Geology of the Netherlands Theo Edward Wong,D. A. J. Batjes,Jan de Jager.2007 The Netherlands, like much of the world, is struggling to balance the development of natural resources like oil and coal with its commitment to environmental preservation. In the landmark study *Geology of the Netherlands*, a team of expert geologists presents an overview of the Low Countries' geology as well as contemporary problems the land faces. This lavishly illustrated volume examines the stratigraphy and structural setting of the Netherlands from the Pre-Silesian to the Quaternary eras; it will be an essential resource for geologists, engineers, and students.

Absent Minds Stefan Collini.2006-03-09 A richly textured work of history and a powerful contribution to contemporary cultural debate, *Absent Minds* provides the first full-length account of 'the question of intellectuals' in twentieth-century Britain - have such figures ever existed, have they always been more prominent or influential elsewhere, and are they on the point of becoming extinct today? Recovering neglected or misunderstood traditions of reflection and debate from the late nineteenth century through to the present, Stefan Collini challenges the familiar cliché that there are no 'real' intellectuals in Britain. The book offers a persuasive analysis of the concept of 'the intellectual' and an extensive comparative account of how this question has been seen in the USA, France, and elsewhere in Europe. There are detailed discussions of influential or revealing figures such as Julien Benda, T. S. Eliot, George Orwell, and Edward Said, as well as trenchant critiques of current assumptions about the impact of specialization and celebrity. Throughout, attention is paid to the multiple senses of the term 'intellectuals' and to the great diversity of relevant genres and media through which they have communicated their ideas, from pamphlets and periodical essays to public lectures and radio talks. Elegantly written and rigorously argued, *Absent Minds* is a major, long-awaited work by a leading intellectual historian and cultural commentator, ranging across the conventional divides between academic disciplines and combining insightful portraits of individuals with sharp-edged cultural analysis.

Object and Economy in Medieval Winchester Martin Biddle.1990 Over six thousand objects were recovered during the Winchester excavations of 1961 to 1971 - by far the most extensive corpus of stratified and datable medieval objects yet presented from a single city. Martin Biddle and the team of eighty-three contributors assembled by the Winchester Research Unit have used this material to investigate not only the industries and arts, but the economic, cultural, and social life of medieval Winchester. Their findings are being published in two parts: the first part, by Katherine Barclay, will deal with the pottery remains; and this second part in two volumes by Martin Biddle covers all the objects from the finest products of the Anglo-Saxon goldsmith's skill to the iron tenter-hooks of the cloth industry. Martin Biddle's study of the objects identifies change through time, and traces variation across the broad social scale - from cottage to palace - represented in the excavated sites. Using the objects as evidence for the economy of the medieval city, it also throws new light on some of the great questions of medieval industry and artistic production: amongst them the development of the textile industry, the origins of wire-drawing and the manufacture of pins, the beginnings of window-glass production, and the earliest glass painting. These objects are an essential part of the evidence for the development and changing character of the excavated sites to be published in forthcoming volumes of Winchester Studies on the Minsters. To ensure complete integration between the objects and the sites, every object in this volume is related to the context in which it was found and a concordance provides a detailed conspectus phase by phase of each of the twenty sites excavated between 1961-71, and of the objects found in each phase.

The Culturalization of Citizenship Jan Willem Duyvendak,Peter Geschiere,Evelien Tonkens.2016-06-30 The notion of citizenship has gradually evolved from being simply a legal status or practice to a deep sentiment. Belonging, or feeling at home, has become a requirement. This groundbreaking book analyzes how 'feeling rules' are developed and applied to migrants, who are increasingly expected to express feelings of attachment, belonging, connectedness and loyalty to their new country. More than this, however, it demonstrates how this culturalization of citizenship is a global trend with local variations, which develop in relation to each other. The authors pay particular attention to the intersection between sexuality, race and ethnicity, spurred on by their awareness of the dialectical construction of homosexuality, held up as representative of liberal Western values by both those in the West and by African leaders, who use such claims as proof that homosexuality is un-African.

