Understanding Green Business Nik Tehrani.2011-05 Why Understanding Green Business? With every new day society has become more aware of the increasing threats to the globe due to the non-environmentally friendly practices that have been occurring in the previous years. Due to the newfound awareness, people have taken greater lengths to pass laws, alter company policies and change their everyday lives to do their part in helping to preserve the environment and prevent any further damage. Rather than taking the easy route and continuing their habits, society is putting forth a consciousness effort to go out of their way to improve the environment in any way they can. As a collective force the going green movement will better the environment and allow further generations to enjoy a clean and productive world. How is Understanding Green Business structured? Dr. Tehrani and Dr. Sinha dedicate each chapter to a different aspect of going green in this book such as products, transportation, networking, research and energy alternatives. In addition, the authors discuss green careers and provide useful information on how to go about working at a green company. The future of the green movement and its impacts are mentioned so as to provide a potential impact of current changes in the future. It also shows a possible interpretation of how the future green movement shall be exercised. Who is this book for? This book has been created as the core textbook for Business professionals, industry practitioners, academicians and

students who would like to hone their business skills, and keep up with the latest trends in Green Business. As a result, Understanding Green Business will support students pursuing a master degree in MBA, Certificate in Management or a Diploma in Management and/or Business while undergraduate students in business programs.

**Automarken - über Hersteller und Markentreue** Martina Kloss. 2020-04-28 Sie fahren einen schicken Mercedes? Oder einen sportlichen BMW? Oder doch einen zuverlässigen Ford?

Automarken stehen für Eleganz, Luxus, Sportlichkeit aber auch für nüchterne Effektivität, Nutzwert oder einen günstigen Preis. Automarken transportieren ein Image und vermitteln als Statussymbol ein Lebensgefühl – selbst, wenn sie, wie Dacia, damit werben, kein Statussymbol zu sein. Automarken gibt es viele und jede versucht, ihren Platz im Markt zu finden und zu behaupten.

**Dependent Growth: Foreign Investment and the Development of the Automotive Industry in East-Central Europe** Petr Pavlínek. 2017-04-07 This book offers a critical analysis of recent developments in the automotive industry of East-Central Europe (ECE). Economists, industry specialists and national governments have considered the rapid development of the automotive industry in ECE in the past twenty years an unqualified success. This rapid growth has been based on large inflows of foreign direct investment (FDI) from Western Europe, North America, Japan and South Korea, and it significantly contributed to GDP growth, created thousands of new jobs, and completely transformed the previously existing automotive industry in the region. This volume offers an analysis that goes beyond uncritical celebratory accounts of this rapid growth. It is based on original, detailed firm-level research conducted by the author in Czechia and Slovakia between 2009 and 2015 that covered assembly firms and the networks of component suppliers. Theoretically and conceptually, the analysis will draw on the global production networks and global value chains perspectives. Drawing on the original empirical data and on additional available information, this volume concentrates on several important questions related to the development of the automotive industry in ECE in the 2000s: • The role of FDI in the rapid development of the automotive industry after 1990 and particularly in the 2000s. • The upgrading of the automotive industry in East-Central Europe through FDI • The position of ECE in the automotive industry research and development (R&D) • The effects of the 2008-2009 economic crisis in the automotive industry of ECE. • The role of

state in the rapid development of the automotive industry in ECE in the 1990s and 2000s. • The effects of FDI on domestic firms in the form of linkages between foreign-owned and domestic firms and spillovers from foreign-owned to domestic firms.

*History of Romanian Technology and Industry* Dorel Banabic.2023-10-23 This volume showcases the valuable achievements of the Romanian technology and industry worldwide. It started from the premise that the history of Romanian technique is scarcely known outside the borders of Romania. The main Romanian contributions to the world's technological heritage are missing, except for a few names in the field of aviation, from the great encyclopedias and dictionaries published worldwide. This is due, among other reasons, to the insufficient promotion in widely spoken languages of the history of Romanian technology. The multidisciplinary approach of the volumes means that the field of technology had to be split into several branches. The present volume includes the following industries: electrical engineering, energy technology, biomedicine, maritime and rail transport,

automotive industry, aviation. The history of engineering societies, of engineering education, of intellectual property, and of inventions, as well as a synopsis of the personalities of Romanian engineering have been tackled in separate chapters. For each field, are engaged the collaboration of authors who have already published a history of their field. Certain chapters were drafted with the aid of specialists who have played the part of policy makers in the elaboration of development strategies for Romania and who are familiar not only with the facts and the history of their field, but also with the 'philosophy' behind its development.

