Mapping Psychopathology with fMRI and Effective Connectivity Analysis Baojuan Li,Adeel Razi,Karl J. Friston.2017-06-22 There is a growing appreciation that many psychiatric (and neurological) conditions can be understood as functional disconnection syndromes - as reflected in aberrant functional integration and synaptic connectivity. This Research Topic considers recent advances in understanding psychopathology in terms of aberrant effective connectivity - as measured noninvasively using functional magnetic resonance imaging (fMRI). Recently, there has been increasing interest in inferring directed connectivity (effective connectivity) from fMRI data. Effective connectivity refers to the influence that one neural system exerts over another and quantifies the directed coupling among brain regions - and how they change with pathophysiology. Compared to functional connectivity, effective connectivity allows one to understand how brain regions interact with each other in terms of context sensitive changes and directed coupling - and therefore may provide mechanistic insights into the neural basis of psychopathology. Established models of effective connectivity include psychophysiological interaction (PPI), structural equation modeling (SEM) and dynamic causal modelling (DCM). DCM is unique because it explicitly models

the interaction among brain regions in terms of latent neuronal activity. Moreover, recent advances in DCM such as stochastic and spectral DCM, make it possible to characterize the interaction between different brain regions both at rest and during a cognitive task.

Storyteller J. D. F. Jones.2002 When he died in 1996, Laurens van der Post was a celebrated polymath: war-hero, writer, explorer, mystic, Jungian, behind-the-scenes diplomat, and sage to Mrs Thatcher and Prince Charles. He was a secular saint. After J.D.F. Jones's authorised biography, he will be most famous for one skill: storytelling. His books and stories - of the bushmen of the Kalahari, of his friendship with Jung, of his diplomatic importance - may be inspiring. They are also largely fabricated.

Patient Safety and Quality Ronda Hughes.2008 Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043). - online AHRQ blurb, <http://www.ahrq.gov/qual/nursesfdbk/>

Biology of Breeding Poultry Paul M. Hocking.2009 This book reviews the biological science and background to breeding meat poultry, specifically broiler, turkey and duck. These commercial birds

have been changed by genetic selection to such an extent that they are substantially different from traditional breeds and laying hens. Covering science, management and husbandry systems, this book is an essential reference for researchers and students in animal science, as well as technical staff of breeding companies and poultry meat producers. Part of the Poultry Science Symposium Series.

Juta's manual of nursing Nelouise Geyer, Sophie Mataniele Mogotlane, Anne Young. 2009-02

Completely updated to include the latest developments in the field of Nursing Science, this second edition covers the topics required for both Fundamental and General Nursing Science; this makes it suitable for the categories of Nursing Auxiliary, Staff Nurse and for the fundamentals of nursing for Professional Nurses. The manual has a strong community-based focus. It introduces the nurse to the fundamentals of nursing and is extremely practical, encouraging problem solving both in the clinic and in the community. Each chapter has tutorial-type questions to stimulate discussion and personal research. Key Features: This updated edition includes a chapter on the important topic of Informatics; The text is outcomes-based so that students understand the focus of each chapter; Numerous line drawings expand on difficult concepts; It covers the new curriculum; therefore lecturers can be assured the book will meet their needs; Summaries of key ethical and legal considerations in each chapter highlight these important aspects; The content encourages the development of problem-solving skills so that the nurse can deal with problems as they arise in the community/clinic environment; Self-assessment and discussion topics throughout the text test what has been learnt.

Encyclopedia of Post-Colonial Literatures in English Eugene Benson, L.W. Conolly. 2004-11-30
Post-Colonial Literatures in English, together with English Literature and American Literature, form one of the three major groupings of literature in English, and, as such, are widely studied around the

world. Their significance derives from the richness and variety of experience which they reflect. In three volumes, this Encyclopedia documents the history and development of this body of work and includes original research relating to the literatures of some 50 countries and territories. In more than 1,600 entries written by more than 600 internationally recognized scholars, it explores the effect of the colonial and post-colonial experience on literatures in English worldwide.

