Nietzsche's Pragmatism Pietro Gori.2019-04-01 During his late period, Nietzsche is particularly concerned with the value that mankind attributes to truth. In dealing with that topic, Nietzsche is not primarily interested in the metaphysical disputes on truth, but rather in the effects that the will to truth has on the human being. In fact, he argues that the faith in a value as such of truth influenced Western culture and started the anthropological degeneration of the human type that characterizes European morality. To call into question the value of truth is therefore necessary, if one wants to help mankind to find her way in the labyrinth of nihilism. In this new addition to Nietzsche scholarship, Gori explores the origin and aim of the philosopher's late perspectival thought by merging the theoretical with the historical approach, with a special focus on the epistemological debate that influenced Nietzsche. As a result, the book provides a contextual reading of the issue that supports the idea that Nietzsche's attitude in addressing the problem of truth is, in a broad sense, pragmatic.

Sexistence Jean-Luc Nancy.2021-05-04 Sex, more than just a part of our experience, troubles our conceptions of existence. Drawing on a fascinating array of sources, ancient and modern, philosophical and literary, Jean-Luc Nancy explores and upholds the form-giving thrust of the drive. Nancy reminds us that we are more comfortable with the drama of prohibitions, ideals, repression,

transgression, and destruction, which often hamper thinking about sex and gender, than with the affirmation of an ordinary trouble at the limits of language that divides being and opens the world. Sexistence develops a new philosophical account of sexuality that resonates with contemporary research on gender and biopolitics. Without attempting to be comprehensive, the book ranges from the ancient world through psychoanalysis to discover the turbulence of the drive at the heart of existence.

Temples of The African Gods Michael Tellinger.2021-04-06 South Africa and Zimbabwe are home to the largest cluster of ancient stone ruins found to date on Earth. Adam's Calendar is at the centre of it all - the oldest functioning megalithic Sun Calendar found to date. Since 2007, more than 5 million circular stone structures have been identified by Michael Tellinger and a small group of independent researchers. These structures are not stand-alone stone circles - they are all connected to each other by channels of stone, and held in a large mesh of agricultural terraces that cover entire mountains and resembles a never-ending spider's web. The great mystery is that the original stone structures have no doors or entrances - indicating that they were not originally constructed as dwellings for people or animals. Additional research and the discovery of mysterious tools and artefacts, indicate that the builders had an advanced knowledge of Cymatics - study of sound - and knew how to use sound as a tool. Together with many ancient gold mines, all this activity has been dated with various

scientific techniques to well over 100,000 years - and provides much support for the presence of the Sumerian Anunnaki on Earth - mining gold in Southern Africa. A place often referred to as the ABZU. Scholars have told us that the first civilization on Earth emerged in a land called Sumer some 6000 years ago. These archaeological findings in southern Africa suggest that the Sumerians inherited much of their knowledge from an earlier civilization that emerged many thousands of years before them in southern Africa, the cradle of humankind.

Kant in Imperial Russia Thomas Nemeth.2017-02-15 This book presents a comprehensive study of the influence of Immanuel Kant's Critical Philosophy in the Russian Empire, spanning the period from the late 19th century to the Bolshevik Revolution. It systematically details the reception bestowed on Kant's ideas during his lifetime and up to and through the era of the First World War. The book traces the tensions arising in the early 19th century between the imported German scholars, who were often bristling with the latest philosophical developments in their homeland, and the more conservative Russian professors and administrators. The book goes on to examine the frequently neglected criticism of Kant in the theological institutions throughout the Russian Empire as well as the last remaining, though virtually unknown, embers of Kantianism during the reign of Nicholas I. With the political activities of many young radicals during the subsequent decades having been amply studied, this book focuses on their largely ignored attempts to grapple with Kant's transcendental idealism. It also presents a complete account of the resurgence of interest in Kant in

the last two decades of that century, and the growing attempts to graft a transcendental idealism onto popular social and political movements. The book draws attention to the young and budding Russian neo-Kantian movement that mirrored developments in Germany before being overtaken by political events.

On the Sea Battle Tomorrow that May Not Happen Tomasz Jarmużek.2018 The book examines the Master Argument (MA) of Diodorus Cronus in the context of the Sea-Battle Tomorrow of Aristotle. The author investigates problems of sentences about the future, time and determinism. He shows that certain reconstructions of the MA do not assume a linear time structure. Thus, the MA is not an argument in favour of determinism.

