Demenz braucht Bindung Wilhelm Stuhlmann.2018-07-16 Wie kann man altersverwirrten Menschen Sicherheit geben? Indem man auf Ressourcen in ihrer Biographie zurückgreift. Dazu gehört vor allem Bindung, d.h. die innige Beziehung zu vertrauten Personen. Anschaulich erklärt der Autor, wie man Bindungserfahrungen in der Arbeit mit Menschen mit Demenz fruchtbar machen kann. Zahlreiche Fallbeispiele illustrieren, wie sich Bindungsstörungen auf die Krankheitsbewältigung auswirken und wie man schützende Faktoren in der Biographie des Betroffenen aufspürt. Gezeigt wird, wie sich das Konzept der Bindung in die Praxis von Pflegeansätzen wie Realitäts-Orientierungs-Training, Validation, Dementia-Care-Mapping, Selbst-Erhaltungs-Therapie u.a. integrieren lässt. Mit einem Glossar wichtiger Fachbegriffe und einem Leitfaden zur Ermittlung des Bindungsverhaltens.

Bindung und Demenz Harald Blonski et al.2020-10-30 Beziehungen: der Schlüssel zur Lebensqualität »Beziehungsgestaltung« ist eine der wichtigsten Aufgaben, wenn es um die Pflege und Betreuung von Menschen mit Demenz geht. Doch bevor eine Beziehung gestaltet werden kann, muss sie erst einmal angebahnt werden. Erst wer Bindung spürt, wird auch Beziehung erleben und gestalten wollen. Mit diesem Buch haben Pflege- und Betreuungskräfte jetzt einen kompakten Überblick zum Thema »Bindung und Demenz« aus unterschiedlichen Perspektiven. Die Autoren erläutern die wichtigsten Konzepte (von der Person-Zentrierung über die Selbsterhaltungstherapie bis zur Mäeutik) und skizzieren die wichtigsten Aspekte. Dabei wird deutlich: Lebensqualität entsteht da, wo Menschen mit Demenz respektvoll und aktiv in eine Gemeinschaft eingebunden werden, wo sie wirkliche Beziehungen gestalten können, weil sie sich als eingebunden erleben.

God Untamed Johannes Hartl.2019 Challenge to get out of our spiritual comfort zones to reach a disengaged generation Powerful. Almighty. Sovereign. Magnificent. Fearsome. This is the God we encounter in the Bible and in prayer--a God who astounds. Yet, Johannes Hartl argues that this is an astonishment that many have lost in the West today. A challenging rejection of 'feel-good' Christianity, God Untamed explores the deep crisis of faith that effects the Western world. At a time where the need for spirituality is great, yet churches are losing more and more members; in the face of a generation with so many opportunities and so little direct threat, yet who are so anxious, depressed and disenchanting--Hartl speaks of the voice that can still oceans. God, as he encounters us, is not simply 'nice' and certainly not trivial or comfortable. He is fascinating and intimidating at the same time. Hartl calls us to rediscover this sense of wonder and reimagine what it is to have a fear of God--not founded in a whimper at the unknown, but a respect borne out of watching his visible power in the nature of our world. Without this fear, Hartl warns that the church is in danger of weakening under the immense pressures of our times. God Untamed is a compelling charge to get out of our spiritual comfort zones to find a real, truly fulfilled and fulfilling faith.

Technology and Aging Alex Mihailidis, Jennifer Boger, Henry Kautz. 2008 This publication presents articles on Aging-in-Place, Assistive Technology, Monitoring and Telehealth, Transportation and Mobility, and Design. The section on assistive technology (AT) represents arguably the most mature and generic aspect of technology and aging; except that AT can hardly be regarded really as a specific discipline any longer. Assistive devices and systems command an expansive gamut of technological and engineering specialties, drawing upon mechanical engineering and industrial design at one end of the field and cybernetic systems engineering and brain-computer user interfaces at the other. The largest section in the book, on monitoring and telehealth, reveals novel applications of advanced pattern recognition techniques, some of which have, up to now, found roles primarily in the military, process engineering, and financial sectors. Transportation and mobility still represents by far the largest and most commercially lucrative market segment of technology for seniors. There is however a clear trend towards synthesis of information and communication technologies (ICT) and mobility technologies, which is embodied in the latest developments of automatic collision avoidance and full or semi-autonomous navigation functions in powered mobility devices. The last section is dedicated to design issues. It is proposed that designing for the special needs market before making a design as inclusive as possible to the mainstream market is a viable alternative to the currently accepted notion of inclusive design, provided that aesthetics are appropriately addressed. To conclude, we see a social shift from institutional to home-based care, in which information communication technology based solutions now afford the possibility of aging-in-place for the many thousands of people having mild to moderate cognitive impairment.