Innovative Endoscopic and Surgical Technology in the GI Tract Santiago Horgan, Karl-Hermann Fuchs. 2021-10-01 This book provides a comprehensive state-of-the art overview on the main trends in the newest endoscopic, robotic, and minimal invasive surgical innovations. It also aims to give insight on some of the innovative ideas around Gastro-intestinal Surgery and Endoscopy to stimulate further activities. It contains established knowledge in the field of endoscopic and surgical techniques, and the integration of these new findings in updated therapeutic decision making are demonstrated. The text reviews the latest literature on the subjects and describes the decision making to establish new therapeutic options in the management of diseases applying new technologies. These new techniques are described in detail, which provide excellent back-up information for clinicians in daily practice. Written by experts in the field, *Innovative Endoscopic and Surgical Technology in the GI Tract* is a valuable resource of knowledge for clinicians, surgeons, nurses, technicians, students and researchers with an interest in GI- disease.

A Story Like the Wind Laurens Van Der Post. 2011-10-31 This is a story of an almost vanished Africa; a world of myth and magic in which the indigenous peoples of the continent lived for uncountable centuries before the Europeans came to shatter it. The main character is a boy who has a relationship with this Africa not unlike Kipling's Kim with the antique world of India. François

Joubert, whose Huguenot ancestors settled in Africa three hundred years ago, lives as a solitary child on his father's farm. 'Hunter's Drift'. Here, in the far interior of Africa, he experiences the wonder and mystery of an ageless, natural primitive life, his perception of it heightened by the influence of three people in particular - his Bushman nurse, the head herdsman of the local Matabele clan (his father's chosen partners in the pioneering of Hunter's Drift), and a hunter of legendary fame, now the chief ranger of a vast game reserve nearby. François' meeting with an untamed Bushman, Xhabbo, whose intuitive teaching nourishes his spirit; his strange pilgrimage to the distant krall of a powerful witch-doctor; his dramatic encounter and relationship with the daughter of a retired colonial governor; all are examples of African point and European counterpoint, in a highly original theme, moving to a strangely presaged and omened climax.

Driver Behaviour and Accident Research Methodology Dr Anders af Wåhlberg.2012-10-01 This book discusses several methodological problems in traffic psychology which are not currently recognized as such. Summarizing and analyzing the available research, it is found that there are a number of commonly made assumptions about the validity of methods that have little backing, and that many basic problems have not been researched at all. Suggestions are made as to further studies that should be made to address some of these problems. The book is primarily intended for traffic/transport researchers, but should also be useful for specialized education at a higher level (doctoral students and transportation specialists) as well as officials who require a good grasp of methodology to be able to evaluate research.

Time-Series Analysis and Cyclostratigraphy Graham P. Weedon.2005-09-15 Increasingly environmental scientists, palaeoceanographers and geologists are collecting quantitative records of environmental changes (time-series) from sediments, ice cores, cave calcite, corals and trees. This

book explains how to analyse these records, using straightforward explanations and diagrams rather than formal mathematical derivations. All the main cyclostratigraphic methods are covered including spectral analysis, cross-spectral analysis, filtering, complex demodulation, wavelet and singular spectrum analysis. Practical problems of time-series analysis, including those of distortions of environmental signals during stratigraphic encoding, are considered in detail. Recent research into various types of tidal and climatic cycles is summarised. The book ends with an extensive reference section, and an appendix listing sources of computer algorithms. This book provides the ideal reference for all those using time-series analysis to study the nature and history of climatic and tidal cycles. It is suitable for senior undergraduate and graduate courses in environmental science, palaeoceanography and geology.

Venture To The Interior Laurens Van Der Post.2010-05-25 Summoned to Whitehall in 1949, Laurens van der Post was told that in old British Central Africa there were two large tracts of country that London didn't really know anything about, and could he go in there on foot and take a look, please? Venture to the Interior is the account of that journey, a journey filled with adventure and discovery, flying from London across Europe and Africa, and after days in small aircraft, on foot across the mountains to the two lost worlds of central Africa.

