Safety Study United States. National Transportation Safety Board.2005 The goal of this National Transportation Safety Board study was to better understand the risk factors associated with

accidents that occur in weather conditions characterized by IMC or poor visibility (weather-related accidents). The study accomplished this goal using the case control methodology, which compared a group of accident flights to a matching group of nonaccident flights to identify patterns of variables that distinguished the two groups from each other. This methodology expands on previous Safety Board efforts that have typically concentrated on summaries of accident cases. For this study, Safety Board air safety investigators (ASI) collected data from 72 GA accidents that occurred between August 2003 and April 2004. The Crash of Delta Flight 723 Paul D. Houle.2021-12-02 At the height of the Watergate scandal, Delta Flight 723 crashed into a fog-shrouded seawall at the end of Runway 4R at Logan Airport in Boston. While this incident and Watergate seemed unrelated at first, President Richard Nixon and his subordinates' actions during Watergate interfered with the ability of the National Transportation Safety Board to properly investigate the crash. It wasn't until three court cases, a federal investigation, congressional hearings, as well as a state investigation, when the true cause of the accident was exposed ten years later. This is also the story of Air Force Sergeant Leopold Chouinard and his incredible fight for survival. Chouinard survived the initial impact of the crash, only to suffer third and fourth degree burns on the majority of his body. Doctors fought against incredible odds to try and save Chouinard's life. For 134 days, Leo Chouinard defied all expectations as his doctors and nurses applied the latest advancements in burn treatments to save him from a non-survivable accident. They nearly succeeded. Through interviews with Chouinard's family, his physicians, and the NTSB's investigation, comes a story of corruption, determination, and vindication as well as the answer to what really caused that crash at Logan airport.
