Walkaway Cory Doctorow.2017-04-25 Kirkus' Best Fiction of 2017 From New York Times bestselling author Cory Doctorow, an epic tale of revolution, love, post-scarcity, and the end of death. *Walkaway* is now the best contemporary example I know of, its utopia glimpsed after fascinatingly-extrapolated revolutionary struggle. —William Gibson Hubert Vernon Rudolph Clayton Irving Wilson Alva Anton Jeff Harley Timothy Curtis Cleveland Cecil Ollie Edmund Eli Wiley Marvin Ellis Espinoza—known to his friends as Hubert, Etc—was too old to be at that Communist party. But after watching the breakdown of modern society, he really has nowhere left to be—except amongst the dregs of disaffected youth who party all night and heap scorn on the sheep they see on the morning commute. After falling in with Natalie, an ultra-rich heiress trying to escape the clutches of her repressive father, the two decide to give up fully on formal society—and walk away. After all, now that anyone can design and print the basic necessities of life—food, clothing, shelter—from a computer, there seems to be little reason to toil within the system. It's still a dangerous world out there, the empty lands wrecked by climate change, dead cities hollowed out by industrial flight, shadows hiding predators animal and human alike. Still, when the initial pioneer walkaways flourish, more people join them. Then the walkaways discover the one thing the ultra-rich have never been able to buy: how to beat death. Now it's war - a war that will turn the world upside down. Fascinating, moving, and darkly humorous, *Walkaway* is a multi-generation SF thriller about the wrenching changes of the next hundred years...and the very human people who will live their consequences. *Teaching Mathematics at Secondary Level* Tony Gardiner.2016-02-08 *Teaching Mathematics* is nothing less than a mathematical manifesto. Arising in response to a limited National Curriculum, and engaged with secondary schooling for those aged 11–14 (Key Stage 3) in particular, this handbook for teachers will help them broaden and enrich their students' mathematical education. It avoids specifying how to teach, and focuses

instead on the central principles and concepts that need to be borne in mind by all teachers and textbook authors—but which are little appreciated in the UK at present. This study is aimed at anyone who would like to think more deeply about the discipline of 'elementary mathematics', in England and Wales and anywhere else. By analysing and supplementing the current curriculum, Teaching Mathematics provides food for thought for all those involved in school mathematics, whether as aspiring teachers or as experienced professionals. It challenges us all to reflect upon what it is that makes secondary school mathematics educationally, culturally, and socially important.

*The Hunt for Zero Point* Nick Cook. 2007-12-18 This riveting work of investigative reporting and history exposes classified government projects to build gravity-defying aircraft--which have an uncanny resemblance to flying saucers. The atomic bomb was not the only project to occupy government scientists in the 1940s. Antigravity technology, originally spearheaded by scientists in Nazi Germany, was another high priority, one that still may be in effect today. Now for the first time, a reporter with an unprecedented access to key sources in the intelligence and military communities reveals suppressed evidence that tells the story of a quest for a discovery that could prove as powerful as the A-bomb. The Hunt for Zero Point explores the scientific speculation that a zero point of gravity exists in the universe and can be replicated here on Earth. The pressure to be the first nation to harness gravity is immense, as it means having the ability to build military planes of unlimited speed and range, along with the most deadly weaponry the world has ever seen. The ideal shape for a gravity-defying vehicle happens to be a perfect disk, making antigravity tests a possible explanation for the numerous UFO sightings of the past 50 years. Chronicling the origins of antigravity research in the world's most advanced research facility, which was operated by the Third Reich during World War II, The Hunt for Zero Point traces U.S. involvement in the project, beginning with the recruitment of former Nazi scientists after the war. Drawn from interviews with those involved with the research and who visited labs in Europe and the United States, The Hunt for Zero Point journeys to the heart of the twentieth century's most puzzling unexplained phenomena.

**Deep Cut** Christine Keiner. 2020 This book is openly available in digital formats thanks to a generous grant from the Andrew W. Mellon Foundation. The Atlantic-Pacific Central American sea-level canal is generally regarded as a spectacular failure. However, Deep Cut examines the canal in an alternative context, as an anticipated infrastructure project that captured attention from the nineteenth through the late twentieth centuries. Its advocates included naturalist Alexander von Humboldt, physicist Edward Teller, and U.S. presidents John F. Kennedy, Lyndon Johnson, and Jimmy Carter. The waterway did not come to fruition, but as a proposal it served important political and scientific purposes during different eras, especially the years spanning the Cold War and the environmental decade of the 1970s. Historian Christine Keiner shows how the evolving plans for the sea-level ship canal performed distinct kinds of work for diverse historical actors in light of shifting scientific, environmental, and diplomatic values. Dismissing it as a failed scheme prevents us from considering the political, cultural, and epistemological processes that went into constructing the seaway as an innovative diplomatic solution to rising U.S.-Panama tensions, an exciting research opportunity for evolutionary biologists, a superior hydrocarbon highway for the oil industry, or a serious ecological threat to marine biodiversity. Invoking past dreams and nightmares of peaceful nuclear explosives, invasive sea snakes, and the 1970s energy crisis, Deep Cut uses the Central American seaway proposal to examine the changing roles of environmental diplomacy and state-sponsored environmental impact assessment. More broadly, Keiner amplifies an emerging conversation around the environmental, scientific, and political histories and legacies of unrealized megaprojects.

