History of Architectural Conservation Jukka Jokilehto. 2007-06-07 A History of Architectural Conservation expands knowledge about the conservation of ancient monuments, works of art and historic buildings. It includes the origins of the interest in conservation within the European context, and the development of the concepts from Antiquity and the Renaissance to the present day. Jokilehto illustrates how this development has influenced international collaboration in the protection and conservation of cultural heritage, and how it has formed the principal concepts and approach to conservation and restoration in today's multi-

cultural society. This book is based on archival research of original documents and the study of key restoration examples in countries that have influenced the international conservation movement. Accessible and of great interest to students and the general public it includes conservation trends in Europe, the USA, India, Iran and Japan.

University and School Collaborations During a Pandemic

Fernando M. Reimers, Francisco J. Marmolejo. 2022 Based on twenty case studies of universities worldwide, and on a survey administered to leaders in 101 universities, this open access book shows that, amidst the significant challenges caused by the COVID-19 pandemic, universities found ways to engage with schools to support them in sustaining educational opportunity. In doing so, they generated considerable innovation, which reinforced the integration of the research and outreach functions of the university. The evidence suggests that universities are indeed open systems, in interaction with their environment, able to discover changes that can influence them and to change in response to those changes. They are also able, in the success of their efforts to mitigate the educational impact of the pandemic, to create better futures, as the result of the innovations they can generate. This challenges the view of universities as ivory towers being isolated from the surrounding environment and detached from local problems. As they reached out to schools, universities not only generated clear and valuable innovations to sustain educational opportunity and to improve it, this process also contributed to transform internal university processes in ways that enhanced their own ability to deliver on the third mission of outreach

The Eusebian Canon Tables Matthew R. Crawford. 2019-05-06

One of the books most central to late-antique religious life was the four-gospel codex, containing the Gospels of Matthew, Mark, Luke, and John. A common feature in such manuscripts was a marginal cross-referencing system known as the Canon Tables. This reading aid was invented in the early fourth century by Eusebius of Caesarea and represented a milestone achievement both in the history of the book and in the scholarly study of the fourfold gospel. In this work, Matthew R. Crawford provides the first book-length treatment of the origins and use of the Canon Tables apparatus in any language. Part one begins by defining the Canon Tables as a paratextual device that orders the textual content of the fourfold gospel. It then considers the relation of the system to the prior work of Ammonius of Alexandria and the hermeneutical implications of reading a four-gospel codex equipped with the marginal apparatus. Part two transitions to the reception of the paratext in subsequent centuries by highlighting four case studies from different cultural and theological traditions, from Augustine of Hippo, who used the Canon Tables to develop the first ever theory of gospel composition, to a Syriac translator in the fifth century, to later monastic scholars in Ireland between the seventh and ninth centuries. Finally, from the eighth century onwards, Armenian commentators used the artistic adornment of the Canon Tables as a basis for contemplative meditation. These four case studies represent four different modes of using the Canon Tables as a paratext and illustrate the potential inherent in the Eusebian apparatus for

engaging with the fourfold gospel in a variety of ways, from the philological to the theological to the visual.

Courtly Love Undressed E. Jane Burns.2002 Reading through clothes reveals that the expression of female desire, so often effaced in courtly lyric and romance, can be registered in the poetic deployment of fabric and adornment, and that gender is often configured along a sartorial continuum, rather than in terms of naturally derived categories of woman and man.

Bouwknegt, Ewan Brown, Eleni Chaitidou, Cale Davis, Markus Eikel, Shreeyash Uday Lalit, Moa Lidén, Tor-Geir Myhrer, Trond Myklebust, Matthias Neuner, Christian Axboe Nielsen, Gilad Noam, Gavin Oxburgh, David Re, Alf Butenschøn Skre, Usha Tandon, William Webster and William H. Cancer Chemoprevention Raymond C. Bergan. 2012-10-24 This volume offers a broad overview of topics related to cancer chemoprevention. It provides a review of topics ranging from basic research arenas to clinical trial design, implementation, and interpretation. It covers all key areas necessary for understanding the field of cancer chemoprevention for the interested reader, for individuals wishing to enter this area of investigation, and for individuals seeking guidance in particular areas of research, relating to agent identification, basic science investigations and clinical trials. The genesis of this book is based on the fact that cancer chemoprevention is a relatively new and rapidly evolving field spanning a wide array of disciplines, and forces researchers to address difficult and complex questions whose answers are not readily available. Cancer Chemoprevention provides a ready resource whose importance and intent lie in its ability to gather and solidify disparate data to explicitly outline areas of difficulty and to highlight future areas of important development. It provides broad outlines for current, ongoing and future directions in this area with various target organ sites, written by experts in their respective fields, whose primary research focuses upon that individual field.

