ELECTRONIC DEVICES AND CIRCUITS I. J. NAGRATH.2007-09-13 Designed specifically for undergraduate students of Electronics and Electrical Engineering and its related disciplines, this book offers an excellent coverage of all essential topics and provides a solid foundation for analysing electronic circuits. It covers the course named Electronic Devices and Circuits of various universities. The book will also be useful to diploma students, AMIE students, and those pursuing courses in B.Sc. (Electronics) and M.Sc. (Physics). The students are thoroughly introduced to the full spectrum of fundamental topics beginning with the theory of semiconductors and p-n junction behaviour. The devices treated include diodes, transistors—BJTs, JFETs and MOSFETs—and thyristors. The circuitry covered comprises small signal (ac), power amplifiers, oscillators, and operational amplifiers including many important applications of those versatile devices. A separate chapter on IC fabrication technology is provided to give an idea of the technologies being used in this area. There are a variety of solved examples and applications for conceptual understanding. Problems at the end of each chapter are provided to test, reinforce and enhance learning.

2016 Global hunger index von Grebmer, Klaus,Bernstein, Jill,Nabarro, David,Prasai, Nilam,Amin, Shazia,Yohannes, Yisehac,Sonntag, Andrea,Patterson, Fraser,Towey, Olive,Thompson, Jennifer.2016-10-11 The 2016 Global Hunger Index (GHI) presents a multidimensional measure of national, regional, and global hunger, focusing on how the world can get to Zero Hunger by 2030. The developing world has made substantial progress in reducing hunger since 2000. The 2016 GHI shows that the level of hunger in developing countries as a group has fallen by 29 percent. Yet this progress has been uneven, and great disparities in hunger continue to exist at the regional, national, and subnational levels. Levels of hunger are still serious or alarming in 50 countries. The highest hunger levels are still found in Africa south of the Sahara and South Asia. Although GHI scores for these two regions have declined over time, the current levels remain close to the alarming category. Africa south of the Sahara has achieved the largest absolute improvement since 2000 and South Asia has also seen a sizable reduction—but the decline in hunger must accelerate in these regions if the world is to achieve Zero Hunger by 2030. The 2016 report, with an essay from United Nations Special Adviser David Nabarro, hails the new paradigm of international development proposed in the United Nations' 2030 Agenda for Sustainable Development, which envisages Zero Hunger by 2030, as one goal among 17, in a holistic, integrated, and transformative plan for the world. To get to Zero Hunger while leaving no one behind, the 2016 GHI highlights the importance of identifying the regions, countries, and populations that are most vulnerable to hunger and undernutrition so progress can be accelerated there.

Rethinking Empowerment Jane L. Parpart,Shirin M. Rai,Kathleen A. Staudt.2003-08-29 Rethinking Empowerment looks at the changing role of

women in developing countries and calls for a new approach to empowerment. An approach that adopts a more nuanced, feminist interpretation of power and em(power)ment, recognises that local empowerment is always embedded in regional, national and global contexts, pays attention to institutional structures and politics and acknowledges that empowerment is both a process and an outcome. Moreover, the book warns that an obsession with measurement rather than process can undermine efforts to foster transformative and empowering outcomes. It concludes that power must be restored as the centrepiece of empowerment. Only then will the term and its advocates provide meaningful ammunition for dealing with the challenges of an increasingly unequal, and often sexist, global/local world.

Disciplines of Education John Furlong, Martin Lawn. 2010-09-13 Are the disciplines of education ghosts of a productive past or creative and useful forms of inquiry? Are they in a demographic and organisational crisis today? The contribution of the 'foundation disciplines' of sociology, psychology, philosophy, history and economics to the study of education has always been contested in the UK and in much of the English-speaking world. But such debates are now being brought to a head in education by the demographic crisis. Recent research has shown that with the ageing population of education academics, in ten years' time, there could be very few disciplinary specialists left working within faculties of education in UK universities. But does that matter and is the UK no more than a special case? How does this 'crisis' look from Europe where the disciplines of education are more embedded, and from the USA with its more diverse higher education system? In this book, leading scholars - including A.H. Halsey, David Bridges, John Furlong, Hugh Lauder, Martin Lawn and Sheldon Rothblatt - consider the changing fortunes of each discipline as education moved away from the dominance of psychology in the 1930s, 1940s and 1950s as a result of the growing importance of the other disciplines and new social questions, and how the changing epistemological and political debates of the last twenty years have resulted in their progressive demise. Finally, the book confronts the question as to whether the disciplines have a place in education in the twenty-first century. The book brings the coming crisis into the public view and explores the issue of the past, current and future relevance of the disciplines to the study of education. It will be of interest to all international academics and researchers in the field of education and the contributory disciplines as well as to students on educational research methods courses.

