

Digging The Dirt The Archaeological Imagination

Archaeologies of English Renaissance Literature Philip Schwyzer.2007-02-22 This study draws on the theory and practice of archaeology to develop a new perspective on the literature of the Renaissance. Philip Schwyzer explores the fascination with images of excavation, exhumation, and ruin that runs through literary texts including Spenser's *Faerie Queene*, Shakespeare's *Romeo and Juliet* and *Hamlet*, Donne's sermons and lyrics, and Thomas Browne's *Hydriotaphia, or Urne-Buriall*. Miraculously preserved corpses, ruined monasteries, Egyptian mummies, and Yorick's skull all figure in this study of the early modern archaeological imagination. The pessimism of the period is summed up in the haunting motif of the beautiful corpse that, once touched, crumbles to dust. Archaeology and literary studies are themselves products of the Renaissance. Although the two disciplines have sometimes viewed one another as rivals, they share a unique and unsettling intimacy with the traces of past life - with the words the dead wrote, sang, or heard, with the objects they made, held, or lived within. Schwyzer argues that at the root of both forms of scholarship lies the forbidden desire to awaken (and speak with) the dead. However impossible or absurd this desire may be, it remains a fundamental source of both ethical responsibility and aesthetic pleasure.

The Cambridge Handbook of the Imagination Anna Abraham.2020-06-18 The human imagination manifests in countless different forms. We imagine the possible and the impossible. How do we do this so effortlessly? Why did the capacity for imagination evolve and manifest with undeniably manifold complexity uniquely in human beings? This handbook reflects on such questions by collecting perspectives on imagination from leading experts. It showcases a rich and detailed analysis on how the imagination is understood across several disciplines of study, including anthropology, archaeology, medicine, neuroscience, psychology, philosophy, and the arts. An integrated theoretical-empirical-applied picture of the field is presented, which stands to inform researchers, students, and practitioners about the issues of relevance across the board when considering the imagination. With each chapter, the nature of human imagination is examined - what it entails, how it evolved, and why it singularly defines us as a species.

Imagining the Dead in British Literature and Culture, 1790-1848 David McAllister.2018-09-29 This book offers the first account of the dead as an imagined community in the early nineteenth-century. It examines why Romantic and Victorian writers (including Wordsworth, Dickens, De Quincey, Godwin, and D'Israeli) believed that influencing the imaginative conception of the dead was a way to either advance, or resist, social and political reform. This interdisciplinary study contributes to the burgeoning field of Death Studies by drawing on the work of both canonical and lesser-known writers, reformers, and educationalists to show how both literary representation of the dead, and the burial and display of their corpses in churchyards, dissecting-rooms, and garden cemeteries, responded to developments in literary aesthetics, psychology, ethics, and political philosophy. *Imagining the Dead in British Literature and Culture, 1790-1848* shows that whether they were lauded as exemplars or loathed as tyrants, rendered absent by burial, or made uncannily present through exhumation and display, the dead were central to debates about the shape and structure of British society as it underwent some of the most radical transformations in its history.

Reclaiming Archaeology Alfredo González-Ruibal.2013-08-21 Archaeology has been an important source of metaphors for some of the key intellectuals of the 20th century: Sigmund Freud, Walter Benjamin, Alois Riegl and Michel Foucault, amongst many others. However, this power has also turned against archaeology, because the discipline has been dealt with perfunctorily as a mere provider of metaphors that other intellectuals have exploited. Scholars from different fields continue to explore areas in which archaeologists have been working for over two centuries, with little or no reference to the discipline. It seems that excavation, stratigraphy or ruins only become important at a trans-disciplinary level when people from outside archaeology pay attention to them and somehow dematerialize them. Meanwhile, archaeologists have been usually more interested in borrowing theories from other fields, rather than in developing the theoretical potential of the same concepts that other thinkers find so useful. The time is ripe for archaeologists to address a wider audience and engage in theoretical debates from a position of equality, not of subalternity. *Reclaiming Archaeology* explores how archaeology can be useful to rethink modernity's big issues, and more specifically late modernity (broadly understood as the 20th and 21st centuries). The book contains a series of original essays, not necessarily following the conventional academic rules of archaeological writing or thinking, allowing rhetoric to have its place in disclosing the archaeological. In each of the four sections that constitute this book (method, time, heritage and materiality), the contributors deal with different archaeological tropes, such as excavation, surface/depth, genealogy, ruins, fragments, repressed memories and traces. They criticize their modernist implications and rework them in creative ways, in order to show the power of archaeology not just to understand the past, but also the present. *Reclaiming Archaeology* includes essays from a diverse array of archaeologists who have dealt in one way or another with modernity, including scholars from non-Anglophone countries who have approached the issue in original ways during recent years, as well as contributors from other fields who engage in a creative dialogue with archaeology and the work of archaeologists.