The Greater Awyu Languages of West Papua Lourens de Vries.2020-08-24 This book is a comprehensive and authoritative description of the Greater Awyu family of Papuan languages. The book brings together many decades of research on Greater Awyu languages, including 10 years of field work by the author. The book presents a description of major patterns found in languages of the family: phonology, morphology, syntax and discourse. In addition, major aspects of the

anthropological linguistics of Greater Awyu languages are described: counting systems, language names, kinship, linguistic ideologies, lexical substitution registers, avoidance and taboo. The linguistic patterns of Greater Awyu languages are systematically placed in the genetic, typological, areal and historical contexts of New Guinea. The long dialect continuums within the family, by reflecting different diachronic stages, offer a window on the origin of switch reference, clause chaining, topic markers, postpositions and double-headed relative clauses. The book is relevant for readers interested in the typological, historical and cultural linguistics of New Guinea but also for anthropologists and historians because the history and cultural practices of Greater Awyu speakers are a key part of the story of this language family.

Responsible Tourism Anna Spenceley. 2012-05-04 *Responsible Tourism* presents a wide variety of valuable lessons learned in responsible tourism initiatives in Southern Africa that many tourism practitioners can use in their efforts to make the tourism sector work for the poor and for the environment. Dr Harsh Varma, Director, Development Assistance Department, World Tourism Organization (UNWTO) For those interested in how tourism can assist in the economic and social development of societies in need, *Responsible Tourism* effectively integrates scales and types of knowledge to present an informative, stimulating perspective. It will be on my bookshelf. Steve McCool, Professor Emeritus, Wildland Recreation Management, University of Montana *Responsible tourism* is one of the most significant contemporary issues for tourism scholars and practitioners alike. This useful and clearly written collection of new research demonstrates the innovations in responsible tourism occurring within southern Africa and provides lessons for international research and practice. Professor Christian Rogerson, University of Witwatersrand, South Africa Conservation efforts are often seen to be in conflict with local livelihoods and resource use - the park versus

people debate. Responsible tourism and Ecotourism are often invoked as a third way that serve both ends. Yet do they actually work in practice? This volume delves deep into practice in southern Africa, the hotbed of innovation on the issue, and provides a comprehensive, evidence-based examination of what works and what fails, using a wealth of information from scholars and practitioners working in the region. This book opens with an overview of the issues, looks at what sustainable and responsible tourism are in practice and how they may contribute to conservation, poverty alleviation and local economic development. Part 1 examines policies and institutional activities in responsible tourism by governments, donor agencies and nongovernmental organizations, and addresses the market for responsible travel. Part 2 considers responsible nature-based tourism, the economics of wildlife tourism and ecotourism, transfrontier conservation areas, ecological impacts of tourism and other issues. Part 3 looks at more detailed case studies of community-based tourism projects, and highlights the reasons for successes and failures in this sector. The book concludes with a synthesis of the key findings with implications for policy, destination planning, business management, and future private sector and donor interventions. Published with the Southern African Sustainable Use Specialist Group (SASUSG) of IUCN

The Threat of Pandemic Influenza Institute of Medicine, Board on Global Health, Forum on Microbial Threats. 2005-04-09 Public health officials and organizations around the world remain on high alert because of increasing concerns about the prospect of an influenza pandemic, which many experts believe to be inevitable. Moreover, recent problems with the availability and strain-specificity of vaccine for annual flu epidemics in some countries and the rise of pandemic strains of avian flu in disparate geographic regions have alarmed experts about the world's ability to prevent or contain a human pandemic. The workshop summary, *The Threat of Pandemic Influenza: Are We*

Ready? addresses these urgent concerns. The report describes what steps the United States and other countries have taken thus far to prepare for the next outbreak of killer flu. It also looks at gaps in readiness, including hospitals' inability to absorb a surge of patients and many nations' incapacity to monitor and detect flu outbreaks. The report points to the need for international agreements to share flu vaccine and antiviral stockpiles to ensure that the 88 percent of nations that cannot manufacture or stockpile these products have access to them. It chronicles the toll of the H5N1 strain of avian flu currently circulating among poultry in many parts of Asia, which now accounts for the culling of millions of birds and the death of at least 50 persons. And it compares the costs of preparations with the costs of illness and death that could arise during an outbreak.