Transforming Global Information and Communication Markets Peter F. Cowhey, Jonathan D. Aronson. 2012-01-13 Innovation in information and communication technology (ICT) fuels the growth of the global economy. How ICT markets evolve depends on politics and policy, and since the 1950s periodic overhauls of ICT policy have transformed competition and innovation. For example, in the 1980s and the 1990s a revolution in communication policy (the introduction of sweeping competition) also transformed the information market. Today, the diffusion of Internet, wireless, and broadband technology, growing modularity in the design of technologies, distributed computing infrastructures, and rapidly changing business models signal another shift. This pathbreaking examination of ICT from a political economy perspective argues that continued rapid innovation and economic growth require new approaches in global governance that will reconcile diverse interests and enable competition to flourish. The authors (two of whom were architects of international ICT policy reforms in the 1990s) discuss this crucial turning point in both theoretical and practical terms.

Climate Change and Air Pollution Rais Akhtar, Cosimo Palagiano. 2017-10-05 This book discusses regional and international climate-change, air-pollution and human-health scenarios. The research, from both industrialized and developing countries, focuses on region-specific perspectives of climate change impacts on air pollution. After analyzing the variations of climate data over recent decades, the authors consider the different effects of climate change on air pollution and health. As stressed by the IPCC, "pollen, smoke and ozone levels are likely to increase in a warming world, affecting the health of residents of major cities. Rising temperatures will worsen air quality through a combination of more ozone in cities, bigger

wild fires and worse pollen outbreaks,” according to a major UN climate report. The report follows the World Health Organization in finding that air pollution is the world’s greatest environmental health risk, killing 7 million people in 2014 (compared to 0.4 million deaths due to malaria). Deteriorating air quality will most affect the elderly, children, people with chronic ill-health and expectant mothers. Another report suggests that more than 5.5 million people die prematurely each year due to air pollution with over half of those deaths occurring in China and India. A study on the air pollution in the USA, suggests that more than half of US population lives in areas with potentially dangerous air pollution, and about six out of 10 of the top cities for air pollution in the USA are located in the state of California. In the face of future climate change, scientists have urged stronger emission controls to avoid worsening air pollution and the associated exacerbation of health problems, especially in more populated regions of the world. It is hoped that the implementation of the Paris Climate Agreement will help minimize air pollution. Additionally the authors consider the various measures that different countries and groups of countries, like the European Union, have adopted to mitigate the problems arising from climate change and to safeguard the health of population. The book examines the increasing incidence of diseases largely caused by climate change. The countries/regions covered in this study include the USA, Northern Europe (U.K.), Southern Europe (Italy), Canada, Australia, East Asia, Russia, Hong Kong, Taiwan, Thailand, Malaysia, Indonesia, India, South Africa, Mexico, Brazil, Caribbean countries, and Argentina.

ASEAN Corporate Governance Scorecard Asian Development Bank. 2014-06-01 Corporate governance principles provide guidance on how corporations should operate. Adoption of international corporate governance best practices leads to long-term sustainability and resilience, and can be a competitive tool to attract foreign investments. The Asian Development Bank, in partnership with the ASEAN Capital Markets Forum, have jointly developed the ASEAN Corporate Governance Scorecard, an assessment based on publicly available information and benchmarked against international best practices that encourage publicly listed companies to go beyond national legislative requirements. This report can be used by capital market regulators and other stakeholders as a reference to understand the current corporate governance standards across the region. It is also a useful diagnostic tool to guide improvement of corporate governance standards.

NASA System Safety Handbook Homayoon Dezfuli.2012-02-27 System safety is the application of engineering and management principles, criteria, and techniques to optimize safety within the constraints of operational effectiveness, time, and cost throughout all phases of the system life cycle. System safety is to safety as systems engineering is to engineering. When performing appropriate analysis, the evaluation is performed holistically by tying into systems engineering practices and ensuring that system safety has an integrated system-level perspective. The NASA System Safety Handbook presents the overall framework for System Safety and provides the general concepts needed to implement the framework. The treatment addresses activities throughout the system life cycle to assure that the system meets safety performance requirements and is as safe as reasonably practicable. This handbook is intended for project management and engineering teams and for those with review and oversight responsibilities. It can be used both in a forward-thinking mode to promote the development of safe systems, and in a retrospective mode to determine whether desired safety objectives have been achieved. The topics covered in this volume include general approaches for formulating a hierarchy of safety objectives, generating a corresponding hierarchical set of safety claims, characterizing the system safety activities needed to provide supporting evidence, and presenting a risk-informed safety case that validates the claims. Volume 2, to be completed in 2012, will provide specific guidance on the conduct of the major system safety activities and the development of the evidence.

