Why Jane and John Couldn't Read--and how They Learned Rosalie Fink.2006 Although there is broad agreement about the major components of good reading instruction, many students continue to struggle with reading, and some never achieve high levels of literacy. This book presents an interest-driven model of reading that focuses on students' strengths and abilities, not their deficits.

The Gospel of Thomas and Plato Ivan Miroshnikov.2018-06-12 In *The Gospel of Thomas and Plato*, Ivan Miroshnikov offers the first systematic discussion of the Platonist impact on the Gospel of Thomas, arguing that Platonism is indispensable to making sense of those sayings that have long remained exegetical cruces.

Harmonising Demographic and Socio-Economic Variables for Cross-National Comparative Survey Research Jürgen H.P. Hoffmeyer-Zlotnik,Uwe Warner.2013-10-07 This book explains harmonisation techniques that can be used in survey research to align national systems of categories and definitions in such a way that comparison is possible across countries and cultures. It provides an introduction to instruments for collecting internationally comparable data of interest to survey researchers. It shows how seven key demographic and socio-economic variables can be harmonised and employed in European comparative surveys. The seven key variables discussed in detail are: education, occupation, income, activity status, private household, ethnicity, and family. These demographic and socio-economic variables are background variables that no survey can do without. They frequently have the greatest explanatory capacity to analyse social structures, and are a mirror image of the way societies are organised nationally. This becomes readily apparent when one attempts, for example, to compare national education systems. Moreover, a comparison of the national definitions of concepts such as private household reveals several different historically and culturally shaped underlying concepts. Indeed, some European countries do not even have a word for private household. Hence such national definitions and categories cannot simply be translated from one culture to another. They must be harmonised.

Expanding the Lexicon Sabine Arndt-Lappe,Angelika Braun,Claudine Moulin,Esme Winter-Froemel.2018-01-22 The creation of new lexical units and patterns has been studied in different research frameworks, focusing on either system-internal or system-external aspects, from which no comprehensive view has emerged. The volume aims to fill this gap by studying dynamic processes in the lexicon - understood in a wide sense as not being necessarily limited to the word level - by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse-related factors. The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers' motivations for innovating. Moreover, the diffusion and conventionalization of innovations will be addressed. In this way, the volume contributes to understanding the complex interplay of structural, cognitive and functional factors in the lexicon as a highly dynamic domain.

The Blue Soda Siphon Urs Widmer.2022-08-05 A magnificent example of Widmer's characteristic humor, literary genius, and unparalleled imagination. In the wildly entertaining novel *The Blue Soda Siphon*, the narrator unexpectedly finds himself back in the world of his childhood: Switzerland in the 1940s. He returns to his childhood home to find his parents frantic because their son is missing. Then, in another switch, the young boy that he was back then turns up in the present of the early 1990s, during the Gulf War, where he meets himself as an older man, and meets his adult self's

young daughter. These head-scratching, hilarious time shifts happen when both the adult narrator and his childhood self go to the cinema and see films, the subjects of which echo their own lives. Translated into English for the first time by Donal McLaughlin, this novel, in which the eponymous blue soda siphon bottle is a recurring symbol, is a magnificent example of Urs Widmer's characteristic humor, literary genius, and unparalleled imagination.

Visible Learning John Hattie. 2008-11-19 This unique and ground-breaking book is the result of 15 years research and synthesises over 800 meta-analyses on the influences on achievement in school-aged students. It builds a story about the power of teachers, feedback, and a model of learning and understanding. The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning. Areas covered include the influence of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning. A major message is that what works best for students is similar to what works best for teachers - an attention to setting challenging learning intentions, being clear about what success means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand. Although the current evidence based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution is a fascinating benchmark/dashboard for comparing many innovations in teaching and schools.

