Language, Literacy, and Technology Richard Kern.2015-05-28 From the origins of writing to today’s computer-mediated communication, material

technologies shape how we read and write, how we construe and share knowledge, and ultimately how we understand ourselves in relation to the world. However, communication technologies are themselves designed in particular social and cultural contexts and their use is adapted in creative ways by individuals. In this book, Richard Kern explores how technology matters to language and the ways in which we use it. Kern reveals how material, social and individual resources interact in the design of textual meaning, and how that interaction plays out across contexts of communication, different situations of technological mediation, and different moments in time. Showing how people have adapted visual forms to various media as well as to social needs, this study culminates in five fundamental principles to guide language and literacy education in a period of rapid technological and social change.

You're Not Listening Kate Murphy. 2020-01-07 When was the last time you listened to someone, or someone really listened to you? If you're like most people, you don't listen as often or as well as you'd like. There's no one better qualified than a talented journalist to introduce you to the right mindset and skillset—and this book does it with science and humor. -Adam Grant, #1 New York Times bestselling author of *Originals* and *Give and Take* **Hand picked by Malcolm Gladwell, Adam Grant, Susan Cain, and Daniel Pink for Next Big Ideas Club** An essential book for our times. -Lori Gottlieb, New York Times bestselling author of *Maybe You Should Talk to Someone* At work, we're taught to lead the conversation. On social media, we shape our personal narratives. At parties, we talk over one another. So do our politicians. We're not listening. And no one is listening to us. Despite living in a world where technology allows constant digital communication and opportunities to connect, it seems no one is really listening or even knows how. And it's making us lonelier, more isolated, and less tolerant than ever before. A listener by trade, New York Times contributor Kate Murphy wanted to know how we got here. In this always illuminating and often humorous deep dive, Murphy explains why we're not listening, what it's doing to us, and how we can reverse the trend. She makes accessible the psychology, neuroscience, and sociology of listening while also introducing us to some of the best listeners out there (including a CIA agent, focus group moderator, bartender, radio producer, and top furniture salesman). Equal parts cultural observation, scientific exploration, and rousing call to action that's full of practical advice, *You're Not Listening* is to listening what Susan Cain's *Quiet* was to introversion. It's time to stop talking and start listening.

Microinteractions Dan Saffer. 2013-04-30 It's the little things that make the difference between a good digital product and a great one. In this insightful book, author Dan Saffer shows you how to design microinteractions: the small details that exist inside and around features. How do you turn on mute? How do you know you have a new email message? How can you change a setting? These moments can change a product from one that's tolerated into one that's treasured. Learn how to create effective and enjoyable microinteractions by using triggers, rules, loops and modes, and feedback.

Academic Interactions (No DVD) Christine B. Feak, Theresa N. Rohlck. 2018-09-13 This version of the book matches 9780472033324 except it is not packaged with a DVD. All references to the DVD in the text have been replaced with videos. Video access sold separately. (Email esladmin@umich.edu for access.) The ability to understand and be understood when communicating with professors and with native speakers is crucial to academic success. *Academic Interactions* focuses on actual academic speaking events, particularly classroom interactions and office hours, and gives students practice improving the ways that they communicate in a college/university setting. *Academic Interactions* addresses skills like using names and names of locations correctly on campus, giving directions, understanding instructors and their expectations, interacting during office hours, participating in class and in seminars, and delivering formal and informal presentations. In addition, advice is provided for communicating via email with professors and working in groups with native speakers (including negotiating tasks in groups). The text uses

transcripts from MICASE (the Michigan Corpus of Academic Spoken English) to ensure that students learn the vocabulary and communication strategies that will be most effective in their academic pursuits. Units also feature language use issues like ellipsis, hedging, and apologies.