'To Aleppo gone ...': Essays in honour of Jonathan N. Tubb Irving Finkel, J.A. Fraser, St John Simpson.2023-05-18 A festschrift in honour of Jonathan Tubb, former Levant curator and Keeper of the Department of the Middle East at the British Museum. 44 contributions reflect Jonathan's career and professional interests with a focus on the Jordan Valley and southern Levant, but also north Syria, Mesopotamia, and the protection of endangered cultural heritage.

Researching the Archaeological Past through Imagined Narratives Daniël van Helden, Robert Witcher.2019-11-26 Archaeological interpretation is an imaginative act. Stratigraphy and artefacts do not tell us what the past was like; that is the task of the archaeologist. The diverse group of contributors to this volume address the relationship between archaeology and imagination through the medium of historical fiction and fictive techniques, both as consumers and as producers. The fictionalisation of archaeological research is often used to disseminate the results of scholarly or commercial archaeology projects for wider public outreach. Here, instead, the authors focus on the question of what benefits fiction and fictive techniques, as inspiration and method, can bring to the practice of archaeology itself. The contributors, a mix of archaeologists, novelists and other artists, advance a variety of theoretical arguments and examples to advance the case for the value of a reflexive engagement between archaeology and fiction. Themes include the similarities and differences in the motives and methods of archaeologists and novelists, translation, empathy, and the need to humanise the past and diversify archaeological narratives. The authors are sensitive to the epistemological and ethical issues surrounding the influence of fiction on researchers and the incorporation of fictive techniques in their work. Sometimes dismissed as distracting just-so stories, or

even as dangerously relativistic narratives, the use of fictive techniques has a long history in archaeological research and examples from the scholarly literature on many varied periods and regions are considered. The volume sets out to bring together examples of these disparate applications and to focus attention on the need for explicit recognition of the problems and possibilities of such approaches, and on the value of further research about them.

Writing Remains Josie Gill, Catriona McKenzie, Emma Lightfoot. 2021-01-14 *Writing Remains* brings together a wide range of leading archaeologists and literary scholars to explore emerging intersections in archaeological and literary studies. Drawing upon a wide range of literary texts from the nineteenth century to the present, the book offers new approaches to understanding storytelling and narrative in archaeology, and the role of archaeological knowledge in literature and literary criticism. The book's eight chapters explore a wide array of archaeological approaches and methods, including scientific archaeology, identifying intersections with literature and literary studies which are textual, conceptual, spatial, temporal and material. Examining literary authors from Thomas Hardy and Bram Stoker to Sarah Moss and Paul Beatty, scholars from across disciplines are brought into dialogue to consider fictional narrative both as a site of new archaeological knowledge and as a source and object of archaeological investigation.

Approaching Biblical Archaeology Anthony J. Frendo. 2021-08-12 Anthony J. Frendo introduces biblical students and scholars alike to the discipline of archaeology by explaining how the minds of professional archaeologists work, explaining what archaeologists seek, how they go about doing so, and how they interpret their data. Frendo shows those engaged in biblical scholarship how they can properly integrate biblical research with archaeological discoveries in a way that allows the bible and archaeology to be viewed and kept as distinct disciplines, the respective results of which, where relevant, may be integrated in productive discussion. Frendo also examines how the archaeology of the ancient Near East (particularly that of the southern Levant) has an essential bearing on how scholars can better appreciate the text of the bible, including its religious message. Frendo examines such matters as artefacts, stratigraphy and chronology, and archaeological reasoning. He also demonstrates that, whilst generally it is archaeology that casts light on the biblical text, at points biblical interpretation can help archaeologists to understand certain data.