Filmische Biographiearbeit im Bereich Demenz Dirk H. Medebach. 2011 Biographiearbeit etabliert sich in stationären Institutionen zunehmend als Form der Hilfe für Menschen mit Demenz und ihre Angehörigen. Im Rahmen eines Projekts wurden biographische Materialien von Frauen mit Demenz zusammengestellt und Lebensfilme produziert. Treffen mit Angehörigen und Pflegepersonal wecken Erinnerungen und Emotionen. Als wiederholtes Erlebnis helfen die filmischen Erfahrungen den Akteuren im Alltag. Der interdisziplinäre Ansatz zeigt die Bedeutung von Interaktion, Kommunikation sowie medialer Biographie- und Trauerarbeit aus theoretischer wie empirischer Perspektive.

Clinical Research in Complementary Therapies E-Book George Thomas Lewith, Wayne B. Jonas, Harald Walach. 2010-11-23 The use of complementary therapies is exploding, increasing the pressure to establish a rigorous science to support its practice. *Clinical Research in Complementary Therapies: Principles, Problems and Solutions* provides students with the tools they need to research complementary and integrative medicine (CIM) and so fill this gap. Essential for both undergraduate and postgraduate students, this second edition is significantly updated and enhanced. Part 1 deals with research strategies and methods, explaining the major types of clinical research in CIM and how these inter-relate. New chapters are included on whole systems research, qualitative research and questionnaire development. Not all therapies can be treated the same way nor channeled through the signal process of randomized controlled trials. Therefore, detailed description of mixed methods approaches including observational, qualitative, cost-benefit and comparative effectiveness research are described. Part 2 deals with specific complementary therapies and how they are investigated by experts in each field. The book analyses the key questions asked and the controversies debated in complementary medicine

research and offers clear and innovative guidance for answering these questions. FEATURES • Provides an overarching synthesis of methods in CIM and how they are to be used collectively including the role of comparative effectiveness research • Suggests both general and specific factors which need to be considered in assessing or planning complementary therapy research • Pinpoints aspects of research which are different in orthodox research and complementary therapy research • Reviews the types of research carried out in specific complementary therapies and analyses issues which arise • Includes information on measuring the economic cost and benefits of complementary medicine, clinical audit and the role of placebos use • Builds upon recent research results, looks at the lessons these provide for all complementary therapies and suggests key issues to address in future research. • Provides an overarching synthesis of methods in CIM and how they are to be used collectively including the role of comparative effectiveness research • Suggests both general and specific factors which need to be considered in assessing or planning complementary therapy research • Pinpoints aspects of research which are different in orthodox research and complementary therapy research • Reviews the types of research carried out in specific complementary therapies and analyses issues which arise • Includes information on measuring the economic cost and benefits of complementary medicine, clinical audit and the role of placebos use • Builds upon recent research results, looks at the lessons these provide for all complementary therapies and suggests key issues to address in future research.

The Problem-Centred Interview Andreas Witzel, Herwig Reiter. 2012-06-22 This book provides the first English language account of the interview method known as the PCI. Offering a way of collecting knowledge by means of involving people actively in the research process, the interviewer takes the role of a well-informed traveller. With careful preparation and planning, the interviewer sets out with priorities and expectations, but the story the interviewer tells about his journey depends on the people encountered along the road. Novice and experienced interview researchers across the social, educational and health sciences will find this an invaluable guide to conducting interviews. Andreas Witzel is senior researcher (retired) at the University of Bremen and former director of the Bremen Archive for Life Course Research. Herwig Reiter is senior researcher in the Department of Social Monitoring and Methodology of the German Youth Institute in Munich.

