Pädagogische Debatten Ulrich Binder, Johannes Drerup, Jürgen Oelkers. 2020-06-24 Wie tickt die Pädagogik? Wer das wissen will, muss sich ihren Debatten zuwenden. In den Debatten wird deutlich, wie die Pädagogik ihre Umwelten beobachtet, wie Themen erzeugt werden, wie Debatten verlaufen und welche Konsequenzen das zeitigt. Die Debatten sind dabei nicht nur Orte der Meinungs- und Urteilsbildung, zeigen nicht nur Kontinuitäten und Brüche gesellschaftlicher Auseinandersetzungen, sondern sind zugleich Seismographen im Umgang mit kulturellen Deutungsmustern und Machtkonstellationen. Pädagogische Debatten bilden dabei nicht nur fachinterne Verarbeitung gesellschaftlicher Problemlagen; sie prägen zugleich auch die Problemdefinitionen einer Gesellschaft.

Boundless cyber world? Nadia Kutscher, Stefan Iske, Hans-Uwe Otto, Alexandra Klein. 2007-07-12 Welche Bedeutung haben technische Ausstattung und soziale Zugangsorte für die Teilhabe im virtuellen Raum? Welchen Einfluss haben soziale Rahmenbedingungen auf Nutzungsdifferenzen und welche Ausprägungen finden sich in dieser Hinsicht bei Jugendlichen? In der Beantwortung dieser neuen Fragestellungen führt der Band international herausragende ExpertInnen aus verschiedenen Disziplinen zusammen. Zentrale Fragen der Bildungsteilhabe in der Informations- und Wissensgesellschaft gerade für die nachwachsende Generation, die häufig als DIE Mediengeneration schlechthin gilt, werden im Zusammenhang mit der Problematik der digitalen Spaltung thematisiert und systematisiert. Die erstmalige Zusammenführung dieser unterschiedlichen Blickwinkel führt zu neuen Erkenntnissen über die Bildungsherausforderungen des Internet.

Cooling out Markus Rieger-Ladich. 2018-03-01 Die starke Resonanz auf Bildungsbiografien wie die des französischen Soziologen Didier Eribon steht für eine heute verbreitete Skepsis gegenüber der elaborierten Semantik von Teilhabe und Partizipation, Chancengleichheit und Diversität der Bildungseinrichtungen. Diese These vertritt Markus Rieger-Ladich in seinem Beitrag zum Kursbuch 193. Das Versprechen der modernen Gesellschaften, dass Teilhabe an Bildung und damit verbundenem sozialen Aufstieg nicht mehr an besondere Bedingungen wie Herkunft, Geschlecht, Rasse usw. geknüpft sei, dürfe eben nicht darüber hinwegtäuschen, dass tatsächliche institutionalisierte Diskriminierung und symbolische Gewaltverhältnisse immer noch existierten. Weiterhin werde die Praxis der (sozialen) Ausgrenzung im Kern betrieben - siehe die jüngst erschienenen Autobiografien von sogenannten Bildungsaufsteigern - sie hat sich nur der äußeren Form nach verändert.

Abolish Silicon Valley Wendy Liu. 2020-04-14 Former insider turned critic Wendy Liu busts the myths of the tech industry, and offers a galvanising argument for why and how we must reclaim technology's potential for the public good. Former insider turned critic Wendy Liu busts the myths of the tech industry, and offers a galvanising argument for why and how we must reclaim technology's potential for the public good. Lucid, probing and urgent. Wendy Liu manages to be both optimistic about the emancipatory potential of tech and scathing about the industry that has harnessed it for bleak and self-serving ends. -- Naomi Klein, author of On Fire: The Burning Case for a Green New Deal An inspiring memoir manifesto... Technologists all over the world are realizing that no amount of code can substitute for political engagement. Liu's memoir is a road map for that journey of realization. -- Cory Doctorow, author of Radicalized and Little Brother Innovation. Meritocracy. The possibility of overnight success. What's not to love about Silicon Valley? These days, it's hard to be unambiguously optimistic about the growth-at-all-costs ethos of the tech industry. Public opinion is souring in the wake of revelations about Cambridge Analytica, Theranos, and the workplace conditions of Amazon workers or Uber drivers. It's

becoming clear that the tech industry's promised innovation is neither sustainable nor always desirable. *Abolish Silicon Valley* is both a heartfelt personal story about the wasteful inequality of Silicon Valley, and a rallying call to engage in the radical politics needed to upend the status quo. Going beyond the idiosyncrasies of the individual founders and companies that characterise the industry today, Wendy Liu delves into the structural factors of the economy that gave rise to Silicon Valley as we know it. Ultimately, she proposes a more radical way of developing technology, where innovation is conducted for the benefit of society at large, and not just to enrich a select few.