Their studies are providing different perspectives and discourses on China. Chapters discover and explore common factors such as the presence of sizeable ethnic Chinese communities, historical and current interactions between China and Southeast Asia, and the diverse intellectual influences in the region. A novel insight into the study of China in Southeast Asia, this book will be of interest to academics in the fields of

Introduction to the Design and Behavior of Bolted Joints, Fourth Edition John H. Bickford.2007-08-24 Redesigned for increased accessibility, this fourth edition of the bestselling Introduction to the Design and Behavior of Bolted Joints has been divided into two separate but complementary volumes. Each volume contains the basic information useful to bolting experts in any industry, but because the two volumes are more clearly focused, they are easier and more efficient to use. The first volume, Non-Gasketed Joints, describes the design, behavior, misbehavior, failure modes, and analysis of the bolts and bolted joints that play a large, even ubiquitous, role in the myriad machines and structures that form our world. The author elucidates why proper bolt tension - often called preload - is critical to the safety and reliability of an assembled joint. He introduces many ways to create that preload as well as ways to measure or inspect for it, then covers how to design joints that are less apt to misbehave or fail, using the guidelines, procedures, and simple algebraic mathematics included in the text. The book provides numerous tables, charts, graphs, and appendices, giving you all the information and data required to design and use non-gasketed bolted joints. Now leaner and meaner, this new edition is better suited for classrooms as well as the practicing engineer.

Digital DNA Jonathan David Aronson, Peter F. Cowhey.2017 Innovation in information and production technologies is creating benefits and disruption, profoundly altering how firms and markets perform. Digital DNA provides an in depth examination of the opportunities and challenges in the fast-changing global economy and lays out strategies that countries and the international community should embrace to promote robust growth while addressing the risks of this digital upheaval. Wisely guiding the transformation in innovation is a major challenge for global prosperity that affects everyone. Peter Cowhey and Jonathan Aronson demonstrate how the digital revolution is transforming the business models of high tech industries but also of traditional agricultural, manufacturing, and service sector firms. The rapidity of change combines with the uncertainty of winners and losers to create political and economic tensions over how to adapt public policies to new technological and market surprises. The logic of the policy trade-offs confronting society, and the political economy of practical decision-making is explored through three developments: The rise of Cloud Computing and trans-border data flows; international collaboration to reduce cybersecurity risks; and the consequences of different national standards of digital privacy protection. The most appropriate global strategies will recognize that a significant diversity in individual national policies is inevitable. However, because digital technologies operate across national boundaries there is also a need for a common international baseline of policy fundamentals to facilitate quasi-convergence of these national policies. Cowhey and Aronson's examination of these dynamic developments lead to a measured proposal for authoritative soft rules that requires governments to create policies that achieve certain objectives, but leaves the specific design to national discretion. These rules should embrace mechanisms to work with expert multi-stakeholder organizations to facilitate the implementation of formal agreements, enhance their political legitimacy and technical expertise, and build flexible learning into the governance regime. The result will be greater convergence of national policies and the space for the new innovation system to flourish.

The Future of the ASEAN Economic Integration Kiki Verico.2016-11-23 Verico discusses the ASEAN economic integration from dual perspectives of time span (trade, investment and finance) and framework (bilateral, sub-regional, regional and regional plus). The work is a

comprehensive study of the integration in the wake of the ASEAN Economic Community (AEC)'s inauguration in late 2015. Examining various economic agreement levels from the ASEAN Free Trade Area (AFTA), Bilateral Free Trade Agreement (BFTA) and the AEC to financial integration in ASEAN, Verico attempts to envisage the future of ASEAN in completing its regional economic integration from trade to investment and finance. Verico argues that, in the absence of a customs union, ASEAN must utilize the open-regionalism frameworks of the ASEAN Plus One, ASEAN Plus Three, Regional Comprehensive Economic Partnership and others in order to shift its economic integration level in this way.

Economic Growth Versus the Environment J. Cherni.2002-04-19 Judith A. Cherni presents a critical text of interdisciplinary research and a theoretical argued case for analyzing a physical/social problem with a political economic approach. The author identifies the convergence of global economic growth trends and the localization of environmental and health risks. Backed by scientific findings, she challenges the exclusive use of the natural sciences for explanation. Drawing also on participatory knowledge of local residents, she uses an original database of a large household survey in Houston, US.

