Exam Literacy Jake Hunton.2018-08-13 In Exam Literacy: A guide to doing what works (and not what doesn't) to better prepare students for exams, Jake Hunton focuses on the latest cognitive research into revision techniques and delivers proven strategies which actually work. Foreword by Professor John Dunlosky. 'Read, highlight, reread, repeat if such a revision cycle sounds all too wearily familiar, you and your students need a better route to exam success. And in light of the recent decision to make all subjects at GCSE linear, so that students will be tested in one-off sittings, it will be even more important that students are well equipped to acquire and recall key content ahead of their exams. In this wide-ranging guide to effective exam preparation, Jake Hunton casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results. With plenty of practical suggestions and subject-specific examples, Exam Literacy provides teachers with user-friendly advice on how they can make the content they cover stick, and shares up-to-date, evidence-based information on: - The nature of learning and the various types of memory. - How to improve students' retention of knowledge and recall of content. - Why popular revision techniques, such as rereading, highlighting and summarising, may not be as effective as you think. - How revision strategies that have been identified as being more effective such as interleaving, elaborative interrogation, self-explanation and retrieval practice can be embedded into day-to-day teaching. - How students can be encouraged to make use of these winning strategies when revising independently.

Nature, Nurture, and the Transition to Early Adolescence Stephen A. Petrill Department of Biobehavioral Health and the Center for Developmental and Health Genetics Pennsylvania State University, London Robert Plomin Research Professor in Behavioural Genetics Institute of Psychiatry, London John C. DeFries Professor of Psychology and Faculty Fellow Institute of Psychiatry, University of Colorado John K. Hewitt Professor of Psychology and Director Both at Institute for Behavioral Genetics.2003-03-05 Some of the most intriguing issues in the study of cognitive, social, emotional, and physical development arise in the debate over nature versus nurture; a debate difficult to resolve because it is difficult to separate the respective contributions of genes and environment to development. The most powerful approach to this separation is through longitudinal adoption studies. The Colorado Adoption Project (CAP) is the only longitudinal adoption study in existence examining development continuously from birth to adolescence, which makes it a unique, powerful, and tremendously valuable resource. CAP is an ongoing assessment of 245 adopted children and 245 biological control children assessed from birth to early adolescence. This book is the fourth in a series describing CAP results. This latest volume, edited by four eminent researchers in developmental psychology, builds on the large body of research already generated by investigating the role of genes and environments on early adolescent development. Because it is the only volume on the most comprehensive investigation of the effect of genes and environments on early adolescent development, this work will be invaluable to researchers in developmental, cognitive, and social psychology.

Strategic Financial Planning over the Lifecycle Narat Charupatt, Huaxiong Huang, Moshe A. Milevsky.2012-05-28 This book on personal financial planning and wealth management employs the lifecycle model of financial economics. The central idea of 'consumption smoothing' is used to connect chapters and topics such as saving and investment, debt management, risk management and retirement planning. The first part of the book is nontechnical and aimed at a wide audience with no special technical background. The second part of the book provides a rigorous presentation of the lifecycle model from first principles using the calculus of variations. The accompanying website is found at http://www.yorku.ca/milevsky/?page_id=185.

Numerology Sonia Ducie.2012-01-01 The ancient practice of numerology offers us insight and guidance for dealing with the modern world. Internationally recognized numerology expert Sonia Ducie Dip explains how each of us has numbers that dramatically impact our lives. Education Exposed 2: In pursuit of the halcyon dream Samuel Strickland.2020-10-09 Education Exposed 2 follows on from Sam Strickland's first book, Education Exposed. The book is a pacy, punchy and forthright critique of how to drive the curriculum, behaviour and teaching within a school and the pivotal role that leadership plays in pursuing the halcyon dream. The book is neatly laid out, with each chapter identifying common curricular misconceptions, posing lots of key questions to consider and offering multiple practical ideas that you can take away. Every chapter ends with five key takeaway points for you to carefully consider. The book neatly interplays theory, research, Sam's expertise and experience coupled with a practical and real world approach. The first section of the book champions the importance of the curriculum and knowledge. The second section examines behaviour and how this can be driven by senior leaders coupled routine driven approach to learning. This section also takes you through a series of curriculum tools and teaching approaches that will assist you in thinking about how to implement and drive the curriculum. The third section of the book examines leadership; how leaders can champion the teacher as the expert and how a school culture can be supported and monitored carefully. Education Exposed 2 is relevant for anyone working in a school, irrespective of their position or role. It is designed to be an

