A Guide to Kernel Exploitation Enrico Perla,Massimiliano

Oldani.2010-10-28 A Guide to Kernel Exploitation: Attacking the Core discusses the theoretical techniques and approaches needed to develop reliable and effective kernel-level exploits, and applies them to different operating systems, namely, UNIX derivatives, Mac OS X, and Windows. Concepts and tactics are presented categorically so that even when a specifically detailed vulnerability has been patched, the foundational information provided will help hackers in writing a newer, better attack; or help pen testers, auditors, and the like develop a more concrete design and defensive structure. The book is organized into four parts. Part I introduces the kernel and sets out the theoretical basis on which to build the rest of the book. Part II focuses on different operating systems and describes exploits for them that target various bug classes. Part III on remote kernel exploitation analyzes the effects of the remote scenario and presents new techniques to target remote issues. It includes a step-by-step analysis of the development of a reliable, one-shot, remote exploit for a real vulnerabilitya bug affecting the SCTP subsystem found in the Linux kernel. Finally, Part IV wraps up the analysis on kernel exploitation and looks at what the future may hold. Covers a range of operating system families — UNIX derivatives, Mac OS X, Windows Details common scenarios such as generic memory corruption (stack overflow, heap overflow, etc.) issues, logical bugs and race conditions Delivers the reader from user-land exploitation to the world of kernel-land (OS) exploits/attacks, with

a particular focus on the steps that lead to the creation of successful techniques, in order to give to the reader something more than just a set of tricks

Architecture & Sustainable Development (vol.1) Magali

Bodart,Arnaud Evrard.2011-07 This book of Proceedings presents the latest thinking and research in the rapidly evolving world of architecture and sustainable development through 255 selected papers by authors coming from over 60 countries.

Architectural Tourism Jan Specht.2014-05-19 Since the early times of travelling architecture does constitute an important force of attraction and a vital element in marketing. Until today destinations try to increase their market positions by means of the development and restoration of the built environment.

However, architecture is characterised by an enduring presence with impacts on visitors and residents alike. Hence, on a sustainable basis it needs to chime with place and situation.

Where modesty might be suitable for one destination, spectacular architecture could be a transformation catalyst or unique selling proposition for another. Destination developers have to be aware of the local requirements as well as the reciprocal relationship between the modern practice of tourism and the built environment. To address the complexity of architectural tourism, throughout the book this topic is subject of a controversial discussion and approached with a contextual and interdisciplinary view.

Introduction to Cameroon Gilad James, PhD. Cameroon is a country in central Africa that is bordered by Nigeria to the west, Chad to the northeast, the Central African Republic to the east, Equatorial Guinea to the south, and Gabon to the southwest. It has a diverse geography, including coastal plains, rainforests, savannas, and the volcanic peaks of Mount Cameroon in the west. Cameroon is home to over 250 different ethnic groups, each with its own language and cultural traditions. French and English are both official languages in the country, reflecting its colonial history as a protectorate of Germany, then a League of Nations mandate administered by France and Britain before it gained independence in 1960. Cameroon is one of the most developed countries in the region, with a relatively stable political system and a growing economy based on natural resources such as oil, cocoa, and timber. However, it faces many social and economic challenges, including high levels of poverty, inequality, and corruption. Despite this, Cameroon has a vibrant arts and music scene, and has produced famous cultural figures such as author Mongo Beti and musician Manu Dibango. Its national football team, known as the Indomitable Lions, has also achieved international success, winning the Africa Cup of Nations five times.

Guide To Contemporary New York City Architecture John Hill. 2011-12-13 The essential walking companion to more than two hundred cutting-edge buildings constructed since the new millennium. The first decade of the 21st century has been a time of lively architectural production in New York City. A veritable building boom gripped the city, giving rise to a host of new—and architecturally cutting-edge—residential, corporate, institutional, academic, and commercial structures. With the boom now waning, this guidebook is perfectly timed to take stock of the city’s new skyline and map them all out, literally. This essential walking companion and guide features 200 of the most notable buildings and spaces constructed in New York’s five boroughs since the new millennium—The High Line, by James Corner Field Operations/Diller Scofidio + Renfro; 100 Eleventh Avenue, by Ateliers Jean Nouvel; Brooklyn Children’s Museum, by Rafael Vinoly Architects; 41 Cooper Square, by Morphosis; Poe Park Visitors Center, by Toshiko Mori Architect; and One Bryant Park, by Cook + Fox, to name just a few. Projects are grouped by neighborhood, allowing for easy, self-guided tours, with photos, maps, directions, and descriptions that highlight the most important aspects of each entry.