Political Memory in and After the Persian Empire Jason M. Silverman, Caroline Waerzeggers. 2015 Various disciplines that deal with Achaemenid rule offer starkly different assessments of Persian kingship. While Assyriologists treat Cyrus's heirs as legitimate successors of the Babylonian kings, biblical scholars often speak of a kingless era in which the priesthood took over the function of the Davidic monarch. Egyptologists see their land as uniquely independently minded despite conquests, while Hellenistic scholarship tends to evaluate the interface between Hellenism and native traditions without reference to the previous two centuries of Persian rule. This volume brings together in dialogue a broad array of scholars with the goal of seeking a broader context for assessing Persian kingship through the anthropological concept of political memory.

Farewell to Freedom Riccardo Baldissone. 2018-07-23 From Homeric poems to contemporary works, this book traces the words that express the various notions of freedom in Classical Greek, Latin, and medieval and modern European idioms. Examining writers from Plato and Aristotle to Nietzsche and Foucault, this theoretical mapping shows old and new boundaries of the horizon of freedom.

Comparative Oriental Manuscript Studies Comparative Oriental Manuscript Studies, COMSt. 2015-01-21 The present volume is the main achievement of the Research Networking Programme 'Comparative Oriental Manuscript Studies', funded by the European Science Foundation in the years 2009-2014. It is the first attempt to introduce a wide audience to the entirety of the manuscript cultures of the Mediterranean East. The chapters reflect the state of the art in such fields as codicology, palaeography, textual criticism and text editing, cataloguing, and manuscript conservation as applied to a wide array of language traditions including Arabic, Armenian, Avestan, Caucasian Albanian, Christian Palestinian Aramaic, Coptic, Ethiopic, Georgian, Greek, Hebrew, Persian, Slavonic, Syriac, and Turkish. Seventy-seven scholars from twenty-one countries joined their efforts to produce the handbook. The resulting reference work can be recommended both to scholars and students of classical and oriental studies and to all those involved in manuscript research, digital humanities, and preservation of cultural heritage. The volume includes maps, illustrations, indexes, and an extensive bibliography.

Aesthetics Today Stefan Majetschak, Anja Weiberg. 2017-06-26 Aesthetics is no longer merely the philosophy of perception and the arts. Nelson Goodman, Arthur Danto and others have contributed

to develop aesthetics from a field at the margins of philosophy to one permeating substantial areas of theoretical and practical philosophy. New approaches like environmental and ecological aesthetics widened the understanding of the aesthetics of nature. The contributions in this volume address the most important issues in contemporary aesthetics, many of them from a Wittgensteinian perspective. The 39th International Ludwig Wittgenstein Symposium, organized by the Austrian Ludwig Wittgenstein Society, was held at Kirchberg am Wechsel, Lower Austria, from August 7th to 13th 2016 and aimed at taking an inventory of important tendencies and positions in contemporary aesthetics. The volume includes a selection of the invited papers.

German and Dutch in Contrast Gunther Vogelaer, Dietha Koster, Torsten Leuschner. 2020-03-09
Designed as a contribution to contrastive linguistics, the present volume brings up-to-date the comparison of German with its closest neighbour, Dutch, and other Germanic relatives like English, Afrikaans, and the Scandinavian languages. It takes its inspiration from the idea of a Germanic Sandwich, i.e. the hypothesis that sets of genetically related languages diverge in systematic ways in diverse domains of the linguistic system. Its contributions set out to test this approach against new phenomena or data from synchronic, diachronic and, for the first time in a Sandwich-related volume, psycholinguistic perspectives. With topics ranging from nickname formation to the IPP (aka 'Ersatzinfinitiv'), from the grammaticalisation of the definite article to /s/-retraction, and from the role of verb-second order in the acquisition of L2 English to the psycholinguistics of gender, the volume appeals to students and specialists in modern and historical linguistics, psycholinguistics, translation studies, language pedagogy and cognitive science, providing a wealth of fresh insights into the relationships of German with its closest relatives while highlighting the potential inherent in the integration of different methodological traditions.

