Gardens of the Iberian Peninsula Nadja Horsch, Michael Scholz-Hänsel, Marta Oliveira  
Sonus.2023-11-22 In garden research, Spanish and Portuguese green spaces are scarcely visible. This is a striking contrast not only to their diversity and quality but also to the global network of both countries, especially during the Early Modern period. To counterbalance this, specialists from Spain, Portugal and Germany gathered in 2021 on an international and interdisciplinary conference. In the Portuguese Palace of Queluz they discussed the fundamental issues of garden art on the Iberian Peninsula. Their contributions are collected in this book. They are proof of a cross-border transcultural approach, which has freed itself from national stereotypes. Also, it addresses insights which have been derived from the cultural interaction across the centuries and the different epochs of garden art.

Catálogo dos desenhos do Jardim Botânico da Universidade de Coimbra Ana Margarida Dias da

Silva, Maria Teresa Silva Gonçalves. O presente catálogo reúne 40 desenhos relativos ao Jardim Botânico da Universidade de Coimbra, fundado pelos Estatutos de 1772, mas que por vicissitudes várias viu a sua construção prolongada no tempo, tendo sido o último dos empreendimentos da reforma pombalina a ser concluído. Os desenhos (plantas, alçados e perfis), 35 dos quais inéditos e agora dados à estampa, permitem acompanhar o percurso das obras realizadas no jardim, desde o século xviii até meados do século xx. Da autoria de Macombia, José do Couto, Neves e Mello e Cottinelli Telmo, por exemplo, os desenhos, nem todos assinados e datados, oferecem um novo olhar sobre o processo de construção do Jardim Botânico da UC, as soluções arquitetónicas projetadas e as realizadas, no diálogo entre as componentes artística e científica. Complementarmente aos desenhos sumptuosos até agora conhecidos, estes são, maioritariamente, documentos com notas e apontamentos de trabalho, estudos e projetos de uso corrente, que ficaram guardados na “gaveta do jardineiro”.

There is nothing which adds so much sunshine and cheer to the rooms of a house besieged by winter and all his dreary encampment of snow and ice, as the greenery, color and fragrance of blossoming plants. There is no pastime quite so full of pleasure and constant interest as this sort of horticulture; the rooting of small slips, the repotting and watering and watching, as new growth develops, and buds unfold. The Garden of Eden was thought to have been in West Asia. Excerpts from The Koran relating to gardens. Because gardens were so often used as a symbol of paradise, there are more references to gardens in The Koran than in The Bible. eTexts relating to Ancient Greece Plato's discussion of 'imitation' (mimesis) is explained and discussed. Book X of The Republic (c370 BC) is in the

