Switzerland International Monetary Fund. European Dept..2018-06-18 This 2018 Article IV Consultation highlights that the Swiss economy has adjusted to the large cumulative exchange rate appreciation that took place since the global financial crisis. After a subdued start to 2017, GDP growth accelerated to 1.1 percent in 2017, and the positive momentum continued in Q1:2018, although at a slightly reduced pace. The improved external outlook, together with the depreciation since mid-2017, are expected to energize the economy and lift GDP growth to 2.25 percent in 2018, before it gradually moderates to 1.75 percent over the medium term. Inflation is expected to increase to the upper half of the target band in 2018-19, and to subsequently revert to the mid-point.

SMEs in Developing Asia Paul Vandenberg,Pornpinun Chantapacdepong,Naoyuki Yoshino.2017-02-28 A vibrant stratum of small and medium-sized enterprises (SMEs) is critical for the growth and development of Asian economies. These enterprises generate employment, contribute to investment, participate in value chains, and support innovation. SMEs that seek to sustain and grow their operations, however, face a variety of constraints, many of which are directly related to size. These so-called size-induced market failures create a role for public policy

interventions by governments throughout the region. This book focuses on the market failures encountered by enterprises in the key areas of technology and innovation, credit and finance, education and skills, and market access. Obstacles to participation in the rapidly expanding regional and global value chains are also examined. Among a variety of issues, the book explores the missing middle in credit facilities for enterprises that are beyond microcredit but not yet able to secure regular loans from banks. The book investigates the barriers to innovation and how best to combine internal and external research and development. It also looks at the hiring versus training options to build human capital. The various chapter authors examine national and multicountry experiences in South and East Asia, ranging from those in Pakistan to Japan.

U.S. Army War College Guide to National Security Issues .2012

This edition of the U. S. Army War College guide to national security policy and strategy continues to reflect the structure and approach of the core national security strategy and policy curriculum at the War College. The fifth edition is published in two volumes that correspond roughly to the Department of National Security and Strategy's core courses: Theory of war and strategy and National security policy and strategy. Like previous editions, this one is based on its predecessor, but contains both updates and new scholarship. Over a third of the chapters are new or have undergone significant rewrites. Many chapters, some of which appeared for years in this work, have been removed. Nevertheless, the book remains unchanged in intent and purpose. Although this is not primarily a textbook, it does reflect both the method and manner that the U.S. Army War College uses to teach strategy formulation to America's future senior leaders. The book is not a comprehensive or exhaustive treatment of either strategic theory or the policymaking process. Both volumes are organized to proceed from the general to the specific. Thus, the first volume opens with general thoughts on the nature and theory of war and

strategy, proceeds to look at the complex aspect of power, and concludes with specific theoretical issues. Similarly, the second volume begins by examining the policy/strategy process, moves to a look at the strategic environment, and concludes with some specific issues. This edition continues the effort begun in the 4th edition to include several short case studies to illustrate the primary material in the volume--Introd.

Evidence-Based Practice for Public Health Emergency

Preparedness and Response National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Board on Health Sciences Policy, Committee on Evidence-Based Practices for Public Health Emergency Preparedness and Response. 2020-11-28

When communities face complex public health emergencies, state local, tribal, and territorial public health agencies must make difficult decisions regarding how to effectively respond. The public health emergency preparedness and response (PHEPR) system, with its multifaceted mission to prevent, protect against, quickly respond to, and recover from public health emergencies, is inherently complex and encompasses policies, organizations, and programs. Since the events of September 11, 2001, the United States has invested billions of dollars and immeasurable amounts of human capital to develop and enhance public health emergency preparedness and infrastructure to respond to a wide range of public health threats, including infectious diseases, natural disasters, and chemical, biological, radiological, and nuclear events. Despite the investments in research and the growing body of empirical literature on a range of preparedness and response capabilities and functions, there has been no national-level, comprehensive review and grading of evidence for public health emergency preparedness and response practices comparable to those utilized in medicine and other public health fields. *Evidence-Based Practice for Public Health Emergency Preparedness and Response* reviews the state of the evidence on

PHEPR practices and the improvements necessary to move the field forward and to strengthen the PHEPR system. This publication evaluates PHEPR evidence to understand the balance of benefits and harms of PHEPR practices, with a focus on four main areas of PHEPR: engagement with and training of community-based partners to improve the outcomes of at-risk populations after public health emergencies; activation of a public health emergency operations center; communication of public health alerts and guidance to technical audiences during a public health emergency; and implementation of quarantine to reduce the spread of contagious illness.

