

Eu Sport Law And Policy Regulation Re Regulation

Research Handbook on EU Sports Law and Policy Jack Anderson, Richard Parrish, Borja García. 2018-07-27 The EU's influence on sport has traditionally focused on the socio-economic and cultural impact. This Research Handbook on EU Sports Law explores the development of the 'European dimension' in sport, and the concomitant legal issues including, competition law, state aid and free movement of persons. The application of such areas of EU law to sport and the influence of EU law on key policy issues such as, doping, match-fixing and governance, are detailed in this comprehensive collection. The topical chapters by experts in their field, also touch upon the future evolution of EU sports law.

Private Regulation and the Internal Market Mislav Mataija. 2016-03-10 How does EU internal market law, in particular the rules on free movement and competition, apply to private regulation? What issues arise if a bar association were to regulate advertising; when a voluntary product standard impedes trade; or when a sporting body restricts the cross-border transfer of a football player? Covering the EU's free movement and competition rules from a general and sector-specific angle, focusing specifically on the legal profession, standard-setting, and sports, this book is the first systematic study of EU economic law in areas where private regulation is both important and legally controversial. Mislav Mataija discusses how the interpretation of both free movement and competition rule adapts to the rise of private regulation, and examines the diminishing relevance of the public/private distinction. As private regulators take on increasingly important tasks, the legal scrutiny over their measures becomes broader and moves towards what Mataija describes as 'regulatory autonomy.' This approach broadly disciplines, but also recognizes the legitimacy of private regulators; granting them an explicit margin of discretion and focusing on governance and process considerations rather than on their impact on trade and competition. The book also demonstrates how the application of EU internal market law fits in the context of strategic attempts by the EU institutions to negotiate substantive reforms in areas where private regulation is pervasive. Surveying recent case law of the Court of Justice of the European Union and the practice of the European Commission, Mataija demonstrates how EU internal market law is used as a control mechanism over private regulators.

Sports Law in Slovakia Tomáš Gábriš. 2022-08-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Slovakia deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Slovakia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

EU Sports Law and Breakaway Leagues in Football Katarina Pijetlovic. 2015-02-02 Katarina Pijetlovic is the first author to address the issue of breakaway leagues in football and their treatment under EU law. In this book she guides the reader through EU sports law, the specificities of the sporting industry and the problems and power struggles in European football governance in the context of the breakaway threats by elite clubs. In order to analyse the legality of UEFA clauses that restrict the formation of such breakaway structures, the author first provides a progressive interpretation of the applicable EU sports law and an in-depth analytical review of EU sports cases decided under internal market and competition provisions, including a novel perspective on the UEFA home-grown rule and the Bosman case. Thereafter, she sets out an original theory of convergence between TFEU provisions on competition and the internal market in the light of sporting exceptions. Finally, in applying the legal principles thus outlined Katarina Pijetlovic explores the legality of the restrictive UEFA clauses and the case for the formation of alternative leagues in European football under EU sports law. A number of surprising outcomes emerge from this analytical process. Conversely, she also tests the largely neglected issue of the legality of forming a breakaway league by the European elite football clubs. The systematic way in which the reader is guided through EU sports law and the legal issues under consideration makes the book accessible for EU lawyers as well as non-EU sports lawyers, on both an academic and a practitioner's level. Katarina Pijetlovic holds licentiate and doctoral degrees in EU sports law from the University of Helsinki. The book appears in the ASSER International Sports Law Series, under the editorship of Dr. David McArdle, Prof. Ben Van Rompuy and Marco van der Harst LL.M.

The EU in International Sports Governance A. Geeraert. 2016-04-12 This book demonstrates that the European Union (EU) can curtail the autonomy of FIFA and UEFA by building upon insights from the principal-agent model. The author argues that EU institutional features complicate control, but do not render the EU powerless, and that FIFA and UEFA can deploy a variety of strategies to mitigate control.