Encyclopedia . Plato's Theory of Forms led to the aesthetic principle that 'Art should Imitate Nature' which had a profound influence on western art in general and garden design in particular. Homer, excerpts from the Iliad and Odyssey relating to gardens Sir James Frazer's The Golden Bough (1890). The chapter in the Encyclopedia describes 'The Ritual of Adonis'. It is written by the founder of modern anthropology and helps to explain the Adonis Cult, which provides evidence of plants being grown in Greek courtyard gardens, and of the spirit in which sacred groves were made in Ancient Greece. eTexts relating to The Roman Empire Vitruvius Pollio on landscape architecture and garden design (27 BC) from de Architectura. Vitruvius was a Roman and wrote the oldest western book on design to have survived. It lays down the principle that places should have 'commodity, firmness and delight'. Cicero, excerpts from his letters relating to gardens Virgil's Aeneid, sections relating to gardens Life of St Martin The first outstanding monastic leader in France was St Martin of Tours (c316-397). Ibn Battuta's account of Constantinople c1300 eTexts relating to Medieval Gardens Charlemagne's 'chapter' (capitulary) on gardens gave detailed instructions for the plants to be used in the royal gardens and for the management of his lands. This gives a particular importance to past travellers descriptions of their use and form. There sections from the following accounts of visits to Persian gardens in the Encyclopedia (and engravings, to capture the flavour of Persian gardens as they were) Montesquieu's Persian letters (1721) contained little information on Pesian gardens but did much to awaken interest in seraglios and the 'romance of the East'. Washington Irving, the 'father of American literature' published a famous account of the Alhambra in 1832. John James *Theory and Practice of Gardening* was published in 1712, based on A J Dezallier d'Arganville and Le Blond. It became the standard book on laying out a French baroque garden and provides a fascinating insight into how this was done. James also 'introduced the concept of the ha-ha and anticipated Pope's famous dictum on the genius of the place'. The Encyclopedia has 3 chapters, 4 plates and a discussion of James' book. Alexander Pope's and his *Essay on Criticism* (1711) *Epistle to Lord Burlington* (1731). The former summarises contemporary attitudes to gardens and the latter summarises contemporary (rationalist-Neoclassical) aesthetic theory: based on Reason, Nature and the Genius of the Place. This was one of the landscape gardens most admired in continental Europe, partly because it was the work of a poet and partly because it combined use and beauty - a *ferme ornée*. The full text of his publisher's description is in the Encyclopedia . William Shenstone 'Unconnected thoughts on gardening'. The invention of the term 'landskip gardening' is attributed to Shenstone. Edmund Burke An essay on the sublime and beautiful (1757). Taking an empiricist approach, Burke attacks Vitruvian and rationalist aesthetics. He also discusses garden design, praising Hogarth's 'line of beauty' (which Brown followed) and comparing 'smooth streams in the landscape' with 'in fine women smooth skins'. Quotations from Lancelot 'Capability' Brown, describing the principles on which he worked. Horace Walpole's essay 'On Gardening' (1780). The most brilliant and influential essay ever written on the development English park and garden design. Thomas Jefferson's descriptions of English gardens John Claudius Loudon's biography of Humphry Repton (1840). After Repton's own writings, this is the primary source of information on Humphry Repton's life and work. Jean-Jacques Rousseau one of the letters

from La Nouvelle Héloïse deal's with Julie's garden. It is a romantic treatment of an ancient theme, making the association between women, sex and gardens (see above references the Song of Solomon, the Romance of the Rose and Boccaccio. Also the reference below to Goethe). Uvedale Price On the Picturesque (1794) Excerpt from Chapter 1 and Chapter 4. Price was a widely respected authority on picturesque taste in gardens. Like Rousseau, Goethe admired 'natural' gardens. He also drew gardens and designed gardens. The section reproduced in the Encyclopedia deals with the design of a romantic garden. Jane Loudon's life of her husband John Claudius Loudon (1843). Jane was a novelist and her memoir is as touching as it is important as the key source of information on her husband - who was the most influential garden writer of the nineteenth century. Loudon's influence was particularly important in America. Edward Kemp How to lay out a garden (1864 edn). Excerpts giving his views on styles of garden design and describing two gardens which he designed. It presents a somewhat depressing picture of the confusion which reigned in the mid-nineteenth century garden aesthetics - and continues to reign in many of the world's municipal parks departments.. Sir Walter Scott, excerpt from Waverly and from The Quarterly Review on gardens. Scott's remarks can be read in conjunction with those of his friends, Gilbert Laing Meason and Washington Irving. Ludwig II of Bavaria: the romantic gardens of the 'Mad King' were rich in historical associations. eTexts relating to the History of Landscape Architecture Guide to the History of Landscape Architecture, by Tom Turner Gilbert Laing Meason. The full text of Meason's On the Landscape Architecture of the Great Painters of Italy (London 1828). Meason was the 'inventor' of the term Landscape Architecture, which has since come to be used by a world-wide profession, represented by the International Federation of Landscape Architects, by the American Society of Landscape Architects, by the UK Landscape Institute and numerous other national associations. Only 150 copies of his book were printed and its contents are not well known. This is the first time the book has been re-published. It is accompanied with an analysis of the text by Tom Turner. A clear appreciation of how landscape architecture began is regarded as central to comprehension of the modern profession. Notes on the Top twenty theorists and designers in the history of landscape architecture and on the question What is landscape architecture? John Claudius Loudon's included comments on Meason in his Gardener's Magazine (1828) and in his Encyclopedia of Architecture (1833). These comments transmitted the term to Andrew Jackson Downing and, later, to Frederick Law Olmsted - setting the course of American landscape architecture. Andrew Jackson Downing's Treatise on the Theory and Practice of Landscape Gardening. (Section 1, Section 2 and Section 9). Downing was 'the first American writer on landscape architectural topics' (Norman T Newton in Design on the Land) and an 'incalculable' influence on American garden design and landscape