Earthly Immortalities Peter Moore. 2019-06-15 In this thought-provoking book, Peter Moore examines the often overlooked issues concerning human mortality, the fragile ways in which the dead can be said to "live on" in earthly terms: through their children, their work, the memories of others, their possessions, and even their bodies. Such earthly immortalities raise a host of fascinating questions about our attitudes toward life, and toward the world we leave behind us when we die. To what extent does the meaning we find in our lives depend upon the assumption there will always be a new generation to continue the human adventure? What would it be like if science were able to extend life indefinitely, and is this something already enshrined in the doctrine of reincarnation? Can we solve our anxieties about mortality by learning that life is worth living precisely because we do not live forever? In a generous and eloquent account, these and more are the questions *Earthly Immortalities* seeks to answer.

Constructing Community Alison E. Rautman. 2014-11-27 In *Constructing Community*, Alison E. Rautman uses the Salinas District in New Mexico to examine the relationships of subsistence practices, mobility, and settlement. Rautman tackles a very broad topic: how archaeologists use material evidence to infer and imagine how people lived in the past, how they coped with everyday decisions and tensions, and how they created a sense of themselves and their place in the world.

Unforgettable Encounters: Understanding Participation in Italian Community Archaeology Francesco Ripanti. 2022-10-13 Whether as excavators and re-enactors, or co-organising research campaigns and outreach activities, the participation of the general public in archaeology has become a well-represented practice, but the impact remains underexplored. Evaluating participation can influence fieldwork practice and enrich the academic discussion on public archaeology.

The Oxford Handbook of the Archaeology of Death and Burial Sarah Tarlow, Liv Nilsson Stutz. 2013-06-06 *The Oxford Handbook of the Archaeology of Death and Burial* reviews the current state of mortuary archaeology and its practice, highlighting its often contentious place in the modern socio-politics of archaeology. It contains forty-four chapters which focus on the history of the discipline and its current scientific techniques and methods. Written by leading, international scholars in the field, it derives its examples and case studies from a wide range of time periods, such as the middle palaeolithic to the twentieth century, and geographical areas which include Europe, North and South America, Africa, and Asia. Combining up-to-date knowledge of relevant archaeological research with critical assessments of the theme and an evaluation of future research trajectories, it draws attention to the social, symbolic, and theoretical aspects of interpreting mortuary archaeology. The volume is well-illustrated with maps, plans, photographs, and illustrations and is ideally suited for students and researchers.

Between Dirt and Discussion Steven Archer, Kevin Bartoy. 2007-02-15 *Between Dirt and Discussion* advocates recentering the materials that make archaeology archaeology, in the hope of reinvigorating dialogues about the historic past, and archaeological contributions to its understanding. The cases presented in this volume revisit old methods and previous scholarly approaches with new perspectives, and incorporate the newest technologies available for understanding the past. Using their own work as examples, the contributors explore the connections between methodology and interpretation.

Bodies in the Bog and the Archaeological Imagination Karin Sanders. 2009-12 Over the past few centuries, northern Europe's bogs have yielded mummified men, women, and children who were deposited there as sacrifices in the early Iron Age and kept startlingly intact by the chemical properties of peat. In this remarkable account of their modern afterlives, Karin Sanders argues that the discovery of bog bodies began an extraordinary—and ongoing—cultural journey. Throughout the nineteenth and twentieth centuries, Sanders shows, these eerily preserved remains came alive in art and science as material metaphors for such concepts as trauma, nostalgia, and identity. Sigmund Freud, Joseph Beuys, Seamus Heaney, and other major figures have used them to reconsider fundamental philosophical, literary, aesthetic, and scientific concerns. Exploring this intellectual spectrum, Sanders contends that the power of bog bodies to provoke such a wide range of responses is rooted in their unique status as both archaeological artifacts and human beings. They emerge as corporeal time capsules that transcend archaeology to challenge our assumptions about what we can know about the past. By restoring them to the roster of cultural phenomena that force us to confront our ethical and aesthetic boundaries, *Bodies in the Bog* excavates anew the question of what it means to be human.