Professional Sport in the EU: Regulation and Re-Regulation Andrew Caiger. 2001-03-07 This book comes at a critical time for the future development of sports law. It examines key issues of both contemporary and future importance to the administration of sporting activity in the European Union. The book is particularly pertinent coming at a time when European Community law is playing a key role in the restructuring of football's transfer system. This forms only one small, though highly significant, part of the fundamental shift that has taken place in European professional sport; away from the self-regulatory autonomy of sporting bodies towards a system more rigidly codified and governed by main stream legal norms and rules. The law, in particular the economic freedoms provided for under the Treaty of Rome, has become a key weapon in the armoury of those who wish to exploit sport to its full commercial potential, free of self-regulatory constraints. It is not only those desirous of exploiting the economic potential of sport, who have made use of European Community law. As sport has become increasingly commercialised and commodified, it has also attracted the attention of the institutions of the Community, which have been keen to ensure that sports regulations adhere to Community law.

The Council of Europe and Sport Robert C.R. Siekmann, Janwillem Soek. 2007 With a Foreword by Dr Ralf-René Weingärtner, Director for Youth and Sport, Council of Europe, Strasbourg The Council of Europe is unquestionably the body that has made the most substantial contribution to paving the way for a European sports model. The Council of Europe was the first international intergovernmental organisation to take initiatives to establish legal instruments, and to offer an institutional framework for the development of sport at European level. The first stage of the Council of Europe's work in this field was marked by the adoption of the Committee of Ministers' Resolution on Doping of Athletes (1967). The extensive work of the Council of Europe on sport is evident through its main instruments on sport, such as the European Sports Charter, the Code of Sports Ethics, the European Convention on Spectator Violence, and the Anti-Doping Convention. Sport co-operation within the Council of Europe is organised in partnership with national governmental and non-governmental bodies. The Council of Europe and Sport: Basic Documents is the second volume in the Asser series of collections of documents on international sports law, containing material on the intergovernmental (inter-state) part of international sports law. The European Union and Sport: Legal and Policy Documents was the first volume devoted to the European Union. In previous other publications, non-governmental materials, i.e. statutes and constitutions, doping rules and regulations, arbitral and disciplinary rules and regulations of the international sports organisations were published. The book provides an invaluable source of reference for governmental and

sports officials, legal practitioners and the academic world. With the increasing public interest in the legal aspects of sports, this collection of documents is a timely and welcome contribution to enhancing the accessibility of basic texts on international sports law and policy.

EU, Sport, Law and Policy Simon Gardiner, Richard Parrish, Robert C. R. Siekmann. 2009 With a Foreword by Dr Michal Krejza, Head of Sport Unit, Directorate-General for Education and Culture, European Commission, Brussels Much has changed since the publication of *Professional Sport in the EU: Regulation and Re-regulation* (edited by Andrew Caiger and Simon Gardiner, The Hague, T.M.C. Asser Press 2000). The present book explores new territory and its scope and tone reflect the maturity of the discipline of EU sports law and policy. The book seeks to balance contributions from established authorities and the best of the new generation of sports law and policy academics. New theoretical insights are revealed which accompany in particular two further sections dealing first with governance and regulatory issues (also including freedom of movement and competition law issues) and second with questions of representation. The issue of the representation of stakeholders within sports governance structures (Social Dialogue between employers/clubs and employees/players) is arguably the most significant development in the last decade and the inclusion of the word 'Representation' in the title is merited. Contributions on anti-doping, football hooliganism and sports betting are added to the book. The editing team consisted of Simon Gardiner, Leeds Metropolitan University, United Kingdom, Richard Parrish, Edge Hill University, Ormskirk, United Kingdom, and Robert Siekmann, ASSER International Sports Law Centre, The Hague, The Netherlands. This book appears in the ASSER International Sports Law Series, under the editorship of Robert Siekmann and Janwillem Soek.

The Legacy of Bosman Antoine Duval, Ben Van Rompuy. 2016-05-25 In December 1995, the Court of Justice of the European Union delivered its judgment in its most famous case to date: the Bosman case. Twenty years later, this book explores in detail how this landmark judgment legally and politically transformed the relationship between the European Union and sport. Written by leading academics in the field, the ten contributions in this book reflect on how Bosman fundamentally shaped the application of EU law to sport and its transformative effects on sports governance. The book's innovative perspectives on the Bosman ruling makes it important reading for scholars, practitioners and policy-makers concerned with EU law and Sports law. With a foreword by Prof. Dr. Carl Otto Lenz, Advocate General at the Court of Justice in the Bosman-case. Dr. Antoine Duval is Senior Researcher for International and European Sports Law at the T.M.C. Asser Instituut in The Hague. He holds a Ph.D. on the interaction between Lex Sportiva and EU Law from the European University Institute in Florence, where he was the conveyor of the Transnational Law Working Group. Prof. dr. Ben Van Rompuy is a senior researcher at the T.M.C. Asser Instituut, where he heads the ASSER International Sports Law Centre, and is Visiting Professor of Competition Policy at the Free University of Brussels (VUB). He holds a Ph.D. in law from the VUB and held visiting scholar positions at Georgetown University and New York University. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Ben Van Rompuy, Dr. Antoine Duval and Marco van der Harst LL.M.

