Think! Different Andreas Boskugel.2015-03-25 *Think! Different* is a different kind of self-help book: the author, Andreas Boskugel, is well-known in Europe and appreciated for his clear and direct manner. Boskugel has taken the law of attraction to its systematic and logical conclusion! This book is completely free of otherwise typical references to moral or religious standards because the law of attraction - like all natural laws - isn't based on morality or religion. Consequently the author has a very different take than do others on success; for example, he doesn't idolize hard work, honesty and gratitude ad absurdum, for these are only religious and cultural based opinions and actually contradict the law of attraction. The author also forgoes otherwise typical teachings about what is right or wrong; after all, what is right is individually defined. Feigned pity or morality sermons are also not included in this work. This work is for those who love the integrity of the law of attraction and prefer clarity over political correctness. And it's for those who really want to get somewhere in life and who therefore question existing opinions. It's for people who are able to think on their own instead of going with the flow. For many, it was not until reading this book that they finally understood the law of attraction, for the topics in this book are more logically organized than in other popular works, and insights are offered that can dramatically improve the lives of readers. Completely new insights about the existing laws of life can help readers become invincible masters of their own destiny. Keywords: Law of Attraction, Self-Help, Success, Wealth, Dream, Wish Fulfillment, Love, Relationship, Money

A Far Glory Peter L. Berger.1993 Berger, an eminent religious sociologist and Protestant believer, attempts to square his own rational side with his religious impulses, bringing a lifetime of professional and personal reflection to bear on the nature of faith, its modern pluralistic context, and its social and individual consequences. A timely guide to the problems of faith for believers and skeptics alike.

America's Forgotten Pandemic Alfred W. Crosby.2003-07-21 Between August 1918 and March 1919 the Spanish influenza spread worldwide, claiming over 25 million lives - more people than perished in the fighting of the First World War. It proved fatal to at least a half-million Americans. Yet, the Spanish flu pandemic is largely forgotten today. In this vivid narrative, Alfred W. Crosby recounts the course of the pandemic during the panic-stricken months of 1918 and 1919, measures its impact on American society, and probes the curious loss of national memory of this cataclysmic event. This 2003 edition includes a preface discussing the then recent outbreaks of diseases, including the Asian flu and the SARS epidemic.

God Untamed Johannes Hartl.2019 Challenge to get out of our spiritual comfort zones to reach a disengaged generation Powerful. Almighty. Sovereign. Magnificent. Fearsome. This is the God we encounter in the Bible and in prayer--a God who astounds. Yet, Johannes Hartl argues that this is an astonishment that many have lost in the West today. A challenging rejection of 'feel-good' Christianity, *God Untamed* explores the deep crisis of faith that effects the Western world. At a time where the need for spirituality is great, yet churches are losing more and more members; in the face of a generation with so many opportunities and so little direct threat, yet who are so anxious, depressed and disenchant--Hartl speaks of the voice that can still oceans. God, as he encounters us, is not simply 'nice' and certainly not trivial or comfortable. He is fascinating and intimidating at the same time. Hartl calls us to rediscover this sense of wonder and reimagine what it is to have a fear of God--not founded in a whimper at the unknown, but a respect borne out of watching his visible power in the nature of our world. Without this fear, Hartl warns that the church is in danger of weakening under the immense pressures of our times. *God Untamed* is a compelling charge to get out of our spiritual comfort zones to find a real, truly fulfilled and fulfilling faith.

