From the Clarinet D'Amour to the Contra Bass Albert R.

Rice.2009-03-31 Following his much-acclaimed *The Baroque*

Clarinet and The Clarinet in the Classical Period, Albert R. Rice now turns his signature detailed attention to large clarinets - the clarinet d'amour, the basset horn, the alto clarinet, bass and

contra bass clarinets. Each chapter is devoted to a specific instrument, and offers a fascinating insider's look at its defining characteristics, a comprehensive history of its evolution,

meticulously-researched information on its makers and aspects of construction, and a thorough discussion of its music. Rice

illustrates how the introduction of large clarinets into chamber ensembles, wind bands, and opera orchestras was the result of

experiments meant to address specific musical needs. Along the way, he brings to life the musicians, virtuosi, soloists, and

orchestral and band musicians, as well as the instruments'

makers and the composers from J. C. Bach to Smetana who wrote for them. Based on careful study of primary sources - musical

compositions, patents, memoirs and diaries, and unfettered

access to historical instruments themselves--Rice's expert

presentation is nothing short of exhaustive. From the Clarinet

d'Amour to the Contrabass will engage all who love the clarinet and its music.

Smith, Jeffrey Spier, Karen Stamm, Lillian Bartlett Stoner, Alessandro Viscogliosi, Ute Wartenberg, Mark Wypyski, Paul Zanker. 2019-04-29 This handsome newly designed addition to The Metropolitan Museum of Art's symposia series furthers the study of one of the most influential but less known periods of Greek art and culture. It is based on papers given at a two-day scholarly symposium held in conjunction with the award-winning exhibition "Pergamon and the Hellenistic Kingdoms of the Ancient World," on view at the Metropolitan in 2016. The twenty diverse essays exemplify the international scope of the Hellenistic arts, which cover the three centuries between the death of Alexander the Great in 323 B.C. and the suicide of Cleopatra in 30 B.C. Subjects range from twenty-first century approaches to museum displays of archaeological material to the circulation of artists and works of art throughout the Mediterranean and the influence of Hellenistic art and its legacy in the ancient Roman world. Among the topics discussed are aspects of royal self-presentation and important elements of iconography and style in coins, gems, mosaics, sculpture, vessels, and wall paintings, in mediums including bronze, faience, glass, marble, silver, and terracotta. Authored by a number of internationally renowned scholars, the essays in this volume highlight the holdings of the Metropolitan and markedly demonstrate the artistic innovations and technical mastery of Hellenistic artists, offering new insights into the vitality and complexity of Hellenistic art. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana}

Mechanisms of Exchange .2013-04-15 Featuring eight innovative studies by prominent scholars of medieval art and architecture, this special issue of Medieval Encounters examines the specific means by which art and architectural forms, techniques, and ideas were transmitted throughout the medieval world (ca. 1000-1500). While focusing on the Mediterranean region, the collection also includes essays that expand this geographic zone into a cultural and artistic one by demonstrating contact with near and distant neighbors, thereby allowing an expanded understanding of the interconnectedness of the medieval world. The studies are united by a focus on the specific mechanisms that enabled artistic and architectural interaction, as well as the individuals who facilitated these transmissions. Authors also consider the effects and collaboration of portable and monumental arts in the creation of intercultural artistic traditions. Contributors are: Justine Andrews, Maria Georgopoulou, Ludovico Geymonat, Heather E. Grossman, Eva Hoffman, Melanie Michailidis, Renata Holod, Scott Redford and Alicia Walker.

Müller. 2013-12 Unlike some other reproductions of classic texts (1) We have not used OCR (Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally

there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy. Marketing Maximilian Larry Silver.2022-06-14 Long before the photo op, political rulers were manipulating visual imagery to cultivate their authority and spread their ideology. Born just decades after Gutenberg, the Holy Roman Emperor Maximilian I (1459-1519) was, Larry Silver argues, the first ruler to exploit the propaganda power of printed images and text. Marketing Maximilian explores how Maximilian used illustrations and other visual arts to shape his image, achieve what Max Weber calls the routinization of charisma, strengthen the power of the Hapsburg dynasty, and help establish the Austro-Hungarian Empire. A fascinating study of the self-fashioning of an early modern ruler who was as much image-maker as emperor, Marketing Maximilian shows why Maximilian remains one of the most remarkable, innovative, and self-aggrandizing royal art patrons in European history. Silver describes how Maximilian--lacking a real capital or court center, the ability to tax, and an easily manageable territory--undertook a vast and expensive visual-media campaign to forward his extravagant claims to imperial rank, noble blood, perfect virtues, and military success. To press these claims, Maximilian patronized and often personally supervised and collaborated with the best printers, craftsmen, and artists of his time (among them no less than Albrecht Dürer) to plan and produce illustrated books, medals, heralds, armor, and an ambitious tomb monument.

Folding in Architecture Greg Lynn.2004-06-07 This seminal book from *Architectural Design* was originally published in 1993, at a time of crucial change and on the eve of the digital revolution. It brought together a series of essays that many

believe created the favourable environment in which computer-based design could thrive. Considered one of the most influential architecture publications of the 1990s, this book ranks as a classic and in itself is a crucial chapter of history, though one that has been out of print since 1999. This faithful reprinting includes a substantial new introductory essay by Mario Carpo, Head of the Study Centre at the Canadian Centre for Architecture, which examines the impact of the original texts and their ongoing significance. Thereafter, the book is true to its original content showcasing projects by ground-breaking architects such as Greg Lynn, Jeffrey Kipnis, Bahram Shirdel, Frank Gehry and Philip Johnson.

