A History of Photography in 50 Cameras Michael Pritchard.2022-02-27 A History of Photography in 50 Cameras explores the 180-year story of perhaps the most widely used device ever built. It covers cameras in all forms, revealing the origins and development of each model and tracing the stories of the photographers who used and popularized them. Illustrated throughout with studio shots of all fifty cameras and a selection of iconic photographs made using them, it is the perfect companion guide for camera and photography enthusiasts alike. The cameras include: The Nikon F, the hockey puck that saved photographer Don McCullin's life when it stopped a sniper's bullet

during the Vietnam War. Its indestructibility, reliability and interchangeable lenses made it a favored workhorse of photojournalists. The Leica M3-D was also favored by war photographers, including David Duncan Douglas, who used the camera during his coverage of the Korean and Vietnam Wars. In 2012, one of his four customized Leica cameras sold at auction for nearly \$2 million. A Speed Graphic was used to take Sam Shere's widely published photograph of the 1937 Hindenburg disaster, the world's most famous news photograph ever taken. With few shots left and no time to get the camera to his eye, he shot his Pulitzer Prize-winning image literally from the hip. It was over so fast there was nothing else to do. The camera phone has transformed picture-taking technology most profoundly since the invention of cameras. The selfie has become a new genre of photography practiced by everyone, and shared globally. This is an ideal book for camera collectors as well as anyone researching the history and art of photography.

Collectors Guide to Kodak Cameras Jim McKeown.1981

Plastic Cameras Chris Gatum.2012 In these days of high tech, high spec digital cameras even the rankest amateur can capture technically professional-looking images - but there's a growing trend of happy-go-lucky snappers who yearn for a more simplistic approach, a return to a time when photography was perhaps less predictable. Decidedly low-tech and highly idiosyncratic plastic, or 'toy' cameras such as the original 1984 Lomo Kompakt Automat (which spawned the term 'Lomography'), the Diana and the Holga, and the recently introduced Blackbird, Fly enable them to create images that - while not technically perfect - display a quirky sense of fun, spontaneity, and creative artiness. Whereas digital cameras and high spec film cameras boast the technology to eradicate undesirable optical 'faults' such as vignetting, barrel and pinchusion distortion, converging verticals and noise, the owners of their cheaper cousins - which have only rudimentary plastic lenses - relish the manifestation of such visual aberrations in their pictures. Colors are typically richly over-saturated, exposure frequently off-kilter, focus dreamily soft. Plastic cameras lack light meters, autofocus, auto film advance, adjustable shutters and digital sensors, notoriously leak light onto the 120 or 35mm roll film they employ, and there are some wacky versions: flamboyant wide-angle fish-eyes, stereo cameras with two lenses and two flashes, pinhole cameras that don't even possess a lens, and multi-lens cameras that create negatives combining up to nine images on a single 35mm frame.

A Nazi Word for a Nazi Thing So Mayer.2020-10-15 In 1937 the Nazis staged an exhibition of seized artworks to showcase the 'perverse Jewish spirit' pervading German culture. It contained work by Jewish artists, but also those were queer or foreign. It was an event that sought to define degeneracy and put it on display. This exhibition, *Entartete Kunst*, is just a single episode in a long running culture war, one that has always been fought on terms set by fascism. In *A Nazi Word for a Nazi Thing*, So Mayer gives us a new frame through which to view these intertwined yet disparate histories.

Renewed interest in film photography has surged in the past few years, both among those rediscovering their past passion and those discovering it for the first time. Vintage cameras that had previously lost their value are now often worth more than they first sold for due to high demand amongst enthusiasts, students, and collectors. Film manufacturers have even started reissuing long discontinued stocks—for example, Kodak's much-loved and recently re-released classic Ektachrome slide film. In our modern world, billions of people have access to instantaneous photography on their mobile phones, but as a result there has been a resurgent desire for a more tactile, physical, unaltered, and thus honest medium. Much of which, ironically, ends up on the internet, with photography fans and influencers sharing their images across Instagram, Flickr, YouTube, and the like. More so than with digital photography, film photography requires a sense of craft, skill, patience, technical knowledge, and a trial-and-error process that results in a greater sense of accomplishment. *Old School Photography* is both enlightening and humorous, and attracts a new generation of fans who are eager to experiment with film cameras, make prints, and post their film

photographs online.