The Social Metabolism of Spanish Agriculture, 1900-2008

Manuel González de Molina, David Soto Fernández, Gloria Guzmán Casado, Juan Infante-Amate, Eduardo Aguilera Fernández, Jaime Vila Traver, Roberto García Ruiz. 2019-11-12 This open access book provides a panoramic view of the evolution of Spanish agriculture from 1900 to the present, offering a more diverse picture to the complex and multidimensional reality of agrarian production. With a clear transdisciplinary ambition, the book applies an original and innovative theoretical and methodological tool, termed Agrarian Social Metabolism, combining Social Metabolism with an agroecological perspective. agroecosystems and public policies capable of moving us towards a more sustainable food system. Spanish agricultural production has experienced impressive growth during the 20th century which has allowed it to ensure the supply of food to the population and even to transform some crops into important chapters in foreign trade. However, this growth has had its negative side since it was based on the injection of large amounts of external energy, on the destruction of employment and the loss of profitability of agricultural activity. But perhaps the most serious part is the strong impact of the current industrialised agriculture model on Spanish agroecosystems, exposed to the overexploitation of hydric resources, pollution of the water by nitrates and pesticides, high erosion rates and an alarming loss of biodiversity; damage which in the immediate future will end up reducing production capacity.

Regional Economic Outlook, April 2007, Western Hemisphere International Monetary Fund. Western Hemisphere Dept..2007-04-12 The past year has been one of strong economic performance for the Western Hemisphere, notwithstanding somewhat slower growth in the United States in recent quarters. Can this performance be sustained, and what challenges does the region face? Reviewing macroeconomic prospects and risks, this report pays particular attention to the influence of the external environment on Latin America, and addresses the question of whether Latin America has now succeeded in breaking with its history of periodic growth reversals.

Cultural Techniques Jörg Dünne, Kathrin Fehringer, Kristina Kuhn, Wolfgang Struck.2020-08-24 This volume presents the preliminary results of the work carried out by the interdisciplinary cultural techniques research lab at the University of Erfurt. Taking up an impulse from media studies, its contributions examine —from a variety of disciplinary perspectives—the interplay between the formative processes of knowledge and action outlined within the conceptual framework of cultural techniques. Case studies in the fields of history, literary (and media) studies, and the history of science reconstruct seemingly fundamental demarcations such as nature and culture, the human and the nonhuman, and materiality and the symbolical order as the result of concrete practices and

operations. These studies reveal that particularly basic operations of spatialization form the very conditions that determine emergence within any cultural order. Ranging from manual and philological paper work to practices of opening up and closing off spaces and collective techniques of assembly, these case studies replace the grand narratives of cultural history focusing on micrological examinations of specific constellations between human and nonhuman actors.

Water, Agriculture and the Environment in Spain: can we square the circle? Lucia De Stefano, M. Ramon Llamas. 2012-10-17 The world water problems are a due to bad governance, not to physical water scarcity. This book is inspired by this statement and explores whether it holds in a specific country, Spain, where climatic conditions - Spain is one of the most arid countries of the European Union - would fully justify saying that water problems are due to physical water scarcity. The metrification of water uses and their monetary value is a first important step in understanding how reallocation of water among users could help mitigating many of current water problems in Spain. However, water reallocation among users or from users to nature is far from simple. Initiatives portrayed as the solution to the water governance 'jigsaw' - e.g. water trade, improved water use efficiency, users collective action, public participation - are not free of difficulties and shortcomings. The book explores the growing need for maintaining Spain's natural capital and the human component of water governance - people's needs, wishes, (vested) interests, aspirations - that often determine the result of decisions and, sometimes, lead water management to a deadlock. This book takes a step forward in showing a more complex - and also closer to reality - picture of water governance in Spain.

Death in Jewish Life Stefan C. Reif, Andreas Lehnardt, Avriël Bar-Levav. 2014-08-27 Jewish customs and traditions about death, burial and mourning are numerous, diverse and intriguing. They are considered by many to have a respectable pedigree that goes back to the earliest rabbinic period. In order to examine the accurate historical origins of many of them, an international conference was held at Tel Aviv University in 2010 and experts dealt with many aspects of the topic. This volume includes most of the papers given then, as well as a few added later. What emerges are a wealth of fresh material and perspectives, as well as the realization that the high Middle Ages saw a set of exceptional innovations, some of which later became central to traditional Judaism while others were gradually abandoned. Were these innovations influenced by Christian practice? Which prayers and poems reflect these innovations? What do the sources tell us about changing attitudes to death and life-after death? Are tombstones an important guide to historical developments? Answers to these questions are to be found in this unusual, illuminating and readable collection of essays that have been well documented, carefully edited and well indexed.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children. 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of

practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Regional Economic Outlook, April 2018, Western

Hemisphere Department International Monetary Fund.

