Teacher Learning in Language Teaching Donald Freeman,Donald J. Freeman,Jack C. Richards,Jack Croft Richards.1996-02-23 This book introduces a new field of educational research called teacher learning, as it applies to the teaching of languages. Up until recently, the study of second language teacher education has focused mainly on the knowledge base and specific skills needed for effective teaching. This book invites us to look at teacher education from a fresh point of view, through an exploration of the thinking and learning processes of individuals as they learn to teach. Seventeen original articles, based on studies done in North America, Europe, Asia, and Australia, provide examples of pioneering research into the ways that individuals learn to teach languages, and the roles that previous experience, social context, and professional training play in the process. The collection thus helps establish a research base for this newly developing field.

Teaching through Stories Margareta Häggström.2020-11-26 This book aims to meet the demands on teaching and learning in the twenty-first century, and in specific, how teacher education may

transform pedagogical approaches and didactic methods to support future teachers in enhancing needful skills. In particular, it focuses on the pedagogical approach of Storyline, and how a Storyline can be applied in teacher education. It argues that teacher education benefits from the potency of various disciplines while applying an interdisciplinary methodology. Storyline is a problem-based, cross-curricular approach, based on learning through an evolving narrative, created in collaboration between teacher and students. It includes a variety of didactic tools, and inclusiveness towards different learners. Using Storyline in teacher education arranges for teacher educators to integrate alternative structures, that enable interdisciplinary cooperation and topic-based teaching. The authors have incorporated Storyline in many different ways, which contextualizes throughout the book. The book provides an overview of Storyline and introduces improved and new theoretical perspectives on this approach, including many practical examples.

Learning Factories Eberhard Abele, Joachim Metternich, Michael Tisch.2018-10-10 This book presents the state of the art of learning factories. It outlines the motivations, historic background,

and the didactic foundations of learning factories. Definitions of the term learning factory and a corresponding morphological model are provided as well as a detailed overview of existing learning factory approaches in industry and academia, showing the broad range of different applications and varying contents. Learning factory best-practice examples are presented in detailed and structured manner. The state of the art of learning factories curricula design and their use to enhance learning and research as well as potentials and limitations are presented. Further research priorities and innovative learning factory concepts to overcome current barriers are offered. While today numerous learning factories have been built in industry (big automotive companies, pharma companies, etc.) and academia in the last decades, a comprehensive handbook for the scientific community and practitioners alike is still missing. The book addresses therefore both researchers in production-related areas, that want to conduct industry-relevant research and education, as well as managers and engineers in industry, who are searching for an effective way to train their employees. In addition to this, the learning factory concept is also regarded as an innovative learning concept in the field of didactics.

Emotional Arenas Mark Seymour.2020-04-02 Based on the records of a murder trial that transfixed all of Italy in the late 1870s, this study makes use of a dramatic court case to develop a new paradigm for the history of emotions - the 'emotional arena'. Set in the decade following Italian unification, the context was one of notable cultural variety. An as-yet unexplored aspect of this was that the experience and expression of emotions were as variable as the regions making up the new nation. Through a close examination of the spaces in which daily lives, loves, and deaths unfolded - from marital homes to places of socializing and entertainment, to a Roman court room - Mark Seymour explores the way social 'arenas' are crucial to the historical development of emotional cultural rules. The narrative is driven by the failed marriage of a decorated but allegedly impotent Risorgimento soldier, his wife's scandalous affair with a virile circus artiste (who had a string of previous lovers), and the illicit new couple's murder of the hapless husband. Hundreds of witnesses - from local professionals to servants and even circus clowns - interviewed across the length and breadth of the peninsula, left their personal views on marriage, sexuality, and infidelity. These provide an extraordinary series of peepholes into little-known areas of the new nation's social fabric. A careful yet imaginative reading of the prosecution records, as well as contemporary newspaper coverage, allows reconstruction of the highly emotional experiences of all those touched by this extraordinary story. The result is a classic Italian micro-history with relevance for today's emotionally volatile times.

Managing Public Debt .2007-01-01 High-quality public debt management plays a critical role in reducing the vulnerability of developing countries to financial crises. With sound risk and cash management, effective coordination with fiscal and monetary policy, good governance, and adequate

institutional and staff capacity in place, governments can develop and implement effective medium-term debt management strategies. *Managing Public Debt: From Diagnostics to Reform Implementation* draws insights from a joint pilot program set up by the World Bank and International Monetary Fund to design relevant reform and capacity-building programs in twelve countries. The experiences of these geographically and economically diverse countries - Bulgaria, Colombia, Costa Rica, Croatia, Indonesia, Kenya, Lebanon, Nicaragua, Pakistan, Sri Lanka, Tunisia, and Zambia - illustrate the challenges and elements necessary to make progress in the area of public debt management. *Managing Public Debt* will serve government officials contemplating or in the process of reforming their practices, providers of technical assistance, and practitioners working on building capacity in public debt management. Because effective implementation of debt management strategies also requires a developed domestic government debt market, readers will also be interested in the companion volume, *Developing the Domestic Government Debt Market*, published by The World Bank in February 2007, based on the same joint pilot program.

