Anthropogenic Pollution of Aquatic Ecosystems Donat-P. Häder,E. Walter Helbling, Virginia E. Villafañe.2021-09-30 This book provides examples of pollutants, such as accidental oil spills and non-degradable plastic debris, which affect marine organisms of all taxa. Terrestrial runoff washes large amounts of dissolved organic materials from agriculture and industry, toxic heavy metals, pharmaceuticals, and persistent organic pollutants which end up into rivers, coastal habitats, and open waters. While this book is not intended to encyclopaedically list all kinds of pollution, it rather exemplifies the problems by concentrating on a number of serious and prominent recent developments. The chapters in this book also discuss measures to decrease and remove aquatic pollution to mitigate the stress on aquatic organisms. Aquatic ecosystems provide a wide range of ecological and economical services. In addition to providing a large share of the staple diet for a fast growing human population, oceans absorb most of the anthropogenically emitted carbon dioxide and mitigate climate change. As well as rising temperatures and ocean acidification, pollution poses increasing problems for aquatic ecosystems and organisms reducing its functioning and services which are exposed to a plethora of stress factors.

Empty as a Scarecrow Kendra Moreno.2021-07-23 Emerald City yearns for blood. . . Cinder had no idea what she was getting into when she fell into Oz, but the devilishly sexy Scarecrow was as unexpected as the glass shards in her feet. Fair Management Heinz Siebenbrock.2021-02-25 Contemporary personnel management is faced with a number of challenges as work becomes increasingly digital and more flexible in terms of time. 'New Work', 'agile management' and a genuine culture of dealing with errors have revolutionised personnel management. What becomes especially apparent in this respect is that managers can foster their employees' commitment to work through their management style. In this book, Heinz Siebenbrock presents a management model based on trust in and appreciation of employees, which encourages their initiative and enables managers to be both fair and successful in their work. By connecting the model to current concepts of management and by presenting a series of case studies, the author demonstrates how managers can develop their own ethical style of management.

The Corona Lie - Unmasked Hermann von Bering.2021-04-08 This book is the first to examine the Corona phenomenon in its entirety and uncovers plenty of contradictions. A wealth of information is substantiated with hundreds of sources and raises doubts about the official account of the virus,

the disease and the sense of the measures. The political background responsible for the economic decline is revealed. The book answers important questions such as: Can the PCR test detect infections at all? Why do the statistics show far too high case numbers? How dangerous is the virus really? What did the alleged corona dead die of? What are the problems of wearing masks? Why lockdowns and spacing rules cannot stop the virus? Why are the new vaccinations hazardous? Who planned and profits from the global crisis? What is the objective? What is happening to the freedom of speech and democracy? Why the fundamental rights are being abolished? The book reveals the secret agenda behind the corona crisis. From thousands of documents, the author has researched the evidence that is hidden by the media. It presents the facts in a way that is easy to understand for everybody. Despite scientific explanations, the book reads easily because the author knows how to lighten up the complex topic with ironic comments.

Memoirs of a Critical Communist Livio Maitan.2019 Livio Maitan's Memoirs of a Critical Communist tells of the life of a revolutionary communist in the second half of the 20th century. From his early commitment to communism in 1942 under fascism in Italy, Livio chose to be 'against the current' by rejecting both Stalinism and social democracy, and charted a course towards democratic and revolutionary Marxism. His translator, Gregor Benton, writes: Livio Maitan helped inspire the growth of Italian Trotskyism. There was also a wave of Maoism in the 1960s and a debate ensued, to which Livio contributed his book on China, Party, Army, and Masses. I was deeply influenced by it, and I translated it for New Left Books. The book combined criticism of the Chinese Revolution with support. From it, I learned how to write engaged scholarship. Livio could have shone at a leading university had he wanted, but instead he spent most of his life working on a shoestring. In 2002, he wrote this history of the Fourth International to go alongside his autobiography. Translating this new book was a bittersweet experience. Through it, I was able to relive chapter by chapter my wild political youth and my middle age. Livio Maitan's spirit lifts this story from a catalogue of false starts into a chronicle of heroism and optimism. He died before Black Lives Matter, Me Too, Corbyism, Gilets Jaunes, Extinction Rebellion, and other new struggles, but he paved the way for them. This book shows the road to socialism remains open.

