

Poor Numbers How We Are Misled By African Develop

The Great Escape Angus Deaton.2015-05-26 Asserts that 250 years ago, some parts of the world began to experience sustained progress, opening up gaps and setting the stage for today's hugely unequal world and examines the United States, a nation that has prospered but is today experiencing slower growth and increasing inequality.

Science And Human Behavior B.F Skinner.2012-12-18 The psychology classic—a detailed study of scientific theories of human nature and the possible ways in which human behavior can be predicted and controlled—from one of the most influential behaviorists of the twentieth century and the author of *Walden Two*. “This is an important book, exceptionally well written, and logically consistent with the basic premise of the unitary nature of science. Many students of society and culture would take violent issue with most of the things that Skinner has to say, but even those who disagree most will find this a stimulating book.” —Samuel M. Strong, *The American Journal of Sociology* “This is a remarkable book—remarkable in that it presents a strong, consistent, and all but exhaustive case for a natural science of human behavior...It ought to be...valuable for those whose preferences lie with, as well as those whose preferences stand against, a behavioristic approach to human activity.” —Harry Prosch, *Ethics*

Measuring African Development Morten Jerven.2016-04-14 The chief economist for the World Bank's Africa region, Shanta Devarajan, delivered a devastating assessment of the capacity of African states to measure development in his 2013 article *Africa's Statistical Tragedy*. Is there a statistical tragedy unfolding in Africa now? If so then examining the roots of the problem of provision of statistics in poor economies is certainly of great importance. This book on measuring African development in the past and in the present draws on the historical experience of colonial French West Africa, Ghana, Sudan, Mauritania and Tanzania and the more contemporary experiences of Ethiopia and the Democratic Republic of Congo. The authors each reflect on the changing ways statistics represent African economies and how they are used to govern them. This book was published as a special issue of the *Canadian Journal of Development Studies*.

The IMF and Aid to Sub-Saharan Africa International Monetary Fund. Independent Evaluation Office.2007-04-13 This independent evaluation of the IMF's role and performance in the determination and use of aid to low-income countries in sub-Saharan Africa is presented at a ground-level view. Country performance has improved in many sub-Saharan Africa countries over the period, and the report details the role of the IMF's programs, as well as perceptions of that role. The report is an important contribution to following through on the IMF's commitment to its Poverty Reduction Strategy and makes three main recommendations for improving the coherence—actual and perceived—of the IMF's policies and actions relating to aid to sub-Saharan Africa going forward.

The Least Developed Countries Report 2009 United Nations.2009 The Least Developed Countries are a group of 50 countries which have been identified as least developed in terms of their low GDP per capita, their weak human assets and their high degree of economic vulnerability. The 2006 Report focuses on the development of productive capacities for sustainable pro-poor economic growth strategies and an analysis of the progress made on some of the quantified targets of the Program of Action agreed during the Third UN Conference on the Least Developed Countries.

Poverty and Shared Prosperity 2018 World Bank.2018-12-10 The World Bank Group has two overarching goals: End extreme poverty by 2030 and promote shared prosperity by boosting the incomes of the bottom 40 percent of the population in each economy. As this year's Poverty and Shared Prosperity report documents, the world continues to make progress toward these goals. In 2015, approximately one-tenth of the world's population lived in extreme poverty, and the incomes of the bottom 40 percent rose in 77 percent of economies studied. But success cannot be taken for granted. Poverty remains high in Sub-Saharan Africa, as well as in fragile and conflict-affected states. At the same time, most of the world's poor now live in middle-income countries, which tend to have higher national poverty lines. This year's report tracks poverty comparisons at two higher poverty thresholds—\$3.20 and \$5.50 per day—which are typical of standards in lower- and upper-middle-income countries. In addition, the report introduces a societal poverty line based on each economy's median income or consumption. *Poverty and Shared Prosperity 2018: Piecing Together the Poverty Puzzle* also recognizes that poverty is not only about income and consumption—and it introduces a multidimensional poverty measure that adds other factors, such as access to education, electricity, drinking water, and sanitation. It also explores how inequality within households could affect the global profile of the poor. All these additional pieces enrich our understanding of the poverty puzzle, bringing us closer to solving it. For more information, please visit worldbank.org/PSP