Wie viel Mathematik braucht die Bildung? Georg von Wallwitz.2018-03-01 Es sei zwar möglich, ein gebildeter Mensch zu sein, ohne etwas von Mathematik zu verstehen, meint Georg von Wallwitz in seinem Beitrag zum Kursbuch 193, aber spätestens die künstliche Intelligenz mache klar, welchen Verzicht auf Verstehen und Erkenntnis das impliziere. Dabei erfülle die Mathematik die einem bildungsbeflissenen Menschen wichtigen Kriterien exakt: Sie ist nützliches Instrument, sich die Welt erklärbar zu machen, ebenso ist sie jedoch geeignet, die Seele zu veredeln und den Geist zu erhöhen. Dass sie dennoch so wenig geschätzt wird - vor allem außerhalb der Geisteswissenschaften -, liege zum einen daran, dass sie sich vielen nur mühsam erschließe, mehr aber noch, dass in ihr eine Strenge der Logik walte, der zu unterwerfen eben nur wenige bereit seien. Dass sich dies allerdings genau um des eigenen Vorteils willen lohnt, zeigt der Autor in seinem Beitrag auf überzeugende Weise.

Digital Transformation and Ethics Peter G. Kirchsclaeger.2021-05-28 Dieses Buch diskutiert die Digitalisierung, Robotisierung und Automatisierung der Gesellschaft und Wirtschaft und den Einsatz von künstlicher Intelligenz aus einer ethischen Perspektive. Nach einer Einleitung zur Beziehung zwischen Moral und Technologie und einer Bewertung der Moralfähigkeit von Technologien führt das Buch ethische Prinzipien ein, die der ethischen Beurteilung der digitalen Transformation der Gesellschaft und Wirtschaft zugrunde liegen. Anschließend werden Chancen und Herausforderungen der digitalen Transformation aus einer ethischen Sicht analysiert. Schließlich werden hinsichtlich der Herausforderungen ethische Lösungsansätze entwickelt. Einer der Forschungsschwerpunkte von Peter G. Kirchscläger (Ordinarius für Theologische Ethik und Leiter des Instituts für Sozialethik ISE an der Universität Luzern; zuvor Visiting Fellow an der Yale University) liegt auf der Ethik der Digitalisierung, Robotisierung, Automatisierung und künstlichen Intelligenz.

Zwischen Mündigkeit, Kritik und Identität Wolfgang Sander.2023-09-08 Wie ist Mündigkeit heute zu verstehen? Was heißt Kritik in der politischen Bildung? Wie kann politische Bildung mit der 'Wokeness'-Bewegung umgehen? Was bedeutet kulturelle Identität für die Aufgaben politischer Bildung? Wo gibt es Grenzen der Kontroversität und was bedeutet das für Lehrerhandeln? Wolfgang Sander bezieht die didaktischen Grundlagen aus seinem Buch *Politik entdecken - Freiheit leben* auf diese neuen Herausforderungen für politische Bildung in den Krisen und Konflikten unserer Zeit. Dabei plädiert er, nach dem Auslaufen der Kompetenzorientierung, für eine Neubesinnung auf den Begriff der Bildung als Leitidee politischer Bildung.

Satipatthāna Anālayo.2003 This book helps to fill what has long been a glaring gap in the scholarship of early Buddhism, offering us a detailed textual study of the Satipatthāna Sutta, the foundational Buddhist discourse on meditation practice.--Back cover.

