The Miracle of the Qur'an Yasir Qadhi.2020-01-06 The Qur'an is the greatest miracle of God (Allah) and the Qur'an is the proof of the truthfulness of Islam. It is the standing and everlasting miracle, but very rarely, have we heard how is it a miracle? The Qur'an is the ultimate miracle of our Prophet Muhammad (Sallahualaihi wassalam - S.A.W). Reflections on the Miracles of the QURAN Zaghloul Kadah.2015-12-03 This book is dedicated to the subject of the miracles contained in the Quran, also referred to as signs or portents. Each prophet of the three Abrahamic faiths was empowered with signs to facilitate his mission and these are well documented in scriptures. With the passage of time many faded away from memory and many people came to doubt their existence, but not so with the Quran. It remains as pure and eternal as God decreed it to be when it was revealed upon the Prophet Muhammad. The author's intention in this book was to select stories from the Quran, some randomly, that cover a wide range of disciplines such as cosmology, physics, history, embryology and others and present them within the framework of the prevailing knowledge at the time. Discerning readers will hopefully find such presentations not only interesting and easy to follow but also leave no doubt in their minds that the Quran is the Word of God and that it could not have been created by humans. The author's ultimate objective is to link the Islamic faith to the other Abrahamic religions in an effort to convey the message that it is God's intent that we establish peace and justice universally and attain compassion among humankind en toto.

Allah's Miracles in the Qur'an Hârun Yahya.2005 PREFACE Fourteen centuries ago, Allah sent down the Qur'an. This book of guidance and wisdom calls man to the truth and instructs all human beings to adhere to the values which this mighty revelation contains. From the day of its revelation to the Day of Judgement, this last divine book will remain as the sole guide for humanity. The book of Allah states, But it is nothing less than a Reminder to all the worlds. The Journey to Allah Ibn Rajab al-Hanbali.2018-11-30 By al-Hafiz Ibn Rajab al-Hanbali. Bukhari records on the authority of Abu Hurayrah that the

Prophet (pbuh) said, 'Your actions alone will not save any of you.' They asked, 'Messenger of Allah, not even you?', He replied, 'Not even me, unless, Allah were to envelop me in His mercy. Be firm; steadfast and balanced; and journey [to Allah] in the beginning of the day, the end of the day, and a portion of the latter part of the night. Moderation, moderation! Through this you will attain your goal! He also recorded this hadith in another place with the wording, 'This religion is easy, none makes it hard upon himself except that it overwhelms him; therefore be firm, steadfast, and balanced; upon which have glad tidings! Seek help in this by journeying [to Allah] at the beginning of the day, at the end of the day, and a portion of the latter part of night.'

Development of Science & Technology in Islamic History Shabeer Ahmed. 2015-11-10 The spectacular advances in science and technology that have occurred over the last century have led some to believe that only Western Capitalism can produce material progress. Does religion hinder man's progress in life? Is there a contradiction between Islam and science? Why are the countries of the Islamic world so technologically backward? Is Islam capable of addressing man's diverse problem in the 21st century? This book tackles these questions by exploring the relationship between Islam and science, by examining how science bloomed under Islam while Europe struggled in the Dark Ages and by illustrating a distinct vision for future scientific and technological advancement under the Islamic State.

The Amazing Qur'an Gary Gary Miller. 2017-10-24 Calling the Qur'an amazing is not something done only by Muslims, who have an appreciation for the book and who are pleased with it; it has been labelled amazing by non-Muslims as well. The Future of Islam John L. Esposito. 2010-02-04 John L. Esposito is one of America's leading authorities on Islam. Now, in this brilliant portrait of Islam today-- and tomorrow-- he draws on a lifetime of thought and research to provide an accurate, richly nuanced, and revelatory account of the fastest growing religion in the world. Here Esposito explores the major questions and issues that face Islam in the 21st century and that will deeply affect global politics: Is Islam compatible with modern notions of democracy, rule of law, gender equality, and human rights? How representative and widespread is Islamic fundamentalism and the threat of global terrorism? Can Muslim minority communities be loyal citizens in America and Europe? In the midst of these questions Esposito places an important emphasis on the issue of Islamophobia, the threat it poses, and its vast impact on politics and society in the US and Europe. He also turns the mirror on the US and Europe and paints a revealing portrait of how we appear to Muslims. Recent decades have brought extraordinary changes in the Muslim world, and in addressing these issues, Esposito paints a complex picture of Islam in all its diversity--a picture of urgent importance as we face the challenges of the coming century.