Western Hemisphere Dept..2018-05-11 The world economy and global trade are experiencing a broad-based cyclical upswing. Since October 2017, global growth outcomes and the outlook for 2018-19 have improved across all regions, reinforced by the expected positive near-term spillovers from tax policy changes in the United States. Accommodative global financial conditions, despite some tightening and market volatility in early February 2018, have been providing support to economic recovery. Higher commodity prices are contributing to an improved outlook for commodity exporters. The US and Canadian economies posted solid gains in 2017 and are expected to grow above potential in the near term. Despite the improved near-term outlook, however, medium-term prospects are tilted downwards. Growth prospects for advanced economies are subdued and many emerging market and developing economies are projected to grow in per capita terms more slowly than advanced economies, raising concerns about income convergence. While risks appear broadly balanced in the near term, they skew to the downside over the medium term, including a possible sharp tightening of financial conditions, waning popular support for global economic integration, growing trade tensions and risks of a shift toward protectionist policies, and geopolitical strains.

Tariffs and Regulation aims to provide a statistical overview about water abstraction, consumption, tariffs and data on sewage and wastewater treatment at an international level. It is mainly based on the statistical information provided by IWA Specialist Group on Statistics and Economics. The book is structured in three main parts. Part I presents tables and figures relative to water consumption and sanitation status and focuses on water abstraction, water delivered, water consumption and the evolution of sewer connection and wastewater treatment. Part II focuses on the analysis of water tariffs by investigating the structure of water tariffs by analysing the importance of the variable and fixed charge. It presents drinking water tariffs and illustrates the relationship between tariffs and GDP and also the size of the cities. Finally, charges in wastewater are dealt with country by country. Part III analyses the main aspects relative to water regulation and describes the importance of private operators in the management of the water cycle. Information relative to the principles used to fix drinking water prices is presented with an assessment of access to public water services.

This second edition has been revised and updated, with new material on such key contemporary issues as Syria, Ukraine, migration and the South China Sea. The text summarizes and discusses the major trends in the field of diplomacy, providing an innovative theoretical approach to understanding diplomacy not as a collection of practices or a set of historical traditions, but as a form of institutionalized communication through which authorized representatives produce, manage and distribute public goods. Ethno-ornithology Sonia C. Tidemann, Andrew

Gosler. 2012-08-06 Indigenous knowledge that embraces ornithology takes in whole social dimensions that are inter-linked with environmental ethos, conservation and management for sustainability. In contrast, western approaches have tended to reduce knowledge to elemental and material references. This book looks at the significance of indigenous knowledge of birds and their cultural significance, and how these can assist in framing research methods of western scientists working in related areas. As well as its knowledge base, this book provides practical advice for professionals in conservation and anthropology by demonstrating the relationship between mutual respect, local participation and the building of partnerships for the resolution of joint problems. It identifies techniques that can be transferred to different regions, environments and collections, as well as practices suitable for investigation, adaptation and improvement of knowledge exchange and collection in ornithology. The authors take anthropologists and biologists who have been trained in, and largely continue to practise from, a western reductionist approach, along another path - one that presents ornithological knowledge from alternative perspectives, which can enrich the more common approaches to ecological and other studies as well as plans of management for conservation.

Clothing Sacred Scriptures David Ganz,Barbara Schellewald.2018-12-03 According to a longstanding interpretation, book religions are agents of textuality and logocentrism. This volume inverts the traditional perspective: its focus is on the strong dependency between scripture and aesthetics, holy books and material artworks, sacred texts and ritual performances. The contributions, written by a group of international specialists in Western, Byzantine, Islamic and Jewish Art, are committed to a comparative and transcultural approach. The authors reflect upon the different strategies of »clothing« sacred texts with precious materials and elaborate forms. They show how the pretypographic cultures of the Middle Ages used book ornaments as media for building a close relation between the divine words and their human audience. By exploring how art shapes the religious practice of books, and how the religious use of books shapes the evolution of artistic practices this book contributes to a new understanding of the deep nexus between sacred scripture and art.

edition of this book in 2006, which prompted us to revise the book for the second edition. While the organization of the book remains unchanged, many of the chapters are substantially rewritten. For example, in Chapter 5, we re-ranked top VC firms, incorporating the latest performance statistics, fundraising and investment activities, notable exits, and (as always) our subjective opinions. In Chapter 6, we examine further evidence of the deepening globalization of the industry. In Chapters 3, 4, and 7, we analyze the impact of the 1999-2000 Internet bubble years on the VC risk and returns, as investments made in those years are finally mature and thus now a part of the performance evaluation analysis. We also incorporated expositional improvements throughout the book based on reader feedback on the first edition. Another feature of the new edition is that the VCV model, used extensively in Part III of the book, is now available as a Web-based application available on <http://VCVtools.com>. Significant collaborative efforts went into developing this tool, which we believe will be of interest to a broad audience, including practitioners interested in valuing VC-backed company stocks and employee stock options

