The Aṣṭādhyāyī of Pāṇini Pāṇini. 1980 Panini's Aṣṭādhyāyī represents the first attempt in the history of the world to describe and analyse the components of a language on scientific lines. It has not only been universally acclaimed as the first and foremost specimen of Descriptive Grammar but has also been the chief source of inspiration for the linguist engaged in describing languages of different regions. To understand Sanskrit language, and especially that part of it which embodies the highest aspirations of ancient Aryan people, viz., the Brahmanas, Samhitas, Upanisads, it is absolutely necessary to have a complete knowledge of the grammar elaborated by Panini. Being a masterpiece of reasoning and artistic arrangement its study is bound to cultivate intellectual powers. Western scholars have described it as a wonderful specimen or a notable manifestation of Indian intelligence. This book is an English translation of Aṣṭādhyāyī in two volumes and has won a unique position in the world of scholarship.

Conditioned Emotional Reactions John B. Watson, Rosalie Rayner. 2013-01-10 Psychology Classics: The Case of Little Albert Conditioned Emotional Reactions by John B. Watson and Rosalie Rayner is one of the most influential, infamous and iconic research articles ever published in the history of psychology. Commonly referred to as The Case of Little Albert this psychology classic attempted to show how fear could be induced in an infant through classical conditioning. Originally published in 1920, Conditioned Emotional Reactions remains among the most frequently cited journal articles in introductory psychology courses and textbooks. A psychology classic is by definition a must read. However, most seminal texts within the discipline remain unread by a majority of psychology students. A detailed, well written description of a classic study is fine to a point, but there is absolutely no substitute for understanding and engaging with the issues under review than by reading the authors unabridged ideas, thoughts and findings in their entirety. Bonus Material: One of the most dramatic aspects of Watson and Rayner's original study was that they had planned to test a number of methods by which they could remove Little Albert's conditioned fear responses. However, as Watson noted Unfortunately Albert was taken from the hospital the day the above tests were made. Hence the opportunity of building up an experimental technique by means of which we could remove the conditioned emotional responses was denied us. This unforeseen turn of events was something that obviously stayed with Watson, as under his guidance some three years later, Mary Cover Jones conducted a follow-up study - A Laboratory Study of Fear: The Case of Peter - which illustrated how fear may be removed under laboratory conditions. This additional and highly relevant article is also presented in full. The Case of Little Albert has been produced as part of an initiative by the website All About Psychology to make important psychology publications widely available. www.all-about-psychology.com

Tourism Products and Services in Bangladesh Azizul Hassan. 2021 Existing limitations in tourism product and service offers hinder the development potential of Bangladesh as a major tourism destination. The need to discern, to enrich, to innovate, and to diversify the range of tourism product and service offers is therefore urgent. To address such concerns effectively, substantial knowledge is required, supported with relevant data, information, facts, and evidence. Since the lack of research into tourism products and services in Bangladesh, as well as relevant publications, remains desperate, this book is a contribution towards this knowledge and research gap. In the context of the tourism industry in Bangladesh, chapters of this book are designed to conceptualise products and

services, as well as to suggest their development. The contents of the book are critically detailed, with explanations of the policy and development framework, selected niches, consumption perspective, power and politics, market design, challenges and suggestions, and the future of tourism products and services. The book can inspire students, academics, and industry practitioners to know more of the tourism products and services in Bangladesh.

The Cabuliwallah Rabindranath Tagore.2014-12-25 Rabindranath Tagore, also written Rabindranatha Thakura, (7 May 1861 - 7 August 1941), sobriquet Gurudev, was a Bengali polymath who reshaped Bengali literature and music, as well as Indian art with Contextual Modernism in the late 19th and early 20th centuries. Author of *Gitanjali* and its profoundly sensitive, fresh and beautiful verse, he became the first non-European to win the Nobel Prize in Literature in 1913. In translation his poetry was viewed as spiritual and mercurial; however, his elegant prose and magical poetry remain largely unknown outside Bengal. Tagore introduced new prose and verse forms and the use of colloquial language into Bengali literature, thereby freeing it from traditional models based on classical Sanskrit. He was highly influential in introducing the best of Indian culture to the West and vice versa, and he is generally regarded as the outstanding creative artist of the modern Indian subcontinent, being highly commemorated in India and Bangladesh, as well as in Sri Lanka, Nepal and Pakistan.

Education and Social Change in South Asia Krishna Kumar, Joachim Oesterheld. 2007 Today education is a key factor for further development of most of the countries in South Asia, which after decades of independence are still lacking in literacy. The book focuses on the relationship between the state and society of South Asian countries, especially in the field of primary education. After dealing with developments under colonial rule, the major part of the contributions is devoted to the educational policy in South Asian countries post-independence. The papers reveal the relevance and crucial role of culture, religion, and ethnicity for imparting basic education on a nation-wide scale. Taking into consideration the complexity of societies of South Asian countries, the book looks at the social and political implications arising out of the educational policy of the state for the process of nation building. The book is a specific contribution from a South Asian context to the ongoing debate about the relevance of language, culture, and religion in the educational policy of a majority population and its impact on minority communities.

Teacher Education Evaluation William J. Gephart, Jerry B. Ayers. 1988-04-30 In an age that dictates accountability and verifiability of educational programs, institutions of higher education are called on to justify their programs. To meet these demands, there is a need for improved methods for the evaluation of teacher education programs. More importantly, there is a need for the development of methods and procedures to conduct continuous and on-going evaluation that can aid the process of program improvement. Many institutions have had difficulties in developing and implementing satisfactory systems for conducting needed evaluation. In recent years the standards for the approval of teacher education programs in all of the states were strengthened as were the standards for approval by the National Council for the Accreditation of Teacher Education (NCATE). These revised standards put even more emphasis on accountability and the need for both summative and formative evaluation in a teacher education program. Tennessee Technological University has long been recognized as an institution with an exemplary project in program evaluation. As a result, in 1986, the state of Tennessee established at Tennessee Technological University, a Center for Teacher Education Evaluation. The Center began work in July 1986, on the development of models and systems for conducting teacher education program evaluation. To most, teacher education program evaluation is simple and straightforward. Evaluation includes a set of options, a set of criteria, data collection and interpretation, and then use in meeting accountability needs.

On Escape Emmanuel Lévinas.2003 First published in 1935, *On Escape* represents Emmanuel Levinas's first attempt to break with the ontological obsession of the Western tradition. In it, Levinas not only affirms the necessity of an escape from being, but also gives a meaning and a direction to it. Beginning with an analysis of need not as lack or some external limit to a self-sufficient being, but as a positive relation to our being, Levinas moves through a series of brilliant phenomenological analyses of such phenomena as pleasure, shame, and nausea in order to show a fundamental insufficiency in the human condition. In his critical introduction and annotation, Jacques Rolland places *On Escape* in its historical and intellectual context, and also within the context of Levinas's entire oeuvre, explaining Levinas's complicated relation to Heidegger, and underscoring the way Levinas's analysis of being riveted, of the need for escape, is a meditation on the body.