Pompeii in the Public Imagination from Its Rediscovery to Today Shelley Hales, Joanna Paul. 2011-11-17 A collection of essays exploring the different ways in which the ruined city of Pompeii has been a major source of inspiration to Western imaginations. The final essay includes twelve original landscapes, mostly in colour.

In Defiance of Time Angus Vine. 2010-06-17 *In Defiance of Time* contends that the antiquarian project, integral to early modern literary and intellectual culture, depended on the antiquaries' capacity to restore - in their imagination at least - the fragments of the past. It offers original readings of important authors such as Leland, Stow, Spenser, Camden, Drayton, and Selden.

Digging the Dirt Jennifer Wallace. 2004-06-25 When Jennifer Wallace travelled round Greece as a student, hiking through olive groves to hunt out the

stones of old temples and lost cities, she became fascinated by archaeology. It was magical. It was absurd. Give an archaeologist a few rocks and, like a master storyteller, he could bring another world to life. Give him a vague hunch about the past, and he was prepared to spend hours raking through the soil in search of proof. From the plain of Troy to the Titanic, and from Britain's Stonehenge to Ground Zero in New York, *Digging the Dirt* explores the excavation sites that have exerted the strongest pull on the public imagination. Some sites, in which bones are indistinguishable from dust, have driven archaeologists to despair. Other sites haunt poets with memories of loss and romance. All reveal the relevance of archaeology to our deepest cultural anxieties. Passionate and intelligent, *Digging the Dirt* engages with the work of philosophers and writers who have been stirred by the life below the ground, while never losing sight of the pressing demands of archaeologists today.

The Archaeological Imagination Michael Shanks.2016-06-03 Archaeology is a way of acting and thinking—about what is left of the past, about the temporality of what remains, about material and temporal processes to which people and their goods are subject, about the processes of order and entropy, of making, consuming and discarding at the heart of human experience. These elements, and the practices that archaeologists follow to uncover them, is the essence of the archaeological imagination. In this extended essay, renowned archaeological theorist Michael Shanks offers his colleagues and students a window on this imaginative world of past and present and the creative role archaeology can play in uncovering it, analyzing it, and interpreting it.

Archaeology with Art Helen Chittock,Joana Valdez-Tullett.2016-12-12 Based on a 2013 Theoretical Archaeology Group (TAG) conference session, this book aims to merge the perspectives of artists and archaeologists on making art. It explores the relationship between archaeology and art practice, the interactions between materials and practitioners, and the processes that result in the objects and images we call 'art'.

Popular Receptions of Archaeology Susanne Duesterberg.2015-02-28 Popular archaeology is a heterogeneous phenomenon: Focusing on the German archaeologist Heinrich Schliemann, Egyptian mummies, and the ruin complex Great Zimbabwe in fictional and factual texts, Susanne Duesterberg analyses the popular reception of archaeology in Victorian and Edwardian Britain. She offers an interdisciplinary and comparative view on the reception of the different archaeologies, reflecting contemporary sociocultural concerns in connection with identity formation. With its focus on popular culture as well as identity and memory studies, the book appeals to both a general public and experts from various disciplines.

Training and Practice for Modern Day Archaeologists John H. Jameson,James Eogan.2012-12-09 In recent years, an important and encouraging development in the practice of archaeology and historical preservation has been the markedly increased number of collaborations among archaeologists, educators, preservation planners, and government managers to explore new approaches to archaeological and heritage education and training to accommodate globalization and the realities of the 21st century worldwide. But what is the collective experience of archaeologists and cultural heritage specialists in these arenas? Should we be encouraged, or discouraged, by national and international trends? In an attempt to answer these questions, this volume examines and gives representational examples of the respective approaches and roles of government, universities, and the private sector in meeting the educational/training needs and challenges of practicing archaeologists today.

