Petranovich.2007-08-02 Where do political identities come from, how do they change over time, and what is their impact on political life? This book explores these and related questions in a globalizing world where the nation state is being transformed, definitions of citizenship are evolving in unprecedented ways, and people's interests and identities are taking on new local, regional, transnational, cosmopolitan, and even imperial configurations. Pre-eminent scholars examine the changing character of identities, affiliations, and allegiances in a variety of contexts: the evolving character of the European Union and its member countries, the Balkans and other new democracies of the post-1989 world, and debates about citizenship and cultural identity in the modern West. These essays are essential reading for anyone interested in the political and intellectual ferment that surrounds debates about political membership and attachment, and will be of interest to students and scholars in the social sciences, humanities, and law.

**Shifting Power in Asia-Pacific?** Enrico Fels.2016-11-03 This book investigates whether a power shift has taken place in the Asia-Pacific region since the end of the Cold War. By systematically examining the development of power dynamics in Asia-Pacific, it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour. With a special emphasis on Sino-US competition, the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities, national power and the much-cited regional power shift. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44 regional countries and covers a period of twenty years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military and economic cooperation via a structured-focused comparison and by applying a comparative-historical analysis, the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing.
