Manual of Neonatal Care John P. Cloherty, Eric C. Eichenwald, Anne R. Hansen, Ann R. Stark. 2012-01-05 This edition of the Manual of Neonatal Care has been completely updated and extensively revised to reflect the changes in fetal, perinatal, and neonatal care that have occurred since the sixth edition. This portable text covers current and practical approaches to evaluation and management of conditions encountered in the fetus and the newborn, as practiced in high volume clinical services that include contemporary prenatal and postnatal care of infants with routine, as well as complex medical and surgical problems. Written by expert authors from the Harvard Program in Neonatology and other major neonatology programs across the United States, the manual's outline format gives readers rapid access to large amounts of valuable information quickly. The Children's Hospital Boston Neonatology Program at Harvard has grown to include 57 attending neonatologists and 18 fellows who care for more than 28,000 newborns delivered annually. The book also includes the popular appendices on topics such as common NICU medication guidelines, the effects of maternal drugs on the fetus, and the use of maternal medications during lactation. Plus, there are intubation/sedation guidelines and a guide to neonatal resuscitation on the inside covers that provide crucial information in a quick and easy format.

Histología básica + StudentConsult Leslie P. Gartner, James L. Hiatt. 2011-05-25 Magnífica obra en la especialidad de la mano de los reputadísimos autores Les Gartner y James Hiatt, que concibieron esta obra pensando en que quedaba un hueco por rellenar en la bibliografía, ya que hacía falta un texto mucho más conciso e ilustrado, que pudiera ser utilizado como un libro de revisión. La idea de los autores es que el estudiante retenga el mayor grado de contenidos, con el menor tiempo posible. El contenido se presenta en un diseño a doble página, en el que en la página de la izquierda se encuentra la explicación teórica y a la derecha las ilustraciones. Dichas ilustraciones (casi 400) han sido cuidadosamente seleccionadas, y pertenecen en su mayor parte a la 3.ª ed. del Texto y atlas a color de histología de los mismos autores. Al inicio de los capítulos se encuentran listadas las palabras clave (cuadro de texto de fondo azul), y a lo largo del texto se incluyen cuadros de correlación clínica (fondo verde). Así, el objetivo de la obra es correlacionar la estructura de las células, de los órganos y sistemas con las patologías clínicas que puedan surgir. En el texto se han omitido deliberadamente las imágenes correspondiente a microscopio electrónico y se han colocado en el recurso Student Consult; así, en este valioso y poderoso recurso se incluyen 150 preguntas autoevaluativas basadas en las imágenes microfotográficas. Las preguntas tienen 5 opciones de respuesta, razonando el porqué de la opción correcta. La histología es una de las asignaturas de formación básica en Medicina y también en otros grados de Ciencias de la Salud (Odontología, Biomedicina, Ciencias Médicas Básicas) . En Medicina se imparte en 1.º curso o 2.º curso, y algunas

veces junto con otras disciplinas. El número de ECTS oscila entre un mínimo de 3 y un máximo de 6.