Extraordinary Bodies Rosemarie Garland Thomson.2017-03-07 *Extraordinary Bodies* is a cornerstone text of disability studies, establishing the field upon its publication in 1997. Framing disability as a minority discourse rather than a medical one, the book added depth to oppressive narratives and revealed novel, liberatory ones. Through her incisive readings of such texts as Harriet Beecher Stowe's *Uncle Tom's Cabin* and Rebecca Harding Davis's *Life in the Iron Mills*, Rosemarie Garland-Thomson exposed the social forces driving representations of disability. She encouraged new ways of looking at texts and their depiction of the body and stretched the limits of what counted as a text, considering freak shows and other pop culture artifacts as reflections of community rites and fears. Garland-Thomson also elevated the status of African-American novels by Toni Morrison and

Audre Lorde. *Extraordinary Bodies* laid the groundwork for an appreciation of disability culture and an inclusive new approach to the study of social marginalization.

Das Goethe-Jahrbuch ist das Publikationsorgan der 1885 in Weimar gegründeten Goethe-Gesellschaft mit derzeit ca. 3000 Mitgliedern in 55 Ländern der Welt.

Neu wird der Mensch! Heinz-Elmar Tenorth. 2018-03-01 Egal, worum es geht: Unverdrossen wird Bildung als universelle Lösungsstrategie gesellschaftlicher Probleme beansprucht, sagt Heinz-Elmar Tenorth in seinem Beitrag zum Kursbuch 193: ob für Gerechtigkeit, Gleichheit, Aufstieg für alle, Wohlstand, eine bessere Zukunft schlechthin – für fast alle Versprechen, die die moderne Gesellschaft ihren Mitgliedern heute zu geben bereit ist, steht Bildung als der große Garant. Bildung soll es richten. Warum in Bildung dieses Potenzial gesehen wurde und wird, dieser Frage geht der Autor in seinem Beitrag kritisch nach und zeigt die Grenzen und die Möglichkeiten dieser Erlösung durch Bildung als letzter Utopie.

Overeducation in Europe the late Felix Büchel, Andries de Grip, Antje Mertens. 2003-01-01 Overeducation is one of the most important mechanisms for labor market adjustment when there is an excess supply of high-skilled workers. However, there is much debate about the consequences of this phenomena and the short and long term effects for both the overeducated worker and the economy as a whole. This book contributes to our understanding of recent developments in the research on overeducation by providing a detailed overview of the pertinent theoretical and policy issues.

Returning to Reims Didier Eribon. 2018-06-07 'A deeply intelligent and searching book, one that makes you re-consider the narrative of your own life and reframe the story you tell yourself' Hilary Mantel There was a question that had come to trouble me a bit earlier, once I had taken the first steps on this return journey to Reims... Why, when I have had such an intense experience of forms of shame related to class ... why had it never occurred to me to take up this problem in a book? *Returning to Reims* is a breath-taking memoir of return, a family story of class, sexuality, gender and of the shifting political allegiances of the French working classes. A phenomenon in France and a huge bestseller in Germany, Didier Eribon has written the defining memoir of our times.

Uniforms Paul Fussell. 2002 Presents a series of anecdotes that tell the history and meaning of American uniforms, identifying their cultural significance in terms of how uniforms unite and divide people as well as how they vary throughout the world.

Chaos Bound N. Katherine Hayles. 2018-03-15 N. Katherine Hayles here investigates parallels between contemporary literature and critical theory and the science of chaos. She finds in both scientific and literary discourse new interpretations of chaos, which is seen no longer as disorder but as a locus of maximum information and complexity. She examines structures and themes of disorder in *The Education of Henry Adams*, Doris Lessing's *Golden Notebook*, and works by Stanislaw Lem. Hayles shows how the writings of poststructuralist theorists including Barthes, Lyotard, Derrida, Serres, and de Man incorporate central features of chaos theory.

Extremismusprävention im Grundschulalter Benno Hafeneeger, Dilara Kanbicak, Türkan Kanbicak. 2020-04-29 Primärpräventive Bildungsarbeit gewinnt angesichts von Antisemitismus und Rassismus zunehmend an Bedeutung. Mit Wahrheiten und Narrationen wurde im Jüdischen Museum Frankfurt ein innovatives Bildungsangebot zur Extremismusprävention im Grundschulalter geschaffen, das in diesem Buch vorgestellt wird. Der Workshop verbindet die Tradition des türkischen Schattentheaters mit den jüdischen Narenerzählungen Isaac Bashevis Singers. Aus einem

vorgegebenen Narrativ entwickeln die Kinder eigene Figuren und Szenen und transferieren die Erzählung so in die transkulturelle Gegenwart. Dabei werden kreativ und spielerisch Vorstellungen vom Zusammenleben in einer heterogenen Gesellschaft aufgeworfen und entwickelt.

