**Being Modern** Olivier Michelon.2017 Published to accompany the first exhibition in Paris of highlights from The Museum of Modern Art, New York, Being Modern tells the stories behind 120 select artworks and design objects acquired by MoMA between the late 19th century and the present, providing a unique insight into the making of one of the greatest collections of modern and contemporary art in the world. Featuring work from all six of the Museum's departments, from Edward Hopper's House by the Railroad (1925) to the recently acquired original set of 176 digital emoji, the catalogue highlights the diversity and topicality of MoMA's collection, and provides a fresh perspective on the modernist canon. The book is organized chronologically according to the year each artwork entered MoMA's collection. Short texts by museum curators accompany each work, providing an overview of its significance as well as a behind-the-scenes look at the acquisitions process, often an untold aspect of a museum's history. Rather than presenting the collection as a flawlessly structured, stable entity, the book reveals its complex evolution and wide-ranging scope,

demonstrating multiple ways of looking at MoMA's multidisciplinary collection.

The Rejection of Consequentialism Samuel Scheffler.1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

The Last Musketeer Jason.2008-01-17 After his existential thriller (Why Are You Doing This?), his Parisian famous-writers crime caper (The Left Bank Gang), and his time-travel story (I Killed Adolf Hitler), Jason's fourth full-color album may feature his loopyest premise yet. Set in the present, The Last Musketeer stars the by-now centuries old (for no explained reason...and it doesn't matter) musketeer Athos, who has been reduced to a suavely dressed but useless near-panhandler trading on his now almost extinct fame. (Aramis has forsaken his musketeering ways, and Porthos...well,

Porthos isn't around any more. Don't ask.) All this changes when one day the Martians attack Earth. Suddenly there is a need for swashes to be buckled, and Athos leaps back into the fray with a vengeance. Robots, evil alien emperors, beautiful alien princesses, rayguns vs. swords, treachery, secret corridors, insanely cool-looking robots...The Last Musketeer is vintage sci-fi adventure with a unique twist from an internationally acclaimed cartoonist.

Will he always be on the sidelines of life, assisting the great forces that be, or can he step into his own life's leading role? Laugh-out-loud funny, and searingly poignant, Byron Lane's A Star is Bored is a novel that, like the star at its center, is enchanting and joyous, heartbreaking and hopeful.

**Ichi-F** Kazuto Tatsuta.2017 On March 11, 2011, Japan suffered the largest earthquake in its modern history. The 9.0-magnitude quake threw up a devastating tsunami that wiped away entire towns, and caused, in the months afterward, three nuclear meltdowns at the Fukushima Daiichi Nuclear Plant. Altogether, it was the costliest natural disaster in human history. This is not the story of that disaster. This is the story of a man who took a job. Kazuto Tatsuta was an amateur artist who signed onto the dangerous task of cleaning up the Fukushima Daiichi Nuclear Plant, which the workers came to call Ichi-F. This is the story of that challenging work, of the trials faced by the local citizens, and of the unique camaraderie that built up between the mostly blue-collar workers who had to face the devious and invisible threat of radiation on a daily basis. After six months, Tatsuta's body had absorbed the maximum annual dose of radiation allowed by regulations, and he was forced to take a

break from the work crew, giving him the time to create this unprecedented, unauthorized, award-winning view of daily life at Fukushima Daiichi.