accessible, versatile and quick read. Equally, it can be used as a dip-in and dip-out guide. Multiple practical approaches and strategies are offered as key take-away points.

Special Economic Zones in Africa Thomas Farole.2011-01-01 This book, designed for policymakers, academics and researchers, and SEZ program practitioners, provides the first systematic and comprehensive analysis of SEZ programs in Sub-Saharan Africa. It is the result of detailed surveys and case studies conducted during 2009 in ten developing countries, including six in Sub-Saharan Africa. The book provides quantitative evidence of the performance of SEZs, and of the factors which contribute to that performance, highlighting the critical importance not just of the SEZ itself but of the wider national investment climate in which it functions. It also provides a comprehensive guide to the key policy questions that confront governments establishing SEZ programs, including: if and when to launch an SEZ program, what form of SEZ is most appropriate, and how to go about implementing it. Among the most important findings from the study that is stressed in the book is the shift from traditional enclave models of zones to SEZs that are integrated with national trade and industrial strategies, with core trade and social infrastructure, with domestic suppliers, and with local labor markets. Although the book focuses primarily on the experience of Sub-Saharan Africa, its lessons will be applicable to developing countries around the world.

Language Acquisition in CLIL and Non-CLIL Settings Verena Möller.2017-12-15 Language Acquisition in CLIL and Non-CLIL Settings builds a bridge between Second Language Acquisition and Learner Corpus Research (LCR) methodologies to take the evaluation of Content and Language Integrated Learning (CLIL) to a new level. The study innovates in two main ways. First, it is based on a highly diversified L2 database which includes learner corpus data as well as experimental data from the same learners. These linguistic components of the database are complemented with extensive information on learner variables, including cognitive and affective factors, which are rarely studied in LCR. Second, the study relies on multifactorial statistical analyses to assess the effectiveness of CLIL itself as well as the impact of the selectivity inherent in the CLIL system, which has frequently been ignored. The linguistic focus of the study is the English passive, which is investigated in CLIL and non-CLIL teaching materials, and subsequently related to learner output.

Financial Steering Martin Schwarzbichler,Christian Steiner,Daniel Turnheim.2018-06-09 This book is a guide to how financial steering is designed, measured and implemented with a special focus on the energy industry. The authors offer an overview of and practical insights into the links between financial steering and accounting, and the temporary cycles of investment, divestment, return and loss, market highs and lows that form the framework of the entire energy industry across all value chain stages. The faster and the larger the cash cycles of investments and their returns, the greater not only the value created, but also the potential loss if the financial steering is not properly designed and managed. Value and value generation require an understanding of how value is both defined and measured in both and how the business/project economics model of a company works - financial steering provides this. Further, the book also discusses accounting topics such as impairments, new IFRS standards and the impact of accounting on key performance indicators of financial steering, which are associated with these investment decision valuations. The combination of accounting with the cash flow perspective provides a complete understanding of selected practical topics of financial steering which are explained in detail in a large number of examples and case studies. The book is intended for a wide range of finance/controllers/treasury/accounting professionals and students. It is written in practical and simple terms to outline the financial steering concept and to bring it to life in daily work and in the decision making process for financial steering. All illustrated concepts are in the same manner relevant and applicable to all other asset-intensive industry sectors and their financial steering processes.