Consensus Building Versus Irreconcilable Conflicts Emanuela Saporito.2016-06-25 This book aims to identify ways of overcoming the limitations of the communicative tradition in understanding participatory spatial planning. Three conceptual models that offer different perspectives on public and civic participation in complex urban planning processes are presented and reviewed: the consensual model, which conceives of planning as a collective decision-making practice geared toward consensus building and conflict resolution; the conflictual model, which views planning as a social mobilization practice addressed at empowerment of marginalized groups; and the trading zone model, which reframes collaborative planning as a coordination activity with respect to practical proposals in the presence of unstable and conflicting rationalities and values. The controversial story of the Integrated Intervention Program "PII Isola Lunetta" in Milan is examined through the interpretative lenses of these models, with detailed interpretation of how each model performs in the field. The book concludes by offering critical reflections on the reframing of participatory spatial planning, highlighting the value of trading zones/trading languages and boundary objects as tools for understanding and addressing collaborative practices in complex and conflictual urban planning processes.

Invisible Walls Hella Pick.2021-03-18 'Memoirs of such richness are rare . . . a joy' JAMES NAUGHTIE 'A remarkable personal journey, by one of the great political correspondents of our world - eloquent, enlightening, exhilarating' PHILIPPE SANDS A trailblazer for women in journalism, Hella Pick arrived in Britain in 1939 as a child refugee from Austria. Over nearly four decades she covered the volatile global scene, first in West Africa, followed by America and long periods in Europe. In her thirty-five years with the Guardian she reported on the end of Empire in West Africa, the assassination of President Kennedy, Martin Luther King's march from Selma to Montgomery, the Vietnam peace negotiation in Paris, the 1968 student revolt in France, the birth of the Solidarity movement in Poland, and the closing stages of the Cold War. A request for coffee on board a Soviet ship anchored in Malta led to a chat with Mikhail Gorbachev. A request for an interview with Willy Brandt led to a personal friendship that enabled her to come to terms with Germany's Nazi past. Her book is also a clarion call for preserving professionalism in journalism at a time when social media muddy the waters between fact and fiction, and between reporting and commentary. INVISIBLE WALLS tells the dramatic story of how a Kindertransport survivor won the trust and sometimes the friendship of world leaders, and with them a wide range of remarkable men and women. It speaks frankly of personal heartache and of a struggle over her Jewish identity. It is also the intensely touching story of how, despite a gift for friendship and international recognised achievements as a woman journalist, a continuing sense of personal insecurity has confronted her with a series of invisible walls.

111 Places in Yorkshire That You Shouldn't Miss Ed Glinert.2021-10-21 * The ultimate insider's guide to Yorkshire for locals and experienced travelers* Features interesting and unusual places not found in traditional travel guides* Part of the international 111 Places/111 Shops series with over 650 titles and 3.8 million copies in print worldwide* Appeals to both the local market (more than 5.3 million people call Yorkshire home) and the tourist market (more than 1.3 million people visit Yorkshire every year!)* Fully illustrated with 111 full-page color photographsThey call Yorkshire God's own country. This is because England's biggest county is also England's most epic and most historically exciting. It has everything: unimaginably beautiful countryside, derelict castles, cliff-hugging coastlines, brutally bleak moors, quirkily quaint villages, wondrously winding waterways and industrial monsters of cities. Many of the most interesting episodes in English history have happened here: the Wars of the Roses, the English Civil War, the birth of the industrial revolution, the rise of the Labour movement. But when people think of Yorkshire they also think of the unusual and the unsung: Bettys delightful tea rooms, cricket at Scarborough, the windswept steps of Whitby Abbey, the steam railway of the Railway Children, Mother Shipton's Cave, and racing at Doncaster and York. Yorkshire has also given birth to some of the greatest and most talented figures in English history: Brian Clough, Harold Wilson, John Wycliffe, William Wilberforce, the Brontë Sisters, David Hockney and Barbara Hepworth.