Flu Gina Kolata.2011-04-01 The fascinating, true story of the world's deadliest disease. In 1918, the Great Flu Epidemic felled the young and healthy virtually overnight. An estimated forty million people died as the epidemic raged. Children were left orphaned and families were devastated. As many American soldiers were killed by the 1918 flu as were killed in battle during World War I. And no area of the globe was safe. Eskimos living in remote outposts in the frozen tundra were sickened and killed by the flu in such numbers that entire villages were wiped out. Scientists have recently rediscovered shards of the flu virus frozen in Alaska and preserved in scraps of tissue in a government warehouse. Gina Kolata, an acclaimed reporter for The New York Times, unravels the mystery of this lethal virus with the high drama of a great adventure story. Delving into the history of the flu and previous epidemics, detailing the science and the latest understanding of this mortal disease, Kolata addresses the prospects for a great epidemic recurring, and, most important, what

can be done to prevent it.

State Formation After Civil War Derek M Powell. 2016-08-05 State formation after civil war offers a new model for studying the formation of the state in a national peace transition as an integrated national phenomenon. Current models of peacebuilding and state building limit that possibility, reproducing a fragmented, selective view of this complex reality. Placing too much emphasis on state building as design they place too little on understanding state formation as unplanned historical process. The dominant focus on national institutions also ignores the role that cities and civic polities have played in constituting the modern state. Mining ideas from many disciplines and evidence from 19 peace processes, including South Africa, the book argues that the starting point for building a systematic theory is to explain a distinct pattern to state formation that can be observed in practice: Despite their conflicts people in fragile societies bargain terms for peaceful coexistence, they make attempts to constitute the right to rule as valid state authority, in circumstances prone to conflict, over which they have imperfect influence, not control. Though the kind of institutions created will differ with context, how rules for state authority are institutionalized follows a consistent basic pattern. That pattern defines state formation in peace transitions as both a unified, if contingent, field of normative practice and an object of comparative study. Where the national-centric models see local government as a matter belonging to policy on decentralization for later in the reconstruction phase, the book uncovers a distinct local government dimension to peace transitions: A civic dimension to national conflicts that must be explained; incipient or proto-local authorities that emerge even during civil war, in peace making, after state collapse; the fact that it is common for peace agreements and constitutions to include rules for local authority, for local elections to be held as part of broader democratization, and for laws to be enacted to establish local

government as part of peace compacts. The book develops the concept of local peace transition to explain the distinctive constitutive role of this local dimension in peace-making and state formation. This path-breaking book will be of compelling interest to practitioners, scholars and students of comparative constitutional studies, international law, peace building and state building.

Comparative Constitutional Reasoning András Jakab, Arthur Dyevre, Giulio Itzcovich. 2017-04-27 To what extent is the language of judicial opinions responsive to the political and social context in which constitutional courts operate? Courts are reason-giving institutions, with argumentation playing a central role in constitutional adjudication. However, a cursory look at just a handful of constitutional systems suggests important differences in the practices of constitutional judges, whether in matters of form, style, or language. Focusing on independently-verified leading cases globally, a combination of qualitative and quantitative analysis offers the most comprehensive and systematic account of constitutional reasoning to date. This analysis is supported by the examination of eighteen legal systems around the world including the European Court of Human Rights and the European Court of Justice. Universally common aspects of constitutional reasoning are identified in

this book, and contributors also examine whether common law countries differ to civil law countries in this respect.

Integrative Pain Management Robert Alan Bonakdar, Andrew W. Sukiennik. 2016 'Integrative Pain Management' takes a practical, patient-centred approach to integrative pain management, equipping clinicians to better understand the rationale for incorporation of integrative care options. It provides practical examples from leading integrative pain centers on how to optimally coordinate integrative options to optimize pain care. The goal of this volume is to introduce clinicians to a model of pain care which has the promise of improving quality of life while improving safety, satisfaction, and cost associated with care.