Forty Pence Each or Two for a Pound Danielle Bartram.2017-11-13 In *Forty Pence Each or Two for a Pound: Making Maths Memorable, Accessible and Relevant*, Danielle Bartram shares a wealth of practical resources and ideas to help teachers develop a whole-school commitment to, and enthusiasm for, improving numeracy. How many times have you heard someone say they 'can't do maths'? This attitude and acceptance of it appears to be endemic, but being bad at maths or excusing innumeracy as maths-phobia can no longer be tolerated. Danielle Bartram, of Miss B's Resources fame, has made it her mission to remedy this issue and believes that learners should have a basic concept of number and problem solving in order to stop them being ripped off by companies when purchasing items, insurance or moving energy suppliers later on in life. For this reason, she has specifically designed *Forty Pence Each or Two for a Pound* to give the teaching and learning of numeracy a firm foundation in everyday contextual settings so that students can transfer the logical and functioning skills inherent in mathematical understanding to real-world contexts. With the new Ofsted criteria focus on numeracy, all teachers will want to develop their maths teaching practice. *Forty Pence Each or Two for a Pound* contains plenty of ideas to help teachers of all subject specialisms to do just that, and tackles students' maths-phobia head on by providing an invaluable collection of 31 ready-to-use activities and resources to improve their enthusiasm for, and confidence in, the applied use of maths. Danielle has achieved this by shifting away from a prescribed list of maths-teaching techniques and instead presents a treasure trove of exciting, lesson-ready ideas held together by six numeracy links number, functional skills, graphs and statistics, problem solving, shapes and measures, and formulae and equations that can be embedded across the full curriculum. The 31 resources are tagged with their relevant numeracy links to indicate the mathematical territory covered (e.g. graphs and statistics), and are also divided into six categories literacy, exploration, engagement, classroom management, marking and reflection, and organisation and presentation for ease of identification while flicking through the book. Danielle complements each activity with useful mathematical pointers, such as the language to be used and the numerical concepts that students often struggle with or have misconceptions about, and has made all of the resources available as PDF downloads from her Miss B's Resources website via a specific link provided in the book. Beyond the more practical provision of strategies and resources, *Forty Pence Each or Two for a Pound* also offers expert guidance on the shaping of numeracy coordination across the school and presents example audit grids to serve as an outline of how students' progress with each numeracy link can be monitored. Suitable for numeracy coordinators and teachers of all subjects, in both primary and secondary settings, who want to embed into their lessons the numeracy skills that their students will need in everyday life.

Teaching Secondary Geography Malcolm McInerney,Susan Caldis,Stephen Cranby,John Butler,Alaric Maude,Susanne Jones,Michael Patrick

Law, Rebecca Nicholas. 2022-03-03 Geography is not only the study of the surface of the planet and the exploration of spatial and human - environment relationships, but also a way of thinking about the world. Guided by the Australian Curriculum and the Professional Standards for Teaching School Geography (GEOGstandards), Teaching Secondary Geography provides a comprehensive introduction to both the theory and practice of teaching Geography. This text covers fundamental geographical knowledge and skills, such as working with data, graphicacy, fieldwork and spatial technology, and provides practical guidance on teaching them in the classroom. Each chapter features short-answer and 'Pause and Think' questions to enhance understanding of key concepts, and 'Bringing It Together' review questions to consolidate learning. Classroom scenarios and a range of information boxes are provided throughout to connect students to additional material. Written by an author team with extensive teaching experience, Teaching Secondary Geography is an exemplary resource for pre-service teachers.

