Tracking the Wild Coomba Robert Cocuzzo.2016-07-12 Doug Coombs had a huge impact on my life; much of my overall approach to mountains comes from his example. I am so grateful that, thanks to author Rob Cocuzzo, I now have the complete story of what influenced one of my biggest heroes. - Jeremy Jones, snowboarding legend "In the 1980s, I was lucky enough to be part of the Bozeman gang of ex-ski racers in one of the crucibles of the American steep skiing scene. Robert Cocuzzo accurately captures the amazing Doug and Emily Coombs that I knew then and the myriad of Coombs ski stories." - Bruce Tremper, avalanche expert and author of *Staying Alive in Avalanche Terrain* Doug Coombs was an inspiration to me and so many others on and off the mountain. Now, here is an insightful look at the life of a legend. Jimmy Chin, climber-photographer • A thrilling biography of renowned extreme skiing pioneer Doug Coombs Arguably the greatest extreme skier to ever live, Doug Coombs pioneered hundreds of first descents down the biggest, steepest, most dangerous mountains in the world—from the Grand Teton "Otter Body" in Jackson Hole, to Mount Vinson, the highest point in Antarctica, to far-flung drops such as Wyatt Peak in Kyrgyzstan. He graced magazine covers, wowed moviegoers, became the face of top ski companies, and ascended as the king of big mountain extreme skiing.

[Barbarians and Romans, A.D. 418-584](#) Walter Goffart.2020-07-21 Despite intermittent turbulence and destruction, much of the Roman West came under barbarian control in an orderly fashion. Goths, Burgundians, and other aliens were accommodated within the provinces without disrupting the settled population or

overturning the patterns of landownership. Walter Goffart examines these arrangements and shows that they were based on the procedures of Roman taxation, rather than on those of military billeting (the so-called hospitalitas system), as has long been thought. Resident proprietors could be left in undisturbed possession of their lands because the proceeds of taxation, rather than land itself, were awarded to the barbarian troops and their leaders.

Edifices de Rome Moderne Paul Letarouilly.2016-07-26 Paul Letarouilly's masterpiece, *Edifices de Rome Moderne*, has been hailed as the most beautiful book on Renaissance architecture ever published. Letarouilly (1795-1855) devoted thirty-five years to drawing the plans, sections, elevations, perspectives, and large-scale details of gardens, convents, palaces, and churches of Renaissance Rome. His keen observational ability and immaculate drawing skills make this work an indispensable sourcebook. In many cases his etchings remain the only measured plans or elevations available; he also recorded buildings destroyed by later demolitions. Our 1982 reprint of *Edifices de Rome Moderne* has been recognized as a classic in its own right: razor-sharp reproductions of the original plates in a usable format. Now we're delighted to offer the *Edifices* in an even-easier-to-use size, and in a sewn paperback binding to make it an affordable cornerstone of any architecture student's library.

No Picnic on Mount Kenya Felice Benuzzi.2015 Imprisoned in a British P.O.W. camp in East Africa in 1943, Felice Benuzzi and his Italian comrades looked out onto the beautiful Mount Kenya, a symbol of everything that was beyond the grasp of their daily drudgery. For Felice, though, this was a temptation too far. Using only equipment manufactured from what was available in the

camp, and stockpiling their meagre rations, Felice and two friends planned a daring escape past armed guards, and attempted to scale the 17,000 foot mountain. Encountering threats from rhinos and leopards, and risking perilous falls, deadly temperatures and starvation, this is an astonishing true story of courage and adventure; of three men who decided, in the midst of the horrors and banalities of the Second World War, that they had a mountain to climb.

Preachers by Night: The Waldensian Barbes (15th-16th Centuries) Gabriel Audisio.2007 This work traces the history of the “barbes”, the Waldensian preachers whose itinerant mission maintained the fervent but clandestine faith of a dissent which from Lyons extended across much of Europe, enduring despite the Inquisition, from the 12th-16th century.

The Amenity Migrants Laurence A. G. Moss.2006 This book describes and analyses the challenges and opportunities of amenity migration to mountain areas and its management, and offers related recommendations. The book's chapters cover the subject through case studies at international, regional and local levels, along with overarching themes such as environmental sustainability and equity, mountain recreation users, housing, and spiritual motivation. Crucial issues addressed are the relationship of amenity migration to tourism and migration motivated by economic gain. Part I (chapters 1-3) describes and analyses key aspects of the amenity migration phenomenon that arch across specific place experiences, while chapters 4-20 are organized geographically, covering amenity migration in the Americas (part II), in Europe (part III), and in the Asia Pacific region (part IV). Chapter 21 concludes by bringing all the information together and focusing on the future of amenity-led migration. The book has a subject index.