How Europe Underdeveloped Africa Walter Rodney.2018-11-27 The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping the great divergence between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

Abolishing School Fees in Africa .2009 Progress in literacy and learning, especially through universal primary education, has done more to advance human conditions than perhaps any other policy. Our generation has the possibility of becoming the first generation ever to offer all children access to good quality basic education. But it will only happen if we have the political commitment -- at the country as well as at the international level -- to give priority to achieve this first in human history. And it will only happen if also those who cannot afford to pay school fees can benefit from a complete cycle of good quality primary education. Investment in good quality fee-free primary education should be a cornerstone in any government's poverty reduction strategy.

Our Continent, Our Future P. Thandika Mkandawire, Charles Chukwuma Soludo.2014-05-14 *Our Continent, Our Future* presents the emerging African perspective on this complex issue. The authors use as background their own extensive experience and a collection of 30 individual studies, 25 of which were from African economists, to summarize this African perspective and articulate a path for the future. They underscore the need to be sensitive to each country's unique history and current condition. They argue for a broader policy agenda and for a much more active role for the state within what is largely a market economy. Finally, they stress that Africa must, and can, compete in an increasingly globalized world and, perhaps most importantly, that Africans must assume the leading role in defining the continent's development agenda.

Challenges to the Nation-state in Africa Adebayo O. Olukoshi, Liisa Laakso.1996 The challenges facing the nation-state in contemporary Africa are increasingly attracting the attention of scholars interested to understand how the decomposition and recomposition of popular political identities on the continent are affecting the post-colonial unitary project. The studies presented in this volume show that the challenges to the post-colonial nation-state project in Africa have mainly taken ethno-regionalist, religious and separatist forms. These challenges have been shaped by the long drawn-out economic crisis, zero-sum, market-led structural adjustment, and the legacy of decades of political authoritarianism and exclusion that dates from the colonial period. The contributors to this book present different suggestions to promote national unity and a supporting civic identity in Africa.

The Wealth and Poverty of African States Morten Jerven.2022-01-13 A wealth of new data have been unearthed in recent years on African economic growth, wages, living standards, and taxes. In *The Wealth and Poverty of African States*, Morten Jerven shows how these findings transform our understanding of African economic development. He focuses on the central themes and questions that these state records can answer, tracing how African states evolved over time and the historical footprint they have left behind. By connecting the history of the colonial and postcolonial periods, he reveals an aggregate pattern of long-run growth from the late nineteenth century into the 1970s, giving way to widespread failure and decline in

the 1980s, and then followed by two decades of expansion since the late 1990s. The result is a new framework for understanding the causes of poverty and wealth and the trajectories of economic growth and state development in Africa across the twentieth century.

African Development Todd J. Moss.2011 This fully updated edition reflects the recent development successes experienced in Africa, as well as the growing divergence between countries that are engaging with the global economy and those that remain more insular.

Agriculture in Africa Luc Christiaensen,Lionel Demery.2017-10-25 Stylized facts set agendas and shape debates. In rapidly changing and data scarce environments, they also risk being ill-informed, outdated and misleading. So, following higher food prices since the 2008 world food crisis, robust economic growth and rapid urbanization, and climatic change, is conventional wisdom about African agriculture and rural livelihoods still accurate? Or is it more akin to myth than fact? The essays in "Agriculture in Africa †" Telling Myths from Facts†? aim to set the record straight. They exploit newly gathered, nationally representative, geo-referenced information at the household and plot level, from six African countries. In these new Living Standard Measurement Study-Integrated Surveys on Agriculture, every aspect of farming and non-farming life is queried—from the plots farmers cultivate, the crops they grow, the harvest that is achieved, and the inputs they use, to all the other sources of income they rely on and the risks they face. Together the surveys cover more than 40 percent of the Sub-Saharan African population. In all, sixteen conventional wisdoms are examined, relating to four themes: the extent of farmer's engagement in input, factor and product markets; the role of off-farm activities; the technology and farming systems used; and the risk environment farmers face. Some striking surprises, in true myth-busting fashion, emerge. And a number of new issues are also thrown up. The studies bring a more refined, empirically grounded understanding of the complex reality of African agriculture. They also confirm that investing in regular, nationally representative data collection yields high social returns.

