Idology in Transcultural Perspective Aoyagi Hiroshi,Patrick W. Galbraith,Mateja Kovacic.2021-12-10 This edited volume expands on what Aoyagi Hiroshi intended in the first decade of the new millennium to establish as a subfield of symbolic anthropology called "idology." It brings together case studies of popular idolatry in Japan, but goes further to provide a transcultural perspective to guide anthropological investigations in different places and times. In proposing an integrated paradigm for the growing body of literature on idols, the volume redirects recurrent questions to more fundamental points of sociocultural inquiry. Contributions from scholars conducting ethnographic fieldwork, as well as those engaged in theoretical and historical analyses, facilitate comparative reading and critical thought. Exceeding a narrow focus on human idols, the chapters shed new light on virtual idols and YouTubers, cartoon characters and voices, robot idols and cybernetic systems. Science and technology studies thus comes together with theories of animation and anthropological work on life in more-than-human worlds.

How to Register a Drone Adam L Myhr.2016-11-01 This book includes a quick start guide for determining if you need to register your drone and subsequently registering it. It goes much further than that though. The real value is in the detail that it goes into on the UAS registration regulations. English Syntax Jenny Arendholz.2022-02-14 This collection of pivotal issues about syntactic analysis bridges the gap between two extremes: Quirk et al.'s classic, yet voluminous standard grammar *The Comprehensive Grammar of the English Language* (CGEL, 1985) and slim booklets with sample solutions. Written for students and teachers alike, this textbook introduces basic concepts, deepens preexisting knowledge, prepares students for various exam contexts and provides hands-on teaching material. Each chapter provides theoretical explanations, which are immediately illustrated by numerous complete sample analyses of sentences taken both from the CGEL as well as from more recent British and American news articles. The final part of this textbook offers a comprehensive practice section for self-study using sentences which are divided into three levels of difficulty and come with model solutions.

DJI Phantom 4 - das Profibuch Christian Rattat.2018-10-01 Das Buch hilft Einsteigern und Fortgeschrittenen auf rund 260 Seiten, den Phantom 4 mit all seinen Funktionen zu verstehen und damit richtig und verantwortungsvoll zu fliegen. Das Thema Drohnen-Gefahr ist nicht umsonst immer wieder mit negativen Schlagzeilen in den Medien vertreten. Das liegt in der Regel nicht an böswilligen Menschen, die damit bewusst gegen Regeln verstoßen, sondern meist daran, dass die Regeln nicht bekannt sind. Darüber hinaus erklärt es Anfängern im Drohnenfliegen, die aber bereits gute Film- oder Fotografie-Kenntnisse besitzen, wie sie mit einer fliegenden Kamera umgehen. Die Perspektive einer Kameradrohne ist eine völlig andere, als eine Kamera auf einem Stativ oder in der Hand. Sie eröffnet Möglichkeiten, die vielen oft nicht bewusst sind, verleitet jedoch dazu, einiges falsch zu machen. Dabei ist nicht zu unterschätzen, dass neben den Aufnahmen auch noch eine Drohne zu fliegen ist. Zwei Kapitel mit Grundlagen zum Fotografieren und Filmen verhelfen Einsteigern in Film und Fotografie schnell und zuverlässig zu guten Ergebnissen. Typische Fehler, die schnell zur Gewohnheit werden, lassen sich damit leicht vermeiden. Nicht zuletzt hilft das Buch auch Eltern, deren Kinder bereits einen Phantom 4 besitzen oder für die die Anschaffung eine Kameradrohne geplant ist, die der immer rasanteren Entwicklung der Technik aber nicht mehr hinterher kommen. Welche Möglichkeiten eine Kameradrohne bietet, wie die Technik funktioniert, aber auch gesetzliche Regelungen und Voraussetzungen und die zum Teil empfindlichen Strafen werden verständlich erklärt.

Methods in Endothelial Cell Biology Hellmut G. Augustin.2004-07-20 Endothelial cell biology has developed into a vibrant discipline and has become a critical instrument to study several disease processes on the cellular and molecular level. It is now widely recognized that dysfunctions of normal endothelial cell homeostasis are involved in some of the most important human diseases, including ischemic heart diseases, hypertension, atherosclerosis, tumors, diabetes, arthritis, and inflammation. Further, the increasing importance and recognition of the field of vascular biology in general requires in vitro and in vivo techniques in order to address the complex questions. *Methods in Endothelial Cell Biology* is a comprehensive practical how-to-guide summarizing the most relevant established techniques as well as a number of new emerging techniques. Easy-to-follow reliable protocols provide a useful lab bench resource for the experienced researcher and newcomer to the field.