Sci di fondo sulle Alpi occidentali. Nevi, borghi e antiche leggende tra Piemonte e Valle d'Aosta Claudio Trova.2013

History of the Alps, 1500-1900 Jon Mathieu.2009 In the 1700s, Jean-Jacques Rousseau celebrated the Alps as the quintessence of the triumph of nature over the horrors of civilization. Now available in English, *History of the Alps, 1500-1900: Environment, Development, and Society* provides a precise history of one of the greatest mountain range systems in the world. Jon Mathieu's work disproves a number of commonly held notions about the Alps, positioning them as neither an inversion of lowland society nor a world apart with respect to Europe. Mathieu's broad historical portrait addresses both the economic and sociopolitical-exploring the relationship between population levels, development, and the Alpine environment, as well as the complex links between agrarian structure, society, and the development of modern civilization. More detailed analysis examines the relationship between various agrarian structures and shifting

political configurations, several aspects of family history between the late Middle Ages and the turn of the twentieth century, and exploration of the Savoy, Grisons, and Carinthia regions.

The 100 Mile City Deyan Sudjic.1993 Contributes to the debate about the future of the city. London, New York, Tokyo and Los Angeles are the ultimate 100-mile cities, set apart by an economic supremacy derived chiefly from their sheer size. Today's cities are standardized, monolithic, corporate urban sprawls - monuments to capitalism.

I centri minori italiani nel tardo Medioevo Centro di studi sulla civiltà del tardo medioevo (San Miniato, Italy).

Convegno.2018-01-01 In the late Middle Ages, Italy was one of the most urbanized areas in Europe. Its coasts, the Apennines, the perialpine area and the plains were all home to a large number of smaller towns, lands, villages, castra, and 'quasi cites'. These settlements were all very diverse in terms of demographic consistency, social articulation and economic dynamism, but together they constituted a characteristic and constitutive element of the Italian historical identity: an 'original personality'. This volume, thanks to some framing essays and a mapping of individual cases involving most of the northern, central and southern regions, aims at investigating the active research on this topic over the last thirty to forty years.

Sustainable Bioenergy Production Lijun Wang.2014-04-18

Given the environmental concerns and declining availability of fossil fuels, as well as the growing population worldwide, it is

essential to move toward a sustainable bioenergy-based economy. However, it is also imperative to address sustainability in the bioenergy industry in order to avoid depleting necessary biomass resources. Sustainable Bioenergy Production provides comprehensive knowledge and skills for the analysis and design of sustainable biomass production, bioenergy processing, and biorefinery systems for professionals in the bioenergy field. Focusing on topics vital to the sustainability of the bioenergy industry, this book is divided into four sections: Fundamentals of Engineering Analysis and Design of Bioenergy Production Systems, Sustainable Biomass Production and Supply Logistics, Sustainable Bioenergy Processing, and Sustainable Biorefinery Systems. Section I covers the fundamentals of genetic engineering, novel breeding, and cropping technologies applied in the development of energy crops. It discusses modern computational tools used in the design and analysis of bioenergy production systems and the life-cycle assessment for evaluating the environmental sustainability of biomass production and bioenergy processing technologies. Section II focuses on the technical and economic feasibility and environmental sustainability of various biomass feedstocks and emerging technologies to improve feedstock sustainability. Section III addresses the technical and economic feasibility and environmental sustainability of different bioenergy processing technologies and emerging technologies to improve the sustainability of each bioenergy process. Section IV discusses the design and analysis of biorefineries and different biorefinery systems, including lignocellulosic feedstock, whole-crop, and green biorefinery.

