*The Silver Apples of the Moon* Jean Lenox Toddie.2006

*The Secret Influence of the Moon* Louis Proud.2013-12-01

The Moon is not a cold, dead rock but a rich, fascinating world just as alive as Earth • Investigates the Moon as the home of an alien intelligence who controls humanity • Examines several of NASA's Apollo missions and the findings they concealed • Reveals the many holes in the "Giant Impact" theory about the Moon's origins and the evidence for a hollow, artificial Moon • Explores the deep influence of the Moon on the collective mind of humanity and occult teachings about the Moon from the Qabbalah, tarot, and other sources Despite being the most prominent celestial body after the Sun, the Moon has many qualities that science has yet to explain. Lunar rock samples reveal the Moon once had a magnetic field like the Earth, and seismic experiments by NASA suggest the Moon is at least partially hollow. For centuries people have observed lights, moving clouds and shadows, and even the disappearance of entire craters via telescope. Apollo astronauts repeatedly felt the presence of a "non-human intelligence" during their Moon visits, and many indigenous traditions speak of malevolent visitors from the Moon. A growing body of astrophysical and geological evidence shows the Moon is not an entirely natural world--that someone or something altered it long ago. Louis Proud explores the phases and movements of the Moon along with its ancient and mysterious features--its craters, maria, rilles, tunnels, and domes. He examines several of NASA's Apollo missions, showing not that NASA faked the Moon expeditions but that they concealed what the astronauts found there. He explains the many holes in the commonly accepted "Giant Impact" theory of the Moon's origins and reveals the evidence for a hollow,

artificial Moon placed in orbit eons ago to observe Earth. Examining the deep influence of the Moon on the collective mind of humanity, Proud looks at what the Qabalah, the tarot, and other occult traditions say about the Moon and interprets G. I. Gurdjieff's teachings that "we are food for the Moon." He investigates the Moon as a gateway to another realm, as the Purgatory of Christianity, and as the home of an alien intelligence who controls and exploits humanity. Examining the Moon from both scientific and esoteric perspectives, Proud shows the Moon is not a cold, dead rock but a rich, fascinating world just as alive as Earth.

We all know the moon. We all have a relationship with it. The earliest people obeyed her orbit, timed their months and holidays and celebrations and agriculture to the moon; the echoes of that system are still visible today, though the connection to the moon is often forgotten. Sarah Faith Gottesdiener is the leader of a movement to remind us of that lineage, guiding our rhythms and our sleep, our energy and our emotions, reminding us of our humanity and our magic. In her self-published Many Moons Workbooks and Lunar Journals, as well as her sold-out classes, she has guided over 50,000 readers to a deeper relationship with the moon, and through it, with themselves. This evergreen book

will be an informative and comprehensive guide to lunar living, incorporating radical, self-empowering, and magical tools and resources for the beginner and experienced lunar-follower alike. Depending on where we are in our lives, depending on what we are feeling or what is happening around us, the moon allows us a space to invite ritual into our daily lives. The Moon Book will provide a framework on how to utilize the entire lunar cycle holistically, while offering ways for the reader to develop a personal relationship with their own cycles—energetic, personal, and emotional—through the lens of the moon’s phases.

*New and Full Moons 1001 B.C. to A.D. 1651* Herman Heine Goldstine.1973 Originally pub. in 1973; reprinted in 1994.

Presents tables giving the dates of all new and full moons during an historical era when these data were of considerable interest and importance. The longitudes of the moon at each of these times is also given, as is a consecutive enumeration of the conjunctions and a similar one of the oppositions. All dates are reckoned in the Julian calendar. These dates and times are calculated for an observer in Babylon, or equivalently Baghdad, since this location is fairly centrally located for the historians of the period. The time used is civil time and is based on a 24-hour clock with its origin at midnight. Since this vol. may be considered as a suppl. to Tuckerman's tables, all fundamental astronomical elements have been taken from them.

*Moon Lore* Elizabeth Pepper.2002 All hail to thee, Queen of heaven Thou showest two horns to mark six days, And on the seventh will divide thy crown in two. On the fourteenth day, turn thy full face unto us. Seven is the Moon's mystic number, because each one of its four phases is completed in seven days. Nineteen is a sacred number in Old Irish and Celtic lore, for the sequence of Moon phases within a single zodiac sign is repeated every 19 years. As both the largest and the brightest object in the night sky, and the only one to appear in phases, the Moon has been a rich source of myth for as long as there have been myth-makers.

Elizabeth Pepper's Moon Lore is a compendium of lunar tales, charms, chants, and curses from ancient time to the present.

**Wicca Moon Magic** Lisa Cunningham.2019-11-17 Do you want to know how the moon influence us?Do you want to learn how to read the moon cycles and to improve different aspect of your life?If you want to discover and learn the power of the moon and how to do spells and rituals, then keep reading... For centuries, even before man began recording the highlights of the events of his day, he has harbored a deep interest in the phenomenon of nature. And the fascinating thing in nature, as far as man has always been concerned, is the moon. Unlike the sun that always remains a large glowing ball in the sky, the moon changes in shape and size at seemingly random moments. There were also times when it disappeared from the sky from a few hours to a few days. The humankind now knows a lot more about the moon and how it works than he did in those days from long ago, but the moon is still an object of fascination. We still depend on the cycles of the moon for agriculture, sailing the high seas, and knowing when to work the best magic rituals. Wicca Moon Magic will explore everything you have always wanted to know about making magic by the light of the moon and how to make it the best magic possible. There is so much to discuss about the moon and magic, such as: The Moon Goddess The different herbs, flowers, and colors that will enhance your moon ritual workings The movement of the moon that rules the year of the Wiccan The moon is responsible for many of earth's basic functions As the moon takes on the different phases, you will learn which magic is best worked during each phase. You will see how Wiccans use the movement of the moon to mark major events in their year.