Seminal Studies in Regional and Urban Economics Roberta Capello.2017-10-09 The book spans a scientific research program elegantly developed by Roberto Camagni, an eminent regional scientist, who has offered ground-breaking ideas in regional and urban economics throughout his academic career. In addition to bringing together a selection of Professor Camagni's most influential works, the book presents syntheses and interpretations of his ideas by respected colleagues and by his students. In regional economics, space as territory, which plays an active role in innovation processes and in regional growth patterns; territorial capital as a synthetic concept of differentiated regional growth assets; and sources of regional competitiveness are only a few of the main ideas that emerged in regional economics thanks to this inspiring mind. In urban economics, he paved the way towards a new theoretical interpretation of the existence of the city and of its dynamics. His theory of city networks overcame the limits of Christaller's and Lösch's spatial approach to the city, with a solid economic conceptualization of spatial city network structures. All theories are accompanied by sound policy analysis, helping to contribute to the design and implementation of appropriate spatial

policies at the European level.

Gravity Inversion and Integration Lars E. Sjöberg, Mohammad Bagherbandi. 2017-04-19 This book contains theory and applications of gravity both for physical geodesy and geophysics. It identifies classical and modern topics for studying the Earth. Worked-out examples illustrate basic but important concepts of the Earth's gravity field. In addition, coverage details the Geodetic Reference System 1980, a versatile tool in most applications of gravity data. The authors first introduce the necessary mathematics. They then review classic physical geodesy, including its integral formulas, height systems and their determinations. The next chapter presents modern physical geodesy starting with the original concepts of M.S. Molodensky. A major part of this chapter is a variety of modifying Stokes' formula for geoid computation by combining terrestrial gravity data and an Earth Gravitational Model. Coverage continues with a discussion that compares today's methods for modifying Stokes' formulas for geoid and quasigeoid determination, a description of several modern tools in physical geodesy, and a review of methods for gravity inversion as well as analyses for temporal changes of the gravity field. This book aims to broaden the view of scientists and students in geodesy and geophysics. With a focus on theory, it provides basic and some in-depth knowledge about the field from a geodesist's perspective. /div

My Life in Houses Margaret Forster. 2014-11-06 'I was born on 25th May, 1938, in the front bedroom of a house in Orton Road, a house on the outer edges of Raffles, a council estate. I was a lucky girl.' So begins Margaret Forster's journey through the houses she's lived in, from that sparkling new council house, to her beloved London home of today. This is not a book about bricks and mortar though. This is a book about what houses are to us, the effect they have on the way we live our lives and the changing nature of our homes: from blacking grates and outside privies; to cities dominated by bedsits and lodgings; to the houses of today converted back into single dwellings. Finally, it is a gently insistent, personal inquiry into the meaning of home.

Shareholder Activism by Hedge Funds: Motivations and Market's Perceptions of Hedge Fund Interventions Mihaela Butu. 2013 In recent years, hedge funds' successful interventions in some large public companies have revealed their critical role in the corporate governance landscape in the United States and Europe. Due to public opinion, this new form of shareholder activism is accompanied by much polemic. This study examines the nature of hedge fund activism, the types of them, and the market's perception of interventions in the United States. Starting with a distinction between shareholder activism by traditional institutions, and activism performed by hedge funds, the study elucidates why the latter may be more effective in monitoring management, and reduce agency costs. Analysing the Schedules 13D filed with the U.S. Securities and Exchange Commission, the study provides a classification of activists' demands into ten distinct categories, arguing that hostile forms of activism are not central for hedge funds, and some more aggressive types of activism are possibly used as a negotiating tool to achieve the activist's agenda. Using the event study methodology, the author estimates the stock returns around the announcement date. For a better understanding of hedge fund activism, and their demands on target companies, the reader will find two original Schedule 13D filings accompanied by letters to the management. Finally, the paper concludes on a view of the subject through the prism of the 2007/ 2008 financial crisis, outlining some trends in the aftermath of the financial market turmoil.

Energy Efficient Affordable Housing Sasha Tsenkova. 2021-04-21 This book provides the first comparative assessment of the energy-efficiency retrofit programs in the social housing sector of Canadian cities, focusing on program efficiency and effectiveness. The analytical framework explores key policy instruments - regulatory, fiscal and institutional - in relation to major results achieved. The approach is interdisciplinary, supported by rich empirical data from case studies, observations and interviews. The book explores important strategies for the provision of green and affordable housing, while addressing climate change imperatives and resilience issues. This is of great interest to researchers, policy makers, city leaders, professionals and students. Its value added contribution to scholarship is complemented by practical relevance for social housing organisations in countries with a small residual housing sector. It offers valuable lessons for the design, planning and implementation of energy retrofit programs in North America and beyond.

What do you do when a homeless man knows your name? How about when he turns out to be a friend you haven't seen in twenty years? Do you treat him to a hot meal and see him on his way? Give him a wad of middle-class guilt money? Or take him in and get him back on his feet? For Alan, there's no question - only natural that he'd want to see his old mate Craig off the streets, even if only for a few nights, and into some clean clothes. But what if the successful life you've made for yourself - good job, happy marriage, lovely kids, grand Victorian house (you did well out of the property boom, thank you very much) - is one that that your old pal would quite like to have too? Even if it means taking it from you? Following the divergent lives of two childhood friends, *No Good Deed* is a funny and painful examination of friendship, the strange currents of ambition, loathing, pity and affection that flow between people over the decades, and of men getting older as they fail and succeed.

