

An Unwanted Guest The Chilling And Gripping Richa

Dial D for Don Neeraj Kumar. 2015-11-25 March 1993. Mumbai was rocked by a series of bomb blasts. Unknown to most, Dawood Ibrahim, the mastermind behind the terror attack, had made several calls to the CBI. The don was desperate to prove his 'innocence' by giving himself up, but with conditions. October 1999. The world's very first case of cricket match-fixing led to the banning of six top Indian cricketers, including the then team captain. It was only in 2013, after the then commissioner of police revived the case, that a charge sheet was filed in a court of law. January 2002. Aftab Ansari—a notorious Dubai-based don responsible for kidnapping a shoe baron in 2001 with the help of Jihadi groups in Pakistan—was arrested just as he was about to escape Dubai on a forged passport to Pakistan. All these cases of life-threatening moments and unbelievable relief, involved the sharp investigative skills of an Indian Police Service officer then serving in the CBI. In his thirty-seven years of service, Neeraj Kumar neutralized several terror modules and decimated insidious organized crime syndicates spanning continents, working closely with Interpol, FBI, Scotland Yard and several national and international agencies. Much decorated and feted, he hung up his boots in 2013, after his last calling as Delhi's police commissioner. He has now decided that the inside details of what have been some of the most fascinating crime stories of our times must not go unheard and untold. The book covers several high-profile cases cracked by him in recent years, including the arrest and deportation of Aftab Ansari, the main accused in the shooting at the American Center in Kolkata, the nabbing of Jagtar Singh Tara, the man behind Punjab CM Beant

Singh's assassination, and the arrest of Romesh Sharma, a Dawood henchman masquerading as a politician based in Delhi.

Non-Timber Forest Products Azamal Husen, Rakesh Kumar Bachheti, Archana Bachheti. 2021-07-30 Forests cover thirty-one percent of the world's land surface, provide habitats for animals, livelihoods for humans, and generate household income in rural areas of developing countries. They also supply other essential amenities, for instance, they filter water, control water runoff, protect soil erosion, regulate climate, store nutrients, and facilitate countless non-timber forest products (NTFPs). The main NTFPs comprise herbs, grasses, climbers, shrubs, and trees used for food, fodder, fuel, beverages, medicine, animals, birds and fish for food, fur, and feathers, as well as their products, like honey, lac, silk, and paper. At present, these products play an important role in the daily life and well-being of millions of people worldwide. Hence the forest and its products are very valuable and often NTFPs are considered as the 'potential pillars of sustainable forestry'. NTFPs items like food, herbal drugs, forage, fuel-wood, fountain, fibre, bamboo, rattans, leaves, barks, resins, and gums have been continuously used and exploited by humans. Wild edible foods are rich in terms of vitamins, protein, fat,

sugars, and minerals. Additionally, some NTFPs are used as important raw materials for pharmaceutical industries. Numerous industry-based NTFPs are now being exported in considerable quantities by developing countries. Accordingly, this sector facilitates employment opportunities in remote rural areas. So, these developments also highlight the role of NTFPs in poverty alleviation in different regions of the world. This book provides a wide spectrum of information on NTFPs, including important references. We hope that the compendium of chapters in this book will be very useful as a reference book for graduate and postgraduate students and researchers in various disciplines of forestry, botany, medical botany, economic botany, ecology, agroforestry, and biology. Additionally, this book should be useful for scientists, experts, and consultants associated with the forestry sector.

Contemporary Environmental Issues and Challenges in Era of Climate Change

Pooja Singh, Rajeev Pratap Singh, Vaibhav Srivastava. 2019-11-16 Over the last few decades, unprecedented global population growth has led to increased demand for food and shelter. At the same time, extraction of natural resources beyond the Earth's resilience capacity has had a devastating effect on ecosystems and environmental health. Furthermore, climate change is having a significant impact in a number of areas, including the global hydrological cycle, ecosystem functioning, coastal vulnerability, forest ecology, food security, and agricultural sustainability. According to the Intergovernmental Panel on Climate Change (IPCC), only immediate and sustained action will prevent climate change causing irreversible and potentially catastrophic damage to our environment. This book presents various scientific views and concepts, research, reviews, and case studies on contemporary environmental issues in changing climate scenarios and highlights different adaptation measures. Increasing awareness of modern-day patterns of climate change, it addresses questions

often raised by environmental scientists, researchers, policymakers and general readers.

