A Civil Society James Smith Allen.2022-05 A Civil Society explores the struggle to initiate women as full participants in the masonic brotherhood that shared in the rise of France's civil society and its civic morality on behalf of women's rights. As a vital component of the third sector during France's modernization, freemasonry empowered women in complex social networks, contributing to a more liberal republic, a more open society, and a more engaged public culture. James Smith Allen shows that although women initially met with stiff resistance, their induction into the brotherhood was a significant step in the development of French civil society and its civic morality, including the promotion of women's rights in the late nineteenth century. Pulling together the many gendered facets of masonry, Allen draws from periodicals, memoirs, and archival material to account for the rise of women within the masonic brotherhood in the context of rapid historical change. Thanks to women's social networks and their attendant social capital, masonry came to play a leading role in French civil society and the rethinking of gender relations in the public sphere.

Antifragile Nassim Nicholas Taleb.2014-01-28 Antifragile is a standalone book in Nassim Nicholas Taleb's landmark Incerto series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are Fooled by Randomness, The Black Swan, Skin in the Game, and The Bed of Procrustes. Nassim Nicholas Taleb, the bestselling author of The Black Swan and one of the foremost thinkers of our time, reveals how to thrive in an uncertain world. Just as human bones get stronger when subjected

to stress and tension, and rumors or riots intensify when someone tries to repress them, many things in life benefit from stress, disorder, volatility, and turmoil. What Taleb has identified and calls “antifragile” is that category of things that not only gain from chaos but need it in order to survive and flourish. In *The Black Swan*, Taleb showed us that highly improbable and unpredictable events underlie almost everything about our world. In *Antifragile*, Taleb stands uncertainty on its head, making it desirable, even necessary, and proposes that things be built in an antifragile manner. The antifragile is beyond the resilient or robust. The resilient resists shocks and stays the same; the antifragile gets better and better. Furthermore, the antifragile is immune to prediction errors and protected from adverse events. Why is the city-state better than the nation-state, why is debt bad for you, and why is what we call “efficient” not efficient at all? Why do government responses and social policies protect the strong and hurt the weak? Why should you write your resignation letter before even starting on the job? How did the sinking of the Titanic save lives? The book spans innovation by trial and error, life decisions, politics, urban planning, war, personal finance, economic systems, and medicine. And throughout, in addition to the street wisdom of Fat Tony of Brooklyn, the voices and recipes of ancient wisdom, from Roman, Greek, Semitic, and medieval sources, are loud and clear. *Antifragile* is a blueprint for living in a Black Swan world. Erudite, witty, and iconoclastic, Taleb’s message is revolutionary: The antifragile, and only the antifragile, will make it. Praise for *Antifragile* “Ambitious and thought-provoking . . . highly entertaining.”—*The Economist* “A bold book explaining how and why we should embrace uncertainty, randomness, and error . . . It may just change our lives.”—*Newsweek*

Integration in Rome and in the Roman World G. de Kleijn, Stéphane Benoist.2013-10-17

Integration in the empire under the political control of the city of Rome, her princeps, and the different authorities in the provinces includes processes of inclusion and exclusion. They are explored from juridical, political, social and religious points of view.

The Arabic Hermes Kevin van Bladel.2009-08-26 This is the first major study devoted to the early Arabic reception and adaptation of the figure of Hermes Trismegistus, the legendary Egyptian sage to whom were ascribed numerous works on astrology, alchemy, talismans, medicine, and philosophy. Before the more famous Renaissance European reception of the ancient Greek Hermetica, the Arabic tradition about Hermes and the works under his name had been developing and flourishing for seven hundred years. The legendary Egyptian Hermes Trismegistus was renowned in Roman antiquity as an ancient sage whose teachings were represented in books of philosophy and occult science. The works in his name, written in Greek by Egyptians living under Roman rule, subsequently circulated in many languages and regions of the Roman and Sasanian Persian empires. After the rise of Arabic as a prestigious language of scholarship in the eighth century, accounts of Hermes identity and Hermetic texts were translated into Arabic along with the hundreds of other works translated from Greek, Middle Persian, and other literary languages of antiquity. Hermetica were in fact among the earliest translations into Arabic, appearing already in the eighth century. This book explains the origins of the Arabic myth of Hermes Trismegistus, its sources, the reasons for its peculiar character, and its varied significance for the traditions of Hermetica in Asia and northern Africa as well as Europe. It shows who pre-modern Arabic scholars thought Hermes was and how they came to that view.

The Archaeology of Rock-Art Christopher Chippindale, Paul S. C. Taçon.1998 Pictures, painted and carved in caves and on open rock surfaces, are amongst our loveliest relics from prehistory. This pioneering set of sparkling essays goes beyond guesses as to what the pictures mean, instead exploring how we can reliably learn from rock-art as a material record of distant times: in short, rock-art as archaeology. Sometimes contact-period records offer some direct insight about indigenous meaning, so we can learn in that informed way. More often, we have no direct record, and instead have to use formal methods to learn from the evidence of the pictures themselves. The book's eighteen papers range wide in space and time, from the Palaeolithic of Europe to nineteenth-century Australia. Using varied approaches within the consistent framework of informed and proven methods, they make key advances in using the striking and reticent evidence of rock-art to archaeological benefit.