Writing Beyond Pen and Parchment Ricarda Wagner, Christine Neufeld, Ludger Lieb. 2019-10-21 What can stories of magical engraved rings or prophetic inscriptions on walls tell us about how writing was perceived before print transformed the world? Writing beyond Pen and Parchment introduces readers to a Middle Ages where writing is not confined to manuscripts but is inscribed in the broader material world, in textiles and tombs, on weapons or human skin. Drawing on the work done at the Collaborative Research Centre "Material Text Cultures," (SFB 933) this volume presents a comparative overview of how and where text-bearing artefacts appear in medieval German, Old Norse, British, French, Italian and Iberian literary traditions, and also traces the paths inscribed objects chart across multiple linguistic and cultural traditions. Structural Features of Distributive Trades and Their Impact on Prices in the Euro Area European System of Central Banks. Monetary Policy Committee. 2011 The distributive trades sector, which is primarily accounted for by wholesale and retail trade, is not only economically important in its own right, but also relevant to monetary policy. Ultimately, it is retailers who set the actual prices of most consumer goods. They are the main interface between producers of consumer goods and consumers, with around half of private consumption accounted for by retail trade. The value added of this intermediation service can be substantial, as this accounts for, on average, about 25% of consumer prices. The purpose of this report is to analyse the structural features of the distributive trades sector and the developments within it, as well as how these may influence prices and price dynamics. Several aspects are relevant. ^From a monetary policy point of view, increasing the degree of competition in the distributive trades sector may have effects not only on price levels, but also on price dynamics, via a reduction in mark-ups, an increase in price flexibility and a greater and more rapid pass-through of

changes in costs to prices. Structural developments, such as the increasing market penetration of hard discounters, online trade and private label brands, the role of buying groups and the relative bargaining power between producers and retailers are of great importance to consumers and price determination. In addition, these may have implications for the measurement of consumer prices and inflation. More generally, the distributive trades sector plays an important role in determining cross-country differentials in productivity growth, both within and outside Europe: the sector has accounted for over one-third of the widening gap in aggregate productivity between the euro area and the United States since the mid-1990s. A specific contribution of this report is the use of a wide range of data sources, including a unique dataset on the location of over 100,000 individual grocery stores across most of the euro area, to investigate how to better measure the degree of competition and concentration in this sector, and to compare sector developments from a national, regional and local perspective.

Computer Architecture Techniques for Power-efficiency Stefanos Kaxiras, Margaret Martonosi. 2008 In the last few years, power dissipation has become an important design constraint, on par with performance, in the design of new computer systems. Whereas in the past, the primary job of the computer architect was to translate improvements in operating frequency and transistor count into performance, now power efficiency must be taken into account at every step of the design process. This book aims to document some of the most important architectural techniques that were invented, proposed, and applied to reduce both dynamic power and static power dissipation in processors and memory hierarchies. A significant number of techniques have been proposed for a wide range of situations and this book synthesizes those techniques by focusing on their common characteristics.--BOOK JACKET.

Regions and Economic Resilience Raul Ramos , Matías Mayor. 2020-12-14 The term “resilience” originated in environmental studies and describes one’s biological capacity to adapt and thrive under adverse environmental conditions. Regional economic resilience is defined as the capacity of a territory’s economy to resist and/or recover quickly from external shocks, often even improving on its prior situation (before the shock). The contributions in this book analyse different channels related to processes of mitigation (resistance–recovery) and adaptive resilience (reorientation–renewal), in a wide variety of geographical settings and scales. While the different chapters include relevant methodological advances in this literature, they also obtain relevant results from a policy perspective. Moreover,

the wide spectrum of topics and analyses among the contributions in this book extend the current framework, to analyse regional economic resilience, from the intersection of several disciplines involving geographers, economists and demographers, as well as environmental scientists.

The Cambridge History of Communism Norman

Naimark, Silvio Pons, Sophie Quinn-Judge. 2017-09-21

The second volume of The Cambridge History of Communism explores the rise of Communist states and movements after World War II.

Leading experts analyze archival sources from formerly

Communist states to re-examine the limits to Moscow's control of its satellites; the de-Stalinization of 1956; Communist reform

movements; the rise and fall of the Sino-Soviet alliance; the

growth of Communism in Asia, Africa and Latin America; and the

effects of the Sino-Soviet split on world Communism. Chapters

explore the cultures of Communism in the United States, Western

Europe and China, and the conflicts engendered by nationalism

and the continued need for support from Moscow. With the

danger of a new Cold War developing between former and

current Communist states and the West, this account of the roots,

development and dissolution of the socialist bloc is essential

reading.