Ignoble Displacement Stephanie Polsky. 2015-09-25 We live in a time of great social, political and economic crisis that many date to the collapse of the global banking system in 2008. Many are finding it difficult to contextualise the hardships that have taken place in the years following on from those events. It is difficult to find the answers in our present media landscape, or in a political and intellectual climate that continues to laud capitalism as the winning economic system coming out of both World War II and the end of the Cold War, which has become over the last century synonymous with democracy itself. The irony is that in our times the majority of the world's people feel disenfranchised by both capitalism and democracy. How did we come to this historical juncture? What can we learn not just from history, but from our cultural artefacts that might tell us how we first came to conduct ourselves within a system of global finance capitalism? This volume proposes that we reinterpret the writings of Charles Dickens to find the antecedents of our present situation with regards to capital, empire and subjectivity.

The clamour of nationalism Sivamohan Valluvan.2019-07-26 Nationalism has reasserted itself today as the political force of our times, remaking European politics wherever one looks. Britain is no exception, and in the midst of Brexit, it has even become a vanguard of nationalism's confident return to the mainstream. Intellectual attempts to account for nationalism's resurgence have however floundered. Desperately trying to read nationalism through one overarching cause - as capitalist crisis, as cultural backlash, or as social media led anti-Establishment politics - these accounts have proven woefully inadequate. This book argues that the only way to understand nationalism is through nationalism itself. To understand it as the key force of modernity that calls upon all existing ideological traditions in

asserting its appeal: whether it is liberal, conservative, neoliberal or left-wing. This ideological clamour that characterises today's British nationalism requires both recognition and theorisation. A meaningful understanding of new nationalism must reckon with the ideological range animating it and the deeply hostile aversion to different racial minorities that pervades its respective ideologies. Drawing on a variety of cultural and political themes – ranging from Corbyn's dithering, the cult of Churchillism, the neoliberal fixation with a 'point-system' immigration policy, the muscular secularism of Richard Dawkins and friends, fears that the white working class have 'become black', and even simply the strange appeal of Harry Potter and Game of Thrones – this book provides a dazzling but always detailed study of how nationalism is the politics of today only because it is a politics of everything.

Practising Human Geography Paul Cloke, Ian Cook, Philip Crang, Mark Goodwin, Joe Painter, Chris Philo. 2004-05-25 'Filling an enormous gap in the geographic literature, here is a terrific book that shows us how to think about and practice human geographic research' - Professor Jennifer Wolch, University of Southern California 'Practising Human Geography lucidly, comprehensively, and sometimes passionately shows why methodology matters, and why it is often so hard. To choose a method is to choose the kind of geographical values one wants to uphold. You need to get it right. These authors do' - Trevor Barnes, University of British Columbia 'Practising Human Geography is a godsend for students. Written in an accessible and engaging style, the book demystifies the study of geographical methodology, offering a wealth of practical advice from the authors' own research experience. This is not a manual of approved geographical techniques. It is a reflexive, critical and highly personal account, combining historical depth with up-to-the-minute examples of research in practice. Practising Human Geography is a comprehensive and theoretically informed introduction to the practices of fieldwork, data collection,

interpretation and writing, enabling students to make sense of their own data and to develop a critical perspective on the existing literature. The book makes complicated ideas approachable through the effective use of case studies and a firm grasp of contemporary debates' - Peter Jackson, Professor of Human Geography, University of Sheffield Practising Human Geography is a critical introduction to key issues in the practice of human geography, informed by the question 'how do geographers do research?' In examining those methods and practices that are essential to doing geography, the text presents a theoretically-informed discussion of the construction and interpretation of geographical data - including: the use of core research methodologies; using official and non-official sources; and the interpretative role of the researcher. Framed by an overview of how ideas of practising human geography have changed, the twelve chapters offer a comprehensive and integrated overview of research methodologies. The text is illustrated throughout with text boxes, case studies, and definitions of key terms. Practising Human Geography will introduce geographers - from undergraduate to faculty - to the core issues that inform research design and practice.