The Social Metabolism Manuel González de Molina, Víctor M. Toledo. 2014-06-30 Over this last decade, the concept of Social Metabolism has gained prestige as a theoretical instrument for the required analysis, to such an extent that there are now dozens of researchers, hundreds of articles and several books that have adopted and use this concept. However, there is a great deal of

variety in terms of definitions and interpretations, as well as different methodologies around this concept, which prevents the consolidation of a unified field of new knowledge. The fundamental aim of the book is to conduct a review of the past and present usage of the concept of social metabolism, its origins and history, as well as the main currents or schools that exist around this concept. At the same time, the reviews and discussions included are used by the authors as starting points to draw conclusions and propose a theory of socio-ecological transformations. The theoretical and methodological innovations of this book include a distinction of two types of metabolic processes: tangible and intangible; the analysis of the social metabolism at different scales (in space and time) and a theory of socio-ecological change overcoming the merely “systemic” or “cybernetic” nature of conventional approaches, giving special protagonism to collective action.

Understanding Environmental Policy Processes James Keeley, Ian Scoones. 2014-10-14 A critical analysis of the post-Rio consensus on environment and development which questions the role of particular forms of internationalized elite scientific expertise. It asks why certain understandings of environmental change stick with such tenacity. In exploring this, the authors unravel the politics of knowledge surrounding policymaking, looking particularly at Ethiopia, Mali and Zimbabwe and their land and soils management. The book also looks at prospects for more inclusive, participatory forms of policymaking.

Botticelli Past and Present Ana Debenedetti, Caroline Elam. 2019-01-08 The recent exhibitions dedicated to Botticelli around the world show, more than ever, the significant and

continued debate about the artist. Botticelli Past and Present engages with this debate. The book comprises four thematic parts, spanning four centuries of Botticelli's artistic fame and reception from the fifteenth century. Each part comprises a number of essays and includes a short introduction which positions them within the wider scholarly literature on Botticelli. The parts are organised chronologically beginning with discussion of the artist and his working practice in his own time, moving onto the progressive rediscovery of his work from the late eighteenth to the turn of the twentieth century, through to his enduring impact on contemporary art and design. Expertly written by researchers and eminent art historians and richly illustrated throughout, the broad range of essays in this book make a valuable contribution to Botticelli studies.

The Rings of Saturn W. G. Sebald.2016-11-08 The book is like a dream you want to last forever (Roberta Silman, The New York Times Book Review), now with a gorgeous new cover by the famed designer Peter Mendelsund A masterwork of W. G. Sebald, now with a gorgeous new cover by the famed designer Peter Mendelsund *The Rings of Saturn*—with its curious archive of photographs—records a walking tour of the eastern coast of England. A few of the things which cross the path and mind of its narrator (who both is and is not Sebald) are lonely eccentrics, Sir Thomas Browne's skull, a matchstick model of the Temple of Jerusalem, recession-hit seaside towns, wooded hills, Joseph Conrad, Rembrandt's Anatomy Lesson, the natural history of the herring, the massive bombings of WWII, the dowager Empress Tzu Hsi, and the silk industry in Norwich. W.G. Sebald's *The Emigrants* (New Directions, 1996) was hailed by Susan Sontag as an astonishing masterpiece perfect while being unlike any book one has ever read. It was one of the great books of the last few years, noted Michael Ondaatje, who now acclaims *The Rings of Saturn* an even more inventive work than its predecessor, *The*

Emigrants.

The Case for Degrowth Susan Paulson, Giacomo D'Alisa, Federico Demaria, Giorgos Kallis. 2020-09-29 The relentless pursuit of economic growth is the defining characteristic of contemporary societies. Yet it benefits few and demands monstrous social and ecological sacrifice. Is there a viable alternative? How can we halt the endless quest to grow global production and consumption and instead secure socio-ecological conditions that support lives worth living for all? In this compelling book, leading experts Giorgos Kallis, Susan Paulson, Giacomo D'Alisa and Federico Demaria make the case for degrowth - living well with less, by living differently, prioritizing wellbeing, equity and sustainability. Drawing on emerging initiatives and enduring traditions around the world, they advance a radical degrowth vision and outline policies to shape work and care, income and investment that avoid exploitative and unsustainable practices. Degrowth, they argue, can be achieved through transformative strategies that allow societies to slow down by design, not disaster. Essential

reading for all concerned citizens, policy-makers, and students, this book will be an important contribution to one of the thorniest and most pressing debates of our era.