Introduction to International and European Sports Law Robert C.R. Siekmann. 2012-04-23 The book is an introduction to sports law, in particular International (worldwide) and European (EU) sports law. The chapters are all put in the perspective of the innovative sports law doctrine that is developed and presented in the opening chapter on what sports law is. After a general coverage of the core concept of "sport specificity" (that is whether private sporting rules and regulations can be justified notwithstanding they are not in conformity with public law), the book covers the following specific main themes of International and European Sports Law (capita selecta): comparative sports law; competition law and sport; the collective selling of TV rights; sports betting; Social Dialogue in sport; sport and nationality; professional football transfer rules; anti-doping law in sport; transnational football hooliganism in Europe; international sports boycotts. In this book association football ("soccer") is the sport that is by far most on the agenda. It is the largest sport in the world and most popular all over the globe. The elite football in Europe is a day-to-day commercialized and professionalized industry, which makes it a perfect subject of study from an EU Law perspective.

Research Handbook of Employment Relations in Sport Michael Barry, James Skinner, Terry Engelberg. 2016-07-27 Employment relations, much discussed in other industries, has often been neglected in professional sports despite its unique characteristics. The book aims to explore in detail the unique nature of the employment relationship in professional sports and the sport industry.

Regulating International Sport Lloyd Freeburn. 2018-08-16 In *Regulating International Sport: Power, Authority and Legitimacy* Lloyd Freeburn provides a ground-breaking account of the legal basis of regulatory power in international sport and outlines the reforms necessary to give the regime legality and legitimacy.

Sports law and policy in the European Union Richard Parrish. 2013-07-19 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Adopting a distinctive legal and political analysis, this book argues that the EU is receptive to the sports sectors claims for special treatment before the law. The book investigates the birth of EU sports law and policy by examining significant court decisions, the possibility of exempting sport from EU law, sport and the EU treaty, and more.

Sports Law in Italy Michele Colucci, Giuseppe Candela, Salvatore Civale, Alessandro Coni, Durante Rapacciuolo. 2022-02-21 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Italy deals with the regulation of sports activity by both public authorities and private sports organizations. Lex Sportiva: What is Sports Law? Robert C.R. Siekmann, Janwillem Soek. 2012-01-19 The important theme "What is Sports Law?" was the topic of the international Conference on "The Concept of Lex Sportiva Revisited", which took place in Jakarta in late 2010. Academics and practitioners are still in debate to agree on this concept as is evident in this book. This book not only contains the worked out contributions of this Conference, but also other related chapters on the subject. It produces a reassessment of the content of Sports Law and its terminology keeping a close eye on the current literature. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

The European Union and Sport . 2011-07-11

Private Regulation and the Internal Market Mislav Mataija. 2016 How does EU internal market law, in particular the rules on free movement and competition, apply to private regulation? Through a close analysis of three case studies (sports, the legal profession, and standard-setting) this book studies how internal market law is used as a control mechanism over private regulators.

European Sports Law Stephen Weatherill. 2013-12-21 *European Sports Law: Collected Papers* 2nd edition contains the collected works (1989-2012) of Stephen Weatherill, Jacques Delors Professor of European Community Law, Somerville College, University of Oxford, United Kingdom, with an extensive introduction on the background and rationale for the selected papers. Stephen Weatherill is a leading academic and author on the subject of European Union law and professional sport. His work is of the highest academic standard and practice-oriented at the same time, which has a strong impact on major court cases and the development of international sports law in general. The updated 2nd edition is a vademecum for those involved with international sport and the challenges European law and sport provide and is an indispensable tool for administrators, managers,

researchers, academics, marketers, broadcasters, advisers and practitioners. The book appears in the ASSER International Sports Law Series (ISSN: 1874-6926), under the editorship of Dr. David McArdle, Dr. Ben Van Rompuy and Marco van der Harst LL.M.