*The Logan Epic : New trajectories for innovation* Bernard Jullien, Yannick Lung, Christophe Midler. 2013-02-06 Synonyme de sophistication, de haute technologie et de prix élevés, l'innovation cherche aujourd'hui ses ruptures dans des formes de valorisation de l'offre délaissées par la concurrence et l'accès à de nouveaux clients. L'épopée de la Logan constitue un archétype de ces nouvelles trajectoires de l'innovation et dessine de nouvelles frontières pour l'industrie. Pourquoi et comment une entreprise comme Renault s'est-elle lancée dans cette aventure ? Comment a-t-elle surmonté les surprises et les obstacles qui l'ont jalonnée pour devenir l'une des success story les plus spectaculaires de ce début du XXIe siècle ? Quelles sont les suites possibles d'un succès qui déstabilise le modèle de développement traditionnel des entreprises industrielles européennes ? Au terme d'une enquête approfondie dans les coulisses de Renault et Dacia, les trois auteurs, économistes et gestionnaires spécialistes de l'industrie automobile, apportent des réponses à ces questions. Ils analysent la réalisation de ce projet, sous l'angle de la conception du produit, du développement industriel et de son déploiement commercial. Au travers d'entretiens exclusifs avec la plupart des acteurs de ce projet, en particulier, les trois dirigeants qui ont joué un rôle clé dans l'histoire du projet Logan, Louis Schweitzer, Jean-Marie Hurtiger et Gérard Detourbet, découvrez les secrets de cette success story. Illustré de nombreux graphiques et de documents inédits, l'ouvrage montre comment la stratégie Logan a émergé et s'est développée dans l'entreprise, comment elle a su percevoir les tendances des marchés émergents, relever des défis de conception

jugés impossibles (réaliser une « vraie » voiture rentable à 5000€), construire et déployer des systèmes industriels et commerciaux, dotant l'entreprise d'une dimension internationale inédite jusque-là. Dans le contexte actuel, cet ouvrage apporte, bien au-delà de l'industrie automobile, des réponses à tous ceux qui s'interrogent sur la déstabilisation actuelle des équilibres économiques mondiaux et le rôle qu'y jouent les processus d'innovation des entreprises.

**Hydrogen Fuel Cell Technology for Stationary Applications** Badea, Gheorghe, Felseghi, Raluca-Andreea, A?chilean, Ioan. 2021-04-30 Unconventional energy sources have gained and will continue to gain an increasing share of energy systems around the world. Hydrogen is already part of today's chemical industry, but as an energy source, its rare advantages can only be obtained with the help of technologies. Currently, the fuel cell is considered the cleanest sustainable energy. With the development of fuel cells, hydrogen-based

energy generation becomes a reality. *Hydrogen Fuel Cell Technology for Stationary Applications* is an essential publication that focuses on the advantages of hydrogen as a primary energy center and addresses its use in the sustainable future of stationary applications. This book is ideally designed for fuel cell manufacturers, architects, electrical engineers, civil engineers, environmental engineers, advocates, manufacturers, mechanics, researchers, academicians, and students.

Automotive FDI in Emerging Europe A. J. Jacobs.2017-06-19 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign

assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

**La valeur ajustée** Jacques Leger.2019-02-07 Innovation et mondialisation; des conséquences pour toute l'Humanité. La mondialisation a engendré le grand découplage de la population en remplaçant la grande classe moyenne par une population qui s'enrichit sans limites et une population qui s'appauvrit sans cesse. La classe de riches est apparue en Chine, en Inde et en Occident. Elle attend des offres haut de gamme et une « innovation riche ». L'appauvrissement des anciens de la classe moyenne et la masse des émergents ont ouvert un marché considérable pour les produits dits « d'innovation frugale ». Cette tendance, associée au phénomène d'économie des ressources de la Terre, conduit les entreprises à réinventer une offre de valeur mieux ajustée à ces besoins nouveaux. La généralisation de l'économie numérique modifie fortement les modèles d'affaires. Les « applications » permettent à chacun de se faire connaître dans le monde entier, alors que les « plateformes » prennent la place des acteurs traditionnels, sans investir ni capital, ni employés, mais en captant la contribution de travail de la multitude des internautes. Le livre traite des concepts liés à la valeur ajustée aux attentes de ces différents clients. Préparez-vous au changement. Deuxième tome d'une série d'ouvrages de l'auteur Jacques Leger, la valeur ajustée propose un regard englobant sur les innovations économiques de notre époque. EXTRAIT La valeur client est la raison qui nous fait acheter un produit plutôt qu'un autre. Nous mesurons cette valeur consciemment ou inconsciemment, mais nous en tenons compte dans notre acte d'achat. Ce peut être le prix de vente, la beauté, la performance, le confort, le faible encombrement, la notoriété, etc... Le propre de la

valeur client est justement de s'adapter à la multitude de critères de sélection des différents types d'acheteurs que nous sommes. Trouver la bonne valeur client, pour une cible donnée, c'est faire de la « valeur ajustée » : c'est-à-dire « ajuster la valeur » à un segment d'acheteurs potentiels. La mondialisation a fait fondre la classe moyenne occidentale. Celle-ci, autrefois prépondérante avait une forte influence dans la définition des produits. À une masse de population de niveau de vie moyen, il convenait de proposer des produits, certes différenciés par le détail, mais tous de valeur moyenne plus ou moins égale. C'était le temps de la production de masse. Cette classe moyenne s'étant fortement rétrécie, il faut désormais adapter l'offre produit aux populations qui la remplacent. À PROPOS DE L'AUTEUR Ingénieur et financier, Jacques Leger a passé cinquante années dans le monde de l'industrie, au sein de grandes entreprises industrielles, opérant dans les divers pays d'Europe, aux USA, au Japon, en Corée du Sud et en Chine. Il a vécu lui-même les différentes étapes de la mondialisation.
