*Hearing Health Care for Adults* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on Accessible and Affordable Hearing Health Care for Adults.2016-10-06 The loss of hearing - be it gradual or acute, mild or severe, present since birth or acquired in older age - can have significant effects on one's communication abilities, quality of life, social participation, and health. Despite this, many people with hearing loss do not seek or receive hearing health care. The reasons are numerous, complex, and often interconnected. For some, hearing health care is not affordable. For others, the appropriate services are difficult to access, or individuals do not know how or where to access them. Others may not want to deal with the stigma that they and society may associate with needing hearing health care and obtaining that care. Still others do not recognize they need hearing health care, as hearing loss is an invisible health condition that often worsens gradually over time. In the United States, an estimated 30 million individuals (12.7 percent of Americans ages 12 years or older) have hearing loss. Globally, hearing loss has been identified as the fifth leading cause of years lived with disability. Successful hearing health care enables individuals with hearing loss to have the freedom to communicate in their environments in ways that are culturally appropriate and that preserve their dignity and function. *Hearing Health Care for Adults* focuses on improving the accessibility and affordability of hearing health care for adults of all ages. This study examines the hearing health care system, with a focus on non-surgical technologies and services, and offers recommendations for improving access to, the affordability of, and the quality of hearing health care for adults of all ages.

**Understanding Deaf Culture** Paddy Ladd.2003-02-18 This book presents a 'Traveller's Guide' to Deaf Culture, starting from the premise that Deaf cultures have an important contribution to make to other academic disciplines, and human lives in general. Within and outside Deaf communities, there is a need for an account of the new concept of Deaf culture, which enables readers to assess its place alongside work on other minority cultures and multilingual discourses. The book aims to assess the concepts of culture, on their own terms and in their many guises and to apply these to Deaf communities. The author illustrates the pitfalls which have been created for those communities by the medical concept of 'deafness' and contrasts this with his new concept of "Deafhood", a process by which every Deaf child, family and adult implicitly explains their existence in the world to themselves and each other.

**When the Phone Rings, My Bed Shakes** Philip Zazove.1993 Despite his achievements in college, Zazove discovered that medical schools were not ready to welcome him with open arms. After enduring one rejection after another based upon his deafness and living with the frustration of seeing classmates with poorer records accepted at the same schools, he finally won entrance to Rutgers University Medical School. Again, he became one of the leaders in his class, making up for not hearing most of what was said in rounds with furious study, observation, and extra hard work.

**Sign Languages and Linguistic Citizenship** Ellen Foote. 2020-12-30 This critical ethnographic account of the Yangon deaf community in Myanmar offers unique insights into the dynamics of a vibrant linguistic and cultural minority community in the region and also sheds further light on broader questions around language policy. The book examines language policies on different scales, demonstrating how unofficial policies in the local deaf school and wider Yangon deaf community impact responses to higher level interventions, namely the 2007 government policy aimed at unifying the country's two sign languages. Foote highlights the need for a critical and interdisciplinary approach to the study of language policy, unpacking the

interplay between language ideologies, power relations, political and moral interests and community conceptualisations of citizenship. The study's findings are situated within wider theoretical debates within linguistic anthropology, questioning existing paradigms on the notion of linguistic authenticity and contributing to ongoing debates on the relationship between language policy and social justice. Offering an important new contribution to critical work on language policy, the book will be of particular interest to students and scholars in sociolinguistics, linguistic anthropology and language education.

**Sign Language Ideologies in Practice** Annelies Kusters, Mara Green, Erin Moriarty, Kristin Snoddon. 2020-08-10 This book focuses on how sign language ideologies influence, manifest in, and are challenged by communicative practices. Sign languages are minority languages using the visual-gestural and tactile modalities, whose affordances are very different from those of spoken languages using the auditory-oral modality.

