Architecture Through Drawing Desley Luscombe,Helen Thomas,Niall Hobhouse.2019 Architecture through Drawing examines how drawing - as both action and object - encapsulates complex ideas relating to culture, technology, space and the built environment. Bringing together an array of beautiful and rarely seen drawings dating from the sixteenth century to the present day, all representing different geographical locations, techniques, methodologies and purposes, the book defines a new field for the subject of the drawing in architecture. It reveals the motives for architectural drawing beyond the requirement to document the processes that underpin the realisation of the architectural object. This book asks, fundamentally, whether drawings can illuminate new interpretations of architectural experimentation. Examples range from initial sketches by architects to analytical and construction drawings, perspectives and schematics, collage and more complex presentations and paintings often carried out in association with others. Dialogues include Fabrizio Ballabio on Filippo Juvarra's Ottoboni Theatre; Desley Luscombe on Ludwig Mies van der Rohe; Mark Dorrian on Michael Webb; Nicholas Olsberg on Victorian architects William Butterfield, Norman Shaw and GE Street; Charles Rice on James Gowan; Laurent Stalder on perspective in postwar housing; Helen Thomas on the covers of San Rocco; John Macarthur on clouds; Markus Lähteenmääki on Superstudio; and Erik Wegerhoff on the Viennese Auto-Expander. The volume is rounded off with an epilogue, 'The Limits of Drawing', by Adrian Forty and Sophie Read.

Drawing and Perceiving Douglas Cooper.1992 Evolving from a drawing course taught to first-year architecture students, this text teaches the foundations, taking the point of view that drawing is fundamentally a tactile and kinesthetic act (for which the author gives credit to Kimon Nicolaides and his book *The Natural Way to Draw*. Theory, exercises, and examples combine to present the art of drawing as an act of making rather than as an act of viewing. May be the one drawing book architecture students need, and certainly should interest art students and others outside of architecture as well. Annotation copyright by Book News, Inc., Portland, OR

Drawing Sir Peter Cook. 2014-01-13 Focusing on the creative and inventive significance of drawing for architecture, this book by one of its greatest proponents, Peter Cook, is an established classic. It exudes Cook's delight and catholic appetite for the architectural. Readers are provided with perceptive insights at every turn. The book features some of the greatest and most intriguing drawings by architects, ranging from Frank Lloyd Wright, Heath-Robinson, Le Corbusier, and Otto Wagner to Frank Gehry, Zaha Hadid, Coop Himmelb(l)au, Arata Isozaki, Eric Owen Moss, Bernard Tschumi, and Lebbeus Woods; as well as key works by Cook and other members of the original Archigram group. For this new edition, Cook provides a substantial new chapter that charts the speed at which the trajectory of drawing is moving. It reflects the increasing sophistication of available software and also the ways in which 'hand drawing' and the 'digital' are being eclipsed by new hybrids—injecting a new momentum to drawing. These 'crossovers' provide a whole new territory as attempts are made to release drawing from the boundaries of a solitary moment, a single-viewing position, or a single referential language. Featuring the likes of Toyo Ito, Perry Culper, Izaskun Chinchilla, Kenny Tsui, Ali Rahim, John Berglund, and Lorene Faure, it leads to fascinating insights into the effect that medium has upon intention and definition of an idea or a place. Is a pencil drawing more attuned to a certain architecture than an ink drawing, or is a particular colour evocative of a certain atmosphere? In a world where a Mayer drawing is creatively contributing something different from a Rhino drawing, there is much to demand of future techniques.