Ancient Terracottas from South Italy and Sicily in the J. Paul Getty Museum Maria Lucia Ferruzza.2016-01-25 In the ancient world, terracotta sculpture was ubiquitous. Readily available and economical—unlike stone suitable for carving—clay allowed artisans to craft figures of remarkable variety and expressiveness. Terracottas from South Italy and Sicily attest to the prolific coroplastic workshops that supplied sacred and decorative images for sanctuaries, settlements, and cemeteries. Sixty terracottas are investigated here by noted scholar Maria Lucia Ferruzza, comprising a selection of significant types from the Getty's larger collection—life-size sculptures, statuettes, heads and busts, altars, and decorative appliqués. In addition to the comprehensive catalogue entries, the publication includes a guide to the full collection of over one thousand other figurines and molds from the region by Getty curator of antiquities Claire L. Lyons. The free online edition of this open-access catalogue, available at www.getty.edu/publications/terracottas/ includes zoomable high-resolution photography and a select number of 360° rotations; the ability to filter the catalogue by location, typology, and date; and an interactive map drawn from the Ancient World Mapping Center and linked to the Getty's Thesaurus of Geographic Names and Pleiades. Also available are free PDF, EPUB, and Kindle/MOBI downloads of the book; CSV and JSON downloads of the object data from the catalogue and the accompanying Guide to the Collection; and JPG and PPT downloads of the main catalogue images.

Alexandria and Alexandrianism J. Paul Getty Museum.1996-09-26 One of the great seats of learning and repositories of knowledge in the ancient world, Alexandria, and the great school of thought to which it gave its name, made a vital contribution to the development of intellectual and cultural heritage in the Occidental world. This book brings together twenty papers delivered at a symposium held at the J. Paul Getty Museum on the subject of Alexandria and Alexandrianism. Subjects range from "The Library of Alexandria and Ancient Egyptian Learning" and "Alexander's Alexandria" to "Alexandria and the Origins of Baroque Architecture." With nearly two hundred illustrations, this handsome volume presents some of the world's leading scholars on the continuing influence and fascination of this great city. Handbook of Multilingualism and Multiculturalism Geneviève Zarate.2011 Built around the concept of linguistic and cultural plurality, this book defines language as an instrument of action and symbolic power. Plurality is conceived here as : a complex array of voices, perspectives and approaches that seeks to preserve the complexity of the multilingual and multicultural enterprise, including language learning and teaching ; a coherent system of relationships among various languages, research traditions and research sites that informs qualitative methods of inquiry into multilingualism and its uses in everyday life ; a view of language as structured sociohistorical object, observable from several simultaneous spatiotemporal standpoints, such as that of daily interactions or that which sustains the symbolic power of institutions. This book is addressed to teacher trainers, young researchers, decision makers, teachers concerned with the role of languages in the evolution of societies and educational systems. It aims to elicit discussion by articulating practices, field observations and analyses based on a multidisciplinary conceptual framework.

Trading Paintings and Painters' Materials Anne Haack Christensen,Angela Jager.2019-07-08 The papers in this volume were presented at the CATS international technical art history conference Trading Paintings and Painters' Materials 1550-1800 which explored international markets for paintings and artists' materials in the early modern period and their implications for artistic production. Questions central to these papers include: did preferences exist for artists' materials and paintings from specific geographical areas in particular places and if so why? How did the import of painting materials and artworks impact local production, connoisseurship and art theory? In what conditions were these artists' materials and finished artworks produced and traded in early modern Europe and beyond? The lavishly illustrated contributions in this volume deal with the above questions and shed light on different trades, products, countries and timeframes by combining a large variety of methods and sources, including visual analyses, written sources, pigment analyses and archaeological excavations. This fourth CATS Proceedings will be of interest to scholars and students, museum professionals, curators, conservators, art historians and conservation scientists.

Plunder Ugo Mattei,Laura Nader.2008-03-17 Plunder examines the dark side of the Rule of Law and explores how it has been used as a powerful political weapon by Western countries in order to legitimize plunder - the practice of violent extraction by stronger political actors victimizing weaker ones. Challenges traditionally held beliefs in the sanctity of the Rule of Law by exposing its dark side Examines the Rule of Law's relationship with 'plunder' - the practice of violent extraction by stronger political actors victimizing weaker ones - in the service of Western cultural and economic domination Provides global examples of plunder: of oil in Iraq; of ideas in the form of Western patents and intellectual property rights imposed on weaker peoples; and of liberty in the United States Dares to ask the paradoxical question - is the Rule of Law itself illegal?

Landscapes of Realism Dirk Göttsche,Rosa Mucignat,Robert Weninger.2021-04-15 Few literary phenomena are as elusive and yet as persistent as realism. While it responds to the perennial impulse to use literature to reflect on experience, it also designates a specific set of literary and artistic practices that emerged in response to Western modernity. Landscapes of Realism is a two-volume collaborative interdisciplinary exploration of this vast territory, bringing together leading-edge new criticism on the realist paradigms that were first articulated in nineteenth-century Europe but have since gone on globally to transform the literary landscape. Tracing the manifold ways in which these paradigms are developed, discussed and contested across time, space, cultures and media, this first volume tackles in its five core essays and twenty-five case studies such questions as

why realism emerged when it did, why and how it developed such a transformative dynamic across languages, to what extent realist poetics remain central to art and popular culture after 1900, and how generally to reassess realism from a twenty-first-century comparative perspective.

Threads and Traces Carlo Ginzburg. 2012-09-02 This book is a translation of historian Carlo Ginzburg's latest collection of essays. Through the detective work of uncovering a wide variety of stories or microhistories from fragments, Ginzburg takes on the bigger questions: How do we draw the line between truth and fiction? What is the relationship between history and memory? Stories range from medieval Europe, the inquisitional trial of a witch, seventeenth-century antiquarianism, and twentieth-century historians--Provided by publisher.