Inspiration from Brussels? the European Union and Sport Jacob Kornbeck.2013 The name Brussels has become largely synonymous with the regulatory role of the EU. Yet Brussels is also a source of inspiration, especially in such areas where the EU is not empowered to regulate, and this side of Brussels is a rather different one. The emerging policy field of sport (which only recently got a legal base in the Treaty of Lisbon) illustrates the complementarity of inspiration versus regulation coming from Brussels. By drawing on two case studies - the fight against doping and the promotion of health-enhancing physical activity - the book shows that inspiration from Brussels takes on a special dimension in relation to sport and physical activity because sport policies are often heavily dependent on various, largely unquestioned arrangements which are in place at national, regional or local level. While EU-level regulation remains a possibility in certain cases, the scope for regulation is very limited. The scope for inspiration, by contrast, is almost endless. The sport sector is a natural candidate for inspiration and inspiration from Brussels can be an opportunity for renewal.

Sport and Brexit Jacob Kornbeck.2022-01-31 This is the first book to investigate the significance of Brexit for sport, with a particular focus on the regulatory and legal challenges that it poses, and the economic and political stresses that are likely to follow in its wake. Written by a team of leading researchers working across sport studies, legal studies and political science, and edited by an EU official with nearly two decades of experience working in EU sport policy, the book explains why regulation, and European dis-integration, matter to sport. It examines key topics including free movement, state aid and labour law, and considers the interests of key stakeholders from fans to football clubs to governing bodies. This is an essential reference for any advanced student, researcher, policy maker, administrator or industry professional working in sport, international law, political science, or international business and management.

European Sports Law Stephen Weatherill.2007 An examination of the special character of sport through European law's microscope reveals the scope of European trade law's adaptability to the particular context in which it is applied. The story of European sports law told through the case law illuminates the way in which European law is exploited by actors as a lever to prise open sometimes long-established organisational patterns. Sport has in recent years become more commercialised and more juridified too. The challenges to its self-regulatory preferences have strengthened and European law plays a significant part in this narrative. It is testimony to the pragmatic and creative approach of the European Commission and the European Court of Justice to the regulation of sport within the Single Market of the European Union, even though there is no specific provision in the EC Treaty giving the EU competence in the field of sport.

EU, Sport, Law and Policy Simon Gardiner, Richard Parrish, Robert C. R. Siekmann.2009-04-02 I am honoured to have been invited to write the foreword to this book. Since the publication of *Professional Sport in the EU: Regulation and Re-regulation* (edited by Andrew Caiger and Simon Gardiner, T.M.C. Asser Press 2000), there have been a number of developments in the European Union in sports law, both in the European Commission and the European Court of Justice. The most significant of these was probably the adoption by the Commission of the White Paper on Sport on 11 July 2007. The White Paper takes stock of the *acquis communautaire* - the rather prodigious body of European Law including judgements and preliminary rulings of the ECJ - in the sports field and sets out the position of the Commission on three significant aspects of European sport: its societal role, its economic dimension, and its governance. The White Paper also contains concrete proposals for further EU action as part of an Action Plan named after Pierre de Coubertin, the founder of the modern Olympic Games.