No BS (Bad Stats) Ivory A. Toldson.2019-04-09 What if everything you thought you knew about Black people generally, and educating Black children specifically, was based on BS (bad stats)? No BS uses robust analysis, meaningful anecdotes, and powerful commentary to dispel myths and challenge conventional beliefs about educating Black children.

Africa Assistant Professor Morten Jerven.2015-06-11 'A valuable corrective to the fraying narrative of [African] failure.' Foreign Affairs Not so long ago, Africa was being described as the hopeless continent. Recently, though, talk has turned to Africa rising, with enthusiastic voices exclaiming the potential for economic growth across many of its countries. What, then, is the truth behind Africa's growth, or lack of it? In this provocative book, Morten Jerven fundamentally reframes the debate, challenging mainstream accounts of African economic history. Whilst for the past two decades experts have focused on explaining why there has been a 'chronic failure of growth' in Africa, Jerven shows that most African economies have been growing at a rapid pace since the mid nineties. In addition, African economies grew rapidly in the fifties, the sixties, and even into the seventies. Thus, African states were dismissed as incapable of development based largely on observations made during the 1980s and early 1990s. The result has been misguided analysis, and few practical lessons learned. This is an essential account of the real impact economic growth has had on Africa, and what it means for the continent's future.

The Bottom Billion Paul Collier.2007-05-25 In the universally acclaimed and award-winning *The Bottom Billion*, Paul Collier reveals that fifty failed states—home to the poorest one billion people on Earth—pose the central challenge of the developing world in the twenty-first century. The book shines much-needed light on this group of small nations, largely unnoticed by the industrialized West, that are dropping further and further behind the majority of the world's people, often falling into an absolute decline in living standards. A struggle rages within each of these nations between reformers and corrupt leaders—and the corrupt are winning. Collier analyzes the causes of failure, pointing to a set of traps that ensnare these countries, including civil war, a dependence on the extraction and export of natural resources, and bad governance. Standard solutions do not work, he writes; aid is often ineffective, and globalization can actually make matters worse, driving development to more stable nations. What the bottom billion need, Collier argues, is a bold new plan supported by the Group of Eight industrialized nations. If failed states are ever to be helped, the G8 will have to adopt preferential trade policies, new laws against corruption, new international charters, and even conduct carefully calibrated military interventions. Collier has spent a lifetime working to end global poverty. In *The Bottom Billion*, he offers real hope for solving one of the great humanitarian crises facing the world today. Set to become a classic. Crammed with statistical nuggets and common sense, his book should be compulsory reading. --The Economist If Sachs seems too saintly and Easterly too cynical, then Collier is the authentic old Africa hand: he knows the terrain and has a keen ear.... If you've ever found yourself on one side or the other of those arguments--and who hasn't?--then you simply must read this book. --Niall Ferguson, The New York Times Book Review Rich in both analysis and recommendations.... Read this book. You will learn much you do not know. It will also change the way you look at the tragedy of persistent poverty in a world of plenty. --Financial Times