Plato's Conception of Justice and the Question of Human Dignity Marek Piechowiak.2019 In this first comprehensive study of Plato's conception of justice, apprehension of human dignity plays a crucial role for understanding an individual in relation to law and state. Plato's philosophy turns out to provide foundations for modern-day human rights protection rather than for totalitarian approaches.

Migration, Migration History, History Jan Lucassen,Leo Lucassen.2005 During the last decade studies have indicated that migration has been a normal, structural element of human societies throughout history. Progress in migration and settlement studies under this new paradigm has been so substantial that a new state of the art is needed. This book presents a reconsideration of current theoretical perspectives encompassing enlightened insights in diverging specialisms in the field of migration history, such as slavery studies, ethnic history, macro-economic migration studies, and gypsy studies. The seventeen essays in this volume, written by leading scholars in the field,

collectively represent a pioneering effort in migration and settlement studies. They address the problems of ongoing specialization (and hence the need for synthesis) and the difficulties of integrating the consequences of this new paradigm into general histories.

The Cygnus Key Andrew Collins.2018-05-15 New evidence showing that the earliest origins of human culture, religion, and technology derive from the lost world of the Denisovans • Explains how Göbekli Tepe and the Giza pyramids are aligned with the constellation of Cygnus and show evidence of enhanced sound-acoustic technology • Traces the origins of Göbekli Tepe and the Giza pyramids to the Denisovans, a previously unknown human population remembered in myth as a race of giants • Shows how the ancient belief in Cygnus as the origin point for the human soul is as much as 45,000 years old and originally came from southern Siberia Built at the end of the last ice age around 9600 BCE, Göbekli Tepe in southeast Turkey was designed to align with the constellation of the celestial swan, Cygnus--a fact confirmed by the discovery at the site of a tiny bone plaque carved with the three key stars of Cygnus. Remarkably, the three main pyramids at Giza in Egypt, including the Great Pyramid, align with the same three stars. But where did this ancient veneration of Cygnus come from? Showing that Cygnus was once seen as a portal to the sky-world, Andrew Collins reveals how, at both sites, the attention toward this star group is linked with sound acoustics and the use of musical intervals “discovered” thousands of years later by the Greek mathematician Pythagoras. Collins traces these ideas as well as early advances in human technology and cosmology back to the Altai-Baikal region of Russian Siberia, where the cult of the swan flourished as much as 20,000 years ago. He shows how these concepts, including a complex numeric system based on long-term eclipse cycles, are derived from an extinct human population known as the Denisovans. Not only were they

of exceptional size--the ancient giants of myth--but archaeological discoveries show that this previously unrecognized human population achieved an advanced level of culture, including the use of high-speed drilling techniques and the creation of musical instruments. The author explains how the stars of Cygnus coincided with the turning point of the heavens at the moment the Denisovan legacy was handed to the first human societies in southern Siberia 45,000 years ago, catalyzing beliefs in swan ancestry and an understanding of Cygnus as the source of cosmic creation. It also led to powerful ideas involving the Milky Way's Dark Rift, viewed as the Path of Souls and the sky-road shamans travel to reach the sky-world. He explores how their sound technology and ancient cosmologies were carried into the West, flowering first at Göbekli Tepe and then later in Egypt's Nile Valley. Collins shows how the ancient belief in Cygnus as the source of creation can also be found in many other cultures around the world, further confirming the role played by the Denisovan legacy in the genesis of human civilization.

The Secret History of Hermes Trismegistus Florian Ebeling.2011-09-01 Perhaps Hermeticism has fascinated so many people precisely because it has made it possible to produce many analogies and relationships to various traditions: to Platonism in its many varieties, to Stoicism, to Gnostic ideas, and even to certain Aristotelian doctrines. The Gnostic, the esoteric, the Platonist, or the deist has each been able to find something familiar in the writings. One just had to have a penchant for remote antiquity, for the idea of a Golden Age, in order for Hermeticism, with its aura of an ancient Egyptian revelation, to have enjoyed such outstanding success.—from the Introduction Hermes Trismegistus, thrice-great Hermes, emerged from the amalgamation of the wisdom gods Hermes and