Interview Research in Political Science Layna

Mosley.2013-05-15 Interviews are a frequent and important part of empirical research in political science, but graduate programs rarely offer discipline-specific training in selecting interviewees, conducting interviews, and using the data thus collected.

Interview Research in Political Science addresses this vital need, offering hard-won advice for both graduate students and faculty members. The contributors to this book have worked in a variety of field locations and settings and have interviewed a wide array of informants, from government officials to members of rebel movements and victims of wartime violence, from lobbyists and corporate executives to workers and trade unionists. The authors

encourage scholars from all subfields of political science to use interviews in their research, and they provide a set of lessons and tools for doing so. The book addresses how to construct a sample of interviewees; how to collect and report interview data; and how to address ethical considerations and the Institutional Review Board process. Other chapters discuss how to link interview-based evidence with causal claims; how to use proxy interviews or an interpreter to improve access; and how to structure interview questions. A useful appendix contains examples of consent documents, semistructured interview prompts, and interview protocols.

Insect Hearing Gerald S. Pollack, Andrew C. Mason, Arthur N Popper, Richard R Fay. 2016-06-06 Insect Hearing provides a broadly based view of the functions, mechanisms, and evolution of hearing in insects. With a single exception, the chapters focus on problems of hearing and their solutions, rather than being focused on particular taxa. The exception, hearing in *Drosophila*, is justified because, due to its ever growing toolbox of genetic and optical techniques, *Drosophila* is rapidly becoming one of the most important model systems in neurobiology, including the neurobiology of hearing. Auditory systems, whether insectan or vertebrate, must perform a number of basic tasks: capturing mechanical stimuli and transducing these into neural activity, representing the timing and frequency of sound signals, distinguishing between behaviorally relevant signals and other sounds and localizing sound sources. Studying how these are accomplished in insects offers a valuable comparative view that helps to reveal general principles of auditory function.

The Logic of Life Tim Harford. 2009-02-24 In *The Logic of Life*,
bestselling author Tim Harford quite simply makes sense of this
world. Life often seems to defy logic. The receptionist is clearly

smarter than the boss who earns fifty times her salary. Arbitrary lines starkly divide the desirable districts of the city from the dangerous ones. Voters flock to the polling booths to elect candidates who'll rip them off to favour special interests. None of it makes logical sense — or does it? Economist and acclaimed author Tim Harford thinks it does. By weaving stories from locations as diverse as a Vegas casino to a barroom speed date, Harford aims to persuade you that people are, in fact, surprisingly logical. When a street prostitute agrees to unprotected sex, or a teenage criminal embarks on a burglary — perhaps especially when a racist employer disregards a black job applicant — we would seem to be a million miles from rational behaviour. Harford shows that, discomfitingly, we are not. It turns out that the unlikeliest of people are complying with the logic of economics and responding to future costs and benefits, often without realizing it; and socially tragic outcomes can have their roots in individually rational decisions. Brilliantly reasoned, always entertaining and often provocative, *The Logic of Life* is a book to help you understand yourself and the world around you.