Poor Numbers Morten Jerven.2013-01-24 One of the most urgent challenges in African economic development is to devise a strategy for improving statistical capacity. Reliable statistics, including estimates of economic growth rates and per-capita income, are basic to the operation of governments in developing countries and vital to nongovernmental organizations and other entities that provide financial aid to them. Rich countries and international financial institutions such as the World Bank allocate their development resources on the basis of such data. The paucity of accurate statistics is not merely a technical problem; it has a massive impact on the welfare of citizens in developing countries. Where do these statistics originate? How accurate are they? *Poor Numbers* is the first analysis of the production and use of African economic development statistics. Morten Jerven's research shows how the statistical capacities of sub-Saharan African economies have fallen into disarray. The numbers substantially misstate the actual state of affairs. As a result, scarce resources are misapplied. Development policy does not deliver the benefits expected. Policymakers' attempts to improve the lot of the citizenry are frustrated. Donors have no accurate sense of the impact of the aid they supply. Jerven's findings from sub-Saharan Africa have far-reaching implications for aid and development policy. As Jerven notes, the current catchphrase in the development community is evidence-based policy, and scholars are applying increasingly sophisticated econometric methods—but no statistical techniques can substitute for partial and unreliable data.

Youth Employment in Sub-Saharan Africa Deon Filmer,Louise Fox.2014-01-24 This book focuses on how to improve the quality of jobs and meet the aspirations of youth in Sub-Saharan Africa. It finds that a strong foundation for human capital development can be key to boosting earnings, arguing for a balanced approach that builds skills and demand for labor.

AIDS in Africa Joint United Nations Programme on HIV/AIDS..2005 This report presents three hypothetical case studies for how the AIDS epidemic in Africa could evolve over the next 20 years based on policy decisions taken today by African leaders and the rest of the world; and considers the factors likely to drive the future responses of African countries and the international community. The scenarios draw on the age-old tradition of storytelling, rather than using data projections, to explore the wider context of the AIDS epidemic, reflecting the complexity of the subject matter.

Gender, Time Use, and Poverty in Sub-Saharan Africa C. Mark Blackden,Quentin Wodon.2006 The papers in this volume examine the links between gender, time use, and poverty in Sub-Saharan Africa. They contribute to a broader definition of poverty to include time poverty, and to a broader definition of work to include household work. The papers present a conceptual framework linking both market and household work, review some of the available literature and surveys on time use in Africa, and use tools and approaches drawn from analysis of consumption-based poverty to develop the concept of a time poverty line and to examine linkages between time poverty, consumption poverty, and ot.

Structural change, fundamentals, and growth : a framework and case studies McMillan, Margaret ,Rodrik, Dani,Sepúlveda, Claudia.2017-05-11

Security in Africa Claire Metelits.2016-10-12 This book questions the dominant Western narrative of security threats in Africa. By assessing the origins of the traditional approach to security and problematizing failed states, political instability, Muslim populations, and poverty, among others, it makes the case for a critical approach to framing security challenges in Africa.

Africa Rising Vijay Mahajan.2011-07-07 With more than 900 million consumers, the continent of Africa is one of the world's fastest growing markets. In *Africa Rising*, renowned global business consultant Vijay Mahajan reveals this remarkable marketplace as a continent with massive needs and surprising buying power. Crossing thousands of miles across the continent, he shares the lessons that Africa's businesses have learned about succeeding on the continent...shows how global companies are succeeding despite Africa's unique political, economic, and resource

challenges...introduces local entrepreneurs and foreign investors who are building a remarkable spectrum of profitable and sustainable business opportunities even in the most challenging locations...reveals how India and China are staking out huge positions throughout Africa...and shows the power of the diaspora in driving investment and development. Recognize that Africa is richer than you think Africa is richer than India on the basis of gross national income (GNI) per capita, and a dozen African countries have a higher GNI per capita than China. Aim for Africa Two Opportunities exist in all parts of the market, particularly the 400 million people in the middle of the market. Find opportunities to organize the market From retailing to cell phones to banking, companies are succeeding by building infrastructure. Develop strategies for the most youthful market in the world Companies are recognizing opportunities from diapers to music to medicine in a market growing younger every day. Understand that Africa is not a "media dark" continent From Nollywood to satellite to broadband, media is exploding on the continent. Recognize the hidden strength of the African diaspora The African diaspora brings resources and knowledge to African development and expands the African opportunity beyond the continent. Build Ubuntu markets Create profitable businesses, sustainable growth, and social organizations by meeting basic human needs.