Advancements in the Philosophy of Design Pieter E. Vermaas,Stéphane Vial.2018-03-02 This volume presents 25 essays on the philosophy of design. With contributions originating from philosophy and design research, and from product design to architecture, it gives a rich spectrum of state of the art research and brings together studies on philosophical topics in which design plays a key role and design research to which philosophy

contributes. Coverage zooms in on specific and more well-known design disciplines but also includes less-studied disciplines, such as graphic design, interior architecture and exhibition design. In addition, contributors take up traditional philosophical issues, such as epistemology, politics, phenomenology and philosophy of science. Some essays cover philosophical issues that emerge in design, for instance what design can do in addressing societal problems, while other essays analyze main-stream philosophical issues in which design is part of the argument, as for instance abduction and aesthetics. Readers will discover new research with insightful analyses of design research, design thinking and the specificity of design. Overall, this comprehensive overview of an emerging topic in philosophy will be of great interest to researchers and students.

The Rise of the Dutch New Right Merijn Oudenampsen.2020-09-13 In the past 20 years, a wave of right-wing populist movements has swept over Europe, changing the face of European politics. The Netherlands has been one of the more iconic countries to partake in this shift. Known internationally as an emblem of progressivism and tolerance, the country soon became a frontrunner in the revival of nationalist and anti-immigrant sentiment. This is the first study to offer an extensive engagement with the ideas behind the Dutch swing to the right. The emergence of Dutch populism, this book shows, formed an integral part of a broader conservative tendency, identified as the Dutch New Right. In the US and the UK, the term New Right has been used to describe conservative backlash movements that arose in opposition to the progressive movements of the 1960s. The Dutch swing to the right, this book argues, formed a belated iteration of the New Right backlash that occurred overseas. This text will be essential reading for students and scholars in the fields of European Studies and Political Science, and Dutch politics and society more specifically.

Building the Economic Backbone of the Belgian Welfare State Michael Ryckewaert.2011 The introduction of a welfare state economy after 1945 profoundly changed the Belgian landscape, and government support for private home ownership resulted in widespread suburban sprawl. This book investigates the new infrastructural and financial backbone that supported this effort. The history of the construction of Belgium's highway network, the establishment of consumer goods industries and the transformation of Brussels' periphery into a metropolitan region appears to read as an account of economic policy and investment decisions. However, upon closer scrutiny, various urban models and architectural paradigms are seen to have left their mark on these endeavors. Phenomena such as the satellite town, the neighborhood unit, Le Corbusier's usine verte, the British industrial park and American corporate architecture are all references in the various operations documented in the book. Building the Economic Backbone of the Belgian Welfare State highlights a crucial episode of postwar urbanization and planning, and puts the Belgian case in an international perspective.

The Kaddu Wasswa Archive Andrea Stultiens,Arthur C. Kisitu,Kaddu Wasswa John.2010 The Kaddu Wasswa archive by photographer Andrea Stultiens is the visual biography of Ugandan John Kaddu Wasswa, born in 1933, who played an important role in his community as a teacher and social worker. What is exceptional about the now 77-year old Kaddu Wasswa is that he has always documented his activities. He wrote novels, plays and essays, took photographs and collected photos. Additionally, his extensive archive contains letters and newspaper clippings, often with added commentary. Andrea Stultiens met Kaddu Wasswa in 2008 through his grandson, photographer Arthur C. Kisitu. Together, Stultiens and Kisitu set out to explore Kaddu Wasswa's archive. She took photographs of the documents to which she added her and Kisitu's own photos which were taken during their meetings. The result is a unique biography in which the author is personally visible as well. Exhibition: Nederlands Fotomuseum, Rotterdam (30.10.2010-2.01.2011).

The Design Way, second edition Harold G. Nelson,Erik Stolterman.2014-08-29 A book that lays out the fundamental concepts of design culture and outlines a design-driven way to approach the world. Humans did not discover fire—they designed it. Design is not defined by software programs, blueprints, or font choice. When we create new things—technologies, organizations, processes, systems, environments, ways of thinking—we engage in design. With this expansive view of design as their premise, in The Design Way Harold Nelson and Erik Stolterman make the case for design as its own culture of inquiry and action. They offer not a recipe for design practice or theorizing but a formulation of design culture's fundamental core of ideas. These ideas—which form “the design way”—are applicable to an infinite variety of design domains, from such traditional fields as architecture and graphic design to such nontraditional design areas as organizational, educational, interaction, and healthcare design. The text of this second edition is accompanied by new detailed images, “schemas” that visualize, conceptualize, and structure the authors' understanding of design inquiry. The text itself has been revised and expanded throughout, in part in response to reader feedback.