Google SketchUp for Site Design Daniel Tal.2010-05-11

Google SketchUp for Site Design illustrates a holistic approach to SketchUp: how it works and more importantly, what to do with it. Filled with tutorials from front to back, the book focuses on the start and completion of projects that include rich detail and expression. Each part and chapter of the book builds on the previous chapters and tutorial. You will learn how to approach modeling site plans, buildings and site elements: from modeling each of these exterior environment elements to piecing them together to generate a singular and expressive model. The book culminates with tutorials demonstrating effective and simple ways to include grades and terrain using the Sandbox tools and how best to integrate the entire approach with AutoCAD and SketchUp. Also included are links to supplemental on-line resources such as YouTube tutorials and free tutorial and example models from 3D Warehouse. The book is useful for all SketchUp proficiency levels including beginners, hobbyists, and professionals.

ISCONTOUR 2014 - Tourism Research Perspectives Roman Egger,Christian Maurer.2014-04-11 Proceedings of the ISCONTOUR The aim of the International Student Conference in Tourism Research (ISCONTOUR) is thus to offer students a unique platform to present their research and to establish a mutual knowledge transfer forum for attendees from academia, industry, government and other organisations. The annual conference, wick is jointly organised by the IMC University of Applied Sciences Krems and the Salzburg University of Applied Sciences, will take place alternatively at the locations Salzburg and Krems. The conference research chairs are Prof. (FH) Dr. Roman Egger (Salzburg University of Applied Sciences) and Prof. (FH) Mag. Christian Maurer (University of Applied Sciences Krems). The target audience include international students (also PhDs), graduates, teachers and lecturers from the field of tourism and leisure management as well as companies and anyone

interested in the conference topic areas. Issues to be covered at the conference include the following areas within a tourism context: Marketing & Management Tourism Product Development & Sustainability Information and Communication Technologies Urban Transformations through Exceptional Architecture Nadia Alaily-Mattar, Alain Thierstein. 2021-05-30 Urban Transformations through Exceptional Architecture focusses on the nexus between architecturally exceptional projects and the city. It addresses the following questions: How can the complexity of these projects be comprehended? What roles do the political contexts play in the commissioning of such projects and what audiences do these projects serve? How has the granting of professional recognition for architects changed and what will this change mean to measures of exceptionality in architectural design? What roles do the architectural competitions play in the process of commissioning the design of architecturally exceptional projects, and do design competitions as an urban planning tool grant high value designs? Architecturally exceptional projects are situated in physical urban fabrics. How can this situatedness be analysed and what different values does the urban design dimension of these projects add? By considering diverse aspects of architecturally exceptional projects, the chapters in this book utilise a variety of research methods. They bring into dialogue a range of themes regarding the architectural, urban design and political aspects of these projects. This volume illustrates that multidisciplinary might well be the best strategy to balance the risks of over simplification and the challenges of complexity in analysing these exceptional projects and the city in its ever-transformative process. The chapters in this book were originally published as a special issue of the Journal of Urban Design.

About Star Architecture Nadia Alaily-Mattar, Davide Ponzini, Alain Thierstein. 2020-03-16 Cities across the world have been resorting to star architects to brand their projects, spark urban regeneration and market the city image internationally.

This book shifts the attention from star architects to star architecture, arguing that the process of deciding about and implementing relevant architectural and urban projects is not the product of any single actor. Star architecture can, in fact, be better studied and understood as assembled by multiple actors and in its relationship with urban transformation. In its 18 chapters, the book presents a multidisciplinary collection of expert contributions in the fields of urban planning, architecture, media studies, urban economics, geography, and sociology, consistently brought together for the first time to deal with this topic. Through a vast array of case studies and analytical techniques touching over 20 cities in Europe, the book shows the positive and more problematic impacts of star architecture with reference to the preservation of built heritage, tourism and media. The book will be of interest to architects, sociologists, urban planners, and public administrators.

A Guide to RISC Microprocessors Florence Slater.1992-06-03 A Guide to RISC Microprocessors provides a comprehensive coverage of every major RISC microprocessor family.

Independent reviewers with extensive technical backgrounds offer a critical perspective in exploring the strengths and weaknesses of all the different microprocessors on the market. This book is organized into seven sections and comprised of 35 chapters. The discussion begins with an overview of RISC architecture intended to help readers understand the technical details and the significance of the new chips, along with instruction set design and design issues for next-generation processors. The chapters that follow focus on the SPARC architecture, SPARC chips developed by Cypress Semiconductor in collaboration with Sun, and Cypress's introduction of redesigned cache and memory management support chips for the SPARC processor. Other chapters focus on Bipolar Integrated Technology's ECL SPARC implementation, embedded SPARC processors by LSI Logic and Fujitsu, the MIPS processor, Motorola 88000 RISC chip set, Intel 860 and 960

microprocessors, and AMD 29000 RISC microprocessor family. This book is a valuable resource for consumers interested in RISC microprocessors.