How Do We Imagine the Past? On Metaphorical Thought, Experientiality and Imagination in Archaeology Paul Bouissac,Dragoş Gheorghiu.2015-02-27 Recent years have witnessed a search for new sources for archaeological inspiration within areas which until recently have not been imagined as a source for science. Archaeology has become more "anthropologized", and, as such, is becoming increasingly influenced by the Zeitgeist, although some European schools are yet to recognize this. The process of scientific research that archaeologists have always considered to be an objective approach has been revealed to be the result of different subjective cognitive processes, forming part of the contemporary humanistic paradigm, a fact confirmed by new tendencies in contemporary archaeology. Consequently, this book considers the question: how does the archaeologist think today? Beginning with simple analogies issued from archaeological experiments or from ethnography, the structure of the contemporary archaeological thought is increasingly complex, working today with concepts that only yesterday were a subject of study. This book considers these new types of approaches, through a series of personal narratives provided by archaeologists, describing their working methods in the process of imagining the past.

Key Concepts in Public Archaeology Gabriel Moshenska.2017-09-28 This book provides a broad overview of the key concepts in public archaeology, a research field that examines the relationship between archaeology and the public, in both theoretical and practical terms. While based on the long-standing programme of undergraduate and graduate teaching in public archaeology at UCL's renowned Institute of Archaeology, the book also takes into account the growth of scholarship from around the world and seeks to clarify what exactly 'public archaeology' is by promoting an inclusive, socially and politically engaged vision of the discipline. Written for students and practitioners, the individual chapters provide textbook-level introductions to the themes, theories and controversies that connect archaeology to wider society, from the trade in illicit antiquities to the use of digital media in public engagement, and point readers to the most relevant case studies and learning resources to aid their further study. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Find out more at

Ideas of Landscape Matthew Johnson.2008-04-15 Ideas of Landscape discusses the current theory and practice of landscape archaeology and offers an alternative agenda for landscape archaeology that maps more closely onto the established empirical strengths of landscape study and has more contemporary relevance. The first historical assessment of a critical period in archaeology Takes as its focus the so-called English landscape tradition -- the ideological underpinnings of which come from English Romanticism, via the influence of the "father of landscape history": W. G. Hoskins Argues that the strengths and weaknesses of landscape archaeology can be traced back to the underlying theoretical discontents of Romanticism Offers an alternative agenda for landscape archaeology that maps more closely onto the established empirical strengths of landscape study and has more contemporary relevance

The Archaeology of Race Debbie Challis.2013-03-14 How much was archaeology founded on prejudice? The Archaeology of Race explores the application of racial theory to interpret the past in Britain during the late Victorian and Edwardian period. It investigates how material culture from ancient Egypt and Greece was used to validate the construction of racial hierarchies. Specifically focusing on Francis Galton's ideas around inheritance and race, it explores how the Egyptologist Flinders Petrie applied these in his work in Egypt and in his political beliefs. It examines the professional networks formed by societies, such as the Anthropological Institute, and their widespread use of eugenic ideas in analysing society. Archaeology of Race draws on archives and objects from the Petrie Museum of Egyptian Archaeology and the Galton collection at UCL. These collections are used to explore anti-Semitism, skull collecting, New Race theory and physiognomy. These collections give insight into the relationship between Galton and Petrie and place their ideas in historical context.

Whether you are an armchair archaeologist or embarking on your first excavation, *Digging Deeper* is an essential primer on the art of the dig.

Ritual, Belief and the Dead in Early Modern Britain and Ireland Sarah Tarlow.2010-11-22 Drawing on archaeological, historical, theological, scientific and folkloric sources, Sarah Tarlow's interdisciplinary study examines belief as it relates to the dead body in early modern Britain and Ireland. From the theological discussion of bodily resurrection to the folkloric use of body parts as remedies, and from the judicial punishment of the corpse to the ceremonial interment of the social elite, this book discusses how seemingly incompatible beliefs about the dead body existed in parallel through this

tumultuous period. This study, which is the first to incorporate archaeological evidence of early modern death and burial from across Britain and Ireland, addresses new questions about the materiality of death: what the dead body means, and how its physical substance could be attributed with sentience and even agency. It provides a sophisticated original interpretive framework for the growing quantities of archaeological and historical evidence about mortuary beliefs and practices in early modernity.

Digging Up History Judy Monroe Peterson.2008-07-15 This book offers insight into the fascinating field of archaeology. It examines what archaeologists do and what they have learned about past civilizations.

Pre-Exilic Israel, the Hebrew Bible, and Archaeology Anthony J. Frendo.2013-03-21 The nature of historical and archaeological research is such that biblical and archaeological evidence should both be taken into account so that we can attain a more reliable reconstruction of ancient Israel.