New Lefts Terence Renaud.2021-09-07 A groundbreaking history of Europe's new lefts, from the antifascist 1920s to the anti-establishment 1960s In the 1960s, the radical youth of Western Europe's New Left rebelled against the democratic welfare state and their parents' antiquated politics of reform. It was not the first time an upstart leftist movement was built on the ruins of the old. This book traces the history of neoleftism from its antifascist roots in the first half of the twentieth century, to its postwar reconstruction in the 1950s, to its explosive reinvention by the 1960s counterculture. Terence Renaud demonstrates why the left in Europe underwent a series of internal revolts against the organizational forms of established parties and unions. He describes how small groups of militant youth such as New Beginning in Germany tried to sustain grassroots movements without reproducing the bureaucratic, hierarchical, and supposedly obsolete structures

of Social Democracy and Communism. Neoleftist militants experimented with alternative modes of organization such as councils, assemblies, and action committees. However, Renaud reveals that these same militants, decades later, often came to defend the very institutions they had opposed in their youth. Providing vital historical perspective on the challenges confronting leftists today, this book tells the story of generations of antifascists, left socialists, and anti-authoritarians who tried to build radical democratic alternatives to capitalism and kindle hope in reactionary times.

Uses of Technology in Primary and Secondary Mathematics Education Lynda Ball,Paul Drijvers,Silke Ladel,Hans-Stefan Siller,Michal Tabach,Colleen Vale.2018-05-14 This book provides international perspectives on the use of digital technologies in primary, lower secondary and upper secondary school mathematics. It gathers contributions by the members of three topic study groups from the 13th International Congress on Mathematical Education and covers a range of themes that will appeal to researchers and practitioners alike. The chapters include studies on technologies such as virtual manipulatives, apps, custom-built assessment tools, dynamic geometry, computer algebra systems and communication tools. Chiefly focusing on teaching and learning mathematics, the book also includes two chapters that address the evidence for technologies' effects on school mathematics. The diverse technologies considered provide a broad overview of the potential that digital solutions hold in connection with teaching and learning. The chapters provide both a snapshot of the status quo of technologies in school mathematics, and outline how they might impact school mathematics ten to twenty years from now.

Handbook of Economic Sociology for the 21st Century Andrea Maurer.2021-05-08 This

handbook provides an overview on major developments that occurred in the field of economic sociology after its rebirth since the 1980s in the US. It offers new insights on the uniqueness of European economic sociology compared to US economic sociology which emerged at the end of the 20th century. The handbook presents economic sociology as a developing field which started with certain foundations as new economic sociology, widening the perspective by introducing social factors thereby focusing more on general belief systems, social forms of coordination and the relationships between society and the economy. It offers an outstanding portrait of the research field helping to identify major foundations and trajectories as well as new research perspectives for a globalized economic sociology. This makes the handbook appeal to specialized researchers of the field, researchers from other disciplines interested in economic phenomena, as well as graduate and postgraduate students.

From Them to Us Mel Ainscow, Tony Booth. 2005-06-23 Inclusive education has become a phrase with international currency shaping the content of conferences and national educational policies around the world. But what does it mean? Is it about including a special group of disabled learners or students seen to have 'special needs' (them) or is it concerned with making educational institutions inclusive, responsive to the diversity of all their students (us)? In this unique comparative study, the editors have brought together an international team of researchers from eight countries to develop case-studies which explore the processes of inclusion and exclusion within a school or group of schools set in its local and national context. The study includes classroom observation, the experiences of the school day of students and interviews with staff, students, parents and school governors. Through an innovative juxtaposition of the case-studies and commentaries on them, differences of perspective within and between countries are revealed and

analysed. The study arose from a dissatisfaction with previous research, which presents 'national perspectives' or seeks findings that have global significance. This book avoids such simplification and draws attention to the problems of translation of practice across cultures. The editors start from an assumption of diversity of perspective which like the diversity of students within schools can be viewed as problematic or as a resource to be recognized and celebrated.

Universities in Change Andreas Altmann, Bernd Ebersberger. 2012-09-13 Universities find themselves in dynamic change. They are confronted with growing expectations from their stakeholders, increasing international competition, and new technological challenges. Featuring insights and in-depth case studies from leading researchers and university decision makers from around the world, this book argues that institutions of higher education, in order to be successful, have to actively reflect on circumstances, visions, and strategies to master the future. Drawing from their experiences across a diverse array of institutions in Europe, Asia, and the Americas, the authors explore the pressures on today's universities and the opportunities for excelling in the contest for resources. They discuss operational issues, such as strategic management, IT governance, leadership development, and entrepreneurial culture, and broader concerns, such as the roles and responsibilities of universities in promoting technology transfer and economic and social development. The result is a resource that not only reveals and analyzes universities from an organizational perspective, but presents best practice models and concrete inspiration for management and policymaking.

Theory of Inquiry Learning Arrangements Johannes Reitingger,Christina Haberfellner,Eric Brewster,Martin Kramer.2016-01-01 Human beings come equipped with a tendency to generally not want to leave thinking to others. With the endeavor to professionally, reflectively, and gracefully support each individual on the basis of this tendency, the paradigm of a curious, self-determined, and inquiring human is developed in this volume, which might point the way towards a promising future. In view of such a perspective, the authors regard the pedagogical construct of self-determined Inquiry Learning as just such a promising concept. The Theory of Inquiry Learning

Arrangements (TILA) concretizes this approach according to the principles of critical multiplism. The effectivity of TILA is scrutinized via the personalized concepts AuRELIA (Authentic Reflective Exploratory Learning and Interaction Arrangements) and CrEEd (Criteria-based Explorations in Education). These concepts are presented in detail, empirically investigated, and underpinned with practical examples. In the current edited volume, the concept of self-determined Inquiry Learning is further empirically substantiated and presented to the international community.