Demenz und Demografischer Wandel - Herausforderungen für den Gesundheitssektor Valerie Grimm.2014-02 In nahezu allen Industrienationen zeichnet sich eine zentrale demographische Entwicklung ab, die zunehmende Alterung der Gesellschaft. Zwar ist es durch den medizinischen Fortschritt und vielfältige Präventionsmaßnahmen durchaus möglich, ein hohes Alter bei guter Gesundheit zu erreichen, jedoch stellt ein solcher Verlauf bei Weitem keine Selbstverständlichkeit dar. Allein in der Bundesrepublik erhalten gegenwärtig über zwei Millionen Menschen Leistungen aus der Pflegeversicherung. Prognosen gehen davon aus, dass bis 2030 mehr als drei Millionen Menschen aus den unterschiedlichsten Gründen pflegebedürftig sein werden - viele von ihnen werden voraussichtlich an einer Form von Demenz leiden. Demenz gilt mittlerweile als die häufigste und folgenreichste psychische Erkrankung im Alter, sie bringt tiefgreifende Veränderungen für die Betroffenen selbst und für deren Familien mit sich.

Music, Gender, Education Lucy Green.1997-03-28 This book focuses on the role of education in relation to music and gender. Invoking a concept of musical patriarchy and a theory of the social construction musical meanings, Lucy Green shows how women's musical practices and gendered musical meanings have been reproduced, hand in hand, through history. Covering a wide range of music, including classical, jazz and popular styles, Dr Green uses ethnographic methods to convey the everyday interactions and experiences of girls, boys, and their teachers. She views the contemporary school music classroom as a microcosm of the wider society, and reveals the participation of music education in the continued production and reproduction of gendered musical practices and meanings.

Intercultural Communication James W. Neuliep.2016-12-27 In the fully updated Seventh Edition of *Intercultural Communication: A Contextual Approach*, bestselling author James W. Neuliep provides a clear contextual model (visually depicted by a series of concentric circles) for examining communication within cultural, microcultural, environmental, sociorelational, and perceptual contexts. Students are first introduced to the broadest context—the cultural component of the model—and progress chapter by chapter through the model to the most specific dimensions of communication. Each chapter focuses on one context and explores the combination of factors within

that context, including setting, situation, and circumstances. Highlighting values, ethnicity, physical geography, and attitudes, the book examines means of interaction, including body language, eye contact, and exchange of words, as well as the stages of relationships, cross-cultural management, intercultural conflict, and culture shock.

Experiments in Ethics Kwame Anthony Appiah.2010-03-30 In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of experimental philosophy, provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Eine Einführung in Intuitives Stillen Suzanne Colson.2013-01-01 Die Mehrheit des Gesundheitspersonals glaubt, dass Mütter im Stillen unterwiesen werden müssen. Dieses Buch liefert neue wissenschaftliche Belege, die zeigen, dass das Wissen, wie gestillt wird, Müttern und Babys angeboren ist, und stellt ein neues Konzept vor: das Intuitive Stillen. Intuitives Stillen ist ein Sammelbegriff für optimale Verhaltenszustände und Positionen zum Stillen, deren Aufeinandereinfließen spontane Verhaltensmuster bei Müttern und Babys auslöst, die ihnen helfen, mit dem Stillen zu beginnen. Intuitives Stillen ist schnell und einfach umzusetzen. Die meisten Mütter und Babys nehmen selbstständig die richtige Position ein, wenn dies ohne fremdes Eingreifen von außen zugelassen wird. Die Aufgabe des Gesundheitspersonals besteht darin, die auslösenden Mechanismen zu verstehen und so zu lernen, wie sie Müttern und Babys helfen können, das zu machen, was diese intuitiv tun wollen. Dieses Buch stärkt das Vertrauen in die biologische Basis des Stillens und die angeborene Stillfähigkeit der Mütter. Dr. Suzanne Colson ist eine meiner Heldinnen, weil ihre aufmerksame und sorgfältige Forschung und die Schlussfolgerungen, die sie