**You Don't Know Everything, Jilly P! (Scholastic Gold)** Alex Gino. 2018-09-25 Alex Gino, the Lambda Literary Award-winning author of *Melissa*, is back with another sensitive tale based on increasingly relevant social justice issues. Jilly thinks she's figured out how life works. But when her sister, Emma, is born deaf, she realizes how much she still has to learn. The world is going to treat Jilly, who is white and hearing, differently from Emma, just as it will treat them both differently from their Black cousins. A big fantasy reader, Jilly makes a connection online with another fantasy fan, Derek, who is a Deaf, Black ASL user. She goes to Derek for help with Emma but doesn't always know the best way or time to ask for it. As she and Derek meet in person, have some really fun conversations, and become friends, Jilly makes some mistakes . . . but comes to understand that it's up to her, not Derek to figure out how to do better next time--especially when she wants to be there for Derek the most. Within a world where kids like Derek and Emma aren't assured the same freedom or safety as kids like Jilly, Jilly is starting to learn all the things she doesn't know--and by doing that, she's also working to discover how to support her family and her friends. With *You Don't Know Everything, Jilly P!*, award-winning author Alex Gino uses their trademark humor, heart, and humanity to show readers how being open to difference can make you a better person, and how being open to change can make you change in the best possible ways.

**Women and COVID-19** Mariam Seedat-Khan, Johanna O. Zulueta. 2023-09-29 *Women and COVID-19: A Clinical and Applied Sociological Focus on Family, Work and Community* focuses on women's lived experiences amid the pandemic, emphasising migrant labourers, ethnic minorities, the poor and disenfranchised, the incarcerated, and victims of gender-based violence, to explore the impact of the pandemic on women. The COVID-19 pandemic highlighted and exacerbated pervasive gender inequalities in homes, schools, and workplaces in the developed world and the Global South. Female workers, particularly those from poor or ethnic minority backgrounds, were often the first to lose their jobs amidst unprecedented layoffs and economic uncertainty. National lockdowns and widespread restrictions blurred the boundaries between work and home life and increased the burden of domestic work on women within patriarchal societies. This so-called 'new normal' in everyday life also exposed women to increased levels of

gender-based violence and the likelihood of contracting COVID-19 due to overcrowding. This edited volume includes contributions from leading applied and clinical sociologists working and living in Asia, Africa, Europe, and the Americas and gives a global overview of the impact of the pandemic on women. Each chapter adopts an applied and clinical sociological approach in analysing gendered vulnerabilities. The volume innovatively uses personal accounts, including narratives, interviews, autoethnographies, and focus group discussions, to explore women's lived experiences during the pandemic. This edited collection will greatly interest students, academics, and researchers in the humanities and social sciences with an interest in gender and the impact of the COVID-19 pandemic.

**Deaf Gain** H-Dirksen L. Bauman, Joseph J. Murray. 2014-10-15 Deaf people are usually regarded by the hearing world as having a lack, as missing a sense. Yet a definition of deaf people based on hearing loss obscures a wealth of ways in which societies have benefited from the significant contributions of deaf people. In this bold intervention into ongoing debates about disability and what it means to be human, experts from a variety of disciplines—neuroscience, linguistics, bioethics, history, cultural studies, education, public policy, art, and architecture—advance the concept of Deaf Gain and challenge assumptions about what is normal. Through their in-depth articulation of Deaf Gain, the editors and authors of this pathbreaking volume approach deafness as a distinct way of being in the world, one which opens up perceptions, perspectives, and insights that are less common to the majority of hearing persons. For example, deaf individuals tend to have unique capabilities in spatial and facial recognition, peripheral processing, and the detection of images. And users of sign language, which neuroscientists have shown to be biologically equivalent to speech, contribute toward a robust range of creative expression and understanding. By framing deafness in terms of its intellectual, creative, and cultural benefits, Deaf Gain recognizes physical and cognitive difference as a vital aspect of human diversity. Diversity in Deaf Education Marc Marschark, Venetta Lampropoulou, Emmanouil K. Skordilis. 2016-05-31 Deaf children are not hearing children who can't hear. Beyond any specific effects of hearing loss, as a group they are far more diverse than hearing peers. Lack of full access to language, incidental learning, and social interactions as well as the possibility of secondary disabilities means that deaf learners face a variety of challenges in academic domains. Technological innovations such as digital hearing aids and cochlear implants have improved hearing and the possibility of spoken language for many deaf learners, but parents, teachers, and other professionals are just now coming to recognize that there are cognitive, experiential, and social-emotional differences between deaf and hearing students likely to affect academic outcomes. Sign languages and schools and programs for deaf learners thus remain an important part of the continuum of services needed for this diverse population. Understanding such diversity and determining ways in which to accommodate them must become a top priority in educating deaf learners. Through the participation of