architecture (Oxford Companion to Gardens). Loudon's writings were his starting point. Frederick Law Olmsted's description of his winning design for the Central Park, New York, competition (1858). Olmsted 'the father of American landscape architecture' entered the profession as a result of the Greensward Plan for Central Park, done in partnership with the English architect Calvert Vaux. Norman T Newton's account of the scope of landscape architecture, from Design on the land. Geoffrey Jellicoe's account of the scope of landscape design, from the Landscape of Man Ian McHarg: notes and links on the twentieth century's outstanding landscape planner. eTexts relating to Arts and Crafts Gardens William Morris' essay on Hopes and fears for art in which he criticises carpet bedding and makes the point that gardens should be works of art and of craft. Thomas Huxley's discussion of Evolution and ethics (1859), in which he views his own garden as a 'work of art' in contrast to the 'state of nature' which existed before it was made. William Robinson The Wild Garden (1881 edn Chapters 1-5, originally published by John Murray and reproduced with their permission). Robinson is described by Jekyll (in the reference below) as 'our great champion of hardy flowers'. He urged the use of hardy plants, instead of subtropical plants and carpet bedding, in garden design. He had a sharp dispute with Blomfield (below). John D Sedding Garden craft old and new (1891) introduced his book with a chapter on The Theory of the Garden. There are 2 chapters in the Encyclopedia . Reginald Blomfield's The Formal garden in England (1901 edn, originally published by MacMillan and reproduced with their permission). A contemporary review in The Times said 'Mr. Blomfield's historical sketch of the art of gardening in England is full of interest and instruction, and his polemic against the so-called landscape gardeners is vigorous, incisive, and to our mind convincing.' The book is undoubtedly polemical, but commendably scholarly. Blomfield was the son of a bishop and had a hatred of modernism. Gertrude Jekyll's account of garden design (from

Wall water and woodland gardens, 1901, originally published by Country Life and reproduced with their permission). Jekyll was the most influential writer on planting design in the twentieth century. This chapter is the clearest statement of her views on the history and theory of garden design.

'Feminine' landscape design: a tale of two tragedies (from a Sheffield Spring School lecture, April 1993) arguing for the 'way of the hunter' to be balanced by the 'way of the nester' Postmodern landscapes (from Landscape Design May 1993) arguing for landscape and garden designers to take account of postmodern ideas and theories in their work Pattern analysis (from Landscape Design October 1991) arguing for a design method based on pattern analysis, instead of the modernist Survey-Analysis-Design (SAD) method taught in most of the world's landscape and garden design schools. Revolutions in the garden (from Tom Turner's City as landscape, Spans 1996). After looking at the design revolutions which have taken place in the 1690s, 1790s, and 1890s this essay finds the seeds of a fourth design revolution in the work of Sir Geoffrey Jellicoe, Charles Jencks, and Ian Hamilton Finlay. The flowers of garden design theory (from Garden Design Journal Autumn 1999, published as 'Timeless with delight') this article suggests a design method which integrates knowledge drawn from various fields, including the fine arts, philosophy, the natural and social sciences. PAKILDA: Pattern Assisted Knowledge Intensive Landscape Design Approach (from Landscape Design May 2001). Developing the method outlined in the Garden Design Journal, this article the recommends a design method for landscape design and

planning.
