The Amateur and the Professional P. J. A. Levine. 2003-02-13 This book highlights the growing divide in nineteenth-century intellectual circles between amateur and professional interest, and explores the institutional means whereby professional ascendancy was achieved in the broad field of studies of the past. It is concerned with how antiquarian 'gentlemen of leisure', pursuing their interests through local archaeological societies, were, by the end of the century, relegated to the sidelines of the now university-based discipline of history. At the same time it explores the theological as well as technical barriers which arrested the development of archaeology in this period. This is a notable contribution to the intellectual history of Victorian England, attending not simply to the ideas perpetrated by these communities of scholarship but to their social status, relating such social consideration to a more traditional intellectual history to create a new social history of ideas.

Musicians' Mobilities and Music Migrations in Early Modern Europe Gesa zur Nieden, Berthold Over. 2016-10-31 During the 17th and 18th century musicians' mobilities and migrations are essential for the European music history and the cultural exchange of music. Adopting viewpoints that reflect different methodological approaches and diversified research cultures, the book presents studies on central scopes, strategies and artistic outcomes of mobile and migratory musicians as well as on the transfer of music. By looking at elite and non-elite musicians and their everyday mobilities to major and minor centers of music production and practice, new biographical patterns and new stylistic paradigms in the European East, West and South emerge.

The English Court in the Reign of George I John M. Beattie. 1967-07-02 In this detailed study Dr Beattie provides evidence of the size, composition, administration and finances of George I's household, and discusses its social and political importance. The book shows that many familiar impressions of George I are misleading, and makes it clear that his court was still 'the most obvious source of patronage and political power and the centre of the upper-class social world of London and the country'. This study is based on material in the archives of England, Germany and America and gives a valuable insight into the control and distribution of patronage in the eighteenth century.

The Age of the Cathedrals Georges Duby.1983-02-15 Recognizing that a work of art is the product of a particular time and place as much as it is the creation of an individual, Duby provides a sweeping survey of the changing mentalities of the Middle Ages as reflected in the art and architecture of the period. If Age of the Cathedrals has a fault, it is that Professor Duby knows too much, has too many new ideas and takes such a delight in setting them out. . . insights whiz to and fro like meteorites.—John Russell, New York Times Book Review

Alchemy and Chemistry in the 16th and 17th Centuries P. Rattansi,Antonio Clericuzio.2013-03-07 The present volume owes its ongm to a Colloquium on Alchemy and Chemistry in the Sixteenth and Seventeenth Centuries, held at the Warburg Institute on 26th and 27th July 1989. The Colloquium focused on a number of selected themes during a closely defined chronological interval: on the relation of alchemy and chemistry to medicine, philosophy, religion, and to the corpuscular philosophy, in the sixteenth and seventeenth centuries. The relations between Medicina and alchemy in the Lullian treatises were examined in the opening paper by Michela Pereira, based on researches on unpublished manuscript sources in the period between the 14th and 17th centuries. It is several decades since the researches of R.F. Multhauf gave a prominent role to Johannes de Rupescissa in linking medicine and alchemy through the concept of a quinta essentia. Michela Pereira explores the significance of the Lullian tradition in this development and draws attention to the fact that the early Paracelsians had themselves recognized a family resemblance between the works of Paracelsus and Roger Bacon's scientia experimentalis and, indeed, a continuity with the Lullian tradition.