Monitoring Global Poverty World Bank.2016-11-28 In 2013, the World Bank Group announced two goals that would guide its operations worldwide. First is the eradication of chronic extreme poverty bringing the number of extremely poor people, defined as those living on less than 1.25 purchasing power parity (PPP)†"adjusted dollars a day, to less than 3 percent of the world's population by 2030.The second is the boosting of shared prosperity, defined as promoting the growth of per capita real income of the poorest 40 percent of the population in each country. In 2015, United Nations member nations agreed in New York to a set of post-2015 Sustainable Development Goals (SDGs), the first and foremost of which is the eradication of extreme poverty everywhere, in all its forms. Both the language and the spirit of the SDG objective reflect the growing acceptance of the idea that poverty is a multidimensional concept that reflects multiple deprivations in various aspects of well-being. That said, there is much less agreement on the best ways in which those deprivations should be measured, and on whether or how information on them should be aggregated. *Monitoring Global Poverty: Report of the Commission on Global Poverty* advises the World Bank on the measurement and monitoring of global poverty in two areas: What should be the interpretation of the definition of extreme poverty, set in 2015 in PPP-adjusted dollars a day per person? What choices should the Bank make regarding complementary monetary and nonmonetary poverty measures to be tracked and made available to policy makers? The World Bank plays an important role in shaping the global debate on combating poverty, and the indicators and data that the Bank collates and makes available shape opinion and actual policies in client countries, and, to a certain extent, in all countries. How we answer the above questions can therefore have a major influence on the global economy.

From Evidence to Action Food and Agriculture Organization of the United Nations.2018-10-18 Cash transfers have become a key social protection tool in developing countries and have expanded dramatically in the last two decades. However, the impacts of cash transfers programmes, especially in Sub-Saharan Africa, have not been substantially documented. This book presents a detailed overview of the impact evaluations of these programmes, carried out by the Transfer Project and FAO's From Protection to Production project. The 14 chapters include a review of eight country case studies: Kenya, Ghana, Ethiopia, Zambia, Zimbabwe, Lesotho, Malawi, South Africa, as well as a description of the innovative research methodologies, political economy issues and good practices to design cash transfer programmes. The key objective of the book is to enhance the understanding of these development programmes, how they lead to a broad range of social and productive impacts and also of the role of programme evaluation in the process of developing policies and implementing programmes.

Why Nations Fail Daron Acemoglu,James A. Robinson.2013-09-17 Brilliant and engagingly written, *Why Nations Fail* answers the question that has stumped the experts for centuries: Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, geography? Perhaps ignorance of what the right policies are? Simply, no. None of these factors is either definitive or destiny. Otherwise, how to explain why Botswana has become one of the fastest growing countries in the world, while other African nations, such as Zimbabwe, the Congo, and Sierra Leone, are mired in poverty and violence? Daron Acemoglu and James Robinson conclusively show that it is man-made political and economic institutions that underlie economic success (or lack of it). Korea, to take just one of their fascinating examples, is a remarkably homogeneous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The south forged a society that created incentives, rewarded innovation, and allowed everyone to participate in economic opportunities. The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people. Sadly, the people of the north have endured decades of famine, political repression, and very different economic institutions—with no end in sight. The differences between the Koreas is due to the politics that created these completely different institutional trajectories. Based on fifteen years of original research Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, medieval Venice, the Soviet Union, Latin America, England, Europe, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, including: - China has built an authoritarian growth machine. Will it continue to grow at such high speed and overwhelm the West? - Are America's best days behind it? Are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority? - What is the most effective way to help move billions of people from the rut of poverty to prosperity? More philanthropy from the wealthy nations of the West? Or learning the hard-won lessons of Acemoglu and Robinson's breakthrough ideas on the interplay between inclusive political and economic institutions? *Why Nations Fail* will change the way you look at—and understand—the world.