Thoth and is one of the most enigmatic figures of intellectual history. Since antiquity, the legendary wise Egyptian has been considered the creator of several mystical and magical writings on such topics as alchemy, astrology, medicine, and the transcendence of God. Philosophers of the Renaissance celebrated Hermes Trismegistus as the founder of philosophy, Freemasons called him their forefather, and Enlightenment thinkers championed religious tolerance in his name. To this day, Hermes Trismegistus is one of the central figures of the occult—his name is synonymous with the esoteric. In this scholarly yet accessible introduction to the history of Hermeticism and its mythical founder, Florian Ebeling provides a concise overview of the Corpus Hermeticum and other writings attributed to Hermes. He traces the impact of Christian and Muslim versions of the figure in medieval Europe, the power of Hermeticism and Paracelsian belief in Renaissance thought, the relationship to Pietism and to Freemasonry in early modern Europe, and the relationship to esotericism and semiotics in the modern world.

Past Lives, Present Miracles Denise Linn.2008-03-01 Miracles can occur in your life, easily and effortlessly. It's simply a matter of remembering who you are—and to do this it's necessary to clear the blockages that stand between you and your soul. Almost all of these obstacles have their roots in your distant past, so it's valuable to travel back in time to release them. However, most of us are so caught up in limiting beliefs about who we are that it's almost impossible to take that journey. In this book, you'll learn how to travel back to your previous incarnations to release buried obstructions so you can create the miracles in your life that you deserve! It's safe, easy, and fun . . . and anyone can do it! You'll learn how to discover your past lives without ever doing a regression, remove limitations regarding your relationships, abundance, and health that came from your past lives, uncover the symptoms of past-life traumas and how to clear them, even if you don't believe in reincarnation,

understand the roles that loved ones played in your previous incarnations, find your personal guides, spirit guardians, and angels and receive their help . . .and much, much more!

History of the French Protestant Refugees, from the Revocation of the Edict of Nantes to Our Own Days Charles Weiss.1854

New Essays on the Political Thought of the Huguenots of the Refuge John Christian Laursen.1995 After the Revocation of the Edict of Nantes in 1685, the Huguenot refugees who spread throughout Protestant Europe contributed greatly to the development of new political ideas and realities, ranging from the theory and practice of freedom of the press through religious toleration and early modern economic discourse. The essays in this volume throw new light on their work.

Why Philosophy? Paolo Diego Bubbio,Jeff Malpas.2019-06-04 Do we really need philosophy? The present collection of jargon-free essays aims at answering the question of why philosophy matters. Each essay considers the central question (Why Philosophy?) from different angles: the unavoidability of doing philosophy, the practical consequences of philosophy, philosophy as a therapy for the whole person, the benefits of philosophy for improving public policy, etc.

The Premonition Code (Large Print 16 Pt Edition) Theresa Cheung, Julia

Mossbridge. 2020-09-09 Precognition is the scientific name for the knowledge or perception of the future, obtained through extrasensory means. Often called 'premonition', precognition is the most frequently reported of all extrasensory perception (ESP) experiences, occurring most often in dreams. It may also occur spontaneously in waking visions, auditory hallucinations, flashing thoughts entering the mind, the sense of ""knowing"" and physiological changes. Combining science and practice, Theresa and Dr Julia unravel the mystery of precognition. The book will cover: What precognition is and the different types, clearly explaining the cutting-edge science, including what is known and what is still a mystery The most common premonitions that people experience and why, including examples from around the world Experimental tools to help you cultivate precognition experiences to help get useful information for your life Case studies included throughout, with supporting scientific evidence offered alongside to provide validation and explanation Personal