The Old King in His Exile Arno Geiger. 2017-01-12 International Bestseller Shortlisted for the Helen and Kurt Wolff Prize and Schlegel-Tieck Prize What makes us who we are? Arno Geiger's father was never an easy man to know and when he developed Alzheimer's, Arno realised he was not going to ask for help. As my father can no longer cross the bridge into my world, I have to go over to his. So Arno sets out on a journey to get to know him at last. Born in 1926 in the Austrian Alps, into a farming family who had an orchard, kept three cows, and made schnapps in the cellar, his father was conscripted into World War II as a schoolboy soldier - an experience he rarely spoke about, though it marked him. Striking up a new friendship, Arno walks with him in the village and the landscape they both grew up in and listens to his words, which are often full of unexpected poetry. Through his intelligent, moving and often funny account, we begin to see that whatever happens in old age, a human being retains their past and their character. Translated into nearly 30 languages, *The Old King in His Exile* will offer solace and insight to anyone coping with a loved one's aging.

Neue Wohnformen im Alter Frank Schulz-Nieswandt, Ursula Köstler, Francis Langenhorst, Heike Marks. 2012-02-16 Das Buch basiert auf einer qualitativ-explorativen Studie zu Wohnformen des Alter(n)s jenseits der Dichotomie private Häuslichkeit versus Pflegeheim. In einer Demenz- und in einer Multiple-Sklerose-Wohngemeinschaft sowie in einem integrierten Mehrgenerationenhaus dreier Großstädte wurden die sozialen Prozesse des Gebens und Nehmens und die Aktivierungspotentiale im Hinblick auf die Lebensqualität und das Persönlichkeitswachstum der Bewohner untersucht. Die Ergebnisse der Analyse weisen unter anderem auf eine attraktive Kosten-Effektivität dieser Wohngemeinschaften hin, und es wird zudem deutlich, dass die optimale Wahl der Wohnform biographisch von der personalen Balance zwischen Nähe und Distanz abhängt. Die Studie schließt mit einigen kommunalpolitischen Überlegungen.

Narrative Identity and Dementia Marie A Mills.2018-08-10 First published in 1998, this book is a study on the influence of emotions on autobiographical memory in dementia. Based on eight in-depth case-studies of older people with dementia, collected over a two year period, the general findings of this innovative study reveal the strength and durability of the personal narrative even as cognitive processes decline. Using a psychotherapeutic approach, the author is able to demonstrate that the retention of a personal past give a sense of narrative identity and well-being to sufferers of dementia and has an important part to play in dementia care training. Researchers, teachers and students will find this book a useful resource, together with those who work in the field of ageing and dementia care.

Small World Martin Suter.2011-10-31 At first, they put Konrad's absentmindedness down to an immoderate fondness for alcohol. For years he had been a benign parasite on the Koch family, first as the childhood playmate of Thomas, heir to the Koch family fortune, later as caretaker of the Koch family holiday villa on Corfu. And they, in their turn, had used him as the mood took them. But when the villa burns down because of Konrad's forgetfulness, Elvira Senn, the matriarch of the Koch family, puts him on a strict regime. No longer allowed his daily tipples, Konrad recovers and

even falls in love again. But then his condition deteriorates. He can't find his way out of the supermarket, let alone his way home. Soon Konrad doesn't even recognise his new lover. Alzheimer's has taken hold. As Konrad loses his present he regains his distant past, and this is what Elvira fears the most. As they watch and wait for him to rewind to the crucial moment, his life is in danger from far more than the debilitating disease... A gripping psychological thriller, *Small World* depicts a man with a void in his soul whose only salvation lies buried deep within himself.