No Shortcuts to Progress Goran Hyden,Göran Hydén.1983-01-01

Pan-African Banks Mr. Charles Enoch,Mr. Paul Henri Mathieu,Mr. Mauro Mecagni,Mr. Jorge Iván Canales Kriljenko.2015-04-30 Pan-African banks are expanding rapidly across the continent, creating cross-border networks, and having a systemic presence in the banking sectors of many Sub-Saharan African countries. These banking groups are fostering financial development and economic integration, stimulating competition and efficiency, introducing product innovation and modern management and information systems, and bringing higher skills and expertise to host countries. At the same time, the rise of pan-African banks presents new challenges for regulators and supervisors. As networks expand, new channels for transmission of macro-financial risks and spillovers across home and host countries may emerge. To ensure that the gains from cross border banking are sustained and avoid raising financial stability risks, enhanced cross-border cooperation on regulatory and supervisory oversight is needed, in particular to support effective supervision on a consolidated basis. This paper takes stock of the development of pan-African banking groups; identifies regulatory, supervisory and resolution gaps; and suggests how the IMF can help the authorities address the related challenges.

Does What You Export Matter? Daniel Lederman,William Maloney.2012-06-18 Does what economies export matter for development? If so, can industrial policies improve on the export basket generated by the market? This book approaches these questions from a variety of conceptual and policy viewpoints. Reviewing the theoretical arguments in favor of industrial policies, the authors first ask whether existing indicators allow policy makers to identify growth-promoting sectors with confidence. To this end, they assess, and ultimately cast doubt upon, the reliability of many popular indicators advocated by proponents of industrial policy. Second, and central to their critique, the authors document extraordinary differences in the performance of countries exporting seemingly identical products, be they natural resources or 'high-tech' goods. Further, they argue that globalization has so fragmented the production process that even talking about exported goods as opposed to tasks may be misleading. Reviewing evidence from history and from around the world, the authors conclude that policy makers should focus less on what is produced, and more on how it is produced. They analyze alternative approaches to picking winners but conclude by favoring 'horizontal-ish' policies—for instance, those that build human capital or foment innovation in existing and future products—that only incidentally favor some sectors over others.

Re-Inventing Africa's Development Jong-Dae Park.2018-12-31 This open access book analyses the development problems of sub-Sahara Africa (SSA) from the eyes of a Korean diplomat with knowledge of the economic growth Korea has experienced in recent decades. The author argues that Africa's development challenges are not due to a lack of resources but a lack of management, presenting an alternative to the traditional view that Africa's problems are caused by a lack of leadership. In exploring an approach based on mind-set and nation-building, rather than unity - which tends

to promote individual or party interests rather than the broader country or national interests – the author suggests new solutions for SSA's economic growth, inspired by Korea's successful economic growth model much of which is focused on industrialisation. This book will be of interest to researchers, policymakers, NGOs and governmental bodies in economics, development and politics studying Africa's economic development, and Korea's economic growth model.

The End of Poverty Jeffrey D. Sachs.2006-02-28 Book and man are brilliant, passionate, optimistic and impatient . . . Outstanding. —The Economist The landmark exploration of economic prosperity and how the world can escape from extreme poverty for the world's poorest citizens, from one of the world's most renowned economists Hailed by Time as one of the world's hundred most influential people, Jeffrey D. Sachs is renowned for his work around the globe advising economies in crisis. Now a classic of its genre, *The End of Poverty* distills more than thirty years of experience to offer a uniquely informed vision of the steps that can transform impoverished countries into prosperous ones. Marrying vivid storytelling with rigorous analysis, Sachs lays out a clear conceptual map of the world economy. Explaining his own work in Bolivia, Russia, India, China, and Africa, he offers an integrated set of solutions to the interwoven economic, political, environmental, and social problems that challenge the world's poorest countries. Ten years after its initial publication, *The End of Poverty* remains an indispensable and influential work. In this 10th anniversary edition, Sachs presents an extensive new foreword assessing the progress of the past decade, the work that remains to be done, and how each of us can help. He also looks ahead across the next fifteen years to 2030, the United Nations' target date for ending extreme poverty, offering new insights and recommendations.