Primitive Photography Alan Greene.2013-04-11 Primitive Photography considers the hand-made photographic process in its entirety, showing the reader how to make box-cameras, lenses, paper negatives and salt prints, using inexpensive tools and materials found in most hardware and art-supply stores. Step-by-step procedures are presented alongside theoretical explanations and historical background. Streamlined calotype procedures are demonstrated, featuring different paper negative processes and overlooked, developing-out printing methods. Primitive Photography combines the simplicity of pinhole photography, the handmade quality of alternative processes, and the precision of large-format. For those seeking alternatives to commercially prepared material as well as digital photography, it provides the instructions for creating the entire photographic process from the ground up. Given its scope and treatment of the photographic process as a whole, this may be the first book of its kind to appear in over a century.

Allowed to Grow Old Isa Leshko. 2019-05-10 There's nothing quite like a relationship with an aged pet—a dog or cat who has been at our side for years, forming an ineffable bond. Pampered pets, however, are a rarity among animals who have been domesticated. Farm animals, for example, are usually slaughtered before their first birthday. We never stop to think about it, but the typical images we see of cows, chickens, pigs, and the like are of young animals. What would we see if they were allowed to grow old? Isa Leshko shows us, brilliantly, with this collection of portraits. To create these portraits, she spent hours with her subjects, gaining their trust and putting them at ease. The resulting images reveal the unique personality of each animal. It's impossible to look away from the animals in these images as they unforgettably meet our gaze, simultaneously calm and challenging. In these photographs we see the cumulative effects of the hardships of industrialized farm life, but also the healing that time can bring, and the dignity that can emerge when farm animals are allowed

to age on their own terms. Each portrait is accompanied by a brief biographical note about its subject, and the book is rounded out with essays that explore the history of animal photography, the place of beauty in activist art, and much more. Open this book to any page. Meet Teresa, a thirteen-year-old Yorkshire Pig, or Melvin, an eleven-year-old Angora Goat, or Tom, a seven-year-old Broad Breasted White Turkey. You'll never forget them.

Mastering Film Photography Chris Gatum. 2019-05 Whether you prefer the term retro, vintage or old skool there's an undeniable truth to the familiar quote: What's old is new again. This is increasingly obvious among next-generation photographers who are already reacting to the established digital norm and actively seeking out something more soulful and personal than the pixel-pushing, quick-fix of the digital age. And that something is film. Yet this is a generation that has never experienced film photography. They have not felt the unique combination of fear and excitement at taking a once-in-a-lifetime shot and not knowing if it's perfect; nor have they waited with bated breath to see if their labours are good, bad or indifferent. And they certainly won't have experienced the happy accidents associated with badly loaded film, light leaks, collapsed shutters or any of the other defects that can transform an average shot into a one-of-a-kind photograph.

Mastering Film Photography is a fast-track guide to shooting emulsion in the digital age. After a crash course in how film works and how to choose the ideal camera to use it with, readers will learn how to overcome the challenges of getting the exposure right when there's no instant feedback; how to use flash systems in the pre-TTL era; and the importance of filters before Instagram; as well as exploring the creative world of lensless photography. With profiles of leading film practitioners along the way, the book is rounded off with a guide to the traditional, digital and hybrid processing options that will enable you to make the most of your negatives and slides

[A History of the Photographic Lens](#) Rudolf Kingslake.1989-11-22 The lens is generally the most expensive and least understood part of any camera. In this book, Rudolf Kingslake traces the historical development of the various types of lenses from Daguerre's invention of photography in 1839 through lenses commonly used today. From an early lens still being manufactured for use in low-cost cameras to designs made possible through such innovations as lens coating, rare-earth glasses, and computer aided lens design and testing, the author details each major advance in design and fabrication. The book explains how and why each new lens type was developed, and why most of them have since been abandoned. This authoritative history of lens technology also includes brief biographies of several outstanding lens designers and manufacturers of the past.