Athletes' Human Rights and the Fight Against Doping: A Study of the European Legal Framework Bart van der Sloot, Mara Paun, Ronald Leenes.2020-01-23 This book addresses the tension between, on the one hand, anti-doping practices and measures and, on the other hand, the fundamental rights of athletes. New techniques for testing and re-testing samples taken several years ago, have caused a push by the World Anti-Doping Agency and affiliated organizations for stricter rules, more doping tests and higher sanctions. Meanwhile, many States are adopting new laws and regulations to facilitate this push. At the same time, privacy and data protection have gained new momentum, especially in the European Union, where the General Data Protection Regulation came into effect in May 2018. It contains new obligations for data controllers and processors, rights for data subjects and sanctions for those violating the data protection rules. It is clear that gathering whereabouts information on athletes, collecting urine and blood samples, analyzing the samples and using the data distilled there from falls within the scope of the data protection framework. In addition, European athletes can invoke their rights to privacy, fair trial and freedom from discrimination as guaranteed by the European Convention on Human Rights. The book is aimed at professionals and organizations involved in sports and anti-doping and provides them with an opportunity to delve into and understand the rights guaranteed to athletes within the European context. Furthermore, it is equally relevant for privacy and data protection lawyers and human rights scholars wishing to familiarize themselves with the difficult questions relating to human rights protection in the world of sport and anti-doping. Written in accessible language, it should also prove useful to athletes and laymen wanting to learn about the rules applicable to almost everyone who practices sport, even at a local amateur level. Bart van der Sloot is senior researcher at Tilburg University, Tilburg, The Netherlands, Mara Paun is PhD researcher at Tilburg University, Tilburg, The Netherlands, Ronald Leenes is professor at Tilburg University, Tilburg, The Netherlands.

EU Antitrust Law and Sport Governance Jacob Kornbeck.2022-12-23 This is the first book to examine the significance of European Union antitrust law for the future of sport in Europe. Drawing on multi-disciplinary perspectives from law, economics, sport management and politics, and including case studies about the European Super League (ESL) and the International Skating Union, the book explores key themes in contemporary sport, including governance, ownership and control; the European sport model; the regulatory autonomy of sports organisations; and the relationship between public policy, the law and sport. This is important reading for any advanced student, researcher, policy-maker or practitioner with an interest in sport management, sport law, European law or European politics.

The Regulation of Sport in the European Union Barbara Bogusz, Adam Jan Cygan, Erika M. Szyszczak.2007-01-01 Globalization not only means fans watching distant contests and leagues exporting their products elsewhere; it also means the ability of knowledgeable academics and policy-oriented fans to learn about how others confront similar challenges. North Americans who realize on reflection that the way we do things is not necessarily natural or the only way will enjoy and profit from the insightful comparative essays in this book. The so-called European Model of Sport is quite different than our own. There are significant parallels between the European effort to distinguish sport and commerce and our own efforts in regard to big-time collegiate sports. The unusual (for North American fans of typical sports leagues) issues with regard to auto racing are quite instructive. A truly horizon-expanding work. Stephen F. Ross, Penn State Institute for Sports Law, Policy and Research, US The purpose of this book

is to examine, from an EU perspective, the numerous developments which have taken place in the regulation of sporting activity in the last decade. Uniquely, in addressing these developments, the book adopts an inter-disciplinary approach, involving law, economics and sociology. The chapters place the regulation of sport in the context of the EU regulatory structure which hitherto has emerged in a piece-meal fashion and thus warrants a more holistic approach. The chapters bring together several key themes which arise from the question of whether sport is special? This addresses a growing argument that sporting activity displays unique properties which require a distinct form of regulation that existing competition or free movement rules cannot provide. The book is divided into three parts which reflect the current policy, legislative and judicial discourses that exists in the regulation of sport. The Regulation of Sport in the European Union provides both an academic and practical review of EU law and policy as applied to sport, and as such, this comprehensive overview will be of great interest to EU law academics, economists and political scientists. It will also appeal to legal practitioners and to those with an interest in regulatory processes in the EU.

The European Union and Sport Robert C. R. Siekmann, Janwillem Soek. 2004-12-23 The present publication entitled *The European Union and Sport - Legal and Policy Documents* is the first volume in the Asser series of collections of documents on international sports law containing material on the intergovernmental (inter-state) part of international sports law. In the previous volumes, NGO material, i.e. statutes and constitutions, doping rules and regulations and arbitral and disciplinary rules of the international Olympic sports organisations were published. The texts in this book cover the period since the Walrave judgment, when the Court of Justice established that sport is subject to Community law to the extent that it constitutes an economic activity, up to the present time. The book provides a detailed insight in what could be called the *acquis communautaire sportive* for the present and future Member States. This *acquis* was developed over the years in numerous decisions and policy documents of the Council, the Commission, the European Parliament and the Court of Justice in particular. A reference book such as this is an extremely valuable tool for both legal practice and research purposes in the field of sport and the law, in this case: sport and European law and policy.