an international, interdisciplinary set of scholars, Diversity in Deaf Education takes a broad view of learning and academic progress, considering the whole child in the context of the families, languages, educational settings in which they are immersed. In adopting this perspective, the complexities and commonalities in the social, emotional, cognitive, and linguistic mosaic of which the deaf child is a part, are captured. It is only through such a holistic consideration of diverse children developing within diverse settings that we can understand their academic potentials.

Early Detection and Intervention in Audiology Katijah Khoza-Shangase, Amisha Kanji. 2021-02-01 A textbook with case studies for audiologists and speech pathologists to make recommendations for early detection and intervention of hearing impairments in the South African context Early hearing detection and intervention (EHDI) is the gold standard for any practicing audiologist, and for families of infants and children with hearing impairment. EHDI programs aim to identify, diagnose and provide intervention to children with hearing impairment from as early as six months old (as well as those at risk for hearing impairment) to ensure they develop and achieve to their potential. Yet EHDI remains a significant challenge for Africa, and various initiatives are in place to address this gap in transferring policy into practice within the southern African context. The diversity of factors in the southern African context presents unique challenges to teaching and research in this field, which has prompted this book project. The South African government's heightened focus on increasing access to health care which includes ongoing Early Childhood Development (ECD) programs, make this an opportune time for establishing and documenting evidence-based research for current undergraduate and postgraduate students. Early Detection and Intervention in Audiology: An African Perspective aims to address this opportunity. Grounded in an African context with detailed case studies, this book provides rich content that pays careful attention to contextual relevance and contextual responsiveness to both identification and intervention in hearing impairment. With diverse contributions from experts in local and international contexts, but always with an African perspective, this is textbook will be an invaluable resource for students, researchers and practitioners.

Disability and Popular Culture Katie Ellis. 2016-05-23 As a response to real or imagined subordination, popular culture reflects the everyday experience of ordinary people and has the capacity to subvert the hegemonic order. Drawing on central theoretical approaches in the field of critical disability studies, this book examines disability across a number of internationally recognised texts and objects from popular culture, including film, television, magazines and advertising campaigns, children's toys, music videos, sport and online spaces, to attend to the social and cultural construction of disability. While acknowledging that disability features in popular culture in ways that reinforce stereotypes and stigmatise, Disability and Popular Culture celebrates and complicates the increasing visibility of disability in popular culture, showing how popular culture can focus passion, create community and express defiance in the context of disability and social change. Covering a broad range of concerns that lie at the intersection of disability and cultural studies, including media representation, identity, the beauty myth, aesthetics, ableism, new media and sport, this book will appeal to scholars and students interested in the critical analysis of popular culture, across disciplines such as disability studies, sociology and cultural and media studies.