daraus gezogen hat, endlich gesunden Menschenverstand in die Diskussion u"ber das Stillen gebracht hat. Library Design for the 21st Century Diane Koen,Traci Engel Lesneski.2018-12-03 Library design in the 21st century has one common theme: collaboration is at the heart of innovation. Designing modern libraries is a complex process involving many stakeholders and participants. Libraries of all types work with an almost limitless range of constituent groups for input, buy-in and successful implementation. Securing support for new library buildings and renovations of libraries engages many people: library clients, community members, faculty, funding agencies, donors, governing authorities, librarians, architects, interior designers and planners. Telling the right story and getting to the end game demand carefully crafted approaches, wide-ranging skills, a unified vision and productive teamwork. The IFLA Library Buildings and Equipment Section has selected the best papers presented by award-winning architects and international thought leaders from the academic and public library sector at our recent satellite conferences and seminars: Collaborative Strategies for Successful Library Design (Chicago, Illinois), What comes after the Third Place? (Columbus, Ohio); Key Issues for Library Space: International Perspectives (Maynooth, Ireland); Storage, the final frontier (Munich, Germany) and Telling and selling the space story (Wroclaw, Poland). The stories by the library and design professionals within this publication illustrate how powerful a role partnerships, outreach and cooperation play in a library project's success.

Rediscovering Apprenticeship Felix Rauner, Erica Smith.2010-03-10 The rediscovery of the value of apprenticeships has been one of the most significant trends in vocational education in recent years, and has prompted an array of research and development projects in countries around the world. In this volume, the renewed interest in the apprenticeship tradition and the various steps towards the implementation of innovative apprenticeship programmes are analysed and discussed from different perspectives. Beginning with a number of chapters that describe recent developments in apprenticeship training in different national contexts, the book moves on to analyze the way in which both the quality and profitability of apprenticeship act in concert as the most influential drivers of innovation in this field. In sum, this book makes an important contribution to the international literature on apprenticeship. It draws together some of the leading researchers in the area, and with its overview of a number of national Vocational Education and Training (VET) projects, provides a body of knowledge on current practices and issues that has previously been lacking in this complex interdisciplinary field. The lessons learned from countries' experiences, as presented in this book, provide a valuable platform for policy-makers and scholars alike.

Preparing for Life in a Digital Age Julian Fraillon,John Ainley,Wolfram Schulz (onderwijs.),Tim Friedman,Eveline Gebhardt.2014 Report of the International Computer and Information Literacy Study (ICILS), that studied the extent to which young people have developed computer and information literacy (CIL) to support their capacity to participate in the digital age. The study focused on: variations in CIL within and across countries; aspects of schools, education systems and teaching associated with student achievement in CIL; the extent to which students' access to, familiarity with, and self-reported proficiency in using computers is associated with student achievement in CIL; and aspects of students' personal and social backgrounds associated with CIL. The Palgrave Handbook of Bottom-Up Urbanism Mahyar Arefi, Conrad Kickert.2018-06-27 Who shapes our cities? In an age of increasing urban pluralism, globalization and immigration, decreasing public budgets, and an ongoing crisis of authority among designers and planners, the urban environment is shaped by a number of non-traditional stakeholders. The book surveys the kaleidoscope of views on the agency of urbanism, providing an overview of the various scholarly debates and territories that pertain to bottom-up efforts such as everyday urbanism, DIY urbanism, guerilla urbanism, tactical urbanism, and lean urbanism. Uniquely, this book seeks connections between the various movements by curating a range of views on the past, present, and future of bottom-up urbanism. The contributors also connect the recent trend of bottom-up efforts in the West with urban informality in the Global South, drawing parallels and finding contrast between social and institutional structures across the globe. The book appeals to urbanists in the widest sense of the word: those who shape, study, and improve our urban spaces.

The Impact of Digitalization in the Workplace Christian Harteis.2018-08-22 This edited volume brings together researchers from various disciplines (i.e. education, psychology, sociology, economy, information technology, engineering) discussing elementary changes at workplaces occurring through digitalization, and reflecting on educational challenges for individuals, organizations, and society. The latest developments in information and communication technology seem to open new potential, and the crucial question arises which kind of work can be replaced by technology? The contributors to this volume are scholars who have been conducting research on the influence of technological change on work and individuals for a long time. The book addresses researchers as well as practitioners in the field of adult education and human resource development.