Investment Banking Joshua Pearl, Joshua Rosenbaum. 2013-05-29 Investment Banking, UNIVERSITY EDITION is a highly accessible and authoritative book written by investment bankers that explains how to perform the valuation work at the core of the financial world. This body of work builds on Rosenbaum and Pearl's combined 30+ years of experience on a multitude of transactions, as well as input received from numerous investment bankers, investment professionals at private equity firms and hedge funds, attorneys, corporate executives, peer authors, and university professors. This book fills a noticeable gap in contemporary financial literature, which tends to focus on theory rather than practical application. It focuses on the primary valuation methodologies currently used on Wall Street—comparable companies, precedent transactions, DCF, and LBO analysis—as well as M&A analysis. The ability to perform these methodologies is especially critical for those students aspiring to gain full-time positions at investment banks, private equity firms, or hedge funds. This is the book Rosenbaum and Pearl wish had existed when we were trying to break into Wall Street. Written to reflect today's dynamic market conditions, Investment Banking, UNIVERSITY EDITION skillfully: Introduces students to the primary valuation methodologies currently used on Wall Street Uses a step-by-step how-to approach for each methodology and builds a chronological knowledge base Defines key terms, financial concepts, and processes throughout Provides a comprehensive overview of the fundamentals of LBOs and an organized M&A sale process Presents new coverage of M&A buy-side analytical tools—which includes both qualitative aspects, such as buyer motivations and strategies, along with technical financial and valuation assessment tools Includes a comprehensive merger consequences analysis, including accretion/(dilution) and balance sheet effects Contains challenging end-of-chapter questions to reinforce concepts covered A perfect guide for those seeking to learn the fundamentals of valuation, M&A, and corporate finance used in investment banking and professional investing, this UNIVERSITY EDITION—which includes an instructor's companion site—is an essential asset. It provides students with an invaluable education as well as a much-needed edge for gaining entry to the ultra-competitive world of professional finance.

Investment Banking Joshua Rosenbaum, Joshua Pearl. 2020-03-20 A timely update to the global best-selling book on investment banking and valuation In the constantly evolving world of finance, a solid technical foundation is an essential tool for success. Due to the fast-paced nature of this world, however, no one was able to take the time to properly codify its lifeblood—namely, valuation and dealmaking. Rosenbaum and Pearl originally responded to this need in 2009 by writing the first edition of the book that they wish had existed when they were trying to break into Wall Street. Investment Banking: Valuation, LBOs, M&A, and IPOs, Third Edition is a highly accessible and authoritative book written by investment bankers that explains how to perform the valuation work and financial analysis at the core of Wall Street—comparable companies, precedent transactions, DCF, LBO, M&A analysis . . . and now IPO analytics and valuation. Using a step-by-step, how-to approach for each methodology, the authors build a chronological knowledge base and define key terms, financial concepts, and processes throughout the book. The genesis for the original book stemmed from the authors' personal experiences as students interviewing for investment banking positions. As they both independently went through the rigorous process, they realized that their classroom experiences were a step removed from how valuation and financial analysis were performed in real-world situations. Consequently, they created this book to provide a leg up to those individuals seeking or beginning careers on Wall Street—from students at undergraduate universities and graduate schools to career changers looking to break into finance. Now, over 10 years after the release of the first edition, the book is more relevant and topical than ever. It is used in over 200 universities globally and has become a go-to resource for investment banks, private equity, investment firms, and corporations undertaking M&A transactions, LBOs, IPOs, restructurings, and investment decisions. As the world of finance adjusts to the new normal of the post-Great Recession era, it merits revisiting the pillars of the second edition for today's environment. While the fundamentals haven't changed, the environment must adapt to changing market developments and conditions. As a result, Rosenbaum and Pearl have updated their widely adopted book accordingly, while adding two new chapters on IPOs.

L2 vocabulary acquisition, knowledge and use Camilla Bardel, Christina Lindqvist, Batia Laufer. 2013 This book is intended for researchers and students in the field of second language (L2) acquisition. As its title suggests, the book discusses L2 vocabulary acquisition, knowledge and use, and examines them from the perspectives of assessment and corpus analysis. The chapters also address some additional central research issues: the role of word frequency in the input, the difference between single words and multi-word units, and the distinction between vocabulary of oral and written language. The first three chapters of the book present critical reviews of different aspects of vocabulary acquisition. The other four chapters contain empirical studies that relate to the central themes of the book. The data in the studies draw on a variety of source and target languages: English, French, Italian, Swedish, Hebrew and Japanese. The book offers some new insights into the field of vocabulary and suggests avenues of research.