Sports Law Simon Gardiner, Roger Welch, Simon Boyes, Urvasi Naidoo. 2012-03-12 Long established as the market leading textbook on sports law, this much-anticipated new edition offers a comprehensive and authoritative examination of the legal issues surrounding and governing sport internationally. Locating the legal regulation of sport within an explicit socio-economic context, this refocused edition is divided into four core parts: Governance & Sport; Commercial Regulation; Sports Workplace; and Safety in Sport. Recent developments covered in this edition include: EU competition law interaction with sport under arts. 101 and 102 of the Treaty on the Functioning of the European Union; the current World Anti-Doping Agency code; analysis of the recent Court of Arbitration for Sport Jurisprudence; reforms of the transfer system in team sports; anti-discrimination provisions in sport; engagement with match fixing; a focus on the legal context of 2012 London Olympics. Essential reading for students studying sports law or sports-related courses, this textbook will also prove useful to sports law practitioners and sports administrators in need of a clear companion to the field.

Principles and Practice in EU Sports Law Stephen Weatherill. 2017 *Principles & Practice in EU Sports Law* provides an overview of EU Sports Law. In particular it assesses sporting bodies' claims for legal autonomy from the 'ordinary law' of states and international organisations. Sporting bodies insist on using their expertise to create a set of globally applicable rules which should not be deviated from irrespective of the territory on which they are applied. The application of the *lex sportiva*, which refers to the conventions that define a sport's operation, is analysed, as well as how this is used in claims for sporting autonomy. The *lex sportiva* may generate conflicts with a state or international institution such as the European Union, and the motives behind sporting bodies' claims in favour of the *lex sportiva*'s autonomy may be motivated by concern to uphold its integrity or to preserve commercial gain. Stephen Weatherill's text underlines the tense relationship between *lex sportiva* and national and regional jurisdictions which is exemplified with specific focus on the EU. The development of EU sports law and its controversies are detailed, reinforced by the example of relevant legal principles in the context of the practice of sports law. The intellectual heart of the text endeavours to make a normative assessment of the strength of claims in favour of sporting autonomy, and the comparison between different jurisdictions and sports is evident. Furthermore the enduring dilemma facing sports lawyers running throughout the text is whether sport should be regarded as special, and in turn how (far) its special character should be granted legal recognition --Front flap of book.

Social Capital and Sport Governance in Europe Margaret Groeneveld, Barrie Houlihan, Fabien Ohl. 2010-09-13 Although there is significant interest in the social role of sport in fostering civil society from both policymakers and academics, there is a lack of evidence of the specific role of sport federations in this system. This book critically presents the mechanisms and structures in a selection of sport federations within a variety of European countries that illuminate the varied relationships between not-for-profit sport federations, their members, governments and the citizens they represent. The contributors explore the contrasts and synergies between core social capital theoretical perspectives, and how these may be informed by and/or shape the realities of governance from different perspectives within the sport system.

Sports Betting: Law and Policy Paul M. Anderson, Ian S. Blackshaw, Robert C.R. Siekmann, Janwillem Soek. 2011-10-28 Gambling is a significant global industry, which is worth around 0.6% of world trade, that is, around US\$ 384 billion; and gambling on the outcome of sports events is a very popular pastime for millions of people around the world, who combine a bet with watching and enjoying their favourite sports. But, like any other human activity, sports betting is open to corruption and improper influence from unscrupulous sports persons, bookmakers and others. Sports betting in the last ten years or so has developed and changed quite fundamentally with the advent of modern technology - not least the omnipresence of the Internet and the rise of on-line sports betting. This book covers the law and policy on sports betting in more than forty countries around the world whose economic and social development, history and culture are quite different. Several chapters deal with the United States of America. This book also includes a review of sports betting under European Union (EU) Law. The book appears in the ASSER International Sports Law Series, under the editorship of Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

Sports Law in the European Union Andrea Cattaneo, Richard Parrish. 2020-09-22 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in the European Union deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in the European Union will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

