The Art of Boat Names Laurie Churchman.2009-01-16 Shouldn't your boat's name look as distinctive as your boat? A well-chosen and well-designed name on a transom or topsides is the finishing touch and creates the ultimate first impression for any boat. Your boat's name is the single most highly visible clue to your nautical interests and sensibilities. Whether the name is whimsical (Y-Knot), classical (Terpsichore), irreverent (Aquaholic), mythical (Valkyrie), sly (For Sail), romantic (Wayfarer), or full of attitude (Bite Me), it won't communicate your message without an effective design. Choose the lettering and graphic style that best expresses your boating aspirations and personality. Communicate your choices to a letterer, vinyl lettering shop, or a designer. Browse 1,500 boat names and explore resources for expanded research. Take a visual tour through the history of boat naming and across a seascape of boat transoms and topsides. Work with hand-painted, gold-leaf, vinyl or lighted display lettering.

The Book of the Sailboat A. Hyatt Verrill,James Zimmerhoff.2017-08-24 No one knows who first invented boats. Probably they were used by primitive man long before he discovered how to use bows and arrows or had even learned to chip stones into simple tools and weapons. But those early boats were not boats as we know them today, for it has taken untold centuries for mankind to improve and develop boats to their present state of perfection. It was a natural and easy matter for a savage to straddle a floating log and, thus supported, cross some pond or stream, and when some member of the tribe discovered that two logs lashed together were more comfortable and less likely to roll over and dump their passengers into the water than a single log, he no doubt felt as if he had made a marvelous invention and was probably looked upon as a prehistoric Fulton by his fellowmen. Later on some man found that a hollowed log was more buoyant and stable than an ordinary tree trunk and from this crude beginning rude dugout canoes were developed. Even today many races have never progressed beyond the hollowed-log state of boat-building and dugouts, forty or fifty feet in length and capable of carrying great weights, are in daily use in many lands. Some of these are very crude, heavy craft, while others are beautifully made, are light in weight and are very speedy and seaworthy.
