Tonalization Dr. Shinichi Suzuki. Dr. Suzuki questioned why all vocalists vocalize every day to improve their voices, but instrumentalists do not do so every day with their instruments. He believes that on any instrument, one needs to practice to make a more beautiful tone. First he talks about playing a beautiful resonant tone with the bow while plucking the string with a finger. When a pizzicato is played, the resonance goes on for a long time. Students should listen to that resonance and play the same kind of clear beautiful sound. He talks about how to make a difference in the tone by using a different bow speed, how to practice to find the resonance point, how to change the weight of the arm on the bow to produce a different kind of tone, and how to change tone color. This book includes all of Dr. Suzuki's basic ideas about tone.

of tutors is designed for teaching mixed string instruments in groups. It is a systematic program developed over many years. The tutors are aimed at the upper primary / lower secondary school age group, but are also suitable for older beginners. The children learn 'tricks' for their fingers or bows, which are fun when done in a group. Reading skills are developed at the same time. Each page represents a small step in musical and technical development based on reading music from the very first lessons. Theory homework is included at the end of most sections. Book 3 provides material for two years of tuition, although progress will vary according to the age of the children, the size of the group and the extent of their previous musical experience. Additional repertoire at the end of the books provides: extension work for pupils who reach the end of the book before the rest of their group; additional work for those who want it; and end of year concert pieces. Most importantly, these tutors make playing music fun, as it should be!