The Many Faces of Shame Donald L. Nathanson. 1987-06-01 For almost a century the concept of guilt, as embedded in drive theory, has dominated psychoanalytic thought. Increasingly, however, investigators are focusing on shame as a key aspect of human behavior. This volume captures a range of compelling viewpoints on the role of shame in psychological development, psychopathology, and the therapeutic process. Donald Nathanson has assembled internationally prominent authorities, engaging them in extensive dialogue about their areas of expertise. Concise introductions to each chapter place the authors both historically and theoretically, and outline their emphases and contributions to our understanding of shame. Including many illustrative clinical examples, the book covers such topics as the relationship between shame and narcissism, shame's central place in affect theory, psychosis and shame, and shame in the literature of French psychoanalysis and philosophy.

Emotion in Adult Development Carol Zander Malatesta, Carroll Ellis Izard. 1984-05 The role of emotion in the development of adults has only recently come into its own as an area of study. In this volume scholars bring together (for the first time) work which provides us with an analysis of these affective processes and their place in the course of adult life. The contributors develop theoretical frameworks and present research which examines the role of emotion in relation to critical developmental areas: cognition, personality, well-being, interaction and culture.

Pet-oriented Child Psychotherapy Boris Mayer Levinson, Gerald P. Mallon. 1997 Boris Levinson was the first professionally trained clinician to formally introduce and document the way that companion animals could hasten the development of a rapport between therapist and patient, thereby increasing the likelihood of patient motivation. The original edition of this fascinating book was the first work to document pet-oriented psychotherapy. That text is reproduced here in its original form; furthermore, in order to update and revise the text, footnotes have been added to identify and highlight research and practices which have occurred since the book was first published in 1969. Also, a list of resources now appears in the appendix. This classic work has universal appeal, from human service practitioners, health and mental health practitioners, to educators in social

work, psychology, nursing, veterinary medicine and counseling.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

The Development of Autobiographical Memory Hans J. Markowitsch,Harald Welzer.2009-10-28 Autobiographical memory constitutes an essential

part of our personality, giving us the ability to distinguish ourselves as an individual with a past, present and future. This book reveals how the development of a conscious self, an integrated personality and an autobiographical memory are all intertwined, highlighting the parallel development of the brain, memory and personality. Focusing strongly on developmental aspects of memory and integrating evolutionary and anthropological perspectives, areas of discussion include: why non-human animals lack autobiographical memory development of the speech areas in the brain prenatal and transnatal development of memory autobiographical memory in young children. This book offers a unique approach through combining both neuroscientific and social scientific viewpoints, and as such will be of great interest to all those wanting to broaden their knowledge of the development and acquisition of memory and the conscious self.

Three Seductive Ideas Jerome Kagan.2000-04-07 Do the first two years of life really determine a child's future development? Are human beings, like other primates, only motivated by pleasure? And do people actually have stable traits, like intelligence, fear, anxiety, and temperament? This book, the product of a lifetime of research by one of the founders of developmental psychology, takes on the powerful assumptions behind these questions—and proves them mistaken. Ranging with impressive ease from cultural history to philosophy to psychological research literature, Jerome Kagan weaves an argument that will rock the social sciences and the foundations of public policy. Scientists, as well as lay people, tend to think of abstract processes—like intelligence or fear—as measurable entities, of which someone might have more or less. This approach, in Kagan's analysis, shows a blindness to the power of context and to the great variability within any individual subject to different emotions and circumstances. "Infant determinism" is another widespread and dearly held conviction that Kagan contests. This theory—with its claim that early relationships determine lifelong patterns—underestimates human resiliency and adaptiveness, both emotional and cognitive (and, of course, fails to account for the happy products of miserable childhoods and vice versa). The last of Kagan's targets is the vastly overrated pleasure principle, which, he argues, can hardly make sense of unselfish behavior impelled by the desire for virtue and self-respect—the wish to do the right thing. Written in a lively style that uses fables and fairy tales, history and science to make philosophical points, this book challenges some of our most cherished notions about human nature.

Cognitive-behavioral Therapy Michelle G. Craske.2010 Although a number of variations on the original theory have developed over the decades, all types of cognitive-behavioral therapy are unified by their empirical foundation, reliance on the theory and science of behavior and cognition, and the centrality of problem-focused goals. In this book, Michelle G. Craske presents and explores this approach, its theory, history, the therapy process, primary change mechanisms, empirical basis, and future developments.