Interpreting the Comorbidity of Learning Disorders Pierluigi Zoccolotti, Maria De Luca, Kristina Moll, Karin Landerl. 2022-01-28

Demonstratives Holger Diessel. 1999 All languages have demonstratives, but their form, meaning and use vary tremendously across the languages of the world. This book presents the first large-scale analysis of demonstratives from a cross-linguistic and diachronic perspective. It is based on a representative sample of 85 languages. The first part of the book analyzes demonstratives from a synchronic point of view, examining their morphological structures, semantic features, syntactic functions, and pragmatic uses in spoken and written discourse. The second part concentrates on diachronic issues, in particular on the development of demonstratives into grammatical markers. Across languages demonstratives provide a frequent historical source for definite articles, relative and third person pronouns, nonverbal copulas, sentence connectives, directional preverbs, focus markers, expletives, and many other grammatical markers. The book describes the different mechanisms by which demonstratives grammaticalize and argues that the evolution of grammatical markers from demonstratives is crucially distinct from other cases of grammaticalization.

The Transcultural Critic: Sabahattin Ali and Beyond Seyda Ozil, Michael Hofmann, Jens Peter Laut, Yasemin Dayioglu-Yücel, Cornelia Zierau. 2017 The central theme of this volume is the work of Sabahattin Ali, the Turkish author and translator from German into Turkish who achieved posthumous success with his novel *Kürk Mantolu Madonna* (The Madonna in the Fur Coat). Our contributors analyze this novel, which takes place largely in Germany, and several other texts by Ali in the context of world literature, (cultural) translation, and intertextuality. Their articles go far beyond the intercultural love affair that has typically dominated the discussion of *Madonna*. Other

articles consider Zafer Şenocak's essay collection *Deutschsein* and transcultural learning through picture books. An interview with Selim Özdoğan rounds out the issue.

Teaching Reading Skills in a Foreign Language Christine Nuttall.1988

Amor Mundi J.W. Bernauer.2012-12-06 The title of our collection is owed to Hannah Arendt herself. Writing to Karl Jaspers on August 6, 1955, she spoke of how she had only just begun to really love the world and expressed her desire to testify to that love in the title of what came to be published as *The Human Condition*: Out of gratitude, I want to call my book about political theories *Amor Mundi*. In retrospect, it was fitting that *amor mundi*, love of the world, never became the title of only one of Arendt's studies, for it is the theme which permeates all of her thought. The purpose of this volume's articles is to pay a critical tribute to this theme by exploring its meaning, the cultural and intellectual sources from which it derives, as well as its resources for contemporary thought and action. We are privileged to include as part of the collection two previously unpublished lectures by Arendt as well as a rarely noticed essay which she wrote in 1964. Taken together, they engrave the central features of her vision of *amor mundi*. Arendt presented *Labor, Work, Action* on November 10, 1964, at a conference *Christianity and Economic Man: Moral Decisions in an Affluent Society*, which was held at the Divinity School of the University of Chicago.

You can download them directly, or have them sent to your preferred cloud storage service (Dropbox, Google Drive, or Microsoft OneDrive). Wikibooks is an open collection of (mostly) textbooks. Subjects range from Computing to Languages to Science; you can see all that Wikibooks has to offer in Books by Subject. Be sure to check out the Featured Books section, which highlights free books that the Wikibooks community at large believes to be "the best of what Wikibooks has to offer, and should inspire people to improve the quality of other books." As the name suggests, Open Library features a library with books from the Internet Archive and lists them in the open library. Being an open source project the library catalog is editable helping to create a web page for any book published till date. From here you can download books for free and even contribute or correct. The website gives you access to over 1 million free e-Books and the ability to search using subject, title and author. With more than 29,000 free e-books at your fingertips, you're bound to find one that interests you here. You have the option to browse by most popular titles, recent reviews, authors, titles, genres,

languages, and more. These books are compatible for Kindles, iPads and most e-readers. You'll be able to download the books at Project Gutenberg as MOBI, EPUB, or PDF files for your Kindle. Think of this: When you have titles that you would like to display at one of the conferences we cover or have an author nipping at your heels, but you simply cannot justify the cost of purchasing your own booth, give us a call. We can be the solution. Amazon's star rating and its number of reviews are shown below each book, along with the cover image and description. You can browse the past day's free books as well but you must create an account before downloading anything. A free account also gives you access to email alerts in all the genres you choose.
