Tip 61 - Behavioral Health Services for American Indians and Alaska Natives U.S. Department of Health and Human Services.2019-03-17 American Indians and Alaska Natives have consistently experienced disparities in access to healthcare services, funding, and resources; quality and quantity of services; treatment outcomes; and health education and prevention services. Availability, accessibility, and acceptability of behavioral health services are major barriers to recovery for American Indians and Alaska Natives. Common factors that influence engagement and participation in services include availability of transportation and child care, treatment infrastructure, level of social support, perceived provider effectiveness, cultural responsiveness of services, treatment settings, geographic locations, and tribal affiliations.

Global Mobile Satellite Communications Applications Stojce Dimov Ilcev.2017-11-11 This book discusses global mobile satellite communications (GMSC) for maritime, land (road and rail), and aeronautical applications. It covers how these enable connections between moving objects such as ships, road and rail vehicles and aircrafts on one hand, and ground telecommunications subscribers through the medium of communications satellites, ground earth stations, Terrestrial Telecommunication Networks (TTN), Internet Service Providers (ISP) and other wireless and landline telecommunications providers. The new edition covers new developments and initiatives that have resulted in land and aeronautical applications and the introduction of new satellite constellations in non-geostationary orbits and projects of new hybrid satellite constellations. The book presents current GMSC trends, mobile system concepts and network architecture using a simple mode of style with understandable technical information, characteristics, graphics, illustrations and mathematics equations. It represents telecommunications technique and technology, which can be useful for all technical staff on vessels at sea and rivers, on all types of land vehicles, on planes, on off shore constructions and for everyone possessing satellite communications handset phones. The first edition of Global Mobile Satellite

Communications (Springer, 2005) was split into two books for the second edition – one on applications and one on theory. This book presents global mobile satellite communications applications.

Real Prospects for Energy Efficiency in the United States

National Research Council,National Academy of

Engineering,National Academy of Sciences,America's Energy Future Panel on Energy Efficiency Technologies.2010-06-10

America's economy and lifestyles have been shaped by the low prices and availability of energy. In the last decade, however, the prices of oil, natural gas, and coal have increased dramatically, leaving consumers and the industrial and service sectors looking for ways to reduce energy use. To achieve greater energy efficiency, we need technology, more informed consumers and producers, and investments in more energy-efficient industrial processes, businesses, residences, and transportation. As part of the America's Energy Future project, Real Prospects for Energy Efficiency in the United States examines the potential for reducing energy demand through improving efficiency by using existing technologies, technologies developed but not yet utilized widely, and prospective technologies. The book evaluates technologies based on their estimated times to initial commercial deployment, and provides an analysis of costs, barriers, and research needs. This quantitative characterization of technologies will guide policy makers toward planning the future of energy use in America. This book will also have much to offer to industry leaders, investors, environmentalists, and others looking for a practical diagnosis of energy efficiency possibilities.

King of Clubs Jim Ducibella.2012-03-01 It began as a Depression-era, winner-take-all challenge between two Chicago stockbrokers, one of them a flamboyant daredevil with more guts

than money and the other with more money than sense. It erupted into a national news story, one never told in its entirety—until *King of Clubs: The Great Golf Marathon of 1938*. In September 1938, thirty-two-year-old J. Smith Ferebee agreed to play 600 holes of golf in eight cities, from Los Angeles to New York, over four consecutive days. The ordeal meant playing more than thirty-three rounds in just ninety-six hours. The stakes: Ferebee’s friend and former business partner Fred Tuerk agreed that if Ferebee succeeded, he would pay on Ferebee’s behalf a \$20,000 mortgage on 296 acres of waterfront Virginia land. If Ferebee lost, he would surrender to Tuerk his ownership stake in the property. Brokers on LaSalle Street in Chicago piled up bets. Before long, the marathon was estimated to be worth \$100,000, or well more than \$1 million today. Playing despite a severe leg injury, Ferebee faced one obstacle after another, including a gambler’s brazen sabotage attempt in Philadelphia. He started the morning rounds before dawn and ended the afternoon rounds in darkness, with lighting provided by spectators’ cars, local fire departments, or flares. Remarkably, Ferebee never lost a ball. Combining the appeal of *Seabiscuit* and *The Greatest Game Ever Played*, *King of Clubs* will amaze and entertain readers from opening drive to final putt.

arguments for the following propositions: Local economic development strategies in the United States should include extensive investments in high quality early childhood programs, such as prekindergarten (pre K) education, child care, and parenting assistance. Economic development policies should also include reforms in business tax incentives. But economic development benefitsChigher earnings per capita in the local communityCcan be better achieved if business incentives are complemented by early childhood programs. Economic development benefits can play an important role in motivating a grassroots movement for investing in our kids.

Proceedings of the 21st EANN (Engineering Applications of Neural Networks) 2020 Conference Lazaros Iliadis,Plamen Parvanov Angelov,Chrisina Jayne,Elias Pimenidis.2020-05-27 This book gathers the proceedings of the 21st Engineering Applications of Neural Networks Conference, which is supported by the International Neural Networks Society (INNS). Artificial Intelligence (AI) has been following a unique course, characterized by alternating growth spurts and “AI winters.” Today, AI is an essential component of the fourth industrial revolution and enjoying its heyday. Further, in specific areas, AI is catching up with or even outperforming human beings. This book offers a comprehensive guide to AI in a variety of areas, concentrating on new or hybrid AI algorithmic approaches with robust applications in diverse sectors. One of the advantages of this book is that it includes robust algorithmic approaches and applications in a broad spectrum of scientific fields, namely the use of convolutional neural networks (CNNs), deep learning and

LSTM in robotics/machine vision/engineering/image processing/medical systems/the environment; machine learning and meta learning applied to neurobiological modeling/optimization; state-of-the-art hybrid systems; and the algorithmic foundations of artificial neural networks.
