**Upholstery Conservation: Principles and Practice** Dinah Eastop,Kathryn Gill.2012-09-10 This well referenced book provides an amply illustrated publication on upholstery conservation which discusses and reviews the issues related to the care, interpretation and treatment of upholstered furniture. Through many well illustrated case studies the inter-disciplinary collaboration fundamental to upholstery conservation, and the complex decision-making process involved in the treatment of upholstered furniture, are made evident. The case histories are contributed by leading international practitioners in the field and concern objects and collections in the care of English Heritage, the Victoria and Albert Museum, the Metropolitan Museum of Art and other internationally renowned institutions. Likewise, the contributors, from both sides of the Atlantic, are world-renowned specialists and leaders in this area of conservation working for the public and private sectors. The case histories, illustrated in colour, black and white and specially prepared line drawings, concern object treatment and documentation, the conservation of information, the function and the artefact. They range from the documentation of eighteenth century removable chair covers and the treatment of a nineteenth century carriage to a twentieth century foam-filled chair belonging to a museum.

**Burt Rutan's Race to Space** Dan Linehan.2011-07-17 Years ago, Burt Rutan told a reporter for Popular Mechanics, "If we make a courageous decision like the goal and program we kicked off for Apollo in 1961, we will see our children or grandchildren in outposts on other planets." Legendary science-fiction writer Arthur C. Clark would later recall Rutan's quote in a piece he wrote about

SpaceShipOne and comment, "Fortunately, we need not rely solely on governments for expanding humanity's presence beyond the Earth." Burt Rutan's Race to Space showcases Rutan's herculean efforts to do just that. Smithsonian's Air and Space Museum displays his most celebrated achievements, including SpaceShipOne, which won the coveted \$10 million Ansari X Prize for private spaceflight; Voyager, which hangs with SpaceShipOne in the Milestones of Flight gallery; the Virgin Atlantic GlobalFlyer; and the VariEze. His many aerospace innovations preceding his most recently conceived designs, SpaceShipTwo and WhiteKnightTwo, chronicle a progressive, step-by-step attempt to break barriers with engineering know-how and a wondrous imagination, all the while remaining on the forefront of the burgeoning private spaceflight industry. Rutan's X Prize triumph and subsequent spacecraft designs are not a beginning, nor an end, but are steps in Burt Rutan's continuing adventure to expand humanity's presence beyond the Earth and into space.

**Fly Fishing West Yellowstone** Bruce Staples, Bob Jacklin. 2021-07-01 West Yellowstone, Montana, a gateway to Yellowstone National Park, is a stone's throw from some of the best trout fishing in the world, including the Yellowstone, Madison, and Gallatin Rivers, as well as the countless legendary streams and lakes in the Park. Because of this, it was one of the first "trout towns," and anglers from all over the world would travel to it—some stayed for good—to fish. Fly-fishing legend Bob Jacklin and well-known writer and fly historian Bruce Staples team up to write the compelling history of this area, which still remains the epicenter of fly fishing in the western United States. This book also includes fly patterns, past and present, as well as up-to-date information about these famous rivers, making this an indispensable reference for anyone visiting the region.

Builders of the Pacific Coast Lloyd Kahn. 2008 In 2004, Lloyd Kahn discovered a group of unique

carpenters along the Pacific Coast of North America. Over a two-year period, he made four trips north from his home in the San Francisco Bay Area, up the coast, shooting the photos that appear in this book. To preserve homeowners' privacy, specific locations are not given, but suffice to say this book focuses on the Pacific Coast north from San Francisco up to and around Vancouver Island, British Columbia, latitudes 37 to 49 degrees. There's been a vortex of creative carpentry energy in this part of the world over the last 30 years. Many of the builders shown here got started in the countercultural era of the '60s and '70s, and their work has never been shown in books or magazine articles.--BOOK JACKET.

A step-by-step design process that includes goal setting and flight testing. In-depth discussions of important topics like airfoils and wing design. The sources of air drag and how to minimize their impact. ADVANCE PRAISE This book is a joy to read! The writing style and wit add dimension in a way that is rarely found in today's reference materials. If someone has considered designing their own airplane and been put off because of complicated formulas, vocabulary and reference style that would bore even an engineer, this will convince them to go ahead and try it. Written with real people in mind and not engineers - and I mean that in a good way. This is a book that will reside along the other favorites on my bookshelf. Carlos really managed to produce a book that will last a long time and become one of the standards for modelers. - Greg Gimlick, Electric's columnist, Model Aviation magazine *RCAdvisor's Model Airplane Design Made Easy* is the ultimate model airplane design book for both beginning and experienced modelers. - Richard Kline, Inventor, KfM airfoils *RCAdvisor's Model Airplane Design Made Easy* is a real contribution to the world's literature on the subject. It provides an excellent bridge between full scale aviation and aeromodelling, showing the relationship between the two, for better understanding of the differences and similarities which should be applied for good model performance. While thorough in detail, the book is also easily readable so that the information is simple to understand. It is a very good combination of theory and practical application. Nicely illustrated, the book is also full of common sense explanations and references to other sources of information. - John Worth, former President and Executive Director of the AMA Carlos Reyes personally leads the reader through some basic aerodynamics, materials considerations, electric power system planning and a practical application of theory as it is applied to a finished flying model. The background history of various types of aircraft shows the development of aviation and how it relates to the models that we build and fly today, as well as how models have influenced general aviation. It is always exciting to find some 'new to me' concepts and theories, and there were several in this well-written narrative. - Ken Myers, Editor, Ampeer electric flight newsletter No matter how long you've been aeromodelling, or what your interests are in our great hobby, the greatest thrill of all is standing behind a unique model that you've designed and built yourself, from a blank sheet of paper - or even a blank CAD file - and preparing to make that first take off. So sit yourself down in a comfy chair, read *RCAdvisor's Model Airplane Design Made Easy* and set off on aeromodelling's greatest adventure. Let Carlos Reyes - an aeromodeller of long standing and great talent - take you through the mysteries of how to arrive at the point that every lover of model aircraft should experience. - Dereck Woodward, aeromodeller, designer and magazine writer for the past fifty years

**How to Build Glued-lapstrake Wooden Boats** John Brooks,Ruth Ann Hill.2004 As a child, John

Brooks loved to build models and sail with his grandfather. When most teenagers were at the prom, John was changing jibs in the Indian Ocean, halfway through a 35,000-mile, two-year cruise. He began building boats in commercial yards at 19, while studying boat design and building his own boats. John worked for many years honing his craftsmanship on fine yachts, small boats, custom furniture, and a harpsichord. He has been an instructor at the WoodenBoat School in Maine since the mid-1990s, teaching glued-lapstrake boatbuilding, fine interior joinery, and carving. Ruth Ann Hill grew up on the coast of Maine. A writer, boatbuilding assistant, naturalist, and graphic artist, Ruth is the author of *Discovering Old Bar Harbor* and *Acadia National Park: An Unconventional Guide* and a contributing editor for *Maine Boats & Harbors* magazine. John and Ruth started their business, Brooks Boats, in 1991. They design and build glued-lapstrake boats in West Brooklin, Maine and get out to enjoy their handiwork in its proper element whenever they can.