Modern Sports Law Jack Anderson. 2010-10-26 The aim of this book is to provide an account of how the law influences the operation, administration and playing of modern sports. Although the book focuses on legal doctrine it has been written bearing in mind sport's historical, cultural, social and economic context, including the drama and colour of sport's major events and leading personalities. And although it is inevitably very much concerned with elite professional sports it is not dominated by them, and seeks to cover the widest possible range of sports, professional and amateur. Initially, the book addresses practical issues such as the structures of national and international sport, and examines the evolution of the body of law known as 'sports law'. Thereafter three main themes are identified: regulatory; participatory; and financial aspects of modern sport. The regulatory theme is dealt with in chapters considering the manner in which decisions of sports governing bodies may be challenged in the ordinary courts and the development of alternative dispute resolution mechanisms in sport. The participatory theme includes the legal regulation of doping and violence in sport, as well as the broader topic of tortious liability for sporting injuries. The financial theme, reflecting the enhanced commercialisation of sport at all levels, is developed in chapters concerning issues in applied contract and employment law for players and legal matters surrounding the organisation of major sports events. The conclusion summarises modern sport's experience of EU law, pointing the way to the future direction of sports law more generally. While the book is aimed primarily at students, and is designed to cover fundamental and topical areas of sports law (sports law in general; sports bodies and the courts; arbitration in sport; corruption; doping; violence; civil liability; discrimination; the commodification of modern sport; and the likely future of sports law), it should also prove of wider interest to practitioners, sports administrators and governing bodies; and though focused primarily on UK law it will also appeal to readers in Australia, Canada, New Zealand and the USA.

Sport Governance Neil King. 2016-07-22 Sport governance has become an increasingly widespread subject for research and teaching in sports studies. This engaging and accessible textbook examines the governance of sport organisations in a changing political, legal, financial and socio-cultural context. It explains how sport organisations are governed, explores the issues and challenges faced by those governing sport today, and looks ahead to how sport can be governed better in the future. Covering sport at all levels, from community organisations and national governing bodies to international organisations such as the IOC and FIFA, this text examines key components of governance, such as legal and regulatory frameworks, stakeholding, performance, compliance and the reform of the non-profit sector in line with corporate governance. This text is also timely given that recent corruption scandals in sport have served to highlight the central importance of good governance in sport. Its nine chapters draw upon more than thirty international case examples across a range of sports including athletics, football, gymnastics, hockey, rowing, rugby, badminton and tennis. With extensive lists of learning activities and resources, original empirical research and insights into the politics of policymaking and implementation, this textbook is essential reading for any course on sport governance, policy, management or development.

Sports Law in Poland Eligiusz Jerzy Krzeński. 2021-09-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Poland deals with the regulation of sports activity by both public authorities and private sports organizations. Practical Regulation of the Mobility of Sportsmen in the EU Post Bosman Stefaan Van den Bogaert. 2005-01-01 Sport is recreational, social, educational, healthful, and cultural. It has always been all of these things. Perhaps also it has always been political. In recent years, however, it has become something else besides: economic. Nowadays a lot of money is invested in sport, and sporting competitions often generate enormous amounts of revenue. This has entailed serious repercussions, especially for the relations between individual sportsmen/sportswomen and the sporting clubs and federations that act as brokers for their careers. Into this protected area for decades a closed shop now come the European institutions, especially the European Court of Justice and the European Commission, with the declared intention of ensuring respect for the exigencies of Community law while at the same time protecting the specificity and the integrity of sport. This important book presents an in-depth analysis of the viability under Community law of traditional sports regulations such as transfer rules and nationality clauses both sets of rules seriously compromised by the Bosman case of 1995. The author asks in particular whether certain rules elaborated by sporting associations can withstand the test of compatibility with the free movement provisions of the EC Treaty. In the light of Bosman, he also rigorously investigates: whether valuable arguments exist for keeping certain sporting rules and practices entirely outside the scope of the EC Treaty; and whether the private nature of sporting clubs constitutes a stumbling block for the application of the relevant free movement rules. *Practical Regulation of the Mobility of Sportsmen in the EU Post Bosman* comes at a moment when clarification of where this complex and contentious matter currently lies is essential if we are to gauge where it is going. The topic is of special and increasing interest, as official declarations on sport were attached to the Treaties of

both Amsterdam and Nice. And, if the draft Constitution for Europe actually enters into force, sport will even become an official area of Union policy. This trend confirms the value and significance of this ground-breaking book for practitioners, policymakers, and regulators in the burgeoning field of sports law. European Monographs 48