The Miraculous Language of the Qur'an: Evidence of Divine Origin Bassam Saeh. 2015-01-12 This study illustrates why the language of the Qur'an is miraculous, unique, and evidence of divine authority. The author compares the language of the Qur'an with the language of pre-Islamic poetry, the Prophet's words (hadith), and the language of the Arabs both past and present, to demonstrate that although the Qur'an was revealed in Arabic it was at the same time an Arabic which was entirely new. Original and early Muslim audiences viewed this as miraculous and responded to the Qur'an's words, sounds, rhythms, etc. in a manner consistent with a deeper appreciation of its beauty and majesty which modern ears, trained by familiarity, and despite being surrounded by all manner of dictionaries and studies, are at a loss to capture. The author attempts to remove this veil and present the Qur'an to readers as if hearing it for the first time, to bring to life some of this wonder. In doing so he guides readers to appreciate the beauty of the Qur'an, to become more immersed in it, and to have a clearer understanding of its structure and flow. Devoting special attention to Surah Al Muddaththir, to underpin his analysis, Saeh thus brings the Revelation to life, to demonstrate that each surah has distinct features and characteristics that make it stand out uniquely within the design and sweep of the whole.

The Divine Miracles of Prophet Muhammad (P.B.U.H.) MR Hakimi Bin Abdul Jabar. 2015-12-16 Of course the Quran is not a book of science. However, many scientific facts that are expressed in an extremely concise and profound manner in its verses have only been discovered with the technology of the 20th century. These facts could not have been known at the time of the Quran's revelation, and this is still more proof that the Quran is the word of God. In order to understand the scientific miracle of the Quran, we must first take a look at the level of science at the time when this holy book was revealed.

The Power of Prayer (Channeling Brain Waves Through Dhikr) Ahmed Hulusi. 2014-06-20 Prayer is the weapon of a believer. - Muhammad (saw) Prayer is the act of actualizing one's wants through the divine powers present within. There is of course a scientific explanation to this act. Essentially prayer is 'guided brain waves.' Just as the dimension of knowledge transforms into energy and the quantum field to form the universe, the wants and desires of consciousness emanate from the dimension of knowledge to reveal themselves as the wants and desires of man and become actualized through the densification of guided brain waves. Due to this, the stronger the concentration level, the faster the response will be to the prayer. And he who turns away from My dhikr (the absolute reality of which I have reminded him), indeed, he will have a restricted life (limited by the conditions of his body and mind), and We will resurrect him as blind in the period of Doomsday. Quran 20:124 Since only a very small percentage of the brain is employed while a large part of brain capacity remains unused, dhikr allows the activation of this larger percentage. The bio-electrical energy produced in specific regions in the brain via dhikr spreads to other regions and activates the dormant cells thereby increasing brain activity.

Whatever the dhikr is about, the frequency corresponding to that meaning is emanated to the cells and thus brain capacity relevant to that particular meaning is increased.

The Qur'an & Modern Science: Compatible or Incompatible? Zakir Naik.2007 Ever since the dawn of human life on this planet, Man has always sought to understand Nature, his own place in the scheme of Creation and the purpose of Life itself. In this quest for Truth, spanning many centuries and diverse civilizations, organized religion has shaped human life and determined to a large extent, the course of history. While some religions have been based on books, claimed by their adherents to be divinely inspired, others have relied solely on human experience. Al-Qur'aan, the main source of the Islamic faith, is a book believed by Muslims, to be of completely Divine origin. Muslims also believe that it contains guidance for all mankind. Since the message of the Qur'aan is believed to be for all times, it should be relevant to every age. Does the Qur'aan pass this test? In this booklet, I intend to give an objective analysis...