Verstehendes Lernen Elsbeth Stern, Ralph Schumacher. 2018-03-01 Das Ziel von zeitgemäßem schulischem Lernen sei es, der jungen Generation ein besseres, die Grenzen ihrer Alltagserfahrungen überschreitendes Weltverständnis zu ermöglichen. Um das zu erreichen müsse sich Unterricht heute vor allem als Überzeugungsarbeit darstellen. Schülern müsse nachvollziehbar sein, sagen Ralph Schumacher und Elsbeth Stern in ihrem Beitrag zum Kursbuch 193, dass sie am Ende die Welt tatsächlich besser verstehen, wenn sie sich auf wissenschaftlich fundierte Erklärungen einlassen. Die Gestaltung von Lehrplänen und Unterricht sollte deshalb im Sinne einer konzeptuellen Umstrukturierung von Wissen den Wissensaufbau in den Mittelpunkt stellen. Was dies konkret bedeutet, zeigen die beiden Bildungsforscher an Beispielen aus den mathematisch-naturwissenschaftlichen Fächern.

Computing Anticipatory Systems Daniel M. Dubois. 2006-06-16 This book constitutes the proceedings of the Seventh International Conference on Computing Anticipatory Systems, CASYS'05. The volume includes all invited papers as well as those papers that received a best paper award. Also included is a lecture on General Principles for Brain Design, presented by Brian D. Josephson, Nobel Laureate in Physics. The papers discuss recent research and development in the modeling and computing of anticipatory systems in fields of natural and artificial systems.

Montessori & Co. Heiner Barz. 2018-03-01 Dem bunten Epochenauftakt der Reformpädagogik im ersten Drittel des 20. Jahrhunderts, mit dem, so Heiner Barz in seinem Beitrag zum Kursbuch 193, die emphatische Rede vom Eigenrecht des Kindes aufkam, folgte zunächst die Konsolidierung der alternativen Konzepte und später – nach einigen verstörenden Skandalen – die (selbst)kritische Auseinandersetzung mit den problematischen Anteilen der jeweiligen Strömungen. Inzwischen gehe es aber auch in ihnen vorrangig darum, Perspektiven zu entwickeln, die den kommenden gesellschaftlichen Herausforderungen angemessen sind – Stichwort: Reformpädagogik 4.0. So sollte zum Beispiel, meint der Autor, die oft bemerkenswert kenntnisfreie Skepsis insbesondere der deutschen Pädagogik gegenüber dem Einsatz elektronischer Medien im Unterricht – wiewohl von deren Segnungen auch keine schulischen Wunder zu erwarten seien – einer eher pragmatisch orientierten Haltung Platz machen und die Annäherung an die Lebenswirklichkeit der heutigen Schüler gewagt werden.

Handbook of Disability Studies Gary L. Albrecht, Katherine D. Seelman, Michael Bury. 2001-05-24 This path-breaking international handbook of disability studies signals the emergence of a vital new area of scholarship, social policy and activism. Drawing on the insights of disability scholars around the world and the creative advice of an international editorial board, the book engages the reader in the critical issues and debates framing disability studies and places them in an historical and cultural context. Five years in the making, this one volume summarizes the ongoing discourse ranging across continents and traditional academic disciplines. To provide insight and perspective, the volume is divided into three sections: The shaping of disability studies as a field; experiencing disability; and, disability in context. Each section, written by world class figures, consists of original chapters designed to map the field and explore the key conceptual, theoretical, methodological, practice and policy issues that constitute the field. Each chapter provides a critical review of an area, positions and literature and an agenda for future research and practice. The handbook answers the need expressed by the disability community for a thought provoking, interdisciplinary, international examination of the vibrant field of disability studies. The book will be of interest to disabled people, scholars, policy makers and activists alike. The book aims to define the existing field, stimulate future debate, encourage respectful discourse between different interest groups and move the field a step forward.