Overtourism Claudio Milano, Joseph M Cheer, Marina Novelli. 2019-06-07 This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

Aramis, Or The Love of Technology Bruno Latour. 1996-04-15 Bruno Latour has written a unique and wonderful tale of a technological dream gone wrong. The story of the birth and death of Aramis—the guided-transportation system intended for Paris—is told in this thought-provoking and fictional account by several different parties: an engineer and his professor; company executives and elected officials; a sociologist; and finally Aramis itself, who delivers a passionate plea on behalf of technological

innovations that risk being abandoned by their makers. As the young engineer and professor follow Aramis's trail—conducting interviews, analyzing documents, assessing the evidence—perspectives keep shifting: the truth is revealed as multilayered, unascertainable, comprising an array of possibilities worthy of Rashomon. This charming and profound book, part novel and part sociological study, is Latour at his thought-provoking best.

Planning the Future of Cross Border Families Ilaria

The book addresses current features of the Brussels IIa, Rome III, Maintenance and Succession Regulations, the 2007 Hague Protocol, the 2007 Hague Recovery Convention and new Regulations on Property Regimes. The contributions are authored by more than 30 experts in cross-border family and succession matters. They introduce social and cultural issues of cross-border families, set up the scope of all EU family and succession regulations, examine rules on jurisdiction, applicable law and recognition and enforcement regimes and focus on the current problems of EU family and succession law (*lis pendens* in third States, *forum necessitatis*, Brexit and interactions with other legal instruments). Modern Forms of Work Stefano Bellomo, Fabrizio

Ferraro.2020-10-06 The collective volume “Modern Forms of Work. A European Comparative Study” evokes the intent to embody a reflection focused on modern labour law issues from a comparative perspective. A first set of essays contains national reports on modern forms of work. The second group contains some reflections regarding critical issues on digitalization, platforms and algorithms, analysing the different facets of the galaxy of digital work. The third group of essays flows into the section entitled “new balances and workers’ rights in the digital era”, a crucial topic in the debate. The complex of the writings, despite the diversity of approaches and methods, reveals the existence of a dense and inexhaustible dialogue between young scholars, at European and extra-European level. The analysis of new forms of work – the offspring of transnational processes of globalization and technologization – forms a fertile ground for experimenting a transnational dialogue on which young researchers can practice with excellent results, as this small volume confirms.

Children and Peace Nikola Balvin, Daniel J. Christie.2019-10-20

This open access book brings together discourse on children and peace from the 15th International Symposium on the Contributions of Psychology to Peace, covering issues pertinent to children and peace and approaches to making their world safer, fairer and more sustainable. The book is divided into nine sections that examine traditional themes (social construction and deconstruction of diversity, intergenerational transitions and

memories of war, and multiculturalism), as well as contemporary issues such as Europe's "migration crisis", radicalization and violent extremism, and violence in families, schools and communities. Chapters contextualize each issue within specific social ecological frameworks in order to reflect on the multiplicity of influences that affect different outcomes and to discuss how the findings can be applied in different contexts. The volume also provides solutions and hope through its focus on youth empowerment and peacebuilding programs for children and families. This forward-thinking volume offers a multitude of views, approaches, and strategies for research and activism drawn from peace psychology scholars and United Nations researchers and practitioners. This book's multi-layered emphasis on context, structural determinants of peace and conflict, and use of research for action towards social cohesion for children and youth has not been brought together in other peace psychology literature to the same extent. *Children and Peace: From Research to Action* will be a useful resource for peace psychology academics and students, as well as social and developmental psychology academics and students, peace and development practitioners and activists, policy makers who need to make decisions about the matters covered in the book, child rights advocates and members of multilateral organizations such as the UN.

Socialism of Fools Michele Battini.2016-04-05 In *Socialism of Fools*, Michele Battini focuses on the critical moment during the Enlightenment in which anti-Jewish stereotypes morphed into a sophisticated, modern social anti-Semitism. He recovers the potent anti-Jewish, anticapitalist propaganda that cemented the idea of a Jewish conspiracy in the European mind and connects it to the atrocities that characterized the Jewish experience in the

nineteenth and twentieth centuries. Beginning in the eighteenth century, counter-Enlightenment intellectuals and intransigent Catholic writers singled out Jews for conspiring to exploit self-sustaining markets and the liberal state. These ideas spread among socialist and labor movements in the nineteenth century and intensified during the Long Depression of the 1870s. Anti-Jewish anticapitalism then migrated to the Habsburg Empire with the Christian Social Party; to Germany with the Anti-Semitic Leagues; to France with the nationalist movements; and to Italy, where Revolutionary Syndicalists made anti-Jewish anticapitalism the basis of an alliance with the nationalists. Exemplified best in the Protocols of the Elders of Zion, the infamous document that leaked Jewish plans to conquer the world, the Jewish-conspiracy myth inverts reality and creates a perverse relationship to historical and judicial truth. Isolating the intellectual roots of this phenomenon and its contemporary resonances, Battini shows us why, so many decades after the Holocaust, Jewish people continue to be a powerful political target.