**Across The Reef: The Marine Assault of Tarawa** Joseph H. Alexander.2016-07-19 In August 1943, to meet in secret with Major General Julian C. Smith and his principal staff officers of the 2d Marine Division, Vice Admiral Raymond A. Spruance, commanding the Central Pacific Force, flew to New Zealand from Pearl Harbor. Spruance told the Marines to prepare for an amphibious assault against Japanese positions in the Gilbert Islands in November. The Marines knew about the Gilberts. The 2d Raider Battalion under Lieutenant Colonel Evans F. Carlson had attacked Makin Atoll a year earlier. Subsequent intelligence reports warned that the Japanese had fortified Betio Island in Tarawa Atoll, where elite forces guarded a new bomber strip. Spruance said Betio would be the prime target for the 2d Marine Division.

**"Over the Top"** Arthur Guy Empey.1917 Excerpt: ...of the trench. One dead German was lying on his back, with a rifle sticking straight up in the air, the bayonet of which was buried to the hilt in his chest. Across his feet lay a dead English soldier with a bullet hole in his forehead. This Tommy must have been killed just as he ran his bayonet through the German. Rifles and equipment were scattered about, and occasionally a steel helmet could be seen sticking out of the mud. At one point, just in the entrance to a communication trench, was a stretcher. On this stretcher a German was lying with a white bandage around his knee, near to him lay one of the stretcher-bearers, the red cross on his arm covered with mud and his helmet filled with blood and brains. Close by, sitting up against the wall of the trench, with head resting on his chest, was the other stretcher-bearer. He seemed to be alive, the posture was so natural and easy, but when I got closer, I could see a large, jagged hole in, his temple. The three must have been killed by the same shell-burst. The dugouts were all smashed in and knocked about, big square-cut timbers splintered into bits, walls caved in, and entrances choked. Tommy, after taking a trench, learns to his sorrow, that the hardest part of the work is to hold it. In our case this proved to be so. The German artillery and machine guns had us taped (ranged) for fair; it was worth your life to expose yourself an instant. Don't think for a minute that the Germans were the only sufferers, we were clicking casualties so fast that you needed an adding machine to keep track of them. Did you ever see one of the steam shovels at work on the Panama Canal, well, it would look like a hen scratching alongside of a Tommy digging in while under fire, you couldn't see daylight through the clouds of dirt from his shovel. After losing three out of six men of our crew, we managed to set up our machine gun. One of the legs of the tripod was resting on the chest of a half-buried body. When...

**Cat's Cradle** Kurt Vonnegut.2009-11-04 "A free-wheeling vehicle . . . an unforgettable ride!"—The New York Times Cat's Cradle is Kurt Vonnegut's satirical commentary on modern man and his madness. An apocalyptic tale of this planet's ultimate fate, it features a midget as the protagonist, a complete, original theology created by a calypso singer, and a vision of the future that is at once blackly fatalistic and hilariously funny. **The Signal Corps** George Raynor Thompson.2003

**Strategy and Command** Louis Morton.2015-07-11 For the United States, full involvement in World War II began and ended in the Pacific Ocean. Although the accepted grand strategy of the war was the defeat of Germany first, the sweep of Japanese victory in the weeks and months after Pearl Harbor impelled the United States to move as rapidly as it could to stem the enemy tide of conquest in the Pacific. Shocked as they were by the initial attack, the American people were also united in their determination to defeat Japan, and the Pacific war became peculiarly their own affair. In this great theater it was the United States that ran the war, and had the determining voice in answering questions of strategy and command as they arose. The natural environment made the prosecution of war in the Pacific of necessity an interservice effort, and any real account of it must, as this work does, take into full account the views and actions of the Navy as well as those of the Army and its Air Forces. These are the factors—a predominantly American theater of war covering nearly one-third the globe, and a joint conduct of war by land, sea, and air on the largest scale in American history—that make this volume on the Pacific war of particular significance today. It is the capstone of the eleven volumes published or being published in the Army's World War II series that deal with military operations in the Pacific area, and it is one that should command wide attention from the thoughtful public as well as the military reader in these days of global tension.
