ELMAN. 2009-06-30 Since the middle of the nineteenth century, imperial reformers, early Republicans, Guomindang party cadres, and Chinese Communists have all prioritized science and technology. The syntax and morphosyntax papers explore issues ranging from the nature of extraction strategies to various types of Construct State representations and the proper analysis of the distribution of the nominal, adjectival and verbal morphological features. The computational linguistics papers focus on the challenge posed by the non-concatenative nature of Arabic morphology. The authors illustrate how their programs can handle Arabic morphology. The papers in morpho-phonology and historical linguistics deal with the development of the Arabic complementizer system and the empirical and theoretical problems that arise in the context of hypocoristic formation in Arabic. [Fluent Forever](#) Gabriel Wyner.2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

An Early Self Susanne Zepp.2014-11-19 What role has Jewish intellectual culture played in the development of modern Romance literature? Susanne Zepp seeks to answer this question through an examination of five influential early modern texts written between 1499 and 1627: Fernando de Rojas's *La Celestina*, Leone Ebreo's *Dialoghi d'amore*, the anonymous tale *Lazarillo de Tormes* (the first picaresque novel), Montaigne's *Essais*, and the poetical renditions of the Bible by João Pinto Delgado. Forced to straddle two cultures and religions, these Iberian conversos (Jews who converted to Catholicism) prefigured the subjectivity which would come to characterize modernity. As New Christians in an intolerant world, these thinkers worked within the tensions of their historical context to question norms and dogmas. In the past, scholars have focused on the Jewish origins of such major figures in literature and philosophy. Through close readings of these texts, Zepp moves the debate away from the narrow question of the authors' origins to focus on the innovative ways these authors subverted and transcended traditional genres. She interprets the changes that took place in various literary genres and works of the period within the broader historical context of the sixteenth and seventeenth centuries, demonstrating the extent to which the development of early modern subjective consciousness and its expression in literary works can be explained in part as a universalization of originally Jewish experiences.