Research in Young Children's Literacy and Language Development Olivia N. Saracho. 2019-12-13 The importance of the early years in young children's lives and the rigid inequality in literacy achievement are a stimulating backdrop to current research in young children's language and literacy development. This book reports new data and empirical analyses that advance the theory of language and literacy, with researchers using different methodologies in conducting their study, with both a sound empirical underpinning and a captivating analytical rationalization of the results. The contributors to this volume used several methodological methods (e.g. quantitative, qualitative) to describe the complete concept of the

study; the achievement of the study; and the study in an appropriate manner based on the study's methodology. The contributions to this volume cover a wide range of topics, including dual language learners; Latino immigrant children; children who have hearing disabilities; parents' and teachers' beliefs about language development; early literacy skills of toddlers and preschool children; interventions; multimodalities in early literacies; writing; and family literacy. The studies were conducted in various early childhood settings such as child care, nursery school, Head Start, kindergarten, and primary grades, and the subjects in the studies represent the pluralism of the globe – a pluralism of language, backgrounds, ethnicity, abilities, and disabilities. This book was originally published as a special issue of *Early Child Development and Care*.

Hearing Loss and Healthy Aging National Research Council, Institute of Medicine, Division of Behavioral and Social Sciences and Education, Board on Health Sciences Policy, Forum on Aging, Disability, and Independence. 2014-07-30 Being able to communicate is a cornerstone of healthy aging. People need to make themselves understood and to understand others to remain cognitively and socially engaged with families, friends, and other individuals. When they are unable to communicate, people with hearing impairments can become socially isolated, and social isolation can be an important driver of morbidity and mortality in older adults. Despite the critical importance of communication, many older adults have hearing loss that interferes with their social interactions and enjoyment of life. People may turn up the volume on their televisions or stereos, miss words in a conversation, go to fewer public places where it is difficult to hear, or worry about missing an alarm or notification. In other cases, hearing loss is much more severe, and people may retreat into a hard-to-reach shell. Yet fewer than one in seven older Americans with hearing loss use hearing aids, despite rapidly advancing technologies and innovative approaches to hearing health care. In addition, there may not be an adequate number of professionals trained to address the growing need for hearing health care for older adults. Further, Medicare does not cover routine hearing exams, hearing aids, or exams for fitting hearing aids, which can be prohibitively expensive for many older adults. Hearing Loss and Healthy Aging is the summary of a workshop convened by the Forum on Aging, Disability, and Independence in January 2014 on age-related hearing loss. Researchers, advocates, policy makers, entrepreneurs, regulators, and others discussed this pressing social and public health issue. This report examines the ways in which age-related hearing loss affects healthy aging, and how the spectrum of public and private stakeholders can work together to address hearing loss in older adults as a public health issue.

*Train Go Sorry* Leah Hager Cohen. 1995-04-25 A stunning work of journalism and memoir that explores the intimate truths of the silent but articulate world of the deaf. In American Sign Language, train go sorry means missing the boat. Leah Hager Cohen uses the phrase as shorthand for the myriad missed connections between the deaf and the hearing. As she ushers readers into New York's Lexington School for the Deaf, Cohen (whose grandfather was deaf and whose father was the school's superintendent) she also forges new connections.

*The Education of d/Deaf and Hard of Hearing Children* Peter V. Paul.2020-02-12 A significant number of d/Deaf and hard of hearing (d/Dhh) children and adolescents experience challenges in acquiring a functional level of English language and literacy skills in the United States (and elsewhere). To provide an understanding of this issue, this book explores the theoretical underpinnings and synthesizes major research findings. It also covers critical controversial areas such as the use of assistive hearing devices, language, and literacy assessments, and inclusion. Although the targeted population is children and adolescents who are d/Dhh, contributors found it necessary to apply our understanding of the development of English in other populations of struggling readers and writers such as children with language or literacy disabilities and those for whom English is not the home

language. Collectively, this information should assist scholars in conducting further research and enable educators to develop general instructional guidelines and strategies to improve the language and literacy levels of d/Dhh students. It is clear that there is not a 'one-size-fits-all' concept, but, rather, research and instruction should be differentiated to meet the needs of d/Dhh students. It is our hope that this book stimulates further theorizing and research and, most importantly, offers evidence- and reason-based practices for improving language and literacy abilities of d/Dhh students.

**Transforming the Workforce for Children Birth Through Age 8** National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success. 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