Seminal Studies in Regional and Urban Economics Roberta Capello.2017-10-09 The book spans a scientific research program elegantly developed by Roberto Camagni, an eminent regional scientist, who has offered ground-breaking ideas in regional and urban economics throughout his academic career. In addition to bringing together a selection of Professor Camagni's most influential works, the book presents syntheses and interpretations of his ideas by respected colleagues and by his students. In regional economics, space as territory, which plays an active role in innovation processes and in regional growth patterns; territorial capital as a synthetic concept of differentiated regional growth assets; and sources of regional competitiveness are only a few of the main ideas that emerged in regional economics thanks to this inspiring mind. In urban economics, he paved the way towards a new theoretical interpretation of the existence of the city and of its dynamics. His theory of city networks overcame the limits of Christaller's and Lösch's spatial approach to the city, with a solid economic conceptualization of spatial city network structures. All theories are accompanied by sound policy analysis, helping to contribute to the design and implementation of appropriate spatial policies at the European level.

William Shakespeare × Chris Ofili: Othello William Shakespeare.2019-10-29 Othello remains one of Shakespeare's most contemporary and moving plays, with its emphasis on race, revenge, murder, and lost love. Chris Ofili's new edition highlights the tragedy of Othello's plight in ways no other volume of this play has. In twelve etchings Ofili has produced to illustrate this play, Othello is depicted with tears in his eyes, which flow below various scenes visualized in his forehead. Ofili asks us to see in Othello the great injustices that still plague the world today. These images add feeling to Shakespeare's words, and together they form their own hybrid object—something between a book and a visual retelling of the tragedy. With a foreword by the renowned critic Fred Moten, this edition is the first of its kind and puts Othello's blackness and interiority front and center, forcing us to confront the complex world that ultimately dooms him. The first play in the Seeing Shakespeare Series, Othello is illustrated by English contemporary artist Chris Ofili. Future titles in the series include A Midsummer Night's Dream illustrated by Marcel Dzama and The Merchant of Venice with images by Jordan Wolfson.

Shareholder Activism by Hedge Funds: Motivations and Market's Perceptions of Hedge Fund Interventions Mihaela Butu.2013 In recent years, hedge funds' successful interventions in some large public companies have revealed their critical role in the corporate governance landscape in the United States and Europe. Due to public opinion, this new form of shareholder activism is accompanied by much polemic. This study examines the nature of hedge fund activism, the types of them, and the market's perception of interventions in the United States. Starting with a distinction between shareholder activism by traditional institutions, and activism performed by hedge funds, the study elucidates why the latter may be more effective in monitoring management, and reduce agency costs. Analysing the Schedules 13D filed with the U.S. Securities and Exchange Commission, the study provides a classification of activists' demands into ten distinct categories, arguing that hostile forms of activism are not central for hedge funds, and some more aggressive types of activism are possibly used as a negotiating tool to achieve the activist's agenda. Using the event study methodology, the author estimates the stock returns around the announcement date. For a better understanding of hedge fund activism, and their demands on target companies, the reader will find two original Schedule 13D filings accompanied by letters to the management. Finally, the paper concludes on a view of the subject through the prism of the 2007/ 2008 financial crisis, outlining some trends in the aftermath of the financial market turmoil.

Autonomy Requirements Engineering for Space Missions Emil Vassev, Mike Hinchey.2014-08-27 Advanced space exploration is performed by unmanned missions with integrated autonomy in both flight and ground systems. Risk and feasibility are major factors supporting the use of unmanned craft and the use of automation and robotic technologies where possible. Autonomy in space helps to increase the amount of science data returned from missions, perform new science, and reduce mission costs. Elicitation and expression of autonomy requirements is one of the most significant challenges the autonomous spacecraft engineers need to overcome today. This book discusses the Autonomy Requirements Engineering (ARE) approach, intended to help software engineers properly elicit, express, verify, and validate autonomy requirements. Moreover, a comprehensive state-of-the-art of software engineering for aerospace is presented to outline the problems handled by ARE along with a proof-of-concept case study on the ESA's BepiColombo Mission demonstrating the ARE's ability to handle autonomy requirements.
