Dashboarding and Reporting with Power Pivot and Excel Kasper de Jonge.2014-07-01

Microsoft's revolutionary Power Pivot is a tool that allows users to create and transform data into reports and dashboards in new and much more powerful ways using the most-used analytical tool in the world: Excel. This book, written by a member of Microsoft's Power Pivot team, provides a practical step by step guide on creating a financial dashboard. The book covers in detail how to combine and shape the relevant data, build the dashboard in Excel, providing layout and design tips and tricks, prepare the model to work with fiscal dates, and show values used in many financial reports, including year-to-date, variance-to-target, percentage-of-total, and running totals reports. Accessibly written, this book offers readers a practical, real-world scenario and can be used as a day-to-day reference. Though the guide focuses on Power Pivot for Excel 2010, a chapter that discusses Power View—compatible with Excel 2013— and Power BI is also included.

Data Visualization with Excel Dashboards and Reports Dick Kusleika.2021-02-17 Large corporations like IBM and Oracle are using Excel dashboards and reports as a Business Intelligence tool, and many other smaller businesses are looking to these tools in order to cut costs for budgetary reasons. An effective analyst not only has to have the technical skills to use Excel in a productive manner but must be able to synthesize data into a story, and then present that story in the most impactful way. Microsoft shows its recognition of this with Excel. In Excel, there is a major focus on business intelligence and visualization. Data Visualization with Excel Dashboards and Reports fills the gap between handling data and synthesizing data into meaningful reports. This title will show readers how to think about their data in ways other than columns and rows. Most Excel books do a nice job discussing the individual functions and tools that can be used to create an Excel Report. Titles on Excel charts, Excel pivot tables, and other books that focus on Tips and Tricks are useful in their own right; however they don't hit the mark for most data analysts. The primary reason these titles miss the mark is they are too focused on the mechanical aspects of building a chart, creating a pivot table, or other functionality. They don't offer these topics in the broader picture by showing how to present and report data in the most effective way. What are the most meaningful ways to show trending? How do you show relationships in data? When is showing variances more valuable

than showing actual data values? How do you deal with outliers? How do you bucket data in the most meaningful way? How do you show impossible amounts of data without inundating your audience? In *Data Visualization with Excel Reports and Dashboards*, readers will get answers to all of these questions. Part technical manual, part analytical guidebook; this title will help Excel users go from reporting data with simple tables full of dull numbers, to creating hi-impact reports and dashboards that will wow management both visually and substantively. This book offers a comprehensive review of a wide array of technical and analytical concepts that will help users create meaningful reports and dashboards. After reading this book, the reader will be able to: Analyze large amounts of data and report their data in a meaningful way Get better visibility into data from different perspectives Quickly slice data into various views on the fly Automate redundant reporting and analyses Create impressive dashboards and What-If analyses Understand the fundamentals of effective visualization Visualize performance comparisons Visualize changes and trends over time

Dashboarding with SAP Crystal Dashboard Design + Training Inc. Report Writing Services, Inc..2012-11-02 Based on Microsoft Office Excel, SAP Crystal Dashboard (Xcelsius) allows you to convert your old spreadsheets into exciting visually interactive dashboards. Numbers in Excel are brought to life with dynamic graphs, which allow the user to customize and visualize data in real