experiences of the authors, detailing how premonition has shaped their lives and interviews with leading scientists and experts in the field Review: ""Dr Julia Mossbridge and co-author Theresa Cheung show us that our everyday notions of time do not reflect the scientific reality of how time can work in our lives. They dare to examine the so-called anomaly of precognition in a clear-headed way, hopeful that as a society we can build teams of ""Positive Precogs"" who globally move us toward positive events and away from negative ones. This book is a major contribution in our understanding of reality and the dormant potential for the so-called supernatural that exists within all of us. Read it and discover the power of time within your mind."" -Deepak Chopra, M.D., author of *The Healing Self* ""The Premonition Code addresses an unprecedented shift in scientific understanding, all over a refined assessment of the nature of consciousness. At its core lie peculiar and unexpected aspects of time itself, and of causal relationships and modes of knowing that defy conventional explanation. The book is not only a sophisticated and comprehensive presentation of the science behind this world-changing revolution: It also provides a fascinating and practical toolbox to aid conscious beings in personally exploring these mind-bending concepts and applying them positively in their own lives. Thanks to Theresa and Dr Mossbridge, a future based in our loftiest dreams has never been more accessible!"" -Eben Alexander MD, neurosurgeon and author of *Living in a Mindful Universe* and *Proof of Heaven* ""It seems that the 'other side' might be in 'another time.' In this book we have a mystic and a hard-core scientist using fascinating and accessible examples to demonstrate the remarkable possibilities of precognition and how to access it in your own life."" -New York Times bestselling author and spiritual medium, James van Praagh While reading the Premonition Code I felt how my mind set steadily transformed. This easily accessible book on the human capacity to foresee future events presents personal accounts as well

as recent scientific insight. What is more, it is about a practical mind technique, probed and tested over the last decades, which might enable us to better sense the future. This book could become the I Ching of our times. -Marc Wittmann, Institute for Frontier Areas of Psychology and Mental Health, Germany ""Dr. Julia Mossbridge and Theresa Cheung, in *Premonition Code*, have written an excellent and compelling book that will present the reader with the very latest research in nonlocal consciousness, as well as a way to use these findings to improve their own lives. I recommend it."" -Stephan A. Foreigners and Englishmen Daniel Statt.1995 This period witnessed demographic contraction or stagnation in most parts of Europe, and at the same time the last of the waves of large-scale inter-European migrations that began at the time of the Reformation. In analyzing the tensions created in England as a result of these broader European patterns, the book seeks to explore the connection between population and migration in the period.

African Temples of the Anunnaki Michael Tellinger.2013-05-24 Archaeological proof of the advanced civilization on the southern tip of Africa that preceded Sumer and Egypt by 200,000 years

- Includes more than 250 original full-color photographs of South Africa's circular stone ruins, ancient roads, prehistoric mines, large pyramids, and the first Sphinx
- Reveals how these 200,000-year-old sites perfectly match Sumerian descriptions of the gold mining operations of the Anunnaki and the city of Enki
- Shows how the extensive stone circle complexes are the remains of Tesla-like technology used to generate energy and carve tunnels straight into the Earth With more than 250

original full-color photographs, Michael Tellinger documents thousands of circular stone ruins, monoliths, ancient roads, agricultural terraces, and prehistoric mines in South Africa. He reveals how these 200,000-year-old sites perfectly match Sumerian descriptions of Abzu, the land of the First People--including the vast gold-mining operations of the Anunnaki from the 12th planet, Nibiru, and the city of Anunnaki leader Enki. With aerial photographs, Tellinger shows how the extensive stone circle and road complexes are laid out according to the principles of sacred geometry and represent the remains of Tesla-like technology used to generate energy and carve immensely long tunnels straight into the Earth in search of gold--tunnels that still exist and whose origins had been a mystery until now. He reveals, with photographic evidence, that the human civilization spawned by the Anunnaki was the first to create many totems of ancient Egypt, such as the Horus bird, the Sphinx, the Ankh, and large pyramids, as well as construct an accurate stone calendar, at the heart of their civilization, aligned with the Orion constellation. He explores how their petroglyphs, carved into the hardest rock, are nearly identical to the hieroglyphs of Sumerian seals. Mapping thousands of square miles of continuous settlements and three urban centers--each one larger than modern-day Los Angeles--Tellinger provides the physical proof of Zecharia Sitchin's theories on the Anunnaki origins of humanity.

Religious Refugees in Europe, Asia and North America Susanne Lachenicht.2007 In June 2005, 17 experts on religious migrations, from the US, Britain, Ireland, Germany and France, met in Galway, Ireland, to discuss in an interdisciplinary and comparative perspective - both in time and space - the migration of religious refugees: Irish monks, the Sephardim, Anabaptists, Scottish Presbyterians, Huguenots, Quakers, Herrnhuters, the Acadians, Iranian Shiites, Arab Christians and Iraki Jews. Analysing migration policies, migrants' expectations, networks, integration and assimilation

processes, this volume's essays will lead to a revised vision of religious migrations in the medieval, early modern and modern periods and could result in a re-evaluation of contemporary migration and integration policies.