Nicht jedes Kind ist hochbegabt! Gerhard Roth. 2018-03-01 Das Thema Begabung bzw. Hochbegabung wird im öffentlichen Diskurs überwiegend kritisch behandelt, und die staatliche Förderung von (Hoch-)Begabten oft als undemokratische Belohnung von Töchtern und Söhnen aus reichem Hause gebrandmarkt, schreibt der Hirnforscher Gerhard Roth im Kursbuch 193. Gleichzeitig wird vehement eine stärkere Förderung begabter Menschen aus bildungsfernen Schichten gefordert, und die Wirtschaft mahnt eindringlich die Ressource Begabung an. Gerhard Roth greift diese sich zum Teil widersprechenden Forderungen und Ansprüche auf und gleicht sie mit den Erkenntnissen aus Psychologie und Hirnforschung ab. Dies besonders unter der Fragestellung, wie Staat und Gesellschaft begabte junge Menschen heute angemessen fördern könnten.

The Years Annie Ernaux. 2017-11-21 WINNER OF THE 2022 NOBEL PRIZE IN LITERATURE Shortlisted for the 2019 Man Booker International Prize Considered by many to be the iconic French memoirist's defining work and a breakout bestseller when published in France in 2008 *The Years* is a personal narrative of the period 1941 to 2006 told through the lens of memory, impressions past and present—even projections into the future—photos, books, songs, radio, television and decades of advertising, headlines, contrasted with intimate conflicts and writing notes from 6 decades of diaries. Local dialect, words of the times, slogans, brands and names for the ever-proliferating objects, are given voice here. The voice we recognize as the author's continually dissolves and re-emerges. Ernaux makes the passage of time palpable. Time itself, inexorable, narrates its own course, consigning all other narrators to anonymity. A new kind of autobiography emerges, at once subjective and impersonal, private and collective. On its 2008 publication in France, *The Years* came as a surprise. Though Ernaux had for years been hailed as a beloved, bestselling and award-winning author, *The Years* was in many ways a departure: both an intimate memoir written by entire generations, and a story of generations telling a very personal story. Like the generation before hers, the narrator eschews the I for the we (or they, or one) as if collective life were inextricably intertwined with a private life that in her parents' generation ceased to exist. She writes of her parents' generation (and could be writing of her own book): From a common fund of hunger and fear, everything was told in the we and impersonal pronouns. Co-winner of the 2018 French-American Foundation Translation Prize in Nonfiction Winner of the 2017 Marguerite Yourcenar Prize for her entire body of work Winner of the 2016 Strega European Prize

Kursbuch 193 Peter Felixberger, Armin Nassehi. 2018-03-02 Schweiß und Gummimatten ergaben eine Geruchskombination, so durchdringend, dass sie in mir als Erwachsenen zuverlässig den Proust'schen ›Madeleine‹-Effekt auslöst. So riecht Grundschule. Olaf Unverzart, heute Fotograf und Künstler, erinnert sich noch genau an seine Einschulung 1979. In Zeiten des Digitalen Bildungspaktes und Diskussionen um zu leichtes Abitur in Deutschland traut sich das Kursbuch 193 nicht nur anhand von Essays nachzuhorchen: In mehreren Bildungsbiografien wagen namhafte Intellektuelle den Blick zurück auf die eigenen Bildungsvoraussetzungen und den Werdegang. Mit Beiträgen von Konrad Paul Liessmann, Georg von Wallwitz, Heinz-Elmar Tenorth, Heiner Barz, Markus Rieger-Ladich, Armin Nassehi, Gerhard Roth, Ralph Schumacher und Elsbeth Stern.

Global Health Diplomacy Ilona Kickbusch, Graham Lister, Michaela Told, Nick Drager. 2012-12-09 The world's problems are indeed world problems: social and environmental crises, global trade and politics, and major epidemics are making public health a pressing global concern. From this

constantly changing scenario, global health diplomacy has evolved, at the intersection of public health, international relations, law, economics, and management—a new discipline with transformative potential. Global Health Diplomacy situates this concept firmly within the human rights dialogue and provides a solid framework for understanding global health issues and their negotiation. This up-to-the-minute guide sets out defining principles and the current agenda of the field, and examines key relationships such as between trade and health diplomacy, and between global health and environmental issues. The processes of global governance are detailed as the UN, WHO, and other multinational actors work to address health inequalities among the world's peoples. And to ensure maximum usefulness, the text includes plentiful examples, discussion questions, reading lists, and a glossary. Featured topics include: The legal basis of global health agreements and negotiations. Global public goods as a foundation for global health diplomacy. Global health: a human security perspective. Health issues and foreign policy at the UN. National strategies for global health. South-south cooperation and other new models of development. A volume of immediate utility with a potent vision for the future, Global Health Diplomacy is an essential text for public health experts and diplomats as well as schools of public health and international affairs.

