**A Schoolboy's Diary and Other Stories** Robert Walser.2013-09-03 A Schoolboy's Diary brings together more than seventy of Robert Walser's strange and wonderful stories, most never before available in English. Opening with a sequence from Walser's first book, "Fritz Kocher's Essays," the complete classroom assignments of a fictional boy who has met a tragically early death, this selection ranges from sketches of uncomprehending editors, overly passionate readers, and dreamy artists to tales of devilish adultery, sexual encounters on a train, and Walser's service in World War I. Throughout, Walser's careening, confounding, delicious voice holds the reader transfixed.

**Im Fokus: Paläontologie** Nadja Podbregar, Dieter Lohmann.2013-10-19 Warum gibt es keine Mammuts mehr? Wen jagte der Tyrannosaurus rex? Und war der Neandertaler wirklich eine Sackgasse der Evolution? Um diese Fragen zu beantworten, müsste man eigentlich zurück in die Urzeit reisen können. Doch den Paläontologen gelingt es heute dank modernster Methoden auch ohne Zeitmaschine, aus fossilen Knochen, Pflanzenrelikten, aber auch Resten urzeitlicher DNA faszinierende Einblicke in die Tier- und Pflanzenwelt vergangener Epochen zu gewinnen. Dieses Buch stellt einige ihrer Erkenntnisse vor und erklärt unter anderem, warum Vögel eigentlich Dinosaurier sind, wie viel Wahrheit im Säbelzahnkater Diego aus dem Film „Ice Age“ steckt und was unsere Gene heute noch über unsere Vorfahren verraten.

**Health, Disease, and Illness** Arthur L. Caplan, James J. McCartney, OSA, Dominic A. Sisti.2004-06-17 In the 1850s, Drapetomania was the medical term for a disease found among black slaves in the United States. The main symptom was a strange desire to run away from their masters. In earlier centuries gout was understood as a metabolic disease of the affluent, so much so that it became a badge of uppercrust honor—and a medical excuse to avoid hard work. Today, is there such a thing as mental illness, or is mental illness just a myth? Is Alzheimer's really a disease? What is menopause—a biological or a social construction? Historically one can see that health, disease, and illness are concepts that have been ever fluid. Modern science, sociology, philosophy, even society—among other factors—constantly have these issues under microscopes, learning more, defining and redefining ever more exactly. Yet often that scrutiny, instead of leading toward hard answers, only leads to more questions. Health, Disease, and Illness brings together a sterling list of classic and contemporary thinkers to examine the history, state, and future of ever-changing concepts in medicine. Divided into four parts—Historical Discussions; Characterizing Health, Disease, and Illness; Clinical Applications of Health and Disease; and Normalcy, Genetic Disease, and Enhancement: The Future of the Concepts of Health and Disease—the reader can see the evolutionary arc of medical concepts from the Greek physician Galen of Pergamum (ca. 150 ce) who proposed that the best doctor is also a philosopher, to contemporary discussions of the genome and morality. The editors have recognized a crucial need for a deeper integration of medicine and philosophy with each other, particularly in an age of dynamically changing medical science—and what it means, medically, philosophically, to be human.

*Boundary Objects and Beyond* Geoffrey C. Bowker, Stefan Timmermans, Adele E. Clarke, Ellen Balka.2016-02-26 The multifaceted work of the late

Susan Leigh Star is explored through a selection of her writings and essays by friends and colleagues. Susan Leigh Star (1954–2010) was one of the most influential science studies scholars of the last several decades. In her work, Star highlighted the messy practices of discovering science, asking hard questions about the marginalizing as well as the liberating powers of science and technology. In the landmark work *Sorting Things Out*, Star and Geoffrey Bowker revealed the social and ethical histories that are deeply embedded in classification systems. Star's most celebrated concept was the notion of boundary objects: representational forms—things or theories—that can be shared between different communities, with each holding its own understanding of the representation. Unfortunately, Leigh was unable to complete a work on the poetics of infrastructure that further developed the full range of her work. This volume collects articles by Star that set out some of her thinking on boundary objects, marginality, and infrastructure, together with essays by friends and colleagues from a range of disciplines—from philosophy of science to organization science—that testify to the wide-ranging influence of Star's work. Contributors Ellen Balka, Eevi E. Beck, Dick Boland, Geoffrey C. Bowker, Janet Ceja Alcalá, Adele E. Clarke, Les Gasser, James R. Griesemer, Gail Hornstein, John Leslie King, Cheris Kramarae, Maria Puig de la Bellacasa, Karen Ruhleder, Kjeld Schmidt, Brian Cantwell Smith, Susan Leigh Star, Anselm L. *Provenance* Gail Feigenbaum, Inge Reist, Inge Jackson Reist. 2012 This volume of essays offers new arguments regarding the significance of the social biography of art and the transformative power of ownership. It realigns the traditional art-historical paradigm that focuses on the moment of an object's origin and instead considers the longue durée of ownership. Whereas the term provenance may call to mind little more than a list of owners or the legal questions raised by competing entitlement claims, the essays in this book demonstrate that a nuanced approach recuperates important, even dramatic, aspects of the history of art. The authors present a broad perspective on provenance, investigating examples from Europe, Asia, Africa, and the Americas, and from ancient archaeology to conceptual art. They explore how stories of ownership are attached to objects, analyze important distinctions between provenance and provenience, and show how provenance can be monetized, politicized, suppressed, or otherwise instrumentalized. --Page 4 of cover.
