Michel Foucault's Archaeology of Western Culture Pamela Major-Poetzl.2017-10-10 The author argues that Foucault's archaeology is an attempt to separate historical and philosophical analysis from the evolutionary model of nineteenth-century biology and to establish a new form of social thought based on principles similar to field theory in twentieth-century physics. She examines Foucault's view of the relationship between power and knowledge and goes on to discuss the new concepts of space, time, subject, and causality expressed in relativity theory, quantum mechanics, Saussurean linguistics, and Foucault's literary essays. Democracy, Justice, and Equality in Ancient Greece Georgios Anagnostopoulos,Gerasimos Santas.2018-11-16 The original essays in this volume discuss ideas relating to democracy, political justice, equality and inequalities in the distribution of resources and public goods. These issues were as vigorously debated at the height of ancient Greek democracy as they are in many democratic societies today. Contributing authors address these issues and debates about them from both philosophical and historical perspectives. Readers will discover research on the role of Athenian democracy in moderating economic inequality and reducing poverty, on ancient debates about how to respond to inborn and social inequalities, and on Plato's and Aristotle's critiques of Greek participatory democracies. Early chapters examine Plato's views on equality, justice, and the distribution of political and non-political goods, including his defense of the abolition of private property for the ruling classes and of the equality of women in his ideal constitution and polis. Other papers discuss views of Socrates or Aristotle that are particularly relevant to contemporary political and economic disputes about punishment, freedom, slavery, the status of women, and public education, to name a few. This thorough consideration of the ancient Greeks' work on democracy, justice, and equality will appeal to scholars and researchers of the history of philosophy, Greek history, classics, as well as those with an interest in political philosophy.

On Enlightenment David Stove.2013-09-05 He advocates a conservative go slow approach to change, pointing out that today's social structures are so large and complex that any widespread social reform will have innumerable unforeseen consequences. For example, the welfare state may diminish individual initiative. The use of pesticides may increase the food supply while polluting the water supply, the popularizing of university education, may lead to a decline in academic standards. Since government has a virtual monopoly on large-scale change. It follows, in Stove's view, that its powers must be limited in order to prevent large-scale damage, instead, he argues that reforms, when they are to be made at all, must be realistic, local, necessary and never coercive.--BOOK JACKET.

Mickalene Thomas Mickalene Thomas.2012 Mickalene Thomas (born 1971) has won acclaim for her elaborate, colorful paintings of African-American women, often posed provocatively against rich, 1970s-themed backgrounds adorned with rhinestones, enamel and acrylics. Thomas draws from earlier traditions of portraiture to arrive at her contemporary sensibility. She engages with the tension between a personal investigation of eroticism, black femininity and beauty and a pop-cultural critique of the overt sexual imagery prevalent in the media--from Blaxploitation film heroines like Cleopatra Jones to the construction of middle-class, African-American taste in Ebony magazine. Her portraits of trans-generational female empowerment have been receiving attention far beyond the standard art-world venues and have been reproduced everywhere from The New Yorker to Bomb magazine. Thomas also reenvision landscapes and interiors through playful and passionate recontextualizations of such artists as Romare Bearden, Édouard Manet, Henri Matisse and Balthus. Mickalene Thomas: The Origin of the Universe is the first monograph on the artist, and accompanies her first solo museum exhibition in the United States at the Santa Monica Museum of Art. It features a wide array of full-color reproductions of her work across media--much of it new and never before published--including photo collages and provocative landscapes, along with an interview with the artist and critical texts that elucidate her paintings' investigations of femininity, sexuality and power, and provide extensive context for her oeuvre as a whole.

The Smiling Spleen Walter Pagel.1984 'Walter Pagel's last book is more arcane and difficult, certainly as erudite and inimitable, and perhaps as rewarding as all his others. In a strange alchemical mixture of alter ego, familiar and doppelgänger, Paracelsus was Pagel's cross and his torch.' With 'The Smiling Spleen', Walter Pagel reconfirms his position as a leading authority on Paracelsus and the influence of his doctrines and practice on the development of modern science and medicine. In this final work of his life, Pagel concentrates on Paracelsianism as a historical phenomenon, giving major attention to the lesser-known figures who characterized the 'storm and stress' of the Paracelsian reform movement during the 16th and 17th centuries.

Transnational Solidarity Helle Krunke,Hanne Petersen,Ian Manners.2020-07-09 The book analyses the concept and conditions of transnational solidarity, its challenges and opportunities, drawing on diverse disciplines as Law, Political Science, Sociology, Philosophy, Psychology and History. In the contemporary world, we see two major opposing trends. The first involves nationalistic and populist movements. Transnational solidarity has been under pressure for a decade because of, among others, global economic and migration crises, leading to populist and authoritarian leadership in some European countries, the United States and Brazil. Countries withdraw from international commitments on climate, trade and refugees and the European Union struggles with Brexit. The second trend, partly a reaction to the first, is a strengthened transnational grass-root community - a cosmopolitan movement - which protests primarily against climate change. Based on interdisciplinary reflections on the concept of transnational solidarity, its challenges and opportunities are analysed, drawing on Europe as a focal case study for a broader, global perspective.