Facial-Oral Tract Therapy (F.O.T.T.) Ricki Nusser-Müller-Busch, Karin Gamp

Lehmann.2020-11-07 The book offers a comprehensive approach to the assessment and treatment of disturbances in facial expression, oral movement, swallowing, breathing, voice and speech production caused by developmental and acquired neurological conditions. The principles outlined are used in patients with different etiologies (e.g. stroke, tumors, traumas). F.O.T. T., developed by Kay Coombes, is a hands-on approach based on an understanding of neurological functions and the way we learn from experience. The approach aims to give the patient experience of physiological posture and movement using facial-oral functions in normal activities of daily living (ADL). Rather than mere "exercises", F.O.T.T involves meaningful activities aiming to promote participation, according to ICF criteria. Four main areas are covered: nutrition, oral hygiene, nonverbal communication and speech. Each chapter summarises the problems of severely ill patients and shows the clinical reasoning behind the solutions offered. Separate chapters discuss tracheostomy management and the training of the carers involved, including relatives. The chapter authors are experienced specialists (physio-, occupational- and speech-language therapists and physicians), whose contributions aim to provide interdisciplinary perspectives and translate latest research into clinical practice.

the history and physiological basis of aromatherapy, tells how to extract and store the oils, and gives detailed information on 27 of the most important essential oils, including their dosages and beneficial effects.--Library Journal.

Ethics in Nursing Practice Sara T. Fry.2002 The International Council of Nurses is an internationally recognised body that considers nursing issues in detail before putting forward best practice. .This publication from the ICN draws upon everyday ethical dilemmas in nursing practice and responds to the realities of nursing and health care in a changing society. It includes the ICN's reviewed Guidelines for Nursing Research and promotes international standards for individual nurses, regulatory bodies and National Boards. This new edition provides the background theory necessary to understand ethical decision making, focusing on the individual nurse's responsibilities - promoting health, preventing illness, restoring health and alleviating suffering - and looking at the wider issues in relation to patients, colleagues and society as a whole.

Storying Later Life Gary Kenyon,Ernst Bohlmeijer,William L. Randall.2010-12-20 In its brief but vigorous history, gerontology has spawned a broadening range of specializations. One of the newest of such specializations is narrative gerontology, so named for its emphasis on the biographical, or inside, dimensions of the experience of aging. Telling stories about our world, our relationships, and ourselves is fundamental to how we make meaning. Everything from our history to our religion and our memories to our emotions is linked to the tales we tell ourselves, and others, about where we have come from and where we are going. They are central to who we are. The biographical side of human life is every bit as critical to fathom as the biological side, if we seek a more balanced, positive, and optimistic perspective on what aging is about; if we would honor the dignity and complexity, the humanity and uniqueness of the lives of older persons, no matter what their health or economic standing. In this respect, a narrative approach is particularly suited to the exploration of such topics as meaning, spirituality, and wisdom, and the connections they share. This volume reflects a selection of new directions and insights, and constitutes a general broadening and deepening of narrative gerontology, exploring its implications for theory and research in the field of aging, and for the quality of life of older adults themselves. Such deepening indicates a greater refinement of thought, method, and intervention. The evolution of narrative gerontology is also evidenced by a significant increase in the number of faculty and graduate students engaged in research in this area, as well as by increasing collaboration among researchers, practitioners, and administrators in applying narrative insights to contexts such as long term care - indeed, healthcare in general. These initiatives have given rise to the phrase, narrative care as core care.

