The Nurse's Role in Community Mental Health Centers Carol D. DeYoung,Margene Tower.1971

Consumer-Centered Computer-Supported Care for Healthy People H.-A. Park,P.J. Murray,C. Delaney.2006-06 This publication, initiated by the Korean Society of Medical Informatics (KOSMI) and its Nursing Informatics Specialist Group, and the Special Interest Group in Nursing Informatics of the International Medical Informatics Association (IMIA-NI), is published for nurses and informatics experts working with informatics applications in nursing care, administration, research and education, bringing together the worlds of nursing informatics community. Korea is well known for having the highest level of Information and Communication Technology (ICT) accessibility in the world. Advances in ICT in Korea have lead Korean health care sectors to fully utilize the benefit of ICT for health care. The theme of the book, 'Consumer-Centered Computer-Supported Care for Healthy People', emphasizes the central role of the consumer and the function of information technology in health care. It reflects the major challenge in our time, which is developing and using information technology for the improvement of consumer oriented health care. I would seriously recommend that this book - in text form - should be available in all nursing libraries as a resource for study and reference in the expanding area of nursing and health care."--Paula M. Procter, Reader in Informatics and Telematics in Nursing, The University of Sheffield, United Kingdom.

Public Health Reports .1965

Field Research Robert G. Burgess.2003-09-02 There are now numerous textbooks, sets of readings and reflections on doing socialresearch. Much of this textbook material is American and deals with the way in whichsocial research and in particular social surveys should be done. These 'cookbook'approaches to social research omit discussions of the interplay between research methodsand research experience. Accordingly, research biographies have been produced in whicheditors have invited researchers to 'come clean' about the way in which research isactually done. While such accounts are high on description of the research process, theyare ofte.

Policy and Politics in Nursing and Healthcare - Revised Reprint Diana J. Mason,Judith K. Leavitt,Mary W. Chaffee.2013-09-23 Featuring analysis of healthcare issues and first-person stories, Policy & Politics in Nursing and Health Carehelps you develop skills in influencing policy in today's changing health care environment. 145 expert contributors present a wide range of topics in policies and politics, providing a more complete background than can be found in any other policy textbook on the market. Discussions include the latest updates on conflict management, health economics, lobbying, the use of media, and working with communities for change. The revised reprint includes a new appendix with coverage of the new Affordable Care Act. With these insights and strategies, you'll be prepared to play a leadership role in the four spheres in which nurses are politically active:

the workplace, government, professional organizations, and the community. Up-to-date coverage on the Affordable Care Act in an Appendix new to the revised reprint. Comprehensive coverage of healthcare policies and politics provides a broader understanding of nursing leadership and political activism, as well as complex business and financial issues. Expert authors make up a virtual Nursing Who's Who in healthcare policy, sharing information and personal perspectives gained in the crafting of healthcare policy. Taking Action essays include personal accounts of how nurses have participated in politics and what they have accomplished. Winner of several American Journal of Nursing Book of the Year awards! A new Appendix on the Affordable Care Act, its implementation as of mid-2013, and the implications for nursing, is included in the revised reprint. 18 new chapters ensure that you have the most up-to-date information on policy and politics. The latest information and perspectives are provided by nursing leaders who influenced health care reform with the Patient Protection and Affordable Care Act of 2010.

Questionnaire design and attitude measurement Abraham Naftali Oppenheim. 1966

A Cultural History of the Nurse's Uniform Christina Bates. 2012 This first and only in-depth analysis of the attire worn by the largest workforce in the health care system explores the role of the nurse's uniform in creating nursing identity for over a hundred years. The introduction of the nurse's uniform in the late nineteenth century was part of a strategy to legitimize North America's first nursing schools. At first varied and experimental in design, by the early 20th century the uniform was drawing on elements of fashionable, scientific, military and ecclesiastical wear, and had standardized into a blue or pink dress worn with stiffly starched white cap, bib, and apron. This remarkable outfit lasted until the 1970s, when educational and societal changes brought about its demise, and practical scrubs became the most common nursing apparel. Seen through the lens of age, gender, class and race, this book shows how the uniform was an active participant in the changing culture of nursing work and thought. Richly illustrated with images of actual garments and over 150 compelling period photographs, cartoons and drawings, the book explores the uniform within the contexts of hospital, community, nursing school, and residence. *A Cultural History of the Nurse's Uniform* will appeal to nurses, historians and scholars of dress.