Narrative Prosthesis David T. Mitchell, Sharon L. Snyder. 2014-05-21 Narrative Prosthesis: Disability and the Dependencies of Discourse develops a narrative theory of the pervasive use of disability as a device of characterization in literature and film. It argues that, while other marginalized identities have suffered cultural exclusion due to a dearth of images reflecting their experience, the marginality of disabled people has occurred in the midst of the perpetual circulation of images of disability in print and visual media. The manuscript's six chapters offer comparative readings of key texts in the history of disability representation, including the tin soldier and lame Oedipus, Montaigne's infinities of forms and Nietzsche's higher men, the performance history of Shakespeare's Richard III, Melville's Captain Ahab, the small town grotesques of Sherwood Anderson's Winesburg, Ohio and Katherine Dunn's self-induced freaks in Geek Love. David T. Mitchell is Associate Professor of Literature and Cultural Studies, Northern Michigan University. Sharon L. Snyder is Assistant Professor of Film and Literature, Northern Michigan University.

Health Promotion Practice: Building Empowered Communities Laverack, Glenn. 2007-04-01 The book provides an excellent combination of broad theoretical background with a generous helping of vocational guidance on the practice of health promotion. A very welcome addition to the practical side of health promotion! Laverack's brief and simply-worded text weaves together just the right balance of theory, evidence, tips and case studies to satisfy the new learner looking to gain a grasp of health promotion's empowering whole, while still offering new insights to the more seasoned practitioner. Ronald Labonté, Institute of Population Health, University of Ottawa How can health promotion practitioners help communities to become more empowered? How do you encourage different communities to work together towards a shared goal? How can you focus your resources to be most effective in building empowered communities? How do you evaluate your success (and failures) in building empowered communities? Power and empowerment are two complex concepts that are central to health promotion practice. People experience empowerment in many different ways and this book explains an approach that has been used by health promoters to intentionally build and evaluate empowerment. The book provides a special focus on communities and is illustrated throughout with useful field experiences in the United Kingdom, Asia, North America, the Pacific region and Africa. The book aims to provide the reader with: An understanding of the key concepts of power and empowerment and the link to improved health outcomes in the context of health promotion programmes An understanding of practical approaches that can be used in health promotion programming to build and evaluate empowered communities Case study examples of how communities can be empowered in practice This unique book offers sound theoretical principles to underpin the practical approaches used to build empowered communities and brings together new and innovative approaches in health promotion practice. Health Promotion Practice is essential reading for health promotion students and practitioners who want to learn more about innovative approaches to build empowered communities in their everyday work. It will inspire them

to work in more empowering ways in health promotion practice and to carefully contemplate how they can influence the way others gain power.

Klima, Viren, Kurven Armin Nassehi.2020-06-01 Unablässig fordert Greta Thunberg hinsichtlich der dramatischen Klimaveränderungen, die der Weltgemeinschaft bevorstehen, dass es Zeit sei, sich angesichts von faktenbasierten wissenschaftlichen Erkenntnissen zusammenzuschließen und das Richtige zu tun, to unite behind the science, wie sie es nennt. Aber, was heißt das genau? Was bedeutet, auf die Wissenschaft zu hören? Armin Nassehi geht dieser Frage in seinem Beitrag in Kursbuch 202 nach: Wieso tun wir nicht das, was nötig wäre? Wo wir es doch etwa in der Corona-Krise so unhinterfragt und reibungslos hingekriegt haben, das wissenschaftlich Richtige zu tun? Kann es in einer funktional differenzierten Gesellschaft mit ihrer verteilten Intelligenz überhaupt einen Ort geben, ein Zentrum, eine eindeutige Instanz, von der aus eine konzertierte Verhaltensweise der Gesellschaft, wie aus einem Guss, koordinierbar wäre?