Caring Democracy Joan C. Tronto.2013-04-12 Americans now face a caring deficit: there are simply too many demands on people's time for us to care adequately for our children, elderly people, and ourselves.At the same time, political involvement in the United States is at an all-time low, and although political life should help us to care better, people see caring as unsupported by public life and deem the concerns of politics as remote from their lives. Caring Democracy argues that we need to rethink American democracy, as well as our fundamental values and commitments, from a caring perspective. The idea that production and economic life are the most important political and human concerns ignores the reality that caring, for ourselves and others, should be the highest value that shapes how we view the economy, politics, and institutions such as schools and the family. Care is at the center of our human lives, but Tronto argues it is currently too far removed from the concerns of

politics. Caring Democracy traces the reasons for this disconnection and argues for the need to make care, not economics, the central concern of democratic political life. Joan C. Tronto is a Professor in the Political Science Department at the University of Minnesota. She is the author of *Moral Boundaries: A Political Argument for an Ethic of Care* (Routledge).

EBOOK: Partnerships In Family Care Mike Nolan,Ulla Lundh,John Keady,Gordon Grant.2003-08-16 * What are the key features of partnerships between family and professional carers? * How do partnerships change over time? * What is needed to help create the best working partnerships? Forging partnerships between service users, family carers and service providers is a key theme in both the policy and academic literatures. However, what such partnerships mean and how they can be created and sustained while responding to change over time, is far from clear. This book considers how family and professional carers can work together more effectively in order to provide the highest quality of care to people who need support in order to remain in their own homes. It adopts a temporal perspective looking at key transitions in caregiving and suggests the most appropriate types of help at particular points in time. It draws on both empirical and theoretical sources emerging from several countries and relating to a number of differing caregiving contexts in order to illustrate the essential elements of 'relationship-centred' care. *Partnerships in Family Care* will be important reading for all health care students and professionals with an interest in community and home care for the ill, disabled, and elderly.

I'm Dancing as Fast as I Can Barbara Gordon.2011-10-01 Barbara Gordon's groundbreaking memoir tells the extraordinary story of a woman who has it all, or thinks she does-a career as an Emmy-award-winning documentary producer, a man she loves, a world of friends, and a beautiful apartment in Manhattan.But beneath the façade, Barbara's life is spinning out of control. In spite of the pills prescribed by her doctor, a nameless terror disrupting her daily life intensifies until she is besieged by crippling anxiety attacks. A formerly strong, independent, successful woman, Barbara's life becomes a nightmare of paralysis and fear.When Barbara finds herself unable to leave her apartment or walk the streets of New York alone, she decides to take charge of her life. She doesn't want pills, she wants answers. Instead of ending her fears, quitting the medicine leads to the unraveling of what she thought was her perfect life, and Barbara becomes a casualty of a flawed and inept mental health system. Barbara had often spoken for the voiceless in her films, but she suddenly finds herself powerless, without a voice of her own. Though she feels frightened and misunderstood, the tenderness and love of another young patient, Jim, helps Barbara rediscover her voice and her identity.In the years since her memoir was first published, thousands of readers all over the world have read her book, followed her descent into hell, traveled with her along the bumpy road to recovery, and celebrated as she creates a new life. *I'm Dancing As Fast As I Can* is a strikingly honest look at a life gone off the rails. Throughout her journey, Gordon's hope and strength make her an incredible heroine worth rooting for.

Utopistics, Or, Historical Choices of the Twenty-first Century Immanuel Maurice Wallerstein.1998 The founder of world-systems analysis explores what we can expect in the twenty-first century. The twentieth century has witnessed both the triumphs and failures of the dreams that have informed the modern world. In *Utopistics*, Immanuel Wallerstein argues that the global order that nourished those dreams is on the brink of disintegration. Pointing to the globalization of commerce, the changing nature of work and the family, the failures of traditional liberal ideology, and the danger of profound environmental crises, the founder of world-systems analysis argues that the nation-state system no longer works. The next twenty-five to fifty years will see the final breakdown of that system, and a time of great conflicts and disorder. It will also be a period in which individual and collective action will have a greater impact on the future than has been possible for 500 years. *Utopistics* distills Wallerstein's hugely influential work on the modern world-system in an accessible way. This fascinating and provocative look into our collective political destiny poses urgent questions for anyone concerned with social change in the next millennium.