The House of the Mosque Kader Abdolah.2011 Iran, 1969. In the house of the mosque, the family of Aqa Jaan has lived for eight centuries. The house teems with life, played out under the watchful eyes of the storks that nest on the minarets above. But this family will experience upheaval unknown to previous generations. For in Iran, political unrest is brewing. The shah is losing his hold on power; the ayatollah incites rebellion from his exile in France; and one day the ayatollah returns. The consequences will be felt in every corner of Aqa Jaan's family.

Electrical Power System Essentials Pieter Schavemaker,Lou van der Sluis.2017-05-08 The electrical power supply is about to change; future generation will increasingly take place in and near local neighborhoods with diminishing reliance on distant power plants. The existing grid is not adapted for this purpose as it is largely a remnant from the 20th century. Can the grid be transformed into an intelligent and flexible grid that is future proof? This revised edition of Electrical Power System Essentials contains not only an accessible, broad and up-to-date overview of alternating current (AC) power systems, but also end-of-chapter exercises in every chapter, aiding readers in their understanding of the material introduced. With an original approach the book covers the generation of electric energy from thermal power plants as from renewable energy sources and treats the incorporation of power electronic devices and FACTS. Throughout there are examples and case studies that back up the theory or techniques presented. The authors set out information on mathematical modelling and equations in appendices rather than integrated in the main text. This unique approach distinguishes it from other text books on Electrical Power Systems and makes the resource highly accessible for undergraduate students and readers without a technical background directly related to power engineering. After laying out the basics for a steady-state analysis of the three-phase power system, the book examines: generation, transmission, distribution, and utilization of electric energy wind energy, solar energy and hydro power power system protection and circuit breakers power system control and operation the organization of electricity markets and the changes currently taking place system blackouts future developments in power systems, HVDC connections and smart grids The book is

supplemented by a companion website from which teaching materials can be downloaded.

Almost Like a Whale Steve Jones. 2000-09-01 In his new book, Steve Jones takes on the challenge of going back to the book of the millennium, Charles Darwin's *The Origin of Species*. Before *The Origin*, biology was a set of unconnected facts. Darwin made it into a science, linked by the theory of evolution, the grammar of the living world. It reveals ties between cancer and the genetics of fish, between brewing and inherited disease, between the sex lives of crocodiles and the politics of Brazil. Darwin used the biology of the nineteenth century to prove his case. Now, that science has been revolutionized and his case can be reargued using the twentieth century's astonishing advances. From AIDS to dinosaurs, from conservation to cloned sheep, bursting with anecdotes, jokes and irresistible facts, *Almost Like a Whale* is a popular account of the science that makes biology make sense. It will catch the millennial mood and tell all those for whom Darwin is merely a familiar name what he really meant. It exposes the Darwinian delusions which try (and fail) to explain human behaviour in evolutionary terms, and, while giving an up-to-date account of our own past, shows how humans are the first species to step beyond the constraints of biology.

Rembrandt and the Golden Age of Dutch Art Ruud Priem, Dayton Art Institute, Phoenix Art Museum. 2006 *Rembrandt and the Golden Age of Dutch Art* celebrates an unprecedented era in the history of art. Drawn from the superb collections of Amsterdam's famed Rijksmuseum, the works of art featured here are a testament to the richness and variety of the paintings, prints, and decorative arts produced in the Netherlands in the 17th century. In a unique approach, Ruud Priem leads the viewer through the highlights of the Golden Age, beginning with the artists themselves and their studios, emerging into busy city streets and the bucolic Dutch countryside, and sampling the variety of 17th-century life and culture. Featured are ninety dazzling works by preeminent Dutch artists--Rembrandt van Rijn, Frans Hals, Jacob van Ruisdael, Pieter de Hooch, and Jan Steen, among them.

Alternative Fees for Litigators and Their Clients Patrick J. Lamb. 2014 The use of non-hourly fee arrangements by lawyers and the demand for those arrangements by clients is increasing. How are you and your law firm addressing this threat to the billable hour? Are you prepared for the systemic changes needed when value is not measured in six minute increments? *Alternative Fees for Litigators and Their Clients* addresses how attorneys can implement and evaluate alternative fee arrangements in litigation matters. Written by a trial lawyer with over 30 years of experience, this essential guide offers lessons, insights, and practical tips that the author has learned during his firm's long-term experiment with alternative fee arrangements.