Wozu Universitäten? Armin Nassehi.2018-03-01 Gesellschaftlicher Wandel könne stets auch als Wandel der wichtigsten etablierten Institutionen beschrieben werden, sagt Armin Nassehi in seinem Beitrag im Kursbuch 193. Also sei er wohl auch als Wandel der Universtätén bzw. als Wandel der Erwartungen, die an die Universitäten gestellt werden, zu beschreiben. Diese Beschreibung führt der Autor bis in die heutige Zeit, für die er eine Wandlung weg von der bisherigen Objekterkenntnis als dem grundlegenden epistemologischen Prinzip hin zu einer (der digitalen Zeit entsprechenden) Mustererkennung als dominanter Erkenntnisform feststellt. Möglicherweise werde es durch diese Umstellung von traditionellem Wissen auf Mustererkennung wichtiger, den Zusammenhang von Frage und Antwort zu lehren und die richtige Antwort, Problem und Lösung als Konstellation zu reflektieren als das fertige Lösungskonzept zu erarbeiten. Kurz: Die universitäre Wissenschaft und Ausbildung müsse sich darauf einstellen, dass sie sich als Teil der Gesellschaft gemeinsam mit dieser stark verändern werde.

Die Bundesbildungsrepublik Konrad Paul Liessmann.2018-03-01 Seit Ausrufung der Bildungsrepublik durch die Bundeskanzlerin habe sich diese Staatsform prächtig entwickelt, schreibt Konrad Paul Liessmann in seinem Beitrag zum Kursbuch 193 in süffisantem Ton. Aus einer geistigen Wüste seien wahrhaft blühende Landschaften geworden, deren spezielle Bewohner der Autor in ihrer jeweiligen Eigenart vorstellt: zum Beispiel die Bildungspolitiker, unter deren Händen jede pädagogische Mode sofort zum Reformvorhaben werde, um bloß nicht als Reformverweigerer - das Todesurteil für einen jeden Bildungspolitiker - zu erscheinen. Er nimmt in seiner mit leichter Ironie vorgetragenen Typologie die unverwechselbaren Eigenschaften von Bildungsforschern, -experten, -propheten, -kritikern usw. aufs Korn, um sich am Ende noch mit dem schon aus der Zeit gefallenem Bildungsbürger kurz vor seinem Verschwinden solidarisch zu erklären.

The Datafication of Education Juliane Jarke, Andreas Breiter.2020-05-21 This book attends to the transformation of processes and practices in education, relating to its increasing digitisation and datafication. The introduction of new means to measure, capture, describe and represent social life in numbers has not only transformed the ways in which teaching and learning are organised, but also the ways in which future generations (will) construct reality with and through data. Contributions consider data practices that span across different countries, educational fields and governance levels, ranging from early childhood education, to schools, universities, educational technology providers, to educational policy making and governance. The book demonstrates how digital data not only support decision making, but also fundamentally change the organisation of learning and teaching, and how these transformation processes can have partly ambivalent consequences, such as new possibilities for participation, but also the monitoring and emergence/manifestation of inequalities. Focusing on how data can drive decision making in education and learning, this book will be of interest to those studying both educational technology and educational policy making. The chapters in this book were originally published in Learning, Media and Technology. Chapter 4 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com>

Kursbuch 202 Armin Nassehi, Peter Felixberger. 2020-06-02 Empörte Aktivisten im Hambacher Forst, wütende SchülerInnen bei den Fridays for Future-Protesten, hitzige Debatten im Bundestag und doch nur ein Schmalspurprogramm zum Klimaschutz, Plastik in den Weltmeeren, Mikroplastik im Trinkwasser, Gletscherschmelze, Tiersterben, Flygskam! Natur- und Klimaschutz sind zum beherrschenden Thema einer übererregten Öffentlichkeit geworden – bis der globale Shutdown die Aufmerksamkeitsökonomie auf andere, viralere Themen lenkte. Bevor aber die Autos auf unseren Auto- und die Flugzeuge auf den Startbahnen die globale Wirtschaft wieder anrollen lassen und der Klimaschutz damit an einem Scheidepunkt steht, nutzen wir die Zeit, und sezieren das Klima der Debattenlage: Wer redet wie, was, wann und wo mit wem? Eisige Winde der Negation, Jetstreams der Erzürnung, Monsunregen der Kritik, Orkane des blinden Aktivismus – kann die Gesellschaft der existentiellen Bedrohung durch die Klimakrise auf diese Weise noch Herr werden? Wir schalten noch einmal zum Klima und durchleuchten, warum uns der Tanz der Perspektiven so durcheinanderwirbelt. Mit Beiträgen von Marlen Gabriele Arnold, Franz Josef Radermacher, Joachim Wille, Jörg Staude, Solvejg Nitzke, Berit Glanz u.v.m.