Nowadays we are faced with numerous reconstructions which are very often diametrically opposed to each other owing to the different assumptions of scholars. An examination of certain issues of epistemology in the current climate of postmodernism, shows that the latter is self-defeating when it claims that we cannot attain any true knowledge about the past. Illustrations are taken from the history of pre-exilic Israel; however, the indissoluble unity of text and artefact is made clearer and more concrete through a detailed case study about the location of the house of Rahab as depicted in Joshua 2: 15, irrespective of whether this text is historical or not. Text and artefact should work hand in hand even when narratives turn out to be fictional, since thus there emerges a clearer picture of the external world which the author would have had in mind.

From Stonehenge to Las Vegas Cornelius Holtorf.2005 Indiana Jones. Lara Croft. Archaeologist as folk hero, detective, treasure hunter. The meaning of things below the surface. The life history of Stonehenge. Las Vegas' Luxor Hotel. Copies of artifacts as contemporary kitch. The connections between archaeology and contemporary culture are endless. Cornelius Holtorf merges archaeological and cultural theory to take readers on an erudite tour of these intersections, using wide-ranging examples and compelling images to support his often controversial theses. Deliberately blurring the borders between past people and present meanings, this ambitious project seeks no less than the redefinition of the term archaeology. Equal parts amusing, infuriating, and provocative, this work will interest students and teachers in archaeology, anthropology, cultural studies and human geography, as well as professionals in heritage management and museums.

Archaeologists Dig for Clues Kate Duke.1996-12-13 Archaeologists on a dig work very much like detectives at a crime scene. Every chipped rock, charred seed, or fossilized bone could be a clue to how people lived in the past. In this information-packed Let's-Read-and-Find-Out Science book, Kate Duke explains what scientists are looking for, how they find it, and what their finds reveal.

Troy, Carthage and the Victorians Rachel Bryant Davies.2018-03-15 Playful, popular visions of Troy and Carthage, backdrops to the Iliad and Aeneid's epic narratives, shine the spotlight on antiquity's starring role in nineteenth-century culture. This is the story of how these ruined cities inspired bold reconstructions of the Trojan War and its aftermath, how archaeological discoveries in the Troad and North Africa sparked dramatic debates, and how their ruins were exploited to conceptualise problematic relationships between past, present and future. Rachel Bryant Davies breaks new ground in the afterlife of classical antiquity by revealing more complex and less constrained interaction with classical knowledge across a broader social spectrum than yet understood, drawing upon methodological developments from disciplines such as history of science and theatre history in order to do so. She also develops a thorough critical framework for understanding classical burlesque and engages in in-depth analysis of a toy-theatre production.

Shadow Sites Kitty Hauser.2007-03-29 At certain times of the day - at sunrise, and sunset - the outlines of prehistoric fields, barrows and hill-forts in the British landscape may be thrown into relief. Such 'shadow sites', best seen from above, and captured by an airborne camera, are both examples of, and metaphors for, a particular way of seeing the landscape. At a time of rapid modernisation and urbanisation in mid-twentieth-century Britain, an archaeological vision of the British landscape reassured and enchanted a number of writers, artists, photographers, and film-makers. From John Piper, Eric Ravilious and Shell guide books, to photographs of bomb damage, aerial archaeology, and *The Wizard of Oz*, Kitty Hauser delves into evocative interpretations of the landscape and looks at the affinities between photography as a medium to capture traces of the past as well as their absence.

Landscapes under Pressure Ludomir R. Lozny.2006-12-30 This book investigates the newly emerging interest to investigate and preserve cultural landscapes. It presents the historic, archaeological, ethnographic, and environmental traditions of cultural landscape study and the attempts to reconstruct and analyze the complex processes of cultural changes. It points to the benefits of interdisciplinary cooperation, which should involve an ecological approach with historical ecology, applied archaeology, and environmental planning.

Archaeology Kevin Greene, Tom Moore.2010-06-17 Archaeology: An Introduction looks behind the popular aspects of archaeology such as the discovery and excavation of sites, the study of human remains and animal bones, radiocarbon dating, museums and 'heritage' displays, and reveals the methods used by archaeologists.