Refiguring the Archive Carolyn Hamilton, Verne Harris, Michèle Pickover, Graeme Reid, Razia Saleh, Jane Taylor. 2012-12-06

Refiguring the Archive at once expresses cutting-edge debates on 'the archive' in South Africa and internationally, and pushes the boundaries of those debates. It brings together prominent thinkers from a range of disciplines, mainly South Africans but a number from other countries. Traditionally archives have been seen as preserving memory and as holding the past. The contributors to this book question this orthodoxy, unfolding the ways in which archives construct, sanctify, and bury pasts. In his contribution, Jacques Derrida (an instantly recognisable name in intellectual discourse worldwide) shows how remembering can never be separated from forgetting, and argues that the archive is about the future rather than the past. Collectively the contributors demonstrate the degree to which thinking about archives is embracing new realities and new possibilities. The book expresses a confidence in claiming for archival discourse previously unentered terrains. It serves as an early manual for a

time that has already begun.

No Nation for Women Priyanka Dubey. 2018-12-11 *No Nation for Women* takes a hard, close look at what makes India unsafe for its women — from custodial rapes and honour killings to rapes of minors and trafficking — the author uncovers many unpalatable truths behind what we are familiar with as newspaper headlines only... Numbers convey, in part, why India is referred to as one of the world's rape capitals — one woman is raped every 15 minutes; and, in 50 years, there has been a staggering rise of 873 per cent in sexual crimes against girls. And beyond the numbers and statistics, there are stories, often unreported — of women in Damoh, Madhya Pradesh, who are routinely raped if they spurn the advances of men; of girls from de-notified tribes in central India who have no recourse to justice if sexually violated; of victimized lower-caste girls in small-town Baduan, Uttar Pradesh; of frequent dislocation faced by survivor families in West Bengal; of political wrath turning into rape in Tripura. Priyanka Dubey travels through large swathes of India, over a period of six years, to uncover the accounts of disenfranchised women who are caught in the grip of patriarchy and violence. She asks if, after the globally reported December 2012 gang-rape of 'Nirbhaya' in New Delhi, India's gender narrative has shifted — and, if it hasn't, what needs to be done to make this a nation worthy of its women.

The Democratization of Artificial Intelligence Andreas Sudmann. 2019-10-31 After a long time of neglect, Artificial Intelligence is once again at the center of most of our political, economic, and socio-cultural debates. Recent advances in the field of Artificial Neural Networks have led to a renaissance of dystopian and utopian speculations on an AI-rendered future. Algorithmic technologies are deployed for identifying potential terrorists through vast surveillance networks, for producing sentencing guidelines and recidivism risk profiles in criminal justice systems, for demographic and psychographic targeting of bodies for advertising or propaganda, and more generally for

automating the analysis of language, text, and images. Against this background, the aim of this book is to discuss the heterogenous conditions, implications, and effects of modern AI and Internet technologies in terms of their political dimension: What does it mean to critically investigate efforts of net politics in the age of machine learning algorithms?

Microbial Interventions in Agriculture and Environment

Dhananjaya Pratap Singh,Vijai Kumar Gupta,Ratna Prabha.2019-11-27 Microbial communities and their functions play a crucial role in the management of ecological, environmental and agricultural health on the Earth. Microorganisms are the key identified players for plant growth promotion, plant immunization, disease suppression, induced resistance and tolerance against stresses as the indicative parameters of improved crop productivity and sustainable soil health. Beneficial belowground microbial interactions with the rhizosphere help plants mitigate drought and salinity stresses and alleviate water stresses under the unfavorable environmental conditions in the native soils. Microorganisms that are inhabitants of such environmental conditions have potential solutions for

them. There are potential microbial communities that can degrade xenobiotic compounds, pesticides and toxic industrial chemicals and help remediate even heavy metals, and thus they find enormous applications in environmental remediation. Microbes have developed intrinsic metabolic capabilities with specific metabolic networks while inhabiting under specific conditions for many generations and, so play a crucial role. The book *Microbial Interventions in Agriculture and Environment* is an effort to compile and present a great volume of authentic, high-quality, socially-viable, practical and implementable research and technological work on microbial implications. The whole content of the volume covers protocols, methodologies, applications, interactions, role and impact of research and development aspects on microbial interventions and technological outcomes in prospects of agricultural and environmental domain including crop production, plan-soil health management, food & nutrition, nutrient recycling, land reclamation, clean water systems and agro-waste management, biodegradation & bioremediation, biomass to bioenergy, sanitation and rural livelihood security. The covered topics and sub-topics of the microbial domain have high implications for the targeted and wide readership of researchers, students, faculty and scientists working on these areas along with the agri-activists, policymakers, environmentalists, advisors etc. in the Government, industries and non-government level for reference and knowledge generation.

