General, Organic, & Biological Chemistry Kalyn Shea Owens, Jeff T. Owens, Ann Judith Murkowski. 2022 Despite all we know about how to support students in the classroom, we still send them home to read from static pages, alone, for hours on end. With this digital first product, we reimagine how students engage with their texts. Each unit is introduced with a current health or environmental topic purposefully written to inspire students to see the interdisciplinary nature of science and to learn the chemistry found in the unit chapters. Applications to biology, healthcare, and the environment are consistently woven throughout each chapter. Key concepts are presented visually and reinforced with multiple opportunities for students to practice new skills and assess their learning. These opportunities include embedded videos of key concepts which provide visual and engaging explanations of each chapter's most challenging topics and just-in-time, detailed feedback, which helps reinforce student progress and address alternative conceptions early in the learning process--

Visual Informatics: Bridging Research and Practice Halimah Badioze Zaman, Peter Robinson, Maria Petrou, Patrick Olivier, Heiko Schröder. 2009-11-14 Visual informatics is a field of interest not just among the information technology and computer science community, but also other related fields such as engineering, medical and health informatics and education starting in the early 1990s. Recently, the field is gaining more attention from researchers and industry. It has become a multi-disciplinary and trans-disciplinary field related to research areas such as computer vision, visualization, information visualization, real-time image processing, medical image processing, image information retrieval, virtual reality, augmented reality, -pressive visual mathematics, 3D graphics, multimedia-fusion, visual data mining, visual ontology, as well as services and visual culture. Various efforts have been invested in different research, but operationally, many of these systems are not prominent in the mass market and thus knowledge and research on these phenomena within the mentioned areas need to be shared and disseminated. It is for this reason that the Visual Informatics Research Group from Universiti - bangsaan Malaysia (UKM) decided to spearhead this initiative to bring together experts in this very diversified but important research area so that more concerted efforts can be undertaken not just within the visual informatics community in Malaysia but from other parts of the world, namely, Asia, Europe, Oceania, and USA. This first International Visual Informatics Conference (IVIC 2009) was conducted collaboratively, by the visual informatics research community from the various public and private institutions of higher learning in Malaysia, and hosted by UKM.