Medieval Worlds Arno Borst.1996-06-22 In Medieval Worlds:

Barbarians, Heretics, and Artists, medieval historian Arno Borst offers at once an imaginatively narrated tour of medieval society. Issues of language, power, and cultural change come to life as he examines how knights, witches and heretics, monks and kings,

women poets, and disputatious university professors existed in the medieval world. Clearly interested in the forms of medieval behavior which gave rise to the seeds of modern society, Borst focuses on three in particular that gave momentum to medieval religious, social, and intellectual movements: the barbaric, heretical, and artistic. Borst concludes by reflecting on his own life as a scholar and draws out lessons for us from the turbulence of the Middle Ages.

Europe in the Renaissance Bernard Aikema, Peter Burke. 2016
The Renaissance experienced some of the most important advances in human history: the invention of the printing press using movable letters, the West's discovery of a continent and the formulation of a new view of the earth. It was a time when people sought to solve the riddles of nature, experimented with alchemy, set out to develop a new medical science, conceived a new vision of humankind and created beauty in the form of pictures and architecture, sculpture and literature. All these discoveries and creations would have been unimaginable without cultural exchange. The Renaissance was an era of dialogue and new horizons in thinking over great distances and time. Based on numerous examples--works of art, instruments and everyday objects--this substantial publication invites readers to trace the various paths of transference. Renowned authors take us to antiquity and the Orient, to Italy and through half of Europe.

A Schoolboy's Diary and Other Stories Robert Walser. 2013-09-03
A Schoolboy's Diary brings together more than seventy of Robert Walser's strange and wonderful stories, most never before available in English. Opening with a sequence from Walser's first book, "Fritz Kocher's Essays," the complete classroom

assignments of a fictional boy who has met a tragically early death, this selection ranges from sketches of uncomprehending editors, overly passionate readers, and dreamy artists to tales of devilish adultery, sexual encounters on a train, and Walser's service in World War I. Throughout, Walser's careening, confounding, delicious voice holds the reader transfixed.

Painting on Light Barbara Butts, Lee Hendrix. 2001-03-01 The names Albrecht Dürer and Hans Holbein the Younger evoke the dazzling accomplishments of Renaissance panel painting and printmaking, but they may not summon images of stained glass. Nevertheless, Dürer, Holbein, and their southern German and Swiss contemporaries designed some of the most splendid works in the history of the medium. This lavish volume is a comprehensive survey of the contribution to stained glass made by these extraordinarily gifted draftsmen and the equally talented glass painters who rendered their compositions in glass. Included are discussions of both monumental church windows and smaller-scale stained-glass panels made for cloisters, civic buildings, residences, and private chapels. The subjects of these rarely seen drawings and panels range from religious topics to secular themes, including love, planets, hunts, and battles. Focusing on stained glass produced in Germany and Switzerland from about 1495 to 1530, *Painting on Light* includes drawings by Dürer, Holbein, Albrecht Altdorfer, Hans Baldung Grien, Jörg Breu the Elder, Hans Burgkmair, Urs Graf, Hans von Kulmbach, Hans Leu the Younger, Niklaus Manuel Deutsch, Hans Schäufelein, Hans Weiditz, and others. This informative book is published in conjunction with an exhibition at the Getty Museum from July 11 through September 24, 2000, and from November 7, 2000, to January 4, 2001, at the Saint Louis Art Museum.

European Drawings 2 George R. Goldner, Lee Hendrix, Kelly

Pask.1992-10-08 The Getty Museum's collection of drawings was

begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in English and Italian editions), the text is here organized first by national school, then alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography.

German Histories in the Age of Reformations, 1400-1650

Thomas A. Brady, Thomas A. Brady Jr..2009-07-13 This book studies the connections between the political reform of the Holy Roman Empire and the German lands around 1500 and the sixteenth-century religious reformations, both Protestant and Catholic. It argues that the character of the political changes (dispersed sovereignty, local autonomy) prevented both a general reformation of the Church before 1520 and a national reformation thereafter. The resulting settlement maintained the public peace through politically structured religious communities (confessions), thereby avoiding further religious strife and fixing the confessions into the Empire's constitution. The Germans' emergence into the modern era as a people having two national religions was the reformation's principal legacy to modern Germany.

Island Rivers John R. Wagner, Jerry K. Jacka. 2018-06-19

Anthropologists have written a great deal about the coastal adaptations and seafaring traditions of Pacific Islanders, but have had much less to say about the significance of rivers for Pacific island culture, livelihood and identity. The authors of this collection seek to fill that gap in the ethnographic record by drawing attention to the deep historical attachments of island communities to rivers, and the ways in which those attachments are changing in response to various forms of economic development and social change. In addition to making a unique contribution to Pacific island ethnography, the authors of this volume speak to a global set of issues of immense importance to a world in which water scarcity, conflict, pollution and the degradation of riparian environments afflict growing numbers of people. Several authors take a political ecology approach to their topic, but the emphasis here is less on hydro-politics than on the cultural meaning of rivers to the communities we describe. How has the cultural significance of rivers shifted as a result of colonisation, development and nation-building? How do people whose identities are fundamentally rooted in their relationship to a particular river renegotiate that relationship when the river is dammed to generate hydro-power or polluted by mining activities? How do blockages in the flow of rivers and underground springs interrupt the intergenerational transmission of local ecological knowledge and hence the ability of local communities to construct collective identities rooted in a sense of place?