Barbarian Spring Jonas Lüscher.2015-03-15 On a business trip to Tunisia, Preising, a leading Swiss industrialist, is invited to spend the week with the daughter of a local gangster. He accompanies her to the wedding of two London city traders at a desert luxury resort that was once the site of an old Berber oasis. With the wedding party in full swing and the bride riding up the aisle on a camel, no one is aware that the global financial system stands on the brink of collapse. As the wedding guests nurse their hangovers, they learn that the British pound has depreciated tenfold, and their

world begins to crumble around them. So begins *Barbarian Spring*, the debut novel from Jonas Lüscher, a major emerging voice in European fiction. The timely and unusual novel centers on a culture clash between high finance and the value system of the Maghreb. Provocative and entertaining, *Barbarian Spring* is a refreshingly original and all-too-believable satire for our times.

Therapeutische Empfehlungen für Menschen mit Demenz Barbara Romero, Michael Wenz.2018-08-08 Dieses Buch stellt das Konzept der Selbsterhaltungstherapie (SET) und seine Anwendung in der Krankenhausbehandlung von Menschen mit Demenz vor. Die Autoren beschreiben praxisnah, wie im Rahmen von stationären und teilstationären Behandlungen die Bedürfnisse von Menschen mit Demenz berücksichtigt werden können. Im Fokus steht dabei die an den Ressourcen der Betroffenen orientierte Vermittlung von Erfahrungen behandelnder Fachteams an Bezugspersonen, die die Erkrankten im Alltag begleiten. Ergänzend zur persönlichen Beratung wurden von diesen Behandlungsteams schriftliche Therapeutische Empfehlungen (TE) für die Bezugspersonen entwickelt, in denen individuell angepasste Hinweise zur Alltagsgestaltung, Kommunikation und Entlastung pflegender Angehöriger zusammengefasst werden. TE leisten einen wichtigen Beitrag zur Verbesserung der Versorgung und zur Stabilisierung von Behandlungserfolgen nach dem Krankenhausaufenthalt. Dieses Buch motiviert zur Einbindung von Bezugspersonen in die Krankenhausbehandlung und unterstützt mit zahlreichen Fallbeispielen und Materialien die Gestaltung von Beratungsgesprächen und die Erstellung der TE.

Spurenlesen im Sprachdschungel Svenja Sachweh.2019-03-11 Demenzen schränken neben den Gedächtnisleistungen und der Orientierungsfähigkeit auch die verbale und nonverbale Kommunikationsfähigkeit ganz erheblich ein: Demenzkranke Menschen haben Wortfindungsstörungen und Verständnisprobleme. Einige erfinden Geschichten, um ihre Gedächtnislücken zu vertuschen, andere wiederholen sich ständig. Viele Menschen mit Demenz durchschauen uns, wenn wir etwas vor ihnen verbergen wollen. Einige reagieren aufgeregt und aggressiv, weil sie unsere Körpersprache missverstehen. Und bei fast allen übertragen sich nonverbale Anzeichen für Stress, schlechte Laune und Aufregung. Wie kann man das vermeiden? Und wie kann man ohne zusätzlichen zeitlichen Aufwand gute Beziehungsarbeit leisten und gegenseitige Verständigung herstellen? Das Praxishandbuch der erfahrenen Kommunikationstrainerin und -forscherin Svenja Sachweh vermittelt Pflegenden und allen anderen, die täglich mit demenzkranken Menschen arbeiten, an Hand von authentischen Gesprächsausschnitten und Bildern aus der Altenpflege, wie sie effektiv mit den Betroffenen kommunizieren und schwierige Situationen meistern können. Die zweite überarbeitete Auflage wurde um Kapitel zum Motivieren von Menschen mit Demenz erweitert, um neue Beiträge zu den Themen Trösten, kreative Konfliktlösungen, Dialekt und Demenz ergänzt und bezüglich des Umgangs mit Wahrheit und Schweinwelten vertieft.