An Attitude Survey of 501 Graduate Nurses in Relation to Specific Job Factors in Nursing

Edmund Renato Mattos. 1949

Nursing Homes United States. Congress. Senate. Special Committee on Aging. 1962

European Neonatal Research Su Mason, Chris Megone. 2020-10-07 This title was first published in 2001. An important book presenting the results of the European Union funded EURICON project in biomedical ethics. Involving experts in eleven countries, this project was motivated by European neonatal clinicians' concerns about the problem of obtaining informed consent in neonatal research. It addressed the difficulties of obtaining consent from subjects involved in such research, and investigated the relevance and appropriateness of obtaining consent from parents. The project also examined the work of Research Ethics Committees in Europe. It explored their responses to EURICON's analysis of the views of clinicians and parents, and their attitudes towards the relevant laws and legal requirements. The wide geographical scope of the project enabled international comparisons of the opinions of clinicians and parents, the legal frameworks governing neonatal research, and the effectiveness of Research Ethics Committees. This is the first such investigation on a European scale, and it offers a unique interdisciplinary approach to these issues. Incorporating clinical, ethical, legal and sociological perspectives, the results and recommendations presented in this book will be of widespread significance to practitioners, researchers and policy makers throughout Europe and beyond.

Critical Care Administration Jorge Hidalgo, Javier Pérez-Fernández, Gloria Rodríguez-

Vega. 2020-01-10 This book provides a state-of-the-art overview on critical care administration. The text reviews important aspects and considerations involved in developing an efficient, cost-effective critical care program, while maintaining a safe and high-quality work environment. Major topics covered include different models of critical care services, planning and budgeting, administration support, staffing models, tele/smart ICU, protocols and guidelines, and disaster preparedness and

management. Written by experts in the field, *Critical Care Administration: A Comprehensive Clinical Guide* is a practical, handy resource for critical care professionals involved in the administration and management of ICUs.

Oxford Textbook of Palliative Nursing Betty Rolling Ferrell, Judith A. Paice. 2019-02-15 The Oxford Textbook of Palliative Nursing remains the most comprehensive treatise on the art and science of palliative care nursing available. Dr. Betty Rolling Ferrell and Dr. Judith A. Paice have invited 162 nursing experts to contribute 76 chapters addressing the physical, psychological, social, and spiritual needs pertinent to the successful palliative care team. Organized within 7 Sections, this new edition covers the gamut of principles of care: from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond. This fifth edition features several new chapters, including chapters on advance care planning, organ donation, self-care, global palliative care, and the ethos of palliative nursing. Each chapter is rich with tables and figures, case examples for improved learning, and a strong evidence-based practice to support the highest quality of care. The book offers a valuable and practical resource for students and clinicians across all settings of care. The content is relevant for specialty hospice agencies and palliative care programs, as well as generalist knowledge for schools of nursing, oncology, critical care, and pediatric. Developed with the intention of emphasizing the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for the seriously ill, this new edition will continue to serve as the cornerstone of palliative care education.

Survey of the Training Schools for Nurses in California California State Board of Health. 1915
Officer, Nurse, Woman Kara Dixon Vuic. 2010 Drawing on more than 100 interviews, Vuic allows the nurses to tell their own captivating stories, from their reasons for joining the military to the physical and emotional demands of a horrific war and postwar debates about how to commemorate their service. Vuic also explores the gender issues that arose when a male-dominated army actively recruited and employed the services of 5,000 women nurses in the midst of a growing feminist movement and a changing nursing profession. Women drawn to the army's patriotic promise faced disturbing realities in the virtually all-male hospitals of South Vietnam. Men who joined the nurse corps ran headlong into the army's belief that women should nurse and men should fight.