Seigneurial Jurisdiction Lloyd Bonfield.2000 It is the aim of this collection of reports to establish a basis for comparing various seigneurial courts in pre-modern Europe. The contributors are largely medievalists.To come to terms with the subject, a definition of courts which were seigneurial, given the

variety of legal heritages, had to be set up. One of the first observations made was that on the Continent, where central courts were less prominent, there appears to be a more flexible notion of seigneurial jurisdiction. The contributors then look at the variety of jurisdictions in which lords in medieval and early modern Europe governed the legal relations of their vassals. Also the seigneurial jurisdiction is placed within its national context as one variety of courts which co-existed with other forums. Next the authors observe the origin and nature of substantive law which was implemented in the courts. Finally, focus is put on procedure. In England the medieval period witnessed considerable developments in the way in which cases came before the manorial court and how proof of the complainant's claim was ascertained. The reports provide a framework for further study. They demonstrate similarities and differences between seigneurial jurisdictions in England and on the Continent. One significant observation is that seigneurial jurisdictions seemed to have survived longer on the Continent than in England. Moreover, Continental seigneurial courts seemed to have serviced a broader strata of society. Yet, what is perhaps most striking are the similarities in procedure and in the process of custom making which the collected reports uncover.

The Thousand Islands .2009 The Thousand Islands are more than 1,800 islands located in 35 miles of the upper St. Lawrence River between Upstate New York and southeastern Ontario. During the latter half of the 19th century, the region evolved as a vacation

destination, initially for Canadian and American urbanites drawn by the restorative powers of spectacular scenery and relaxed summer life. Tourism expanded rapidly, and by the early 1900s, the Thousand Islands boasted dozens of grand hotels, daily railroad connections to New York and Philadelphia, steamship service to Montreal and Toronto, innumerable sightseeing and guided fishing excursions, and the best that North America's premier vacation spot could offer.

I Chose To Climb Chris Bonington.2013-10-17 The early climbing years of Britain's greatest living mountaineer, from his schooldays to his ascent of the Eiger in 1962. I CHOSE TO CLIMB, first published in 1966, was Chris Bonington's first book. He was recognised then, as now, as one of the outstanding members of a brilliant generation of mountaineers, which included such personalities as Hamish MacInnes, Don Whillans and Ian Clough. Here he describes his climbing beginnings as a teenager as well as successful ascents all over the world: the first ascent of the Central Pillar of Freney, the first British ascent of the North Face of the Eiger in 1962, Annapurna II in 1960 and in an unhappy expedition in 1961, Nuptse, the third peak of Everest. The first volume of Chris Bonington's autobiography is written with a warmth and enthusiasm that he has made his own. It tells of his climbing tastes and practice, and of family, friends and partnerships cemented over many years.

Transforming Peasants, Property and Power Constantin Iordachi, Dorin Dobrinu. 2009-06-15 The subject matter of the volume is part of larger research agenda on the process of land collectivization in the former communist camp, focusing on state, identity and property. The main innovation of the volume is to apply recent interdisciplinary approaches to the study of the collectivization process, asking what types of new peasant-state relations it formed and how it transformed notions of self, persons, and things (such as land). The project conceived of changes in the system of ownership as causing changes in the identity and attitude of people; similarly, it regarded the study of personal identities as essential for understanding changes in the system of ownership. This perspective is rare in the area-studies approaches to the topic.

Wolfwatching Ted Hughes. 1992-01-01 Wolfwatching was the fourteenth collection published by Ted Hughes (1930-98), England's former Poet Laureate. In it, we encounter several poems that feature his typically striking yet somber exactitude, a style of perception and depiction always unclouded by sentiment.

Other poems find Hughes returning to the Yorkshire landscape of his childhood, recounting the tragic effects of World War I, or revisiting the dire plight of that region's coal miners and textile workers. *Wolfwatching* is an unflinching book about the struggles of this world, struggles both physical and spiritual, both in and out of nature.

Dreaming Of Jupiter Ted Simon. 2012-12-20 Ted Simon is the author of the classic travel book *JUPITER'S TRAVELS*. It documents his four-year journey round the world by motorbike, travelling through Europe, Africa, South and North America, and Asia. A number one bestseller in the late 1970s, it is still regarded as one of the greatest motorcycle books - indeed, one of the greatest travel books - ever written. In 2001, at the age of 69, Ted Simon decided to retrace his journey, and *DREAMING OF JUPITER* is the result. It took him two and a half years - during which time he revisited all the countries he had travelled through in the 1970s. He found much had changed, and he reflects upon the increased poverty, political upheavals, environmental issues and indeed the changes in himself. But ultimately, *DREAMING OF JUPITER* is a hugely inspiring read with a positive message at its heart - that even at the age of 70 you can still set off on an adventure, and be surprised and excited by what life throws at you along the way.