Theory from the South Jean Comaroff, John L.

Comaroff. 2015-11-17 As nation-states in the Northern Hemisphere experience economic crisis, political corruption and racial tension, it seems as though they might be 'evolving' into the kind of societies normally associated with the 'Global South'. Anthropologists Jean and John Comaroff draw on their long experience of living in Africa to address a range of familiar themes - democracy, national borders, labour and capital and

multiculturalism. They consider how we might understand these issues by using theory developed in the Global South. Challenging our ideas about 'developed' and 'developing' nations, Theory from the South provides new insights into key problems of our time.

Quiet and beautiful Mankor stays in Kuran, the last Indian village on the Indo-Pak border and takes care of her two children, Samar and Ranu. Her husband Virender is a tracker at the BSF headquarters in Rapar. Virender returns home during Navratri, triumphant after nabbing Shaukat, a member of a dangerous cross-border gang involved in a heinous terror plot against India. But there's some terrible news awaiting Virender in Kuran. Are there murky secrets that threaten to destroy his family? And what are those haunting voices that whisper about a horrifying kill? When a brutal murder takes place under mysterious circumstances, Virender's boss, Commandant Ranbir connects it to the minute-by-minute unravelling terror plot. But was he missing something? And then little Ranu goes missing! Ranbir finds himself chasing red herrings in a race against time to find her and foil a terror plot. As Ranbir sets out to seek the truth, he discovers a terrifying web of deceit. Will he be able to save Ranu, find Virender's killer and save the country? As chilling secrets tumble out, the end is more sinister than you can ever imagine!

Eros Plus Massacre David Desser.1988-05-22 The decade of the 1960s encompassed a New Wave of films whose makers were rebels, challenging cinematic traditions and the culture at large. The films of the New Wave in Japan have, until now, been largely overlooked. *Eros plus Massacre* (taking its title from a 1969 Yoshida Yoshishige film) is the first major study devoted to the examination and explanation of Japanese New Wave film. Desser organizes his volume around the defining motifs of the New Wave. Chapters examine in depth such themes as youth, identity,

sexuality, and women, as they are revealed in the Japanese film of the sixties. Desser's research in Japanese film archives, his interviews with major figures of the movement, and his keen insight into Japanese culture combine to offer a solid and balanced analysis of films by Oshima, Shinoda, Imamura, Yoshida, Suzuki, and others.

Free, Fair, and Alive David Bollier, Silke Helfrich. 2019-09-03 The power of the commons as a free, fair system of provisioning and governance beyond capitalism, socialism, and other -isms. From co-housing and agroecology to fisheries and open-source everything, people around the world are increasingly turning to 'commoning' to emancipate themselves from a predatory market-state system. *Free, Fair, and Alive* presents a foundational rethinking of the commons — the self-organized social system that humans have used for millennia to meet their needs. It offers a compelling vision of a future beyond the dead-end binary of capitalism versus socialism that has almost brought the world to its knees. Written by two leading commons activists of our time, this guide is a penetrating cultural critique, table-pounding political treatise, and practical playbook. Highly readable and full of colorful stories, coverage includes: Internal dynamics of commoning How the commons worldview opens up new possibilities for change Role of language in reorienting our perceptions and political strategies Seeing the potential of commoning everywhere. *Free, Fair, and Alive* provides a fresh, non-academic synthesis of contemporary commons written for a popular, activist-minded audience. It presents a compelling narrative: that we can be free and creative people, govern ourselves through fair and accountable institutions, and experience the aliveness of authentic human presence.