time. While spreadsheet data is static and needs to be updated from reports using cut-and-paste, dashboards automatically query databases or reports for the most current data. This book by Report Writing Services is a 3 day course that includes 10 hours of one-on-one personal training with a dashboard instructor from Information Analytics Institute. The student learns by building dashboards (not by reading theory) and is exposed to a comprehensive collection of components and shown a wide range of design concepts and practical spreadsheet programming techniques. Breadth of knowledge is emphasized over repetitious exercises while dashboard standards and best practices are taught throughout the course. The book consists of nine chapters written in an easy to follow step-by-step format. All the instructions are accompanied by detailed color illustrations to help create the dashboards quickly and easily. A new and increasingly challenging dashboard, which introduces and teaches new concepts, is built in each chapter. Student files provided by Information Analytics Institute include a rich set of pre-constructed and mid construction dashboards available to be previewed and examined prior to purchase. These are worked on throughout the course. The chapters are knit together by an entertaining story about Candy Cane Enterprises and how Annie Heartland and Abel Goodman struggle to overcome corporate politics to build dashboards that reveal the truth about the company's finances, sales, production, client relations and human resources. While learning to build dashboards the student is carried on a journey from the skyscrapers of New York to the islands of the South Pacific and hills of Montana. Complete with cartoon images, intrigue and a little romance, the story provides context and meaning to the tasks the student must perform. Learning was never so entertaining. Includes: 10 hours of one-on-one personal training with a dashboard instructor from Information Analytics Institute course book dashboards & student files (available from Information Analytics Institute to be previewed and

examined prior to purchase) Training: study from your home or office over the Internet according to your schedule meet one-on-one with an expert instructor for a one hour introduction and overview of the course complete the nine Crystal Dashboard step-by-step self-study chapters (approximately 9 hours are required) After completing each chapter, meet one-on-one with your instructor to discuss a series of questions and perform hands on exercises to ensure an understanding of the material. Each meeting will last approximately an hour 10 hours total instructor time is provided During the course you will: get acquainted with the program window, menus and toolbars discover the variety of components you can choose from to create dashboards learn how to use properties and settings of different objects study how to link objects to spreadsheet data find out how to set up connections between objects and make them influence each other learn to organize objects on the canvas by aligning and grouping them see how to organize data in the spreadsheet by distributing it among different sheets and tables write different Excel formulas to get the data you need learn many facets of effective dashboard design study and apply standards and best practices

Dashboarding with SAP Crystal Dashboard Design Inc. Report Writing Services, Inc.. 2012-11-01 Based on Microsoft Office Excel, SAP Crystal Dashboard (Xcelsius) allows you to

convert your existing spreadsheets into exciting visually interactive dashboards. Numbers in Excel are brought to life with dynamic graphs, which allow the user to customize and visualize data in real time. While spreadsheet data is static and needs to be updated from reports using cut-and-paste, dashboards automatically query databases or reports for the most current data. This book by Report Writing Services, designed as a 3 day training course, is written in a way perfect for self-study or an instructor led classroom setting. The student learns by actually building dashboards (not by reading theory) and is exposed to a comprehensive collection of dashboard components and shown a wide range of design concepts and practical spreadsheet programming techniques. Breadth of knowledge is emphasized over repetitious exercises and dashboard standards and best practices are taught throughout the course. The book consists of nine chapters written in an easy to follow step-by-step format. All the instructions are accompanied by detailed color illustrations to help create the dashboards quickly and easily. A new and increasingly challenging dashboard, which introduces and teaches new concepts, is built in each chapter. Student files provided by Information Analytics Institute include a rich set of pre-constructed and mid construction dashboards available to be previewed and examined prior to purchase. These are worked on throughout the course. The chapters are knit together by an entertaining story about Candy Cane Enterprises and how Annie Heartland and Abel Goodman struggle to overcome corporate politics to build dashboards that reveal the truth about the company's finances, sales, production, client relations and human resources. While learning to build dashboards the student is carried on a journey from the skyscrapers of New York to the islands of the South Pacific and the hills of Montana. Complete with cartoon images, intrigue and a little romance, the story provides context and meaning to the tasks the student must perform. Learning was never so entertaining. During the course you will: get

acquainted with the program window, menus and toolbars discover the variety of components you can choose from to create dashboards learn how to use properties and settings of different objects study how to link objects to spreadsheet data find out how to set up connections between objects and make them influence each other learn to organize objects on the canvas by aligning and grouping them see how to organize data in the spreadsheet by distributing it among different sheets and tables write different Excel formulas to get the data you need learn many facets of effective dashboard design apply standards and best practices and study them with the online Standards & Best Practices reference guide and tools Includes: course book dashboards & student files (available from Information Analytics Institute to be previewed and examined prior to purchase)