Network Psychometrics with R Adela-Maria Isvoranu, Sacha Epskamp, Lourens Waldorp, Denny Borsboom. 2022-04-28 A systematic, innovative introduction to the field of network analysis, *Network Psychometrics with R: A Guide for Behavioral and Social Scientists* provides a comprehensive overview of and guide to both the theoretical foundations of network psychometrics as well as modelling techniques developed from this perspective. Written by pioneers in the field, this textbook showcases cutting-edge methods in an easily accessible format, accompanied by problem sets and code. After working through this book, readers will be able to understand the theoretical foundations behind network modelling, infer network topology, and estimate network parameters from different sources of data. This book features an introduction on the statistical programming language R that guides readers on how to analyse network structures and their stability using R. While *Network Psychometrics with R* is written in the context of social and behavioral science, the methods introduced in this book are widely applicable to data sets from related fields of study. Additionally, while the text is written in a non-technical manner, technical content is highlighted in

textboxes for the interested reader. Network Psychometrics with R is ideal for instructors and students of undergraduate and graduate level courses and workshops in the field of network psychometrics as well as established researchers looking to master new methods. This book is accompanied by a companion website with resources for both students and lecturers.

Earth's Climate Response to a Changing Sun Jean Lilensten,Thierry Dudok De Wit,Katja Matthes.2015-11-23 For centuries, scientists have been fascinated by the role of the Sun in the Earth's climate system. Recent discoveries, outlined in this book, have gradually unveiled a complex picture, in which our variable Sun affects the climate variability via a number of subtle pathways, the implications of which are only now becoming clear. This handbook provides the scientifically curious, from undergraduate students to policy makers with a complete and accessible panorama of our present understanding of the Sun-climate connection. 61 experts from different communities have contributed to it, which reflects the highly multidisciplinary nature of this topic. The handbook is organised as a mosaic of short chapters, each of which addresses a specific aspect, and can be read independently. The reader will learn about the assumptions, the data, the models, and the unknowns behind each mechanism by which solar variability may impact climate variability. None of these mechanisms can adequately explain global warming observed since the 1950s. However, several of them do impact climate variability, in particular on a regional level. This handbook aims at addressing these issues in a factual way, and thereby challenge the reader to sharpen his/her critical thinking in a debate that is frequently distorted by unfounded claims.

Achieving sustainable production of poultry meat Volume 3 Todd Applegate.2017-08-31 To meet growing demand, the FAO has estimated that world poultry production needs to grow by 2-3% per year to 2030. Much of the increase in output already achieved has been as a result of improvements in commercial breeds combined with rearing in more intensive production systems. However, more intensive systems have increased the risk of transmission of animal diseases and zoonoses. Consumer expectations of sensory and nutritional quality have also never been higher. At the same time consumers are more concerned about the environmental impact of poultry production as well as animal welfare. Drawing on an international range of expertise, this book reviews research on poultry health and welfare. Part 1 begins by reviewing the range of diseases and other health issues affecting poultry. It then goes on to discuss ways of preventing and managing disease such as breeding, and means of attenuating the immune system. The second part of the book discusses welfare issues such as management of breeding flocks, housing, transport and humane slaughter techniques. *Achieving sustainable production of poultry meat Volume 3: Health and welfare* will be a standard reference for poultry and food scientists in universities, government and other research centres and companies involved in poultry production. It is accompanied by two further volumes which review safety, quality and sustainability as well as poultry breeding and nutrition.

Religion, Theory, Critique Richard King. 2017-07-18 Religion, Theory, Critique is an essential tool for learning about theory and method in the study of religion. Leading experts engage with contemporary and classical theories as well as non-Western cultural contexts. Unlike other collections, this anthology emphasizes the dynamic relationship between religion as an object of study and different methodological approaches and openly addresses the question of the manifold ways in which religion, secular, and culture are imagined within different disciplinary horizons. This volume is the first textbook which seeks to engage discussion of classical approaches with contemporary cultural and critical theories. Contributors write on the influence of the natural sciences in the study of religion; the role of European Christianity in modeling theories of religion; religious experience and the interface with cognitive science; the structure and function of religious language; the social-scientific study of religion; ritual in religion; the phenomenology of religion; critical theory and religion; embodiment and religion; the impact of colonialism and modernity; theorizing religion in terms of race and ethnicity; links among religion, nationalism, and globalization; the interplay of gender, sex, and religion; and religion and the environment. Each chapter introduces the topic, identifies key theorists and issues, and respects the pluralistic nature of the scholarship in the field. Altogether, this collection scrutinizes the explicit and implicit assumptions theorists make about religion as an object of analysis.