Autonomy Requirements Engineering for Space Missions Emil Vassev, Mike Hinchey. 2014-08-27 Advanced space exploration is performed by unmanned missions with integrated autonomy in both flight and

ground systems. Risk and feasibility are major factors supporting the use of unmanned craft and the use of automation and robotic technologies where possible. Autonomy in space helps to increase the amount of science data returned from missions, perform new science, and reduce mission costs. Elicitation and expression of autonomy requirements is one of the most significant challenges the autonomous spacecraft engineers need to overcome today. This book discusses the Autonomy Requirements Engineering (ARE) approach, intended to help software engineers properly elicit, express, verify, and validate autonomy requirements. Moreover, a comprehensive state-of-the-art of software engineering for aerospace is presented to outline the problems handled by ARE along with a proof-of-concept case study on the ESA's BepiColombo Mission demonstrating the ARE's ability to handle autonomy requirements.

Urbanisation and Crime in Nigeria Adegbola Ojo,Oluwale Ojewale.2019-06-22 This book uses crime-science and traditional criminological approaches to explore urban crime in the rapidly urbanising country Nigeria, as a case study for urban crime in developing nations. In Africa's largest democracy, rapid unmanaged growth in its cities combined with decaying public infrastructure mean that risk factors accumulate and deepen the potential for urban crime. This book includes a thorough explanation of key concepts alongside an examination of the contemporary configuration, dynamics, dimensions, drivers and potential responses to urban crime challenges. The authors also discuss a range of methodological techniques and applications that can be used, including spatial technologies to generate new data for analysis. It brings together history, theory, trends, patterns, drivers, repercussions and responses to provide a deep analysis of the challenges that confront urban dwellers. Urbanisation and Crime in Nigeria offers academics, researchers, governments, civil society organisations, citizens, and international partners a tool with which to engage in a serious dialogue about crime within cities, based on evidence and good practices from inside and outside sub-Saharan Africa.

The book goes beyond an aesthetic depiction of the photographs; it also deals with the history of their use and function within one of the biggest anti-fascist movements in Europe during the Second World War. The photographs are used to trace the development of a movement that—while seemingly doomed to certain failure—nevertheless survived the most destructive war in human history. This book provides new answers to the question of photography's role as a medium and its significance and use in social movements.

CSCW: Cooperation or Conflict? Steve Easterbrook.2012-12-06 Computer supported cooperative work (CSCW) systems will undoubtedly play an important role in the application of information systems in the 1990s and beyond. The term cooperative is often taken for granted and it is assumed that CSCW users are willing and able to cooperate without any difficulty. This assumption ignores the possibility of conflict and, as a result, the expression, management and resolution of conflict are not supported. CSCW: Cooperation or Conflict? arose from a one-day meeting on computer supported cooperative work which examined the role of conflict in collaborative work. The aim of the meeting was to examine what people actually do when they say they are cooperating, and to assess how this affects the design of systems. The chapters of this book are fuller accounts of the work presented during the meeting. The first chapter presents a survey of studies of conflict in social psychology and related fields, providing both a summary of the main findings and a set of pointers into the literature. The subsequent chapters each present a different view of conflict, focussing particularly on the social and organizational settings, and the factors which lead to conflict. The earlier chapters provide conceptual frameworks for the study of various types of conflict, while the later chapters concentrate on the implications for CSCW. The book is the first to examine conflict from a CSCW perspective. It offers a unique

snapshot of current research work in this exciting field, and establishes the importance of the issue. For the designer of CSCW systems, it offers insights into the role of conflict, and an analysis of some of the assumptions on which existing CSCW systems have been based. For the student and researcher, it provides both an introduction to the area, and a set of in-depth studies suitable to inform future research.

Consensus Building Versus Irreconcilable Conflicts Emanuela Saporito.2016-06-25 This book aims to identify ways of overcoming the limitations of the communicative tradition in understanding participatory spatial planning. Three conceptual models that offer different perspectives on public and civic participation in complex urban planning processes are presented and reviewed: the consensual model, which conceives of planning as a collective decision-making practice geared toward consensus building and conflict resolution; the conflictual model, which views planning as a social mobilization practice addressed at empowerment of marginalized groups; and the trading zone model, which reframes collaborative planning as a coordination activity with respect to practical proposals in the presence of unstable and conflicting rationalities and values. The controversial story of the Integrated Intervention Program "PII Isola Lunetta" in Milan is examined through the interpretative lenses of these models, with detailed interpretation of how each model performs in the field. The book concludes by offering critical reflections on the reframing of participatory spatial planning, highlighting the value of trading zones/trading languages and boundary objects as tools for understanding and addressing collaborative practices in complex and conflictual urban planning processes.