Technology Offsets in International Defence Procurement Kogila Balakrishnan.2018-08-14 Technology offsets, a nonconventional international trade-financing tool, is used by governments (buyers) to obtain industrial and technological benefits from companies (sellers) as part of international procurement. Offsets deals involve billions of dollars and this practice exists in around 80 countries around the world. Though offsets is a popular practice in defence, it is increasingly gaining popularity in civil sectors. Offsets is often tainted by controversy and receives bad press. What then makes offsets popular? Governments claim that offsets delivers technology and knowledge transfer, skills in high technology sectors and employment, and offsets expands export opportunities through participation in OEM supply chains. For companies, offsets is mainly employed as a tool to obtain a competitive edge and win sales in international business. In the past, there have been mixed results of case studies on the impact of offsets successes and failures. Considering the mismanagement of globalisation, unfair trade agreements and current political and economic discontent, there is a stronger need for governments and companies to use vehicles such as offsets to create a relationship of trust and commitment for sustainable development. This book fills the gap in offsets and focuses on how to manage offsets more effectively by addressing issues of strategy, policy and implementation, technology management, governance and risk. *Technology Offsets in International Defence Procurement* is designed for those studying international procurement, international trade, international business, technology management, defence policy and industrial policy. This book will also be of interest to practitioners and policy makers in both government and industry.

The Regional Integration Manual Philippe De Lombaerde, Renato Flores, Lelio Iapadre, Michael Schulz.2012-03-29 The Regional Integration Manual brings together different methods for monitoring and analysing regional integration processes in a systematic way. Employing a multi-disciplinary approach, it seeks to provide officials in regional organisations, researchers in think tanks, academics and students worldwide with an accessible set of both quantitative and qualitative tools, useful in their day-to-day work. The Manual addresses an increasing demand for such tools, in a world where mechanisms and ideas for effective regional government and governance are in dire need, whereas the monitoring and analytical capabilities of official and non-governmental actors often lag behind. It also addresses a rapidly growing academic community studying the determinants, depth, speed and other characteristics of regional integration and co-operation. Employing a multi-disciplinary approach, *The Regional Integration Manual* will be of interest to scholars of governance and regional politics as well as policy-makers and those in regional organisations.

Life in Europe Under Climate Change Joseph Alcamo, Jorgen E. Olesen.2012-05-21 Life in Europe will indeed go on as the climate changes, but not in the same way as before. The air will be warmer, winds will change, patterns of rainfall and snowfall will alter, and sea level is likely to rise. These phenomena are already being seen. Europe will in the future experience marked changes in vegetation cover, increased floods along rivers and coastlines as well as more frequent droughts and forest fires, often leading to large societal costs. The changes will be minor in some cases, profound in others, but in any case, pervasive. This book uses the most up to date information issued by the IPCC (Intergovernmental Panel on Climate Change), and informs readers about these effects, as well as showing how Europe is contributing to attempts to slow the tempo of global climate change, and how it can adapt to the climate change that seems unavoidable. Life in Europe under Climate Change makes essential information on climate impacts in Europe accessible to a broad audience, including students, politicians, planners and members of non-governmental organizations.

Responsibilities and Functions of a Nuclear Energy Programme Implementing Organization International Atomic Energy Agency.2019-07-02 An important element of the milestones approach to introducing nuclear power is a mechanism to coordinate efforts among the many organizations and individuals who have roles to play in the process. This mechanism is referred to as a nuclear energy programme implementing organization (NEPIO). This publication describes a set of responsibilities, functions and activities that States can use as guidance for establishing a NEPIO and ensuring its effectiveness. This revision incorporates lessons learned from integrated nuclear infrastructure review missions and IAEA technical assistance activities. It attempts to clarify that there are many ways to structure a NEPIO and that each could result in the successful execution of all functions and activities. Several case studies are included. Consistent with the revision of IAEA Nuclear Energy Series No. NG-G-3.1 (Rev. 1) Milestones in the Development of a National Infrastructure for Nuclear Power published in 2015, this publication recognizes that the NEPIO plays an important and evolving role in each of the three phases of nuclear power infrastructure development.

ASEAN Post-50 Aida Idris, Nurliana Kamaruddin.2019-06-10 The first 50 years of ASEAN integration has brought peace and prosperity to the Southeast Asian region, while the next 50 will undoubtedly be fraught with unprecedented challenges. Today ASEAN not only has to contend with its own internal challenges arising from the highly diverse political, economic and socio-cultural systems of its member countries, it also has to deal with

external factors which include shifts in geostrategic balance, fraying global consensus on free trade, populism and xenophobia, climate change, digital revolutions and cybercrimes. Set against the above background, this edited collection considers some of the contemporary issues and challenges faced by ASEAN in its journey towards more cohesive and dynamic regional integration. Among the topics explored are ASEAN's evolving partnerships with its key strategic partners including China and the United States on economic policies and strategies, educational systems and frameworks, migration and environmental threats.