Schriftsprach- und Orthographieerwerb: Erstlesen, Erstschreiben Christa Röber, Helena Olfert. 2022-05-31 Lesen- und Schreibenlernen ist endlich wieder Thema geworden. Aufgrund seiner Bedeutung für die individuelle psychische Entwicklung, den Bildungserfolg und die Lebensplanung von Menschen sowie seiner gesellschaftlichen Relevanz wird es derzeit auch öffentlich intensiv diskutiert. Ergebnisse der internationalen Forschung belegen die fundamentale Bedeutung des Schrifterwerbs auch für die kognitive Entwicklung. Sprachliches Lernen als kognitives Lernen wird dann unterstützt, wenn die Schrift – und damit auch die Sprache – von Kindern als systematisch und regelhaft wahrgenommen werden kann. Der Unterricht hat daher die Aufgabe, ihnen dieses von Beginn an zu ermöglichen. Die Beiträge dieses Bandes stellen aus verschiedenen Blickwinkeln die Notwendigkeit und die Möglichkeit einer systematischen Hinführung an die Schrift heraus und weisen auf Konsequenzen einer Schrifterwerbsdidaktik, die auf die Darstellung der Regelmäßigkeit von Schrift und Sprache abzielt, sowohl für die unterrichtliche als auch die außerunterrichtliche Diagnostik, vor allem für die Konzeptbildung des Unterrichts hin. Entsprechende praktische Beispiele beenden den Band.

Der gesteuerte Mensch? Gottfried Böhme. 2020-03-31 Big Data greift nach der Schule, digitale Medien sollen den Schulalltag bestimmen. Doch die wenigsten erkennen: Es geht nicht um eine Ergänzung des Unterrichts, es geht um die Neudefinition dessen, was Schule heißt. Es geht um die Rolle, die in Zukunft Klassen, Lehrer und besonders Schüler in ihr spielen sollen. Schule soll durch eine digitale Bildungsrevolution umgekrempelt werden – und der Begriff Revolution ist ernst zu nehmen. Die Schule ist eine sehr empfindliche Stellschraube unserer Gesellschaft. Wer an ihr dreht, der bewegt sehr viel mehr als nur Schüler. Schulen sind keineswegs nur Lernorte. Bildung ist der Kitt, der eine Gesellschaft noch am ehesten zusammenhalten kann. Und das sollen in Zukunft Algorithmen gewährleisten? Die Sorge ist berechtigt, dass solcher Umbau kulturrevolutionäre Ausmaße annehmen könnte.

There Is No Such Thing as Cultural Identity François Jullien. 2021-05-28 As people throughout the world react to globalization and revert to nationalism, they are proclaiming distinct cultural identities for themselves. Cultural identity seems to offer a defensive wall against the homogenizing effects of globalization and a framework for nurturing and protecting cultural differences. In this short and provocative book, François Jullien argues that this emphasis on cultural identity is a mistake. Cultures exist in relation to one another and they are constantly mutating and transforming themselves. There is no cultural identity, there are only what Jullien calls ‘resources’. Resources are created in a certain space, they are

available to all and belong to no one. They are not exclusive, like the values to which we proclaim loyalty; instead, we deploy them or not, activate them or let them fall by the wayside, and each of us as individuals is responsible for these choices. This conceptual shift requires us to redefine three key terms - the universal, the uniform and the common. Equipped with these concepts, we can rethink the dialogue between cultures in a way that avoids what Jullien sees as the false debate about identity and difference. This powerful critique of the modern shibboleth of cultural identity will appeal to anyone interested in the great social and political questions of our time.