Forty-Five Years in White Uniforms C.L.G. Solomon. 2013-06-25 Forty five years in white uniforms From the pen of the same writer of the book *Natural Bread Is Not Enough* comes a partial biographical account of her forty-five-year nursing career. Seventeen years were spent working in various disciplines of nursing, while the final twenty-eight years were spent working in public health nursing. In keeping with HIPPA laws, which are designed to protect the privacy of clients and their information, no part of this writing at any point ever divulges anyones name or records. The information is recollected from various work experiences, in various cities and states, over a period of years. Forty-five years have not qualified me to be an authority in the nursing field. It has simply given me various insights that someone else may read about and make a quality career decision. I had classmates who dropped out of nursing school and stated, Nursing definitely is not for me. Some students failed because they underestimated the amount of study and dedication involved in becoming a nurse. Some students were not willing to spend long hours in study and research. Some found that the sights and smells of blood and other body fluids were definite turnoffs. One other classmate completed the entire nursing program with a 4.0 average, only to say she hated it. She never practiced a day of nursing. She excelled in clinicals as well as in the classroom. She received the highest academic award in our class, yet nursing was not her cup of tea. The experiences that I encountered in my personal life somewhat intensified my desire to become a nurse. I am happy to have been able to practice the kind of work that was very satisfying to me. The nursing knowledge that paralleled certain difficult times in my life was priceless. Nursing is the type of profession that one can practice in different settings with various categories of people, such as the aged, the middle aged, the young adults, the teens, the expectant moms and their children the newborn, premature babies and people with special needs. Work settings run the gamut from hospitals to jails,

institutions, the military, private homes, clinics, schools, rehabilitation centers of different types, and other settings not mentioned. Someone once said, Variety is the spice of life. Variety abounds in the nursing profession. A nurse can expand on her career by becoming an advanced registered nurse practitioner, nurse anesthetist, midwife, legal consultant, or she may go on to medical school to be a physician. Nurses also train other nurses. Administration is another career option within nursing. One of the first things a prospective nurse needs to consider is which type of program she should choose. Some students choose the certified nursing assistant (CNA) program. They want to obtain some of the basic skills and a quick job. These skills often include learning to take vital signs, such as blood pressure, pulse, and respiration. They learn how to do basic care and other skills that can assist the nurse in his/her work. CNA skills can serve as a pivotal point for the person to move higher into the medical profession. Some certified nursing assistants advance their training and become registered nurses and doctors. Nurses are trained in programs of different length and at different levels. Licensed practical nurses, or LPNS, may train one or more years depending on where they train. Registered nurses, or RNs, may complete an associates degree and start work after licensure. RNs may also complete a four-year baccalaureate-degree program. All levels must be certified. Some medical facilities offer CNA training whereby a student may work and train in their facility at the same time. Upon completion of training, the student is expected to work for the institution for a contracted amount of time. The student may stop at this level or move further into the profession. Associate and baccalaureate programs are located on College campuses. A C

Health Planning Reports: Subject index. 4 v United States. Health Resources Administration.1978

A Contemporary History of the U.S. Army Nurse Corps . This book focuses on an organization, the

U.S. Army Nurse Corps, which the author has been privileged to be affiliated with - in one way or another - for the greatest part of her adult life. As an active duty officer, the author had first-hand knowledge about the Army Nurse Corps inner workings and spent the last years of her Army career (from 1992) researching and writing the Corps history. One of her goals in researching and writing this history was to intrigue and provide a sense of gratification for the reader. After the conclusion of the Vietnam War, several wide-ranging and significant changes exerted myriad effects on the Army Nurse Corps. The most influential of these phenomena included the dismantling of the Selective Service System, the reorganization of the Army, the launch of the Health Services Command (HSC), the opening of the Academy of Health Sciences, the transformation of the Office of the Army Surgeon General, the inauguration of improvements in the Army Reserve and National Guard, and the evolution in the roles and status of women.

Health Planning Reports Personal Author Index United States. Bureau of Health Planning.1981 Lists citations to the National Health Planning Information Center's collection of health planning literature, government reports, and studies from May 1975 to January 1980.

The Social Psychology of Clothing Susan B. Kaiser.1997 A single glance at our clothing reveals a wealth of information about how we perceive ourselves, each other, and our place in society. In this classic text, Susan B. Kaiser brings to the surface the unconscious thought processes we use to decide not just how clothes look, but what they mean. In a new section written especially for this updated edition, Kaiser addresses the increasingly multicultural emphasis of the study of clothing and appearance. She also reexamines fashion in terms of gender, ethnicity, sexuality, and social class, offering a more broad-based and inclusive vision of the social psychology of clothing.