Congressional Record United States. Congress.1967

Poor Numbers Morten Jerven.2013-02-01 One of the most urgent challenges in African economic development is to devise a strategy for improving statistical capacity. Reliable statistics, including estimates of economic growth rates and per-capita income, are basic to the operation of governments in developing countries and vital to nongovernmental organizations and other entities that provide financial aid to them. Rich countries and international financial institutions such as the World Bank allocate their development resources on the basis of such data. The paucity of accurate statistics is not merely a technical problem; it has a massive impact on the welfare of citizens in developing countries. Where do these statistics originate? How accurate are they? *Poor Numbers* is the first analysis of the production and use of African economic development statistics. Morten Jerven's research shows how the statistical capacities of sub-Saharan African economies have fallen into disarray. The numbers substantially misstate the actual state of affairs. As a result, scarce resources are misapplied. Development policy does not deliver the benefits expected. Policymakers' attempts to improve the lot of the citizenry are frustrated. Donors have no accurate sense of the impact of the aid they supply. Jerven's findings from sub-Saharan Africa have far-reaching implications for aid and development policy. As Jerven notes, the current catchphrase in the development community is evidence-based policy, and scholars are applying increasingly sophisticated econometric methods-but no statistical techniques can substitute for partial and unreliable data.

Politics and the English Language George Orwell.2021-01-01 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the *Orwell's Essays* series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's *Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — Irish Times

African Economic Development Christopher Cramer,John Sender,Arkebe Oqubay.2020 This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries. Its starting point is the striking variation in African economic performance. Unevenness and inequalities form a central fact of African economic experiences. The authors highlight not only differences between countries, but also variations within countries, differences often organized around distinctions of gender, class, and ethnic identity. For example, neonatal mortality and school dropout have been reduced, particularly for some classes of women in some areas of Africa. Horticultural and agribusiness exports have grown far more rapidly in some countries than in others. These variations (and many others) point to opportunities for changing performance, reducing inequalities, learning from other policy experiences, and escaping the ties of structure, and the legacies of a colonial past. The book rejects teleological illusions and Eurocentric prejudice, but it does pay close attention to the results of policy in more industrialized parts of the world. Seeing the contradictions of capitalism for what they are – fundamental and enduring – may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth, linear process, or that it would be were certain impediments suddenly removed. The authors criticize a wide range of orthodox and heterodox economists, especially for their cavalier attitude to evidence. Drawing on their own decades of research and policy experience, they combine careful use of available evidence from a range of African countries with political economy insights (mainly derived from Kalecki, Kaldor and Hirschman) to make the policy case for specific types of public sector investment--

Global Trends 2040 National Intelligence Council.2021-03 The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come. -Global Trends 2040 (2021) *Global Trends 2040-A More Contested World* (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Socio-economic and cultural impacts of COVID-19 on Africa UNESCO.2020-07-21

Africans John Iliffe.2017-07-13 An updated and comprehensive single-volume history covering all periods from human origins to contemporary African situations.

A Little Life Hanya Yanagihara.2016-01-26 NEW YORK TIMES BESTSELLER • A stunning “portrait of the enduring grace of friendship” (NPR) about the families we are born into, and those that we make for ourselves. A masterful depiction of love in the twenty-first century. NATIONAL BOOK AWARD FINALIST • MAN BOOKER PRIZE FINALIST • WINNER OF THE KIRKUS PRIZE *A Little Life* follows four college classmates—broke, adrift, and buoyed only by their friendship and ambition—as they move to New York in search of fame and fortune. While their relationships, which are tinged by addiction, success, and pride, deepen over the decades, the men are held together by their devotion to the brilliant, enigmatic Jude, a man scarred by an unspeakable childhood trauma. A hymn to brotherly bonds and a masterful depiction of love in the twenty-first century, Hanya Yanagihara's stunning novel is about the families we are born into, and those that we make for ourselves. Look for Hanya Yanagihara's latest bestselling novel, *To Paradise*.

African Economic Outlook 2017 Entrepreneurship and Industrialisation African Development Bank,OECD,United Nations Development Programme.2017-05-22 The African Economic Outlook 2017 presents the continent's current state of affairs and forecasts its situation for the coming two years.
