts to explain women's under-representation, including the effects of unconscious biases, stereotype threat, and micro-inequities. Other chapters draw on the resources of feminist philosophy to challenge everyday understandings of time, communication, authority and merit, as these shape effective but often unrecognized forms of discrimination and exclusion. Often it is assumed that women need to change to fit existing institutions. This book instead offers concrete reflections on the way in which philosophy needs to change, in order to accommodate and benefit from the important contribution women's full participation makes to the discipline.

Finding a Solution to Leadership Niels Brabandt.2019-11-18 Business and employee management are key subjects in business administration. For decades, actually for centuries, there has been a discussion about how effective leadership of people or employees can be realized. It has always been a major concern within market-based economic systems to learn how its products and services should be designed in order to generate consumer demand. That the discussion about business and employee management is more relevant than ever is linked to the fact that leadership situations are influenced by a variety of external factors. They include, in particular, political, cultural, social, demographic, economic, and technological developments. It is therefore required for

business and employee management to be adapted to those external framework conditions on a permanent basis. In former times, the assumption in mainstream leadership research was that leadership success relied on specific personal characteristics. Later on, the prevailing view was that the decisive factors in employee management lied in specific leadership behavior or leadership styles. Today's research on leadership is dominated by situation-oriented approaches, providing for specific leadership concepts for specific organizational and employee-related structures. The present thesis is an attempt to bundle a variety of approaches to leadership with the aim of providing an overarching framework for concepts of a similar nature. Therefore, the leadership concept to be developed in what follows is to be characterized by the principles of holism and sustainability. The first step is to present the fundamentals of leadership and management in order to introduce key terms and concepts and provide an overview of the research on leadership. Chapter 3 deals with separately displaying the business and employee management approaches of various management pioneers, distinguishing between early and con-temporary pioneers. Each approach is presented in consideration of its key elements, its strengths and opportunities, as well as its weaknesses and limitations. The fourth chapter, finally, is devoted to developing a holistic and sustainable leadership concept.

An Answer from the Silence Max Frisch.2019-09-15 This novel by esteemed Swiss writer Max Frisch is an exploration of the question: Why don't we live when we know we're here just this one time, just one single, unrepeatable time in this unutterably magnificent world?! This outcry against the emptiness of ordinary everyday life uttered by the hero of Frisch's book is countered by an answer from the silence he meets when face-to-face with death. When An Answer from the Silence begins, the protagonist has just turned thirty and is engaged to be married and about to start work as a teacher. Frightened by the idea of settling down, he journeys to the Alps in a do-or-die effort to climb the unclimbed North Ridge, and by doing so prove he is not ordinary. But having reached the top he returns not in triumph, but in frostbitten shock, having come dangerously close to death. This highly personal early novel reflects a crisis in Frisch's own life, and perhaps because of this intimate connection, he refused to allow it to be included in his Collected Works in the 1970s. Now available

in English, this distinctive book will thrill fans of Frisch's other works.

Mesopotamia Serhiï Z[H]adan.2018-01-01 A unique work of fiction from the troubled streets of Ukraine, giving invaluable testimony to the new history unfolding in the nation's post-independence years One of the most astounding novels to come out of modern Ukraine. Mesopotamia is seductive, twisted, brilliant, and fierce.--Gary Shteyngart, author of Little Failure and Absurdistan This

captivating book is Serhiy Zhadan's ode to Kharkiv, the traditionally Russian-speaking city in Eastern Ukraine where he makes his home. A leader among Ukrainian post-independence authors, Zhadan employs both prose and poetry to address the disillusionment, complications, and complexities that have marked Ukrainian life in the decades following the Soviet Union's collapse. His novel provides an extraordinary depiction of the lives of working-class Ukrainians struggling against an implacable fate: the road forward seems blocked at every turn by demagogic forces and remnants of the Russian past. Zhadan's nine interconnected stories and accompanying poems are set in a city both representative and unusual, and his characters are simultaneously familiar and strange. Following a kind of magical-realist logic, his stories expose the grit and burden of stalled lives, the universal desire for intimacy, and a wistful realization of the off-kilter and even perverse nature of love.

How Much Globalization Can We Bear? Rüdiger Safranski. 2014-02-20 According to current debates, 'individualization' has frequently been proposed as the conceptual counterpart to 'globalization'. It has often seemed that nothing would be left once these processes have fully unfolded, other than individual human atoms dispersed on a globe without any political, economic or cultural structures. Regardless of whether this description is based on any good and valid observation, nobody drew the conclusion that suddenly emerges as evident after reading Rüdiger Safranski's lucid and timely exploration of the issue: globalization, if it occurs, means a radical change in the human condition. It brings human being in direct confrontation with the world in its totality. Almost unnoticed in broader debate, the scenario of globalization entails a return - in new a radical guise - of the time-honoured question of the ways of being-in-the-world of human beings. In this compelling new book, the philosopher Rüdiger Safranski grapples with the pressing problems of the global age: 'Big

Brother' states, terrorism, international security and the seeming impossibility of 'world' peace. He suggests that the era of globalization should not be thought of as that epoch in world history in which all human beings will see themselves in the same, indistinct situation. There will always be, Sanfranski argues, some need for understanding one's own situation by drawing boundaries and conceptualizing 'otherness' and individuality.