Agricultural Policy Analysis Jeevika Weerahewa, Andrew Jacque. 2022-04-09 This book is centred around various interwoven topics which are fundamental to policy analysis in agriculture. Key concepts and tools that are fundamental for the analysis of agricultural policies and programmes are presented. Key concepts introduced include, the role of the state in a market economy with examples from the Sri Lanka and other developing economies, the international trade environment, and conceptual frameworks for analysing important domestic and international trade policies. It also highlights interconnections among agriculture, development, policy and illustrates the extent to which the agricultural sector contributes in achieving economic growth objectives, equity and equality objectives and environmental objectives. The book takes the readers through the nature of agricultural markets in developing countries, with special emphasis on Sri Lanka, and illustrates how the degree of competitiveness is measured at various market levels using multiple indices and methods. Several tools, with accompanying case studies, for the analysis of policies and programmes are detailed. These tools include the GTAP model, gravity models, extended benefit cost analysis, and linear programming. Tools and models are applied to the analysis of trade policies and agreements, marketing policies, environmental services, extension programmes, land tenure reforms and climate change adaptations. Case studies in relation to the agri-food policy and strategy response to COVID-19 Pandemic are also covered. This book is of interest to public officials working in agricultural planning and agricultural policy, teachers, researchers, agro-economists, capacity builders and policymakers. Also the book serves as additional reading material for undergraduate and graduate students of agriculture, development studies, and environmental sciences. National and international agricultural scientists, policy makers will also find this to be a useful read.

Investment Banking Focus Notes Joshua Rosenbaum, Joshua Pearl. 2013-06-21 Investment Banking FOCUS NOTES provides a comprehensive, yet streamlined, review of the basic skills and concepts discussed in Investment Banking: Valuation, Leveraged Buyouts, and Mergers & Acquisitions, Second Edition. The focus notes are designed for use both as a companion to the book, as well as on a standalone basis. Investment Banking focuses on the primary valuation methodologies currently used on Wall Street—namely, comparable companies analysis, precedent transactions analysis, DCF analysis, and LBO analysis—as well as detailed M&A analysis from both a sell-side and buy-side perspective. Our focus notes seek to help solidify knowledge of these core financial topics as true mastery must be tested, honed, and retested overtime.

Teaching the National Strategy at Key Stage 3 Pat Perks, Stephanie Prestage. 2013-10-23 National Numeracy Strategy (NNS) for Key Stage 3 will be introduced into Secondary Schools in September 2001. The NNS document: Framework for Teaching Mathematics in Years 7 to 9, is based on the National Curriculum, but offers a very different interpretation of some of the expected learning outcomes for year 7 to 9. This practical book, interprets and explains the document for busy practitioners, spells out the expectations of the framework and offers guidance on how to fulfil these, describes and explains the types of teaching methods for maximising students' learning, and includes many practical ideas for classroom activities within the framework of the NNS.

Beyond Bullying Simone Paul. 2014-04-24 Beyond Bullying offers guidance and advice on conducting practitioner research into bullying and provides resources to assist practitioners and researchers in doing so. It draws on a case study of almost 1,000 secondary school students over a period of 5 academic years to explore student perception of traditional bullying and cyber bullying, and how recommended approaches to bullying research can be applied to practice. The book provides an overview of bullying and cyber bullying literature, considering recent research in the field, how this was conducted, and what the findings were. In addition, the case study illustrates how a positive anti-bullying school ethos can be established through practitioner research. Each chapter will impart both practical and academic knowledge enabling the reader to: - conduct bullying research with secondary school students - complete research activities with bullies and victims - help students to raise awareness of bullying in school - inform school staff of problems occurring at class level. Beyond Bullying discusses how bullying research can be used to construct a model of bullying behaviour in the school environment and establishes suitable approaches to bullying intervention. The book will appeal to practitioner researchers in the area of school bullying, as well as practitioners, researchers and postgraduate students in the fields of education, sociology and related disciplines.
